SALISBURY, the capital, is situated on the Mashonaland plateau, altitude 4,831 ft., population (estimated) 183,000, including 55,000 Europeans. **BULAWAYO**, the largest town in Matabeleland, altitude 4,405 ft., estimated population 120,000, including 45,000 Europeans. Other centres (with European totals) are Umtali (7,000), Gwelo (7,000), Gatooma (2,000), Que Que (2,000). Since the war Southern Rhodesia has accepted about 100,000 immigrants, mainly from the United Kingdom and the Union of South Africa.

Salisbury is 5,600 miles from London (air route) transit 24 hours; by sea 17 days (approx.).

NORTHERN RHODESIA

The Protectorate of Northern Rhodesia lies on the plateau of Central Africa between the longitudes 22° E. and 33° 33' E. and between the latitudes 8° 15' S. and 18° S. Its area is 200,323 square miles, and its boundaries are 3,515 miles in length.

With the exception of the valleys of the Zambesi, the Luapula, the Kafue and the Luangwa Rivers the greater part of Northern Rhodesia has a flat to rolling topography, with elevations varying from 3,000 to 5,000 feet above sea level, but in the north-eastern districts the plateau rises to occasional altitudes of over 5,000 feet. In many localities the evenness of the plateau is broken by hills, sometimes occurring as chains which develop into areas of broken country. The highest group of hills is the Muchinga Mountains which form part of the Great Escarpment running down the western edge of the Luangwa River Valley, and of these, individual peaks rise to about 8,000 feet.

Although Northern Rhodesia lies within the tropics, and fairly centrally in the great land mass of the African continent, its elevation relieves it from the extremely high temperatures and humidity usually associated with tropical countries. The lower reaches of the Zambesi, Luangwa and Kafue rivers in deeper valleys do experience high humidity and trying extremes of heat, but these areas are remote and sparsely populated.

The census of May 8, 1951, showed a European population of 37,221, a Coloured population of 1,092 and an Asiatic population of 2,529. At Dec. 31, 1954, the European population was estimated at 60,000, Coloured persons at 1,400, Asiatics at 4,600 and Africans at 2,040,000.

FINANCE

	1953	1954*
Revenue	£31,233,657	£13,847,900
Expenditure	28,221,596	13,723,043

* Estimated.

With the coming into being of the Federation of Rhodesia and Nyasaland the period of the financial year has been changed from the calendar year to the period 1st July to 30th June. The Federal Government has assumed, under the Constitution, powers to impose certain important taxes formerly enjoyed by the Northern Rhodesia Government and has also taken over responsibility for the administration of various departments and services. As a consequence, estimates for the financial year which commenced on July 1, 1954, show a sharp reduction in both revenue and expenditure.

GOVERNMENT

Government is carried on by a Governor appointed by the Crown, assisted by an Executive Council of five official and four unofficial members. The Legislative Council consists of twenty-six members, of whom eight are official, twelve are elected, two nominated by the Governor to represent African interests and four African members, elected by the African Representative Council and nominated by the Governor. The Legislative Council is presided over by a Speaker who is an unofficial but not a member of the Council.

<i>Governor of Northern Rhodesia, His Excellency Sir Arthur Edward Trevor Benson, K.C.M.G.</i> (1954).	
<i>Chief Justice of the High Court, Hon. Sir Peter Bell</i>	£2,700
<i>Chief Secretary, A. T. Williams, C.M.G., M.B.E.</i>	2,550
<i> Puisne Judges, Hon. W. E. Evans; Hon. A. G. C. Somerhough, O.B.E.</i>	2,050
<i>Attorney-General, E. L. G. Unsworth, C.M.G., Q.C.</i>	2,300
<i>Financial Secretary, R. A. Nicholson, C.B.E.</i>	2,300
<i>Secretary for Native Affairs, W. F. Stubbs, C.M.G., C.B.E.</i>	2,300
<i>Senior Provincial Commissioner, G. E. Fane Smith, C.M.G.</i>	2,200

Provincial Commissioners, A. F. B. Glenzie, C.M.G.; J. P. Murray; M. G. Billing; N. S. Price, O.B.E.; D. B. Hall; G. C. R. Clay; F. R. G. Phillips each £2,000
British Council Representative in N. Rhodesia, A. A. G. Anderton

CAPITAL AND SEAT OF GOVERNMENT, Lusaka, situated in the Midlands (estimated European pop. 8,000). Other centres are Livingstone, Broken Hill, Fort Jameson, Mazabuka, Abercorn, Kasama, Ndola, Luanshya, Nkana (the main copper mining town of the copper belt—European pop. 8,200), Mufulira, Chingola and Mongu.

Commissioner in London, J. H. Wallace, C.M.G., 57 Haymarket, S.W.1.

NYASALAND PROTECTORATE

The Nyasaland Protectorate comprises the western shore of Lake Nyasa, with the high tableland separating it from the basin of the Loangwa River, and the region lying between the watershed of the Zambesi and Shire Rivers on the west, and the Lakes Chiuta and Chilwa and the River Rao (a tributary of the Shire) on the east, including the mountain systems of the Shire Highlands and Mlanje.

The Protectorate is bounded on the North by Tanganyika Territory, on the West by Northern Rhodesia and on the South and East by Portuguese East Africa (Mozambique). The rainy season is from November to March, and it is dry for the rest of the year.

Nyasaland has a total area of 49,177 sq. miles (land area, 36,879) with an estimated population in 1955 of 2,575,700 (2,560,000 Africans, 6,300 Europeans and 9,400 Asians and other races).

The seat of Government is Zomba (est. pop., 1955, 5,500), other centres being Blantyre and Limbe in the Shire highlands, Fort Johnston (on Lake Nyasa), Lilongwe, Mlanje and Mzimba.

FINANCE

	1954-55	1955-56*
Revenue	£4,302,542	£5,708,298
Expenditure	4,231,208	5,906,577

* Estimated

In 1953, the Government of the Federation of Rhodesia and Nyasaland assumed responsibility for the servicing of the public debt of the Protectorate, then amounting to £6,228,488. In 1955-56, Government borrowing amounted to £1,900,000, £900,000 of which was received as a share of Federation Government borrowing and the remaining £1,000,000 from the Rhodesian Selection Trust.

GOVERNMENT

The Government consists of the Governor and an Executive and Legislative Council, the former being nominated. The Legislative Council consists of *ex officio* and official members appointed by the Governor, unofficial non-African members elected by direct vote and unofficial African members elected by electoral colleges.

In 1944 and 1945 African Provincial Councils were established in each of the three provinces. These councils, which are advisory, are composed of chiefs and other responsible African members under the presidency of the Provincial Commissioner. An African Protectorate Council, also of an advisory nature, was established in 1946.

Governor and Commander-in-Chief, His Excellency Sir Robert Perceval Armitage, K.C.M.G., M.B.E., apptd. 1956

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with an estimated population at Dec. 31, 1955 of 4,877. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trade" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova, in 1502 (probably on St. Helena's Day) and remained unknown to other European nations until 1588. It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 1821 the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, 1821. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. A phormium (flax fibre) and lacemaking industry has been established. St. James's Bay, on the north-west of the island, possesses a good anchorage.

GOVERNMENT

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of up to 4 official and 3 unofficial members. The Governor is also assisted by an Advisory Council of up to 10 unofficial members chosen to represent, as far as possible, all unofficial sections of the community, the Governor alone making all ordinances.

CAPITAL, St. James's Town. Estimated population (1946), 1,547.

Governor, His Excellency Sir James Dundas Harford, K.B.E., C.M.G. (1953)	
Government Secretary, K. B. Scott, M.B.E.	1,200

ASCENSION

An isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55' 55" S. lat. and 14° 25' 55" W. long. It is said to have been discovered by João de Nova, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it; on Dec. 31, 1955, the population was 196. Ascension was administered by the Board of Admiralty until 1922, when by Royal Letters Patent it became a Dependency of St. Helena, and was transferred to the Colonial Office. St. George's town, the capital, is situated in a small bay on the N.W. coast. Ascension is visited from January to May by the sea-turtle, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

Resident Magistrate, A. R. Harrison.

TRISTAN DA CUNHA

Is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 2' W., discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 45 square miles and in 1921 the inhabitants numbered 127, increased in 1955 to 295; they are stated to be very long-lived. The main island is about 1,800 miles W. of the Cape of Good Hope, 3,600 miles N.E. of Cape Horn, and about 1,300 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817. William Glass, a corporal of artillery (died 1853), remaining at his own request, with his wife and two children. This party, with two ex-Navy men, Alexander Cotton and John Mooney, and three masons imported for the purpose of housing the garrison, formed the present settlement. In 1817 five coloured women from St. Helena, and afterwards others from Cape Colony, joined the party. The inhabitants are of mixed blood, but the British strain is predominant. In 1885 many of the able-bodied men were drowned through the loss of a boat, and in 1886 a grant of stores and provisions was made by Parliament. The principal settlement (Edinburgh) is in a fertile tract in the north-west of the island, its name being in honour of a visit from the former Duke of Edinburgh in 1867. The inhabitants raise crops and possess cattle, sheep and pigs.

From the death of Corporal Glass until 1933 the oldest inhabitant acted as Governor; in 1933 a council of four was set up (with one of its members as Chairman), the chairman, or chief, acting as island spokesman and conducting marriages in the absence of a chaplain. In 1948 an Administrator was appointed by the Governor of St. Helena. The Council now has 24 members, including the Administrator as President, and 6 women members. The separate women's Council has been abolished. Communications with the outside world were infrequent until the outbreak of war in 1939, but have improved since that time. There is now a South African Government meteorological station equipped with wireless. The recent commencement of operations by a South African fishing company has led to more frequent visits of vessels to the island.

CAPITAL, Ψ Edinburgh.

Administrator, P. R. Forsyth Thompson (1954).
Resident Chaplain, Rev. P. H. Bell.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and $\frac{1}{2}$ mile wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Seals, innumerable penguins, and vast numbers of sea-fowl visit these islands.

GOUGH ISLAND (or Diego Alvarez), in $40^{\circ} 20' S.$ and $9^{\circ} 44' W.$, lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and sea-elephants and has valuable guano deposits. There is no permanent population.

By Letters Patent dated January 12, 1938, the Islands of *Tristan da Cunha*, *Gough*, *Nightingale* and *Inaccessible* in the South Atlantic were made Dependencies of the Island of St. Helena.

SEYCHELLES

The Seychelles Islands, in the Indian Ocean, which number altogether 92, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By Letters Patent of Sept., 1903, they were erected into a separate colony. The principal islands of the group are Mahé (56 sq. miles), Praslin (9,700 acres), Silhouette (4,900 acres), La Digue (2,500 acres), Curieuse (900 acres), Félicité (689 acres), North Island (525 acres), St. Anne (500 acres), Providence (500 acres), Frigate (700 acres), Denis (340 acres), Cerf (290 acres), and Bird, or Sea Cow Island (160 acres), and the total area of the Colony, with dependencies, is estimated at 156½ square miles; the dependencies are the Amirantes, Alphonse, Bijoutier, St. François, St. Pierre, the Cosmoledo Group, Astove, Assumption, Coëtivy, Aldabra and Farquhar Island. The population on June 30, 1955, was estimated at 38,672. Although only 4° S. of the Equator, the islands are healthy, the death-rate in 1955 being 11.8 per 1,000 and the birth-rate 33.7 per 1,000. There are 28 Roman Catholic and Church of England and Government primary schools, and Government technical and homecraft centres. There are also 5 private schools. There are 2 secondary grammar and a secondary modern schools. Aldabra, one of the dependencies of the Seychelles, and about 630 miles

from Mahé, is famous for the gigantic land tortoises, while the unique double coconut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 3 *ex officio* members and 5 unofficial members appointed by the Government, and by a Legislative Council of 6 official and 6 unofficial members, 4 of whom are elected.

SIERRA LEONE

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs to be used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony, including those portions administered as Protectorate, lies along the coast, extending from the boundary of French Guinea—north of the mouth of the Scarcies River—to the boundary of Liberia at the mouth of the Mano River, a distance of approximately 220 miles; having an approximate area of 2,500 square miles. Those portions of the Colony which are strictly administered as Colony (viz. the Sierra Leone Peninsula, Tasso Island, Banana Islands, the township of Bonthe on Sherbro Island and York Island) cover areas totalling approximately 271 square miles, with a population (1949) of approximately 125,000, of whom about 600 were resident Europeans and

about 900 resident Asiatics. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes; a babel of tongues is thus to be heard in the streets of Freetown. The total area of the Colony and Protectorate is about 28,000 sq. miles, and the total population about 1,860,000. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 212 miles, lying between 6° 55', and 10° N. lat., and the extreme breadth from east to west is 207 miles, between 10° 16' and 13° 18' of W. long. For administrative purposes the Protectorate is divided into 3 Provinces covering 12 Districts, each administered by a Commissioner. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

Communications.—A railway runs inland from Freetown to Pendembu (227½ miles) and a branch line of 83 miles extends in a north-easterly direction from Bauya to Makeni. There are 174 miles of motor road in the Colony, of which 115 miles are bitumen surfaced. In the Protectorate, there are 17 miles of bitumen-surfaced road, 1,383 miles of motor road and 1,389 miles of lower standard motorable roads. The Posts and Telegraphs Department maintains a trunk line network of 800 miles of telephone and telegraph routes connecting Freetown with the Colony and Protectorate. On these routes telegraph services exist between Freetown and 55 towns in the Protectorate. Trunk speech facilities are available between Freetown, Bo and other main centres in the Protectorate.

Education.—In 1955 there were 421 primary schools with 34,168 boys and 14,766 girls on the rolls, and 22 secondary schools with 3,611 boys and 1,656 girls enrolled. Fourah Bay College provides University and other post-secondary courses, and the Prince of Wales School and Bo Government Secondary School provide a course in science up to Higher School Certificate standard. There are 6 teacher training institutions, including the Normal Department of St. Joseph's Convent.

The total expenditure in 1955 was £751,917 from Colony Resources; £143,748 under Colonial Development and Welfare Act; and approximately £79,132 from Native Authority funds and £58,858 from Missions.

FINANCE

	1954	1955
Public revenue	£7,620,392	£7,545,133
Public expenditure	6,860,536	7,396,673
Net public debt (Dec. 31)	4,822,007	4,410,582

TRADE

	1954	1955
Total imports	£13,376,250	£17,114,967
Total exports	11,398,305	10,222,067
Imports from U.K.	8,901,849	10,289,717
Exports to U.K.	7,665,425	7,135,562

The principal exports are iron ore, palm kernels, diamonds, cocoa, piassava, raw coffee, chrome ore, bennised, ginger and kola nuts. Some of the largest diamonds known have been found in the Colony; in 1943 one of 530 carats and in 1945 one of 770 carats. The chief imports are cotton piece goods, apparel, ale and stout, artificial silk piece goods, machinery, motor vehicles, petroleum products, potable spirits, wheat flour, tobacco, cement, corrugated iron sheets, sugar, soap, fish and fish preparations and electrical machinery, apparatus and appliances.

GOVERNMENT

Under the Constitution of 1951, there is a Legislative Council consisting of the Governor as President, a Vice-President who may not be already a member of the Legislative Council and 30 members, 7 of whom are *ex officio*, 7 elected to represent the Colony, 12 elected by the District Councils of the Protectorate, 2 elected by the Protectorate Assembly and 2 nominated by the Governor. The Council has full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council of 4 official and 6 unofficial members, the latter appointed from among the unofficial members of the Legislative Council. There is thus an unofficial majority in both the Legislative and the Executive Councils. Five of the unofficial members of the Executive Council hold ministerial portfolios, and the sixth is a Minister without portfolio.

SOMALILAND PROTECTORATE

The Somaliland Protectorate occupies part of the north-east horn of the African Continent along the south of the Gulf of Aden up to 49° E. longitude. It is bordered to the west by French Somaliland (Djibouti) and Ethiopia, and to the south and east by Somalia (ex-Italian Somaliland). The territory covers an area of approximately 68,000 square miles, and lies between 11° 27' north latitude and 42° 40' and 49° east longitude. The interior of the Protectorate is characterized by an elevated plateau rising towards the north to an altitude of from 2,000 to 7,000 feet, and descending

in scarps and broken hills to the coastal plain which varies in width from 30 to 60 miles. Vegetation consists largely of nutritious grasses and thorn and acacia trees, which furnish good grazing for camels, sheep and goats.

The nomadic population is estimated at from 500,000 to 700,000, and consists entirely of various Moslem Somali tribes of the Qadrayeh and Saleyeh sects. The life and wealth of the people is centred round their stock (camels, sheep and goats). Agriculture is confined to small but increasing areas with sufficient rainfall. Frankincense and myrrh are found in the east. The coastline abounds in fish, and the presence of oil and minerals is suspected in the interior. The chief exports are meat on the hoof, skins and hides. Game in the Protectorate includes lion, leopard, kudu, ostrich and numerous types of gazelle.

Climate conditions are governed by the south-west monsoon (Kharif) which blows from May to September, and the north-east monsoon which lasts from November to March. Much of the interior is generally cool and healthy owing to its elevation.

The Protectorate owes its foundation to the capture of Aden by the Bombay Government in 1839, when Turkey claimed the Somali Coast from Zeilah to Cape Gardafui. The Egyptians bought the port of Massawa in Eritrea in 1864 and subsequently spread their jurisdiction south to Zeilah and Berbera at a time when this Coast provided the chief source of supplies for Aden. As they were pre-occupied by events in the Sudan and the rise of the Mahdi, the Egyptians withdrew from the Somali coast in 1884. On July 20, 1887, the Powers were notified that a British Protectorate had been established on the Somali Coast from Ras Jibuti to Bender Ziada. Its boundaries were later defined by treaties with France, Italy and Ethiopia; but they are still artificial. The frontiers between ex-Italian Somaliland and the Protectorate, save for the Bender Ziada Enclave, and those between Ethiopia and the Protectorate have been demarcated.

The Protectorate was invaded by Italian forces on August 4, 1940; and after resistance against greatly superior numbers the British forces were evacuated on August 18, leaving the Italians temporarily in occupation. British sovereignty was restored in 1941 in the course of the East African campaign.

FINANCE AND TRADE

	1954-55	1955-56
Revenue	£701,418	£801,440
Grant-in-Aid	404,000	418,000
Expenditure	1,090,184	1,235,085
Imports	2,360,880	2,880,872
Exports	1,208,644	1,375,241

Principal towns, Hargeisa (30,000 to 40,000), ♀ Berbera (pop. in hot season, about 15,000; in cold season, about 30,000), Burao (10,000), Borama, Erigavo and Las Anod.

GOVERNMENT

The territory is divided into 6 districts which bear the names of 6 principal towns (see above).

Governor, His Excellency Sir Theodore Ousley Pike, K.C.M.G. (1953) (+ £1,000 duty alloc.)	£3,000
Private Sec. and A.D.C. (vacant)	
Judges of the High Court, Sir Charlton Lane; T. T. Russell	2,200
Chief Secretary to the Government, J. R. Stebbing, O.B.E.	2,250
Attorney-General, J. S. R. Cole, Q.C.	2,100
Financial Secretary, G. C. Lawrence	2,100

Commissioner for Somali Affairs, P. Carrel, O.B.E.	2,000
Director of Medical Services, W. T. Thom ..	2,000
Commissioner of Police, H. S. Swain	2,000
Director of Agriculture and Veterinary Services, J. M. Watson	2,000
Director of Public Works, E. P. L. Wilders ..	2,000
Director of Education, C. Sykes-Thompson ..	2,000
Accountant-General, C. Griffith	1,700
Comptroller of Customs, H. Forrester, O.B.E.	1,900

SOUTH EAST ASIA

OFFICE OF THE COMMISSIONER-GENERAL FOR THE UNITED KINGDOM IN SOUTH EAST ASIA

Commissioner-General, His Excellency Sir Robert Heatlie Scott, K.C.M.G., C.B.E.
Deputy Commissioner-General, A. M. MacKintosh.

The appointment of Commissioner-General for the United Kingdom in South East Asia, whose headquarters are at Phoenix Park, Singapore, was first made in 1948, being a combination of the responsibilities of two appointments, that of Governor-General of the Malayan Union and the Colony of Singapore with authority also in Borneo, and that of Special Commissioner in South East Asia, a diplomatic appointment established in 1946 primarily for co-ordinating measures to meet the critical supply situation in that area at that time.

The main task of the newly appointed Commissioner-General was to co-ordinate British policy, including defence, in South East Asia, and he was responsible to both the Colonial Secretary and the Foreign Secretary in London. In addition he was made Chairman of the British Defence Co-ordination Committee (Far East). In 1955 the Commissioner-General became also the United Kingdom Representative on the Council of the South-East Asia Treaty Organisation.

When Sir Robert Scott succeeded Mr. Malcolm MacDonald as Commissioner-General in October, 1955, the form of appointment was changed, Sir Robert Scott holds his appointment from the Prime Minister, to whom he reports direct as well as to the two Secretaries of State.

The Commissioner-General has the personal rank of Ambassador.

STRAITS SETTLEMENT

(See MALAYA)

SWAZILAND

(See BASUTOLAND)

TANGANYIKA

The *Trust Territory of Tanganyika* (formerly *German East Africa*, 1884-1918) occupies the east central portion of the African continent, between 2°-12° 45' S. lat. and 28° 50'-40° 38' E. long. The Territory is bounded on the N. by Kenya and Uganda; on S.W. by Lake Nyasa, Nyasaland and N. Rhodesia; on S. by Portuguese E. Africa; on the W. it is bounded by the Belgian trust territory of Ruanda-Urundi and Belgian Congo; on the E. the boundary is the Indian Ocean. Tanganyika has a coast-line of about 500 miles and an area of 362,688 square miles (including 19,982 square miles of water). The coast-line extends from the mouth of the Umba to the mouth of the Rovuma.

The greater part of Tanganyika is occupied by the Central African Plateau from which rise many mighty mountains, including Mt. Kilimanjaro, the highest point in the Continent of Africa (19,340 ft.) and Mt. Meru (14,979 ft.). The Rovuma, Rufiji, Pangani, Wami and Kingani rivers flow into the Indian Ocean; the Mara and Kagera into

Lake Victoria; the Malagarasi into Lake Tanganyika; the Songwe into Nyasa; and the Rungwa and Lupa-Songwe into Lake Rukwa. A *National Park*, created in the Ngorongoro-Serengeti area of the Northern and Lake Provinces, covers several thousand square miles of the finest game country in Africa.

The native population consists mostly of tribes of mixed Bantu race. The latest estimates of non-African residents is: Europeans, 20,300, other nationalities, 84,000. The African population is estimated at 7,965,000. Swahili, the language of the coastal people, is understood throughout the country, and forms an invaluable *lingua franca*. It has been adopted as the basic standard dialect for literature, both for educational and general purposes.

Expenditure by Government on education in 1955 was £3,373,781. In 1955 there were 656 Government and Native authority African primary schools, and 1,667 voluntary agency assisted primary schools. The total primary school enrolment was 221,977. There were 196 middle schools for boys and 39 for girls. Government or Native authorities managed 75 of the boys' and 8 of the girls' schools. The enrolments were 18,832 boys and 4,236 girls. There were 10 secondary schools run by Government and 15 by voluntary agencies. The enrolments were 1,708 boys and 153 girls. Five teacher-training centres were maintained by Government and 23 by voluntary agencies. The number of students in training were 1,865 men and 515 women. Facilities for post-secondary education are provided by the University College of Makerere at Kampala, where there were 150 Tanganyika students, and the School of Building and Civil Engineering also at Kampala. Vocational training is given at Ifunda Trade School in various trades and the Tengeru Natural Resources School.

Educational facilities for Europeans are administered by the Education Department and financed from the European Education Fund, which derives its revenue from Education Tax paid by Europeans, fees in Government European schools and a contribution from Government. There are seven Government primary schools, of which three are boarding schools, and 16 private schools receiving financial assistance from the Fund, as well as nine unassisted private schools. There is also a Government correspondence course for children who cannot attend a school. In 1955 there were 1,949 primary pupils. There is one Government secondary boarding school, at Kongwa, which had 232 pupils in 1955.

As in the case of European education there is a separate authority for Indian Education with its own fund. There are Government primary and secondary schools in Dar es Salaam and Tanga, but most of the educational facilities for Indians are provided by non-Government schools receiving grants in respect of staff, buildings and equipment; in 1955 there were 106 of these assisted schools.

Production, etc.—The economy is primarily agricultural and industry, other than mining, is mainly concerned with the processing of primary products. Secondary manufacturing industries established include canned meat, fruit and vegetables, paint, metal containers, coil matting, macaroni and bleaching and dyeing of textiles. African agricultural effort is largely devoted to the subsistence cultivation of cereals and other food crops.

A striking feature of Tanganyika's development in recent years has been the growth of the co-operative movement, which has for a considerable period been well established among African coffee producers around Mount Kilimanjaro and which

handles all African-produced coffee amounting to about 19,000 tons. A large proportion of the Lake Province's cotton crop is also handled by co-operatives.

The Tanganyika Agricultural Corporation has continued the experimental tenant farming scheme started at Nachingwea by the Overseas Food Corporation, whose tobacco farms at Urambo are to be worked by tenants and the Tanganyika Agricultural Corporation in co-operation with Government. The United Nations Food and Agricultural Organization is undertaking a survey of the Rufiji Basin.

The value of principal exports, other than minerals, in 1955 was: sisal, £9,956,000; coffee, £6,905,000; cotton, £5,534,000; hides and skins, £1,235,000; oilseeds, £1,721,000. Other exports include canned meat and meat products, cashew nuts, tea, beans and other pulses, timber, kapok, beeswax, gum arabic, papain, pyrethrum and tobacco.

Live Stock.—In 1955 there were 6,755,000 cattle, 2,739,000 sheep, 3,878,000 goats, 13,122 pigs, 137,000 donkeys and 335 horses in the Territory.

Minerals.—The value of mineral production in 1955 reached £5,494,000, a new record. Principal exports were as follows: diamonds, £3,199,000; gold £864,000; lead concentrates £790,000; sheet mica, £68,000; salt, £90,000; tin concentrates, £30,000; tungsten concentrates, £18,000; silver, £14,000; gypsum, £17,000.

Communications.—The Railways in Tanganyika are operated by the East African Railways and Harbours Administration. They are metre gauge and comprise the following lines:—*Tanga Line.* Tanga to Moshi, 218 miles, with a branch line 54 miles in length from Moshi to Arusha. There is a connection with the Kenya and Uganda Section at Kahe near Moshi. *Central Line.* Dar es Salaam to Kigoma on Lake Tanganyika, 780 miles, with branch lines from Msagali to Kongwa (17 miles); Tabora to Mwanza on Lake Victoria (236 miles); and Kaliwa to Mpanda (131 miles). *Southern Province Line.* Mtwara to Nachingwea (132 miles). Steamers run on Lakes Victoria and Tanganyika. Railway road services operate over 1,700 miles, the main routes being from Morogoro to Korogwe (78 miles), Dodoma to Arusha (273 miles), Dodoma to Mbeya (406 miles) and Itigi to Mbeya (305 miles). A first-class bitumen-surfaced road, 131 miles long, runs from Namanga (on the Kenya border) to Himo, via Moshi and Arusha. New roads between Dar es Salaam-Morogoro and Tanga-Korogwe have been completed, and the Morogoro-Iringa road is expected to be completed by October, 1956. The Tanganyika section of the Cape to Cairo road, from the Northern Rhodesian border to the Kenya border is 810 miles in length.

Tanganyika has an extensive telephone and telegraph network consisting of 63 telephone exchanges and 198 telegraph offices. These services are available to Kenya and Uganda. A radio telephone service is also available to 44 other countries, to ships off the East African Coast and to certain ships in the North Atlantic. Postal services are provided by means of 164 Post Offices and Postal Agencies.

There is a weekly direct air service between London and Dar es Salaam operated by British Overseas Airways Corporation. Internal air services are operated by East African Airways, which connects with the daily London to Nairobi services. There are daily airmail services between Dar es Salaam, Tanga, Nairobi and Zanzibar.

¶The chief seaports are Dar es Salaam, Tanga, Lindi, Mtwara and Kilwa. A deep water quay was opened at Mtwara in 1954 and three deep

water berths at Dar es Salaam will be ready early in 1956.

FINANCE

	1955-56	1956-57
Estimated Revenue:

CAPITAL, Ψ Dar es Salaam. Population (1952), Europeans, 3,603; other non-natives, 23,207; Africans, 72,330; total, 99,140.

GOVERNMENT

The Trust Territory of Tanganyika is administered by a Governor, who is assisted by an Executive Council of 3 *ex officio* members, 5 official members and 6 unofficial members. The Legislative Council, presided over by a Speaker, has a membership of 61. The official bench of 31 includes 17 Government officials and 14 unofficials who have accepted the Government whip. The unofficial bench of 30 includes 10 members of each of the three main races, 27 representing constituencies and 3 the general interests of the territory.

Governor and Commander-in-Chief, His Excellency Sir Edward Francis Twining, G.C.M.G., M.B.E., assumed office June, 1949, term extended until June 17, 1958 (and £2,500 Duty Allowance)

Private Sec., J. W. D. Margetson

Chief Secretary, R. de S. Stapledon, C.M.G., C.B.E.

Attorney-General and Member for Legal Affairs, A. I. Grattan-Bellew, C.M.G., Q.C.

Financial Secretary and Member for Finance and Economics, C. E. Tilney, C.M.G.

Member for Agriculture and Natural Resources, A. E. Trotman, C.M.G.

Member for Communications, Works and Development Planning, J. F. R. Hill, C.M.G.

Member for Local Government, F. H. Page-Jones, C.M.G.

Member for Lands and Mines, A. H. Pike, C.M.G., O.B.E.

Member for Social Services, J. P. Attenborough, C.B.E.

Speaker of the Legislative Council, Brig. W. E. H. Scupham, C.M.G., M.C.

(+ *allice* £500)

Chief Justice, E. J. Davies

Puise Judges, G. M. Mahon; J. S. Abernethy; E. D. W. Crawshaw; A. G. Lowe; C. D. G. Harbord

Director of Medical Services, J. M. Liston ..

Director of Education, G. H. Rusbridger, O.B.E.

Senior Provincial Commissioners, E. G. Rowe, C.M.G.; S. A. Walden, C.M.G.; L. M. Heaney; M. J. B. Molohan, M.B.E.

Director of Public Works, F. H. Woodrow, O.B.E.

Director of Agriculture, J. R. P. Soper

Director of Veterinary Services, E. C. S. Dawe

Commissioner of Police, R. E. Foulger, C.M.G.

Director of Lands and Surveys, C. Mace, O.B.E.

Commissioner for Development and Housing,

Col. W. L. Rolleston, O.B.E. 2,900

British Council Representative, J. F. C. Springford.

Trade Enquiry Office in London, The East Africa Office, Grand Buildings, Trafalgar Square, W.C.2.

TONGA

The Tongan or Friendly Islands form a self-governing State under the protection of Great Britain by Treaty made in 1900. These islands are situated in the Southern Pacific some 300 miles to the E.S.E. of Fiji, with an area of 270 square miles, and population (December 31, 1955) of 56,006, made up of 54,661 Tongans and 1,345 others, including 286 Europeans. The largest island, Tongatapu, was discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic (Tofua, Kao and Niuafoou or "Tin Can" Island). The limits of the group are between 15° and 23° 30' S., and 173° and 177° W. Nukualofa, on the island of Tongatapu, is the seat of government. The present Queen Salote Tubou, G.C.V.O., G.B.E., succeeded her father the late King George Tubou II on April 12, 1918. The constitution provides for a Government consisting of the Sovereign, a privy council and cabinet, a legislative assembly and a judiciary. The legislative assembly has 21 members, with a Speaker, and includes the Ministers of the Crown, the two Governors of island groups, and the representatives of the Nobles and of the people (seven of each), who are elected triennially. Soil generally is fertile, the principal export is copra. Revenue 1954-55 £1592,740; expenditure £471,183. There is no debt. Total imports (1955) £11,044,118; total exports £11,569,485. The total shipping cleared in 1955 was 101,937 tons. Tongan currency is on parity with Australian currency in relation to sterling.

British Agent and Consul, C. R. H. Nott, O.B.E., (1954) (and duty allowance £200) £2,300.

TRINIDAD AND TOBAGO

(See BRITISH WEST INDIES)

THE UGANDA PROTECTORATE

The territories now comprised within this Protectorate came under British influence in 1890. The present limits are approximately as follows:—On the north, the Sudan; on the east, the western boundary of Kenya Colony; on the south, Tanganyika Territory and Belgian Ruanda-Urundi; and on the west, the eastern boundary of the Belgian Congo. Within these boundaries lie Lake Victoria (part), Lake Edward (part), Lake George, Lake Albert (half), Lake Kyoga, Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to the Sudan frontier post at Nimule. Total area, 93,981 square miles, including 13,689 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

(1) Buganda (East Mengo, West Mengo, Masaka and Mubende).

(2) Eastern (Teso, Busoga, Bugisu, Bukedi, Mbale Township).

(3) Western (Bunyoro, Toro, Ankole and Kigezi).

(4) Northern (Achoi, Lango, West Nile and Karamoja).

The total population of Uganda at the 1943 Census was 4,955,176, composed as follows: Africans 4,914,211; Indians 33,767; Europeans 3,448; Goans 1,448; others 2,302. About 2,500,000 Africans, who occupy the Central and Southern parts of the Protectorate, speak Bantu

languages of which the most important is Luganda (the language of the Baganda tribe, from whom the present name of the Protectorate was originally derived). Ki-Swahili in a debased form is also spoken as a trading and, in a few districts, administrative language. The tribes occupying the North of the Protectorate are closely related to various tribes in the South of the Sudan. They speak a series of widely differing languages, now distinguished as belonging to the Sudanian, Nilotic and Nilo-hamitic clusters.

Development—A five-year capital development plan for the period July, 1955–July, 1960 has been drawn up, involving the expenditure of approximately £30,000,000.

A dam has been erected at the Owen Falls on the Nile, near Jinja, to provide hydro-electric power for industrial development. A generating capacity of 60,000 kW. is now available. Orders for four more turbines have been placed which will double the present capacity. The potential generating capacity of the dam is 150,000 kW. Power is now available over a wide area.

Mineral resources are mainly concentrated in two widely separated areas. In the west on the slopes of the Ruwenzori Mountains are found limestone, copper, cobalt and salt whilst around Tororo in the east the Sukulu mineral complex includes limestone, magnetite, apatite (phosphate), and pyrochlore (niobium). The copper and cobalt deposits are being developed, while at Tororo cement is manufactured.

In 1952, the Uganda Development Corporation Limited was established with a capital of £5,000,000 now increased to £8,000,000, of which £5,500,000 has been issued, to take over Government holding in industry, and to foster, assist, and, where necessary, to participate in the financing of further industrial enterprises, normally by establishing subsidiary companies in which private enterprises will be encouraged to participate, and in proper circumstances have a majority holding. The Corporation is at present participating in companies whose activities include, or will include, the mining and production of copper and cobalt from Kilembe, the mining and production of phosphate and niobium at Tororo, and the manufacture of textiles in a new factory at Jinja.

These developments have been carried on through private enterprise. The Corporation is also concerned through its subsidiaries with fish marketing, building, hotels, cattle ranching, tea growing, cement and cement products, including cement-asbestos sheeting.

Education—Separate schools are provided for members of the African, Asian and European communities. The majority of African schools are managed by voluntary agencies, especially by Mission Societies. Substantial grants are provided by Government towards teachers' salaries, buildings and equipment, and in these grant-aided schools there are about 256,000 children. There are 11 Government schools (primary and secondary) for Asians, with a total roll of about 7,800 children. There are also a further 7,700 Asian children in 88 grant-aided schools, which are mostly in the smaller trading centres of the Protectorate. About 750 European children attend Government and grant-aided schools in the Protectorate, but there are no secondary schools in Uganda for European children and the majority of them attend secondary schools in Kenya or the United Kingdom. Approximately £4,000,000 was spent on education, including capital projects, during the financial year 1955/56. Makerere College, Kampala, the University College of East Africa, is an autonomous inter-territorial foundation; its Board of Governors is appointed by the East African Governments, the

Inter-University Council and the Academic Board of the College. It was granted special relationship with London University in 1949, and London external degrees were awarded for the first time at the end of 1953.

Communications—The main line of the East African Railways in Kenya and Uganda extends from Mombasa, *via* Nairobi, Tororo, Jinja and Kampala to Kasese near the Belgian Congo border. There are branches from Tororo to Soroti, from Jinja through Mbulamuti to Namasagali on Lake Kyoga, and from Kampala to Port Bell on Lake Victoria. The Railway Administration maintains a regular steamer service on Lake Kyoga between Namasagali and Masindi Port; and on Lake Victoria between Port Bell, Entebbe, Kisumu and Tanganyika Ports. A service is maintained on Lake Albert and the Nile between Butiaba and Nimule (connected by motor road with Juba in the Sudan) and between Butiaba and the Belgian Congo port of Kasenyi. A road transport service operates between Masindi Port and Butiaba, and a freight service between Butiaba and Kampala. A through service is thus provided by the Railway Administration from Mombasa to the Sudan and the Belgian Congo. The Uganda Public Works Department maintains 351 miles of tarmac road and 2,494 miles of all-weather murrum roads connecting the principal towns; the various African local governments between them maintain a further 4,418 miles of all-weather murrum roads and 3,881½ miles of lesser murrum roads of variable standard. There is a joint East African Ports and Telecommunications Service which operates throughout Kenya, Uganda and Tanganyika. Entebbe has a first-class international airport, and is a principal stopping place on the main B.O.A.C. routes through East Africa. Other airlines operating regularly through Entebbe include Sabena, Air France, Central African Airways, and E.A.A.C. It is also a stopping point on many charter flights. There are landing grounds at Jinja, Tororo, Masindi, Lomej, Gulu, Soroti, Arua, Lira, Mbarara, Moroto, Murchison Falls, Kisenyi (on Lake George) and Kasese. There are hotels at Entebbe, Kampala, Jinja, Tororo, Masindi, Fort Portal, Kabale, Mbarara, Kichwamba and Masaka.

Production—Agricultural production is largely in the hands of Africans, the most important crops being cotton, coffee, tobacco, maize and groundnuts. Sugar, coffee and tea are the main crops on non-African estates. The potential mineral wealth is considerable, tin ore, wolfram and copper being won in the Western Province.

FINANCE

In 1954 the Government's financial year was amended and now runs from July 1 to June 30. The Protectorate estimates of revenue and expenditure are now divided into the Revenue Budget, which contains details of recurrent revenue and expenditure, and the Capital Budget which contains details of non-recurrent expenditure and revenue specifically assigned to meet capital expenditure, including a contribution from the Revenue Budget.

A. Revenue Budget:

	1954/55 actual)	1955/56 (revised estimate)
Revenue.....	£19,476,430	£18,269,616
Expenditure (excluding loans)	18,503,190	16,986,918
Public debt	464,198	510,122
B. Capital Budget:		
Revenue.....	£4,790,782	£2,765,629
Expenditure.....	5,299,722	6,328,721

TRADE

	1954	1955
Total imports.....	£25,198,645	£33,975,208
Total exports.....	41,028,620	42,304,584

The Customs Services of Uganda, Kenya and Tanganyika are administered jointly by the Customs and Excise Department of the East Africa High Commission. The export trade is mainly in raw cotton, coffee, cotton-seed, oil seed cake, tea, cigarettes, ores, and hides and skins. The chief imports are cotton fabrics, base metals and metal manufactures, and machinery. The trade is chiefly with Great Britain, India and the neighbouring African territories.

GOVERNMENT

The Executive Council consists of the Governor and 13 members. Of these 13 members, the Chief Secretary, the Attorney-General and the Minister of Finance are *ex officio* members. The remaining places are filled by the Ministers of Social Services, of Local Government, of Natural Resources, of Commerce and Works, of Corporations and Regional Communications and of Rural Development, the Assistant Minister of Social Services, the Resident, Buganda and the Commissioner on Special Duty. The Legislative Council consists of 3 *ex officio* members (the Chief Secretary, the Attorney-General and the Minister of Finance), 14 Ministers and officials and 13 other members (total 30) on the Government side and 30 representative members. Of these 30 representative members, 18 are African, 6 Asian and 6 European. The Governor is President of the Council.

The whole territory is under British Administration; but in particular areas local powers are specifically reserved by treaty or "Agreement" to the local tribal government.

There are four "Agreement States," all monarchical in constitution—Buganda, Ankole, Toro and Bunyoro.

Generally throughout the whole country, government has been and still is administered through a system of county, sub-county and parish chiefs, first developed during the latter half of the 19th century in Buganda and extended by British and Ganda influence to all parts of the country. Chiefs consequently are to be regarded everywhere not as hereditary leaders of the original social groups, but as salaried civil servants selected and promoted by merit. Native courts of varying limited jurisdiction deal with cases, both civil and criminal, involving Africans only, but certain classes of cases are reserved to the Protectorate courts. Such native courts are supervised, in Buganda, by a judicial adviser, and elsewhere by the administrative staff, the High Court having appellate powers in such cases in Buganda and exercising appellate and revisional jurisdiction over such courts elsewhere. During the last twenty years a system of councils extending from the parish through the sub-county and county up to the District Councils has been established; the District Councils are being developed as local government bodies which will gradually take over from the Central Government responsibility for certain local services. The Legislative Council of the Protectorate is representative of all races, and has African representatives from all Districts save one. There are Protectorate Courts dealing with certain reserved offences, and cases in which a non-African is a party. Appeal from these courts lies to the High Court of Uganda and ultimately to the Court of Appeal for Eastern Africa.

Governor and Commander-in-Chief, His Excellency Sir Frederick Crawford, K.C.M.G., O.B.E. (Jan. 1957) (and £2,500 duty allowance)..... £5,000

ZANZIBAR

(The Zanzibar Protectorate)

Sultan, H. H. Seyyid Sir Khalifa bin Harub, C.C.M.G., C.B.E., born Aug. 26, 1879; succeeded Dec. 9, 1911.

Heir-Apparent, Seyyid Abdullah bin Khalifa, C.C.M.G., born Feb. 22, 1910.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north to Warskeikh; but since the cession of the coast-line from Ruwuma

to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadir and Kismayu coasts to Italy in 1904 and 1924 respectively, they are confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboni (Dick's Head), the islands of Lamu, Manda, Patita, and Siu, for which His Highness' Government receives annual rentals of £10,000 from the Government of Kenya, and £1,000 from Her Majesty's Government in respect of part of the Somali coast-line.

Zanzibar has an area of 640 square miles with a population of 149,575 (1948 Census); Pemba (380 square miles) population, 114,587; total area, 1,020 square miles; total population, 264,162.

Production, etc.—The islands produce a large percentage of the world's supply of cloves and clove oil (cloves exported in 1955 were valued at £3,957,398 and clove oil at £106,844). They also exported £333,694 of coconut oil and £325,225 of copra in 1955. Other important products are chillies, oil cake, soap, tobacco and coir rope. Rice and cassava are grown extensively for local consumption. The importance of Zanzibar as a port of transhipment and distribution has decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the adjacent mainland coast.

Education.—There are Government primary schools for Arab and African children, and one for Indian boys. Grant-aided primary schools are mainly for Indians. There are two Government secondary schools for boys and girls respectively of all communities, a Muslim academy for Arabic studies, a rural middle boarding school for Arab and African boys in Zanzibar, a Government primary boarding school for girls in Pemba, the H.H. the Aga Khan Secondary School for boys, St. Joseph's Convent School, and a boys' primary boarding school run by the Universities' Mission to Central Africa. Boys are sent for technical training to the Mombasa Institute of Muslim Education, and boys and girls to Makerere or England for further education. In addition there are Government primary training colleges for men and women teachers. The total enrolment in November, 1955, was 14,177 and the total expenditure on education in 1955, £297,980 from local revenue.

Communications.—There are 206 miles of road suitable for motor traffic in Zanzibar and 80 miles in Pemba. There are 5 post offices in the two islands and a Government telephone system. The city of Zanzibar, on the island of the same name, had a population (1948) 45,284. It possesses a magnificent harbour, which presents great facilities for shipping and trade generally. Net tonnage of ocean-going steamers which entered the port in 1954 was 1,558,102. Zanzibar provides the best water supply on the East Coast of Africa, and it is much in demand for shipping supplies.

A civil aerodrome is situated 4 miles south-east of the city, linked with Tanganyika and Kenya by charter and daily scheduled services. There is also an all-weather aerodrome in Pemba linking the island with Zanzibar, Kenya and Tanganyika by regular services with the East African Airways Corporation.

FINANCE

	1954	1955
Revenue	£2,962,363	£2,413,477
Expenditure	2,624,625	2,265,016

TRADE

	1954	1955
Imports	£5,877,454	£6,702,661
Exports	6,429,287	6,781,695
Imports from U.K. ...	1,630,057	1,899,197
Exports to U.K.	379,889	256,157

The principal imports are rice, grain, groceries, sugar, tobacco, ivory, petroleum and piece-goods; the exports are cloves, copra, soap, clove oil, coconut oil, oil cakes and coir rope in addition to re-exports of previously imported ivory and piece-goods.

GOVERNMENT

Zanzibar has been a British Protectorate since November, 1890. On July 1, 1923, the Protectorate was transferred from the Foreign to the Colonial Office.

The government is administered by a British Resident. There is an Executive Council, over which H.H. the Sultan presides, and a Legislative Council of 16 members (4 *ex officio*, 5 official and 8 unofficial) under the chairmanship of the Resident.

British Resident, Sir Henry Steven Potter,
K.C.M.G. (1954) (and duty allowance

£1,250)	£3,250
Chief Justice, R. Windham	2,700
Chief Secretary, R. E. Alford, C.M.G.	2,600

Zanzibar is distant 6,850 miles; transit, 20 days by sea; 2 days by air.

THE ARCTIC OCEAN

The Arctic Ocean consists of a deep sea over 2,000 fathoms, on the southern margin of which there is a broad continental shelf with numerous islands. Into this deeper sea there is only one broad channel, about 700 miles, between Greenland and Scandinavia. Behring Strait is only 49 miles wide and 27 fathoms deep. The southern boundary of the Arctic Ocean is the Wyville-Thomson and Faeroe-Icelandic submarine ridge, which separates the North Atlantic from the Norwegian and Greenland Seas. The Norwegian Deep lies between Norway and Jan Mayen and Iceland; it exceeds 1,500 fathoms. The Greenland Deep, of similar depth, lies between Spitsbergen and Greenland. These two depressions are separated by a somewhat deeply submerged ridge from the east of Jan Mayen to Bear Island, south of Spitsbergen. A shallow ridge from the north-west of Spitsbergen to Greenland separates the Greenland Sea from the deep North Polar Basin. This extends from the north of Spitsbergen and Franz Josef Land to the north of the New Siberia Islands and of the North American Arctic Archipelago.

Another more shallow depression is Baffin Bay, less than 1,000 fathoms. This is separated from the North Atlantic by a submarine ridge. Barent's Sea, between Spitsbergen, Norway and Novaya Zemlya, and the Kara Sea, between Novaya Zemlya and the Siberian coast, are respectively below 200 and 100 fathoms.

The total area of the Arctic Sea is about 5.5 million square miles, of which 2.3 million square miles are probably covered with floating ice.

See also Northern Ireland, pp. 687-690; Republic of Ireland, pp. 816-9.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between 51° 26' and 55° 21' N. latitude and from 5° 25' to 10° 30' W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annagh Head), is 174 miles. On the N. coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Islands, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the *Sperin Mountains* (Sawel 2,240 ft.) of County Tyrone; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,030 ft.); the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland); and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *C Comeragh Mountains* (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Harbour, and the *Suir*, *Barrow* and *Nore*, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which *Lough Neagh* (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the *Shannon Chain of Allen*, *Booberg*, *Forbes*, *Ree* and *Derg*, and the *Erne Chain of Gowna*, *Oughter*, *Lower Erne*, and *Erne*; *Melvin*, *Gill*, *Gara* and *Conn* in the north-west; and *Corrib* and *Mask* (joined by a hidden channel) in the west. In County Kerry, to the east of *Macgillicuddy's Reeks*, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, the extreme range of temperature readings being from 2° F. to 90° F. (compared with -17° F. to 100° F. over Great Britain). The average annual rainfall varies from 27 inches at Dublin to more than 100 inches in the mountains of Connemara. The rainfall is also more uniform from year to year than in Great Britain.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

History.—According to Irish legends, the island of Ierne was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardr* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriell, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of *Miled*. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Cool (Fingal) to connect Antrim with Scotland (Staffa).

Hibernia was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as *Findgail* (White Strangers) and the Danes as *Dubgail* (Black Strangers), names which survive in "Fingal," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (*Ulaidh-tir*, *Laigintir*, *Mumans-tir* and *Kunnak-tir*). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (880), at which the Hy Neill

king *Maelsechlainn II.* defeated the Scandinavians of Dublin and the Hebrides under their king *Amlaib Cuarán*; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 *Dermot MacMurrough* (*Diarmait MacMurcacha*), the deposed king of Leinster, sought assistance in his struggle with *Ruaidhri O'Connor* (the high king of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and *Dermot* enlisted the services of *Richard de Clare*, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with *Dermot's* daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though under Henry VII. Sir Edward Poyning's, as Lord Deputy had passed at the *Parliament of Drogheda* (1494) the act later known as *Poyning's Law*, subordinating the Irish Legislature to the Crown, the *Earls of Kildare* retained effective power until, in 1534, Henry VIII began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

Christianity.—Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 380, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

GOVERNMENT

The Constitution.—The Constitution of Ireland, approved by a plebiscite on July 1, 1937, came into operation on December 29, 1937.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the re-integration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as a second official language.

The President.—The President of Éire—*Uachtarán na hÉireann*—is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves Dáil Éireann on the advice of the Taoiseach (Head of the Government). He signs and promulgates laws. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

The Legislature.—The Parliament—*Oireachtas*—consists of the President and two Houses: a House of Representatives—*Dáil Éireann*—and a Senate—*Seanad Éireann*.

Dáil Éireann is composed of 147 members elected by adult suffrage on a basis of proportional representation.

Seanad Éireann is composed of 60 members, of whom 11 are nominated by the Taoiseach and 49

are elected; three by the National University of Ireland, three by the University of Dublin, and 43 from panels of candidates, established on a vocational basis.

The Executive.—The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to Dáil Éireann, meets and acts as a collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The Taoiseach is appointed by the President on the nomination of Dáil Éireann. The other members of the Government are appointed by the President on the nomination of the Taoiseach with the previous approval of Dáil Éireann. The Taoiseach appoints a member of the Government to be the *Tánaiste* who acts for all purposes in the place of the Taoiseach in the event of the death, permanent incapacitation, or temporary absence of the Taoiseach. The Taoiseach, the *Tánaiste* and the Minister for Finance must be members of Dáil Éireann. The other members of the Government must be members of Dáil Éireann or Seanad Éireann, but not more than two may be members of Seanad Éireann.

CAPITAL

Dublin (*Baile Átha Cliath*) is a City and County Borough on the River Liffey at the head of Dublin Bay. In April, 1951, its population was 522,183. There are many notable public buildings in the City, among them the two Cathedrals of Christ Church and St. Patrick, the Bank of Ireland (formerly the House of Parliament) and Trinity College (the only constituent College of the University of Dublin). University College is a constituent college of the National University of Ireland. A large export trade of agricultural products passes through the city and there is a considerable brewing industry, while there is an increasing amount of light manufacturing.

Other cities and towns are Cork (pop. 74,567). Dún Laoghaire, formerly Kingstown (47,920). Limerick (50,820). Waterford (28,691). Galway (21,316). Dundalk (19,678). Drogheda (16,779). Sligo (13,599). Wexford (11,979). Bray (12,063). Kilkenny (10,572). Tralee (11,045). Clonmel (10,471) and Athlone (9,015).

THE PRESIDENT

Uachtarán na hÉireann (President of Éire), elected June 25, 1945, re-elected June 25, 1952, Seán T. Ó. Ceallaigh (Seán T. O'Kelly).

Secretary to the President: Domhnall Ó Donnabháin (Daniel J. O'Donovan).

Taoiseach, Seán Ua Coisdealbha, A.S. (John A. Costello, S.C.) £3,000

Tánaiste and Minister for Industry and Commerce, Liam Ó Neachtain (William Norton) 2,125

Minister for Education, An Ginearál Risteard Ua Maolchatha (General Richard Mulcahy) 2,125

Minister for Lands, Seosamh Ó Blathmháic (Joseph Blowick) 2,125

Minister for Justice, Séamas Éabhróid (James Everett) 2,125

Minister for Agriculture, Séamas Diolún (James Dillon) 2,125

Minister for Defence, An Ginearál Seán Mac Eoin (General Seán MacEoin) 2,125

Minister for Posts and Telegraphs, Micheál Mac Aoidh (Michael Keyes) 2,125

Minister for External Affairs, Liam Mac Cosgair (Liam Cosgrave) 2,125

Minister for Social Welfare, Brendan Mac Fhéarais (Brendan Corish) 2,125

Minister for Finance, Gearóid Suatman (Gerard Sweetman) £2,125

Minister for Local Government, Pádraig Ó Domhnaill (Patrick O'Donnell) 2,125

Minister for Health, Tomás Ó hUiginn, A.S. (Thomas Francis O'Higgins, S.C.) 2,125

THE LEGISLATURE

The Legislature (*Oireachtas*) consists of the President and two Houses—a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). Dáil Éireann is composed of 147 Members, elected on the system of Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 21 years and are not disqualified by law have the right to vote. The same Dáil does not continue for a longer period than seven years, but a shorter period of five years has been fixed by existing legislation. The present (15th) Dáil was elected on May 18 1954, and met on June 2, 1954.

Party Strength (Dáil Éireann)

*** Members of Dáil Éireann, other than Ministers and Parliamentary Secretaries, are allowed £52 (and members of Seanad Éireann £39) a month towards expenses, together with free travelling facilities between Dublin and their constituencies.

Parliamentary Secretaries.

Parliamentary Secretary to the Government, Seán Ó Donnobháin (John O'Donovan).
Do. to the Taoiseach and to the Minister for Defence, Donnchadh Ó Súilleabháin (Denis J. O'Sullivan).
Do. to the Minister for Finance, Mícheál Ó Domhnailláin (Michael Donnellan).
Do. to Minister for Local Government, Domhnall Spring (Daniel Spring).
Do. to Minister for Agriculture, Oilibhéar Ó Flannagáin (Oliver Flanagan).
Do. to Minister for Industry and Commerce, Pádraig Ó Crotaigh (Patrick J. Crotty).

Attorney-General, Pádraig Mac Giollaigáin, A.S. (Patrick McGilligan, S.C.).

Secretary to the Government, Muiris Ó Muimhneacháin (Maurice Moynihan).

Assistant Secretary to the Government, Nioclás Ó Nualláin, Ph.D. (Nicholas G. Nolan, Ph.D.).

United Kingdom Ambassador to the Republic of Ireland

H. E. Sir Alexander Clutterbuck, G.C.M.G., M.C., 39 Merrion Square, Dublin.
Counsellor, G. Kimber, C.M.G.
First Secretary, R. P. Ross Williamson.
Military Attache, Lt.-Col. M. J. Lindsay, D.S.O.
Trade Commissioner, N. K. Paterson, C.I.E., O.B.E.
Head of Visa Section, F. C. Savage, O.B.E.

Diplomatic Representatives Abroad

The Holy See: (vacant) (Ambassador)
Argentina: T. J. Horan (Chargé d'Affaires).
Australia: M. L. Skentlebury (Chargé d'Affaires).
Austria: H. McCann (Minister).
Belgium: D. R. McDonald (Minister).
Canada: L. T. McCauley (Ambassador).
France: W. P. Fay (Ambassador).
Federal Republic of Germany: T. J. Kiernan (Minister).
Great Britain: Cornelius C. Cremin (Ambassador), 17 Grosvenor Place, London, S.W. 1.
Italy: D. A. Devlin (Minister).
Netherlands: (vacant) (Minister).
Norway: Mrs. J. MacNeill (Minister).
Portugal: T. V. Commis (Chargé d'Affaires).
Spain: M. Rynne (Ambassador).
Sweden: Mrs. J. MacNeill (Minister).
Switzerland: H. McCann (Minister).
Turkey: D. A. Devlin (Minister).
U.S.A.: J. J. Hearn (Ambassador).

THE JUDICIARY

The Judiciary consists of Courts of First Instance and a Court of Final Appeal called the Supreme Court—*Cúirt Uachtarach*. The Courts of First Instance include a High Court—*Ará-Chúirt*—invested with full original jurisdiction in and power

to determine all matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with a right of appeal as determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, subject to exceptions and regulations prescribed by law. No law may, however, be enacted excepting the question of the validity of any law from the appellate jurisdiction of the Supreme Court.

Chief Justice, Hon. Conor Maguire £4,850
President of the High Court, Hon. Cahir Davitt 3,700
Judges, Supreme Court, Hon. Martin C. Maguire; Hon. Cecil Lavery; Hon. T. C. Kingsmill Moore; Hon. C. O'Daly, each 3,700
Judges, High Court, Hon. Kevin Haugh; Hon. Kevin J. Dixon; Hon. F. G. O. Budd; Hon. R. McLoughlin; Hon. Thomas Teevan; Hon. George Murnaghan; Hon. W. G. Shannon (*ex officio*) each 3,250
Master of High Court, John O. Leary, S.C.

DEFENCE

Under the direction of the President, and subject to the provisions of the Defence Act, 1954, the military command of the Defence Forces is exercisable by the Government through the Minister of Defence. To aid and counsel the Minister for Defence on all matters in relation to the business of the Department of Defence on which he may consult it, there is a Council of Defence consisting of the Parliamentary Secretary to the Minister, the Secretary of the Department of Defence, the Chief of Staff, the Adjutant-General and the Quartermaster-General. Establishments provide at present for a Permanent Defence Force of approximately 13,000 all ranks, including the Air Corps and the Naval Service. The Defence Estimates for the year ending March 31, 1957, provide for approximately 25,000 all ranks of the Reserve Defence Force. Recruitment is on a voluntary basis. Minimum term of enlistment for the Army is three years in the Permanent Defence Force with, in most cases, nine years in the Reserve Defence Force. Suitable men may complete twenty-one years service in the Permanent Defence Force. For the Naval Service, enlistment is for six years in the Permanent Defence Force and six years in the Reserve Defence Force. The Naval Service comprises three corvettes and auxiliary vessels. The Defence Estimates for the year ending March 31, 1957, provide for an expenditure of £7,033,450.

FINANCE

	1955-56 (Actual)	1956-57 (Estimated)
Revenue	£111,675,000	£121,791,000
Expenditure	126,281,000	132,791,000

The expenditure figures include certain services regarded as proper to be met from borrowing. Issues for these services in 1955-56 amounted to £14,294,000 and for 1956-57 are estimated at £11,000,000.

The estimated Revenue for 1956-57 includes: Customs, £43,255,000; Special Import Levy, £3,000,000; Excise, £18,265,000; Estate, etc., Duties, £2,850,000; Income Tax, Sur-tax and Super-tax, £45,034,000; Corporation Profits Tax, etc., £3,200,000; Motor Vehicle Duties, £5,750,000; Stamp Duties, £1,875,000; Post Office Services, £7,700,000.

The principal items of estimated Expenditure for

1956-57 are Debt Service, £19,673,000; Agriculture, land division, etc., £14,827,000; Food subsidies, £8,384,000; Army, £7,033,000; Police, £4,019,000; Education, £12,630,000; Social Insurance, £2,446,000; Social Assistance, £18,523,000; Postal Services, £7,200,000; Superannuation, £4,857,000.

The Gross Debt on March 31, 1956, was £326,000,000 with Assets £197,000,000, leaving the net total of the debt at £129,000,000.

RELIGION (Census of 1946)

Catholics.....	2,786,033
Protestant Episcopalians.....	124,829
Presbyterians.....	23,870
Methodists.....	8,355
Others.....	12,020
Total.....	2,955,107

EDUCATION

Primary Education is directed by the State (4,874 schools with an enrolment of 490,157, and average daily attendance 85.6 per cent.). Secondary Education is in private hands and is largely conducted by Religious Orders (458 recognized schools with 56,411 pupils 12-20 years of age). Vocational (Continuation and Technical) Education is conducted by 38 local Committees in 225 permanent schools (including 12 residential schools of domestic training and one day trades preparatory school) and several temporary centres (20,922 whole-time day students and 68,355 other students). There are two Universities in Dublin, of which the National University has 3 constituent colleges (Cork, Galway and Dublin) with 419 Professors, etc., and 5,134 students; and Trinity College, Dublin with 158 Professors, etc., and 1,877 students in the academic year 1953-54. The estimated State expenditure on education in 1954-55, excluding administration and inspection, was Primary £8,262,490; Secondary £1,689,870; Vocational £1,016,230; Science and Art £189,970. The vote for Universities and Colleges for 1954-55 amounted to £568,774, while in addition grants of £76,984 were made in respect of the Faculties of General Agricultural and Dairy Science.

PRODUCTION AND INDUSTRY

Agriculture and Live Stock.—In 1955 there were 1,121,266 acres under corn crops, 593,077 under root and green crops, 1,904 under flax, 11,448 under fruit, and 1,889,221 under hay, a total of 3,616,916 acres. The principal produce in 1955 was: oats, 567,000 tons; wheat, 399,000 tons; barley, 246,000 tons; turnips, 2,247,000 tons; potatoes, 2,114,000 tons; mangolds, 1,260,000 tons; sugar beet, 597,000 tons; and hay, 4,242,000 tons. The Live Stock included 4,483,474 cattle, 3,268,896 sheep, 798,845 pigs, and 296,274 horses.

Minerals.—1,481 persons were employed in the coal mines in 1954 and 202,000 tons of coal won.

Sea Fisheries.—7,614 persons were employed in the fisheries in 1954, the total value of all fish excluding salmon landed being £882,298.

COMMUNICATIONS

Railways.—There were (1955) 2,259 miles of railway of which 2,069 miles are of standard (5 ft. 3 in.) gauge. 17,748,000 passengers and 3,672,653 tons of merchandise were conveyed. The gross receipts (1954) were £18,678,926* and the net loss £415,710.*

* Figures relate to the year ended March 31, 1955 for Córas Iompair Éireann and to the calendar year 1954 for other railways.

These figures include receipts from Road Transport Services, Canals, etc., operated by the Railway Companies.

Road Motor Services.—In 1955 road motor vehicles carried 309,000,000 passengers, the gross receipts being approximately £5,397,000.

Shipping.—In 1955 the number of ships with cargoes and in ballast entered at the various ports, Dublin, Cobh (Queenstown), Dún Laoghaire (Kingstown), Cork, Galway, Waterford, Rosslare, Limerick and Foynes, Dundalk, etc., was 9,852 of 8,987,938 tons, of which 1,720 (1,361,874 tons) were Republic of Ireland flag, and 5,736 (5,212,353 tons) British.

CIVIL AVIATION

Shannon Airport, 15 miles W. of Limerick, on the main transatlantic air route, caters for traffic to and from the U.S.A., Canada, Great Britain and the Continent. A service to and from Dublin is operated daily. In 1955 the transatlantic companies operating through the airport carried 407,622 passengers and 26,943,085 lb. of cargo.

Dublin Airport, situated at Collinstown, 6 miles N. of Dublin, serves the cross-Channel and European services operated by Aer Lingus Teoranta and continental airlines. During 1955 the airport handled 391,618 passengers and 17,921,000 lb. of cargo.

The following private aerodromes are also licensed: Weston, 9 miles W. of Dublin; Dunmore East, 10 miles S.E. of Waterford; Coonagh, 2 miles W. of Limerick; Oranmore, 5 miles E. of Galway; Killarney Racecourse, 1 mile S.W. of Killarney; Rosapenna Strand, 25 miles N. of Letterkenny; Farmers' Cross, 4 miles S.W. of Cork.

* Based on 50 per cent. sample.

† Estimated.

Note.—Deaths exclude fetal death and deaths among armed forces overseas. Birth and death rates for 1950 are based on the population at census of April 1; for other years as estimated on July 1. Birth rates for 1944-46 are based on total population including armed forces overseas. For other years armed forces overseas are excluded.

IMMIGRATION AND EMIGRATION

From 1820 to 1955, 40,413,120 alien immigrants were admitted to the United States. Of the inward total in 1955, 17,849 were born in the United Kingdom; 31,831 in Germany and Austria; 5,345 in Scandinavia; 31,925 in Italy; 4,697 in Poland; and 3,411 in France. The total number of alien immigrants admitted in the year ending June 30,

1955, was 237,790. During the same period 31,245 residents left the United States for permanent residence abroad.

MARRIAGE AND DIVORCE

Laws of marriage and of divorce are within the exclusive jurisdiction of each State. Each State legislature enacts its own laws prescribing rules and qualifications pertaining to marriage and its dissolutions.

Year	Marriages	Per 1,000 Pop.	Estimated Divorces	Per 1,000 Pop.
1944	1,452,000	10.9	400,000	2.9
1945	1,613,000	12.2	485,000	3.5

The total number, including countries not specified, was 10,161,168 in 1950 compared with 11,419,138 in 1940. 1950 figures include a total of 180,024 from all Asian countries, 120,297 from countries in America other than Canada and Mexico and 86,375 from European countries not listed above.

PHYSIOGRAPHY

The Republic occupies nearly all that portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°–49° North and longitude 67°–124° 30' West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line has an estimated length of about 3,561 miles on the Atlantic, 1,872 miles on the Pacific, 2,908 miles on the Gulf of Mexico, and 2,470 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, partly hilly, rolling plain, with a general slope southward, toward the Gulf of Mexico, excepting to the Atlantic, interrupted only by the Appalachian Mountains and the Great Smoky Mountains. Nearly the whole of this plain, from the Rocky Mountains to the Atlantic, is covered by the Mississippi valley, and its immense prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of oak, hickory, maple, chestnut, and other trees, elm, ash, walnut; and in the south, live oak, wax palm, and cypress, exist, the remnants of the forests which formerly covered the country. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, mined chiefly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,495 feet above sea-level, and the lowest point of dry land is in Death Valley, 280 feet below sea-level; these two points are in California, only 86 miles apart. The mean elevation of the 48 States is approximately 2,500 feet.

GOVERNMENT

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 28 were admitted after such organization), and of 2 organized Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleven to twenty-second Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 20, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933 and Feb. 27, 1951), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

THE Executive power is vested in a President, who is elected every four years, and is eligible for re-election to one additional term. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the first Monday after the second Wednesday in December following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the sixth day of January by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects a President, the votes being taken by States, the

representation from each State having one vote. There is also a Vice President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice President end at noon on the 20th day of January of the years in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice President, a statute provides for the succession.

The President must be at least 35 years of age and a native citizen of the United States. He receives a salary of \$100,000 with a taxable expense allowance of \$50,000 and a non-taxable travelling allowance of not exceeding \$40,000. Under the XXIIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT

President of the United States (January 20, 1953, to January 20, 1957), DWIGHT D. EISENHOWER, of New York City, New York, born Oct. 14, 1890, sworn in as President (in succession to Harry S. Truman) Jan. 20, 1953. Republican.

Vice-President, Richard Milhous Nixon, of California, born Jan. 9, 1913, elected Nov. 4, 1952. Republican.

THE CABINET

(Each \$22,500).

Secretary of State, John Foster Dulles, of New York (born Feb. 25, 1888), appointed Jan. 21, 1953.

Secretary of the Treasury, George M. Humphrey, of Ohio (born Mar. 8, 1890), appointed Jan. 21, 1953.

Secretary of Defence, Charles E. Wilson, of Michigan (born July 18, 1890), appointed Jan. 28, 1953.

Attorney-General, Herbert Brownell, Jr., of New York (born Feb. 20, 1904), appointed Jan. 21, 1953.

Postmaster-General, Arthur E. Summerfield, of Michigan (born Mar. 17, 1899), appointed Jan. 21, 1953.

Secretary of the Interior, Fred. A. Seaton of Nebraska (born Dec. 11, 1909), appointed May 29, 1956.

Secretary of Agriculture, Ezra T. Benson, of Utah (born Aug. 4, 1899), appointed Jan. 21, 1953.

Secretary of Commerce, Sinclair Weeks, of Massachusetts (born June 15, 1893), appointed Jan. 21, 1953.

Secretary of Labour, James Paul Mitchell, of New Jersey (born Nov. 12, 1900), appointed Oct. 9, 1953.

Secretary of Health, Education and Welfare, Marion B. Folsom (born 1894), appointed July 13, 1955.

THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 301,164. The Senate consists of 96 members. The salary of a Senator is \$22,500 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 435 Representatives besides a delegate from Alaska, a delegate from Hawaii, and a resident commissioner from Puerto Rico. The salary of a Representative is \$22,500 per annum with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On July 1, 1950, there were 47,860,228 men and 49,556,137 women of voting age, excluding members of the armed forces overseas.

THE EIGHTY-FOURTH CONGRESS

Noon of Jan. 3, 1955, to Noon of Jan. 3, 1957.

<i>President of the Senate</i> , Richard M. Nixon, Calif.	\$30,000
<i>Speaker of the House of Representatives</i> , Sam Rayburn, Tex.	\$30,000
<i>Secretary of the Senate</i> , Felton M. Johnson, Miss.	

Clerk of the House of Representatives, Ralph R. Roberts, Ind.

Members of the 84th Congress were elected on Nov. 2, 1954.

The 84th Congress is constituted as follows:

Senate.—Democrats 49, Republicans 47. Total 96.

House of Representatives.—Democrats 232, Republicans 203. Total 435.

LIBRARY OF CONGRESS

(National Library)

Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, Congress purchased Thomas Jefferson's library of some 6,000 volumes as the basis for a new collection, which was partially destroyed by fire in 1851. Since that date increased (1) by regular annual appropriations by Congress; (2) by deposits under the copyright law; (3) by gifts and exchanges. The collection is the largest in the Western Hemisphere and one of the largest in the world. Exclusive of unbound newspapers and parts of serials awaiting binding, its collections contained, on June 30, 19 6, more than 35,000,000 items. These included about 10,800,000 volumes and pamphlets; 155,900 bound newspaper volumes; 15,100,000 manuscript; 2,200,000 maps and views; 20,000 microcards; 121, 00 reels and strips of microfilm; 115,800 reels of motion pictures; 2,084,000 volumes and pieces of music; 464,000 phonograph records; 2,637,000 photographic negatives, prints and slides;

583,200 fine prints, 70,000 microprint cards, and other materials such as broadsides, photostats, posters and miscellaneous items. The main building was first occupied in 1897. Considerable additions, including an Annex completed in 1939, have brought the total cost to approximately \$18,880,000 and the floor space to 1,563,189 square feet (nearly 36 acres), with more than 250 miles of shelving. During the fiscal year 1956, \$15,614,400 was available for use by the Library. Of this sum \$10,260,508 was appropriated directly by Congress; \$3,517,896 was transferred from other Government agencies and \$1,066,879 was derived from gifts. During the fiscal year 1956, the Library registered copyright claims for 224,908 works and received \$881,612 in copyright fees. It also received more than \$1,044,000 in payment for over 24,600,000 catalogue cards sold to approximately 10,000 subscribers. These funds are transferred to the U.S. Treasury. As the national library, the Library of Congress serves other Government agencies, other libraries throughout the world, scholars, and the general public as well as the Congress. In addition to providing reference service on the materials in its collections and publishing catalogues and other guides, the Library administers a national programme to provide books for the blind, sponsors music concerts, literary readings and other cultural affairs, and participates in international professional and cultural activities.

Librarian of Congress, L. Quincy Mumford.
Chief Assistant Librarian, Verner W. Clapp.
Deputy Chief Assistant Librarian, Lucile M. Morsch.
Assistant Librarian for the American Collections, David C. Mearns.

Director, Administrative Department, Robert C. Gooch.

Director, Legislative Reference Service, Ernest S. Griffith.

Director, Manuscript Division, H. Cronin.
Director, Rare Book Division, W. Adkinson.

Register of Copyrights, Arthur Fisher.

THE SMITHSONIAN INSTITUTION

The Mall, Washington, 25 D.C.

Secretary, Leonard Carmichael.
Assistant Secretaries, J. E. Graf; J. L. Keddy.
Administrative Assistant, L. M. Pearson.
Treasurer, T. F. Clark.
Chief, Editorial and Publications Division, P. H. Ochsner.
Librarian, Leila F. Clark.

Board of Regents

Chancellor, The Chief Justice of the U.S.
Chairman, Executive Committee, R. V. Fleming.

Bureaux of the Smithsonian Institution

National Museum

Director, A. Remington Kellogg.
Assistant Director, F. A. Taylor.
Head Curators, F. M. Setzler; W. L. Schmitt;
 J. R. Swallen; G. A. Cooper; R. P. Multhaupt
 (acting); M. L. Peterson (acting).

Bureau of American Ethnology

Director, M. W. Stirling.
Director, River Basin Surveys, F. H. H. Roberts, Jr.

Astrophysical Observatory

Director, Fred L. Whipple.
Chief, Radiation and Organisms, R. B. Withrow.

National Gallery of Art

Director, John Walker.
Administrator, Ernest R. Feidler.
Secretary-Treasurer and General Counsel, Huntington Cairns.
Chief Curator (vacant).

National Collection of Fine Arts
Director, Thomas M. Beggs.

Freer Gallery of Art
Director, A. G. Wenley.
Assistant Director, John A. Pope.

National Zoological Park
Director, William M. Mann.
Asst. Director, E. P. Walker.

International Exchange Service
Chief, Dan G. Williams.

National Air Museum
Head Curator, Paul E. Garber.

Canal Zone Biological Area
Resident Naturalist, Carl B. Koford.

NATIONAL COMMISSION OF FINE ARTS

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress May 17, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings and public parks, within the D.C. An expenditure not exceeding \$35,000 in any one year is authorized by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, David E. Finley.
Members, Felix W. de Weldon; Wallace K. Harrison; Emily L. Muir; Douglas W. Orr; Elbert Peets; William G. Perry.
Secretary and Administrative Officer, L. R. Wilson.

THE JUDICATURE

The Federal Judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the decisions of the highest Courts of the States. (2) The United States Courts of Appeals, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The 93 District Courts, served by 199 District Court Judges.

THE SUPREME COURT

(U.S. Supreme Court Building, Washington, D.C.)
Chief Justice, Earl Warren, Cal., born March 29, 1891, appointed Sept. 30, 1953. \$35,500

Associate Justices (each \$35,000)

Reporter, Walter Wyatt.

DEFENCE

Department of Defence.

Secretary of Defence (in the Cabinet), Charles E. Wilson (Jan. 26, 1953).

Secretary of the Army (not in the Cabinet), Wilbur M. Brucker.

Secretary of the Navy (not in the Cabinet), Charles S. Thomas.

Secretary of the Air Force (not in the Cabinet), Donald A. Quarles.

Army.—The Army of U.S. had a strength of 8,291,336 on V.E. Day, reduced by June 30, 1950, to 591,700 (excluding Air Corps). The strength on March 31, 1956, was 1,067,407.

Navy.—The peak strength of the Navy (including Marine Corps) in the summer of 1945 was 3,855,497. The strength on June 30, 1950, was 454,800, and on March 31, 1956, it was 873,994.

Air.—The U.S. Air Force was formerly the Army Air Corps and directly under command of the War Department. In 1947 an independent Department of the Air Force was established under a Secretary of the Air Force. The Navy and Marine Corps retained separate air organizations. Strength of the Air Force (March 31, 1956), 910,600.

CAPITAL OF THE U.S.

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital *Washington* and in 1793 the foundation-stone of the Capitol building was laid. In 1800 the seat of government was removed to Washington, which was chartered as a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the *District of Columbia* (with which the City of Washington is considered co-extensive) is 69.245 square miles, with a population at the Census of 1950 of 802,178.

The District of Columbia is ruled directly by the President and Congress through a Board of Commissioners appointed by the President, one being chosen from the Engineer Corps of the United States Army and two from civil life.

The City of Washington, the Capital of the United States, is considered co-extensive with the District of Columbia. It is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 107 miles from Chesapeake Bay and 186 from the Atlantic Ocean.

EDUCATION

State School Systems

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 16 years of age, and those from 14 to 16 must attend school or be lawfully employed. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the *truant or attendance officers*.

In 1954 the total number of children in the United States of 5 to 17 years of age was 34,540,000, of whom 28,836,000 were enrolled in public elementary and secondary schools. The average daily attendance in the public schools was 25,644,000, the average length of school term was 178.6 days, and the average number of days attended by each pupil enrolled was 158.9 days. In 1953-54, 1,032,138 teachers (253,518 men and 778,620 women) were employed. The average annual salary of all teachers was \$3,825.

The total revenue receipts for school purposes, excluding balances on hand, was \$7,866,853,000. Of this amount, \$355,237,000 was received from Federal sources, \$2,944,103,000 from State sources and \$4,567,512,000 from county and local sources. Current expenditure was \$6,883,387,000. This figure comprises administration, \$310,995,000; instruction, \$4,552,349,000; operation and maintenance of plant, \$907,542,000; other current expenditure, \$1,112,561,000. In addition, \$2,055,178,000 was expended for sites, buildings, furniture and equipment; \$153,884,000 for interest; and \$43,723,000 for adult and summer schools.

Institutions of Higher Education

In the autumn of 1955 enrolment in institutions of higher education numbered 2,720,929.

Institutions of higher education include uni-

versities, colleges, professional schools, teachers' colleges and normal schools, and junior colleges. The 1955 survey of enrolments covered 1,858 institutions classified as follows: 1,161 universities, colleges and professional schools enrolling 2,125,557 students; 192 teachers' colleges enrolling 243,652 students and 505 junior colleges enrolling 351,720 students. There are 98 institutions of higher education attended predominately by Negroes, enrolling 74,114 students included in the foregoing figures.

During the school year 1954-55, 287,401 bachelor's degrees were conferred, 183,602 to men and 103,799 to women; 58,204 masters' degrees, 38,740 to men and 19,464 to women; and 8,840 doctor's degrees, 8,014 to men and 826 to women. Education, Business and Commerce, and Engineering, were, in that order, the fields in which most students received baccalaureate degrees. There were 53,254 bachelor's degrees in Education, 41,655 in Business and Commerce, and 22,589 in Engineering. The three leading fields of study for the master's degree were Education (27,620), Engineering (4,484) and Business and Commerce (3,336). The most popular fields of study on the doctorate level were Education (1,470), Chemistry (1,005) and Psychology (688).

Particulars of some of the Universities are: Harvard (10,406 students, including 346 women, in 1955), founded at Cambridge, Mass., on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; Yale (7,456 students, including 583 women, in 1955), founded at New Haven, Connecticut, in 1701; Bowdoin, Brunswick, Me. (founded 1794); Brown, Providence, R.I. (founded 1764; 3,570 students, including 954 women, in 1955); Columbia, New York, N.Y. (founded 1754; 25,807

students, including 9,408 women, in 1955); Cornell (founded at Ithaca, N.Y., 1865; 10,265 students, including 2,532 women, in 1955); Dartmouth, Hanover, N.H. (founded 1769; 3,007 students in 1955); Georgetown, Washington, D.C. (founded 1789; 5,657 students in 1955); North Carolina, Chapel Hill, N.C. (founded in 1789; 6,630 students, including 1,219 women, in 1955); Pennsylvania, Philadelphia, Pa. (founded 1740; 15,570 students, including 3,561 women, in 1955); Pittsburgh, Pittsburgh, Pa. (founded 1787); 17,287 students, including 4,724 women in 1955); Princeton, Princeton, N.J. (founded 1746); Tennessee, Knoxville, Tenn. (founded 1794; 9,843 students, including 2,741 women, in 1955); William and Mary, Williamsburg, Va. (founded 1693); New York University, founded in 1831 at New York, had 31,867 students, including 7,610 women, in 1955.

Private Schools and Colleges

In 1953-54 there were 3,592,000 pupils in private kindergarten and elementary schools, 747,300 pupils in private high schools and academies,

45,700 pupils in elementary and secondary departments of private universities and colleges, and 1,160,219 students in privately controlled institutions of higher education. In addition, there were 10,100 pupils enrolled in privately controlled elementary and secondary schools for exceptional children.

PUBLIC DEBT

On June 30, 1955, the *Federal Public Debt* of the United States stood at \$274,374,000,000; the level at the end of fiscal year 1954 was \$271,600,000,000.

COST OF LIVING IN U.S.A.

The Consumer Price Index (for city wage-earner and clerical worker families in 46 cities representative of all cities in the United States) showed a monthly average during the calendar year 1955 of 114.5 (the basic figure of 100 being the 1947-49 average). During each of the first two months of 1956, the average of consumer prices was 114.6; for March, 1956, 114.7; and for April, 1956, 114.9.

According to figures prepared by the Bureau of Labour Statistics, the index of consumer prices (all items) fluctuated within the range of 114.2 and 115.0 during the calendar year 1955, displaying its greatest stability since monthly pricing of all items was initiated in 1940 (the average for the years 1947-49=100). In broad terms, service items increased while commodities, especially foods, declined on the average. Food declined from 110.6 to 109.5, transportation from 127.6 to 127.3, and reading and recreation from 106.9 to 106.8. On the other hand, medical care rose from 126.5 to 130.2, personal care from 113.7 to 117.9, rent from 129.5 to 131.1, and apparel from 103.3 to 104.7. During the first four months of 1956, the consumer price index for all items rose from 114.6 to 114.9. Transportation decreased from 126.8 to 126.4. All other major groups increased; apparel from 104.1 to 104.8, food from 109.2 to 109.6, rent from 131.4 to 131.7, medical care from 130.7 to 131.6, personal care from 118.5

to 119.5, and reading and recreation from 107.3 to 108.2.

The wholesale price index showed a monthly average during 1954 of 110.3 (the average for the years 1947-49=100). The monthly average rose to 110.7 in 1955 and rose further to 114.3 in May, 1956. Wholesale prices for farm products declined from 95.6 in 1954 to 89.6 in 1955, but rose to 90.9 in May, 1956. Industrial prices rose from 114.5 in 1954 to 117.0 in 1955 and further to 121.7 in May, 1956.

PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose from \$287.6 billion in 1954 to \$303.2 billion in 1955. Increases were registered in this period in most types of income: labour income rose by \$12.7 billion, business and professional income by \$1.4 billion, dividends by \$1.2 billion, interest income by \$0.9 billion, and transfer payments by \$1.0 billion. Farm proprietors' income declined by \$1.0 billion. Preliminary estimates for April, 1956 (seasonally adjusted annual rate) showed personal income at \$317.1 billion, an increase of \$13.9 billion over the 1955 level. Most of this increase was in labour income which went from \$215.5 billion in 1955 to \$226.0 billion in April, 1956, an increase of \$10.5 billion. Personal interest income rose from \$15.6 billion in 1955 to \$17.1 billion in April, 1956, and transfer payments rose from \$17.2 billion in 1955 to \$18.2 billion in April, 1956. All other types of personal income, except farm proprietors' income, also rose from 1955 to April, 1956. Farm proprietors' income declined from \$11.0 billion in 1955 to \$10.7 billion in April, 1956.

PRODUCTION

AGRICULTURE AND LIVE STOCK

Agriculture.—The total land surface, excluding island possessions and Alaska, is 1,903,824,640 acres, of which about 61 per cent. is in farms. The total number of farms in 1954 (1954 Census of Agriculture) was 4,782,393. The cash income from crops in 1949 was \$12,460,000,000; in 1950, \$12,360,000,000; in 1951, \$13,239,000,000; in 1952, \$14,258,000,000; in 1953, \$14,035,000,000; in 1954, \$16,271,000,000; and in 1955, \$15,837,000,000. Cash income from livestock and livestock products, in 1949, \$15,404,000,000; in 1950, \$16,073,000,000; in 1951, \$19,622,000,000; in 1954, \$13,443,000,000; and in 1955, \$13,427,000,000.

Livestock and poultry on farms and ranches showed a net increase of 2 per cent. during 1955. The total for January 1, 1956 was 7 per cent. below the peak of January 1, 1944. The aggregate increase during the past year resulted from a substantial increase in hog numbers and a small increase in cattle. Chickens, turkeys, sheep, lambs, horses and mules were less than a year before.

Crop production in 1955 almost equalled the 1948 record and considerably surpassed the total for any of the past six years. Production was generally good, crop by crop and area by area, with some notable exceptions. The combined acreage of principal crops harvested was the smallest since 1940 but generally high yields per acre more than offset acreage reductions. The indexes used are based on 1947-49 averages which are represented at 100. Using this standard, the 1955 total production of all crops was 105.4. This is only slightly below the 1948 peak of 106. The index of over-all yield was 117 per cent. of the 1947-49 base, which was easily a record figure. The previous record yield year was 1948 with an index of 107.8, followed closely by 1954 and 1953. The

1955 yield index for 18 principal field crops as a group reached 117.5, far surpassing any other year.

RECLAMATION

Bureau of Reclamation, Interior Department, Interior Building, 18th and 19th Streets (between C and E streets), N.W., Washington, D.C. Commissioner, Wilbur A. Dextheimer.

The Bureau of Reclamation constructs and operates irrigation, power and other multiple-purpose projects in the area west of the 97th meridian and is the Federal agency with principal responsibility for water conservation in this region. Almost 7,000,000 acres of lands in the arid and semi-arid west can be irrigated by works constructed by the Bureau. In June, 1953, the Bureau had in operation, under construction or authorized 87 irrigation and multiple-purpose projects. Among these is the *Missouri River Basin project*, with more than 250 units, authorized by the Flood Control Acts of 1944 and 1946. Seventy-five projects, or divisions of projects, are producing food supplies and electric energy and furnishing municipal-industrial water. Farmers on Bureau or Reclamation projects in 1954 produced 23,606,417 tons of food and forage crops, valued at \$935,679,755.

136 storage dams have been completed or are under construction on Reclamation projects. Four

of them are the four largest concrete structures in the world.

Grand Coulee Dam, on the Columbia River in the State of Washington, the largest concrete structure in the world by volume (10,585,000 cubic yards), and with the greatest hydro-electric power-plant capacity, began operating in March, 1941; its installed capacity is 1,974,000 kW. The dam will provide storage for the ultimate irrigation of 1,029,000 acres in the Columbia Basin project.

Hoover Dam (Arizona and Nevada), on the Colorado River, is the highest dam in the world (726 ft.), and has an operating power plant with a capacity of 1,249,800 kW., and an ultimate capacity of 1,332,300 kW.

Shasta Dam (602 ft.), on the Sacramento River in California, is the world's second highest. It was completed in 1944, and the power plant has a rated capacity of 793,000 kW.

Hungry Horse Dam, virtually completed in 1952, on the Flathead River in Montana is 565 ft. high, the third highest in the world. It will have an ultimate power capacity of 285,000 kW.

MINERALS

The value of mineral production in continental United States in 1954 totalled an estimated

\$15.8 billion. The comparable value for 1953 was \$14.4 billion and for 1952 \$13.4 billion (revised figures).

Nearly three-quarters of the mineral production of the United States (in value) consists of fuels.

In 1954 U.S. production of crude petroleum amounted to 2,315 million barrels, a reduction of 1.8 per cent. on a daily average basis over that of 1953. 29,773 new oil wells were drilled by the industry during the year.

Bituminous coal and lignite produced in 1955 totalled 470,000,000 tons, 19.9 per cent. less than in 1954.

MANUFACTURES

The leading 5 States according to value added by manufacture in the 1954 Annual Survey were: New York (\$14,149,000,000), Ohio (\$10,154,000,000), Pennsylvania (\$9,940,000,000), Illinois (\$9,642,000,000) and Michigan (\$8,734,000,000).

The average number of employees in 1954 for the United States as a whole was 16,135,000, salaries and wages totalling \$66,011,000,000. The value added by manufacture (value of output less cost of materials and supplies) was \$116,001,000,000.

INDUSTRIAL DIVISIONS, 1954

LABOUR IN THE UNITED STATES

Organized Labour.—On December 2, 1955, the American Federation of Labour (AFL), founded in 1881, and the Congress of International Organizations (CIO), formally established in 1938, merged into an organization called the American Federation of Labour and Congress of Industrial Organization. The combined membership is 16,100,000 (including 933,000 members in Canada). There are also 1,800,000 members of unions not affiliated to the AFL-CIO.

Approximately one-third of the non-agricultural labour force of the United States is estimated to be organized.

Work Stoppages.—There were 4,320 stoppages recorded in 1955, involving 2,650,000 workers and 28,200,000 man-days of idleness. The number of work stoppages beginning in the year was about 25 per cent. greater than in 1954 but was substantially below post-war peaks. Similarly, the number of workers involved and amount of idleness also exceeded 1954, although idleness remained below all post-war years except 1951 and 1954. Idleness in 1955 amounted to 0.26 per cent. of estimated working time of all workers, a proportion substantially lower than the post-war average.

Employment and Unemployment.—The civilian labour force (working population) was 67,846,000 in May, 1956. This includes self-employed, wage and salary-earners, employed and unemployed. Unemployment was estimated at 2,650,000 (3.8 per cent.). In addition there were 1,069,000 temporarily stopped, and 9,537,000 working fewer than 35 hours a week.

Wages.—Average weekly earnings by industry ranged from \$120.90 per week in electrical work to \$41.30 in laundries. The average for all

manufacturing was \$78.78 in March 1956, a three-fold increase since 1939 but in terms of 1947-49 purchasing power, the increase was 1½ times.

March 1956	Average Weekly Earnings	Hours Per Week	Average Hourly Earnings
Manufacturing.....	\$78.78	40.4	1.95
Durable.....	84.46	41.0	2.06
Non-durable.....	70.49	39.6	1.78
Coal Mining:			
Anthracite.....	71.32	28.3	2.52
Bituminous.....	102.38	38.2	2.68
Building construction	94.88	35.9	2.63
Gas and Electricity..	89.19	41.1	2.17
Wholesale trade....	80.20	40.3	1.99
Retail trade.....	59.14	38.4	1.54
(except eating and drinking places)			
Laundries.....	41.30	40.1	1.03

A minimum wages of \$1 an hour is set by federal law for employees engaged in interstate commerce or in the production of goods for interstate commerce, or in activities directly essential to such production. The act requires time and a half for all hours over 40 a week. While national averages by industry are generally above the minimum, rates in some occupations are close to the minimum.

In addition to cash wages, most workers receive some type of "fringe" benefits—the most common forms being paid vacations, and public holidays, various types of insurance and health funds financed by the employer or by employer and employees jointly.

Wages and price controls, initiated after the outbreak of war in Korea, were ended in 1953.

INDIAN POPULATION

On Jan. 1, 1950, the enumerated and estimated Indian population of the United States, exclusive of Alaska, was 421,600. There are many persons of Indian blood who are not enrolled with any recognized tribe, have no rights in tribal property and receive no services from the Government. The States with the largest resident Indian population are: Arizona, 55,600; Oklahoma, 53,500; New Mexico, 35,400; South Dakota, 19,600; Montana, 13,500.

POSTS, TELEGRAPHS AND TELEPHONES

On June 30, 1955, there were 37,863 post offices in the U.S. handling 55,233,563,647 "pieces" of mail matter. The postal revenue was \$2,375,790,772, and the expenditure \$2,738,464,424 for the fiscal year of 1955. The telegraphs and telephones are operated by private companies.

On June 30, 1955, the postal savings deposits amounted to \$2,007,996,458, a decrease of \$243,422,779 since June 30, 1954.

GOVERNMENT PRINTING OFFICE

North Capitol and H. Streets, Washington, D.C.

The Office was established by Congress in 1860 and has been in continuous operation from that time. It carries out all the printing and binding ordered by Congress and the departments, independent establishments and agencies of the Federal Government, and provides them with stationery. It also distributes Government publications as required by law, maintains the necessary catalogues and a library of these publications, and prints for sale to the public such documents as are not confidential.

Public Printer, Raymond Blattenberger, N.J., \$15,000.

WEIGHTS, MEASURES AND CURRENCY

The *Weights and Measures* in the United States in common use are of British origin and in many cases are the same as those now employed in Great Britain. The short ton of 2,000 pounds (20 hundred weight of 100 pounds each) is generally used instead of the long ton of 2,240 pounds. The old "Winchester" bushel and the wine gallon and their subdivisions are used instead of the British Imperial units of capacity; 1 U.S. bushel = 0.680 British bushel, and 1 U.S. gallon = 0.83268 British gallon. The U.S. liquid quart is divided into 32 fluid ounces. The Metric System of Weights and Measures is permissive, but is not extensively used except in scientific work. The unit of currency is the dollar of 100 cents. The rate of exchange with sterling will be found on p. 84.

ROADS

On January 1, 1954, there were 3,395,000 miles of roads and streets in the United States, of which 3,030,000 miles were in rural areas and 365,000 miles were in urban areas. Surfaced roads and streets account for 2,228,000 miles of the total; 1,167,000 miles are unimproved and graded and drained. State primary roads, including extensions in urban areas, total 420,000 miles (413,000 surfaced). Other roads under State control total 228,000 miles (187,000 surfaced); 2,655,000 miles are under local control (1,606,000 surfaced); and 92,000 miles (22,000 surfaced) are under Federal control.

An estimated total of \$7,405,000,000 was spent in 1955 for roads and streets in the United States. Of this total \$1,893,000,000 was spent for State highways, \$1,346,000,000 was spent for county and local rural roads, \$1,088,000,000 was spent for city streets, and \$78,000,000 was spent on roads in Federal areas. Capital outlay accounted for 65.1 per cent. of the total expenditures; 25.1 per cent. was spent for maintenance; 4.2 per cent. for administration; 1.7 per cent. for highway police; and 3.9 per cent. for interest on highway bonds.

Motor Vehicles and Taxation.—The number of motor vehicles registered in 1955 in the United States was 62,760,395, an increase of 7.2 per cent. over the 1954 total of 58,563,250. In 1941 the registrations in the U.S.A. were 34,894,134. The State Governments received \$1,468,554,000 in 1941 and \$4,025,693,000 in 1955, respectively, from motor-fuel, motor-vehicle and motor-carrier taxes. In 1955 the Federal Government received \$2,866,908,000 from excise taxes on motor vehicles and parts, tyres and tubes, gasoline, diesel and special fuels and lubricating oil.

Accidents.—In 1955 there were 38,300 deaths and over 1,350,000 injuries caused by motor vehicle accidents. The death rate per 100,000,000 miles of travel was 6.4 in 1955, a slight increase from the 1954 rate of 6.3.

SHIPPING

The active ocean-going Merchant Marine of the U.S. on June 1, 1956, consisted of 1,085 vessels of 1,000 gross tons and over, of which 1,037 were privately owned and 48 were government-owned ships under charter or general agency agreement with private companies. There were 2,074 government-owned vessels in the reserve fleets. Of the active vessels, 713 were dry cargo ships, 39 were combination passenger and cargo, and 333 were tankers.

AIR TRANSPORT

United States domestic and international scheduled airlines in 1955 were estimated to have carried 41,623,000 passengers 24,340,000,000 passenger miles. Mail carried by air during 1955 totalled approximately 241,800,000 pounds, compared with 270,000 pounds in 1926, when a mail service was first provided by private contractors. The combined express and freight flown by the scheduled airliners during 1955 totalled 326,324,000 ton-miles.

Domestic air coach or tourist service is becoming increasingly popular in the United States. During 1955, scheduled domestic airlines flew 6,662,529,000 air coach passenger miles, an increase of more than 25 per cent. over the 1954 total.

Seven principal classes of commercial air carriers can be distinguished in the United States, (a) The Domestic Trunk Lines (12); (b) Local Service Lines, operating the low-density traffic routes between the smaller traffic centres and between small and large centres (13); (c) The International and Overseas Group, including all U.S. flag air carriers authorized to operate between the U.S.A. and foreign countries, between foreign countries and into Mexico and the Caribbean (18); (d) Territorial Air Carriers, operating in Hawaii (2) and in Alaska (12); other less important classes are (e) Certificated All Cargo Lines (6); (f) Helicopter Airmail Operators (3); and (g) Non-Certificated Air Carriers, including irregular transport carriers, air taxi operators, air freight forwarders and Alaskan pilot-owners and air carriers (1,653).

548 stations of the United States are served by domestic trunk and local service airlines and 6,927 airports of all classes are in use, including 363 military. In 1955, 90,077 persons were employed by all domestic airlines and 24,838 by all international airlines.

AIR STATISTICS, 1955

	Domestic Trunk Lines	Local Service Airlines	Territorial Airlines	International Airlines

STATE AND LOCAL GOVERNMENT

State Government

Each State has a constitution drafted to suit its own problems. States vary greatly in size, population and character but there are no important variations in the form of government organization. Like the National Government, State governments have three branches, legislative, executive and judicial.

State Legislatures.—With one exception, State legislatures consist of two Houses, a Senate and a House of Representatives; Nebraska has a single legislative body. The basis of representation in both Senate and House is the county, counties being combined or divided into districts which return one Senator and one or more Representatives. With a few variations, Senators serve for four and Representatives for two years. Generally the two houses meet in the State capital for a legislative session every two years; in a few States they meet annually; the legislature of Alabama meets only once in every four years.

Most of the business of the State legislature is carried on by committees. A bill, introduced either in the Senate or the House of Representatives, is first considered by a committee of the same house. Public hearings are usually held by committees at which representations may be made by opponents and supporters of the measure. If the committee approves the bill it makes a report to the house, when the bill may be further debated before a vote is taken. When passed by one house it is sent to the other where treatment is much the same. A bill which has been changed by the second house is sent to a "conference committee" of both houses for adjustment and if this is successful the bill is voted on favourably by both houses and sent to the governor for signature when it becomes law. Failing a report by the committee, a bill is not considered by the legislature unless a majority of the house votes for consideration without a committee report. In every State except North Carolina the governor may veto a bill and, ordinarily, prevent it from becoming law. The legislators have a right to vote again on a bill to decide whether it shall become law without the governor's approval; in some cases a two-thirds majority is required.

State Executives.—The chief executive of the State is the governor, who is elected by popular vote for a two year or, in about half the States, a four year term. His powers are outlined in the State constitution. The governor may advise the legislature on new laws which he considers necessary and may call special sessions of the legislature to consider such laws. He appoints members of many boards and commissions, subject in some cases to Senate approval. He is head of the National Guard of his State and may use it to keep order if need arises. The governor may pardon persons convicted of crimes by the State courts or reduce sentences. Elected with the governor is a lieutenant governor whose regular duty it is to preside over the Senate and who succeeds if the governor dies or is removed from office.

Other important officers of the executive are the Secretary of State, whose duties concern the official records of the State, publication of the State laws and elections; the attorney-general, chief law officer of the State; the State auditor or comptroller and the State treasurer. There are also many departments and commissions such as labour boards, boards of health, banking commissions and highway commissions. In some States the governor has a considerable control over the work of the other State officials and in others little or none. A civil

service system, intended to put much of the work of government offices into the hands of qualified workers not subject to political control and change, has been adopted by some States.

State Courts.—The simplest form of State court is usually presided over by a justice of the peace and hears minor civil and criminal cases. In large cities this work is done by police courts or special municipal courts. More important cases are dealt with in district courts, superior courts, circuit courts or common pleas courts, all dealing usually with both civil and criminal matters. Supreme courts of States deal largely with appeals and references from lower courts. Some States have a large number of special courts such as probate, children's, domestic relations and small debts courts. Judges, usually elected (but in some States appointed by the Governor or by the State legislature) preside over all trials. Many of the court practices in the United States have come from the English courts.

Local Government

Cities.—There is a number of different forms of government organization. Usually there is an elected central council with a mayor or manager to act as head of the organization. The three main forms of city government are (1) *The mayor-council plan.* The oldest type of city government, this compares with National and State organizations. The mayor is elected and usually appoints the heads of departments and many other officers, sometimes subject to the council's confirmation. He may sign or veto city ordinances and in general is responsible for putting them into effect. The mayor may also be required to produce a budget. The council passes the city laws which must not violate the city charter or conflict with State or National laws or constitutions. (2) *The commission form of government.* Three or more commissioners are elected from the city as a whole, rather than from districts or wards, and are given both law-making and law-enforcing powers. One of the commissioners is chairman and is usually called the mayor although his powers may be no greater than those of the other commissioners. Each commissioner supervises the work of one or more of the departments and is responsible for them. (3) *The City-Manager plan.* A small elected council makes city ordinances and decides general policy. It appoints a professional administrator as city-manager. The city manager appoints the heads of departments and some of the other officers; he advises the council on the needs of the city; suggests plans for finance and city improvements and enforces city ordinances. In most cases he holds office as long as the council is satisfied with his work.

County and other Local Governments.—The county, a subdivision of the State usually containing two or more townships and a number of villages, is administered by a board of commissioners or supervisors elected by the voters of the entire county. In recent years a number of counties have appointed County Managers to be responsible to a small board for the county government as a whole. In many townships, officials such as justices of the peace, constables and road supervisors are elected. The voters of some New England townships meet once a year and make their own laws on purely local matters, fix rates, decide how the money is to be spent and elect officials. Village or town government is usually in the hands of a council of elected members and some villages elect a president or mayor and employ local officials.

		1890, Oct. 14	1953

† Died in office. § Assassinated. (a) Elected as Vice-President.

‡ Re-elected Nov. 5, 1940, the first case of a third term; re-elected for a fourth term Nov. 7, 1944.

TERRITORIES AND PRINCIPAL ISLAND POSSESSIONS OF THE UNITED STATES

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: the Territory of Alaska (which includes all of the Aleutian Islands east of longitude 167° east of Greenwich); the Territory of Hawaii (including Ocean or Kure Island, and Palmyra Island); Kingman Reef (about 1 sq. mile); Johnston (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Canton and Enderbury Islands (jointly administered with Great Britain); Midway Islands; Wake Island; Guam; Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other Islands of the Samoan group east of longitude 171° west of Greenwich together with Swains Island); the Commonwealth of Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

The Canal Zone is under the jurisdiction of the United States.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and a population of 64,000 in 1955. Nine individual languages are spoken in the Territory. Copra is the only export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently

embodied in Sections 5570-5578 of the Revised Statutes, are considered as appertaining to the United States. Responsibility for territorial affairs generally is centred in the Office of Territories, Dept. of the Interior, Washington, D.C.

HAWAII

The Hawaiian (or Sandwich) Islands form a Territory of the U.S. and consist of a chain of 24 (named) islands in the N. Pacific Ocean between 18° 55'—22° 15' N. lat. and 154° 4'—160° 30' W. long. Of the 24 islands 9 are inhabited. The total area is 6,435 sq. miles.

For Administrative purposes the Territory of Hawaii is divided into four counties. The county of Honolulu comprises the island of Oahu and all other areas not falling within the other three counties. The other counties are Hawaii, including the island of that name; Maui, including the islands of Maui, Kahoolawe, Lanai and all of Molokai except the leper settlement; and Kauai, including the islands of Kauai and Niihau. The leper settlement on Molokai (where Father Damien worked from 1873-1889) constitutes a fifth "county", Kalawao, which is under the control of the Territorial Board of Health. The estimated population of the Territory of Hawaii on July 1, 1953, was:—

County	Pop.
City and County of Honolulu..	335,054
County of Hawaii.....	62,894
Counties of Maui and Kalawao..	45,666
County of Kauai.....	29,600
Total.....	473,214

The islands were discovered by Capt. James Cook, R.N., in 1778 (he was killed there in 1779) and formed a kingdom under native rulers until Queen Liliuokalani was driven from the throne in 1893, a republic being proclaimed in 1894. In 1898 the group was annexed by the U.S., being organized as a Territory on June 14, 1900. The Governor is appointed by the President of the U.S. There is a Senate of 15 and House of Representatives of 30 members, the Territory sending an elected Delegate to Congress at Washington, D.C.

The majority of native Hawaiians are Christians. School attendance is compulsory for all children, 6 to 16 years of age. Kindergarten work is offered to 5-year-old children. The University of Hawaii (founded 1907) has an enrolment of 6,345.

The group is of volcanic origin and contains many craters, Haleakala on Maui being the largest in the world. Kilauea and Mauna Loa, on Hawaii, are active volcanoes, with Mauna Kea (13,823 ft. above mean sea level) extinct. The islands are very fertile, and rice, cane sugar, pineapples, coffee, bananas and other tropical and sub-tropical products are abundantly grown.

The U.S. Government maintains large military bases on the island of Oahu, including an important naval base at Pearl Harbour.

Governor, Samuel W. King \$15,000
Territorial Secretary, Farrant L. Turner.

CAPITAL, Ψ Honolulu, on the island of Oahu, population (1953), 241,627. Ψ Hilo, on the island of Hawaii, has a population of 25,128.

CANTON AND ENDERBURY

Under the Anglo-American Pact of Aug. 10, 1938, Canton and Enderbury (of the Phoenix Island Group in the Central Pacific) were declared to be for the common use of Gt. Britain and U.S.A. for aviation and communications. The islands are about midway between Hawaii and Australia.

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

GUAM

Guam, the largest of the Ladrone or Mariana Islands in the North Pacific Ocean, lies in 13° 26' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 217 square miles, with a population of 68,900 (1955), of whom 30,800 are Guamanians. The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec., 1941, but was recaptured and occupied throughout by U.S. forces before the end of August, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has statutory powers of self-government, and Guamanians are United States citizens. A governor is appointed for a four-year term. A 21-member

unicameral legislature is elected biennially. There is also a District Court of Guam, with original jurisdiction in cases under federal law.

Governor (vacant).

Secretary, William T. Corbett.

CAPITAL, Agaña. Port of entry, Ψ Apra.

WAKE AND MIDWAY ISLANDS

Wake Island, annexed in 1898, has an area of about 1 sq. mile and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. Wake Island was occupied by Japanese Dec. 27, 1941; it was re-occupied by U.S. on Sept. 15, 1945.

Midway Islands, with a total area of 22 sq. miles and a population (1940) of 437, lie in the N. Pacific about 1,300 miles from Hawaii. There is no indigenous population. The group is under the jurisdiction of the U.S. Navy.

PUERTO RICO

Puerto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50'–18° 30' N. lat. and 65° 30'–67° 15' W. long., with a total area of 3,435 square miles and a population of 2,210,703 at the census of 1950. Three-fourths of the population are of Spanish descent and about one-fourth coloured. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,399 miles distant from New York, and 963 miles from Key West. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, and yams are also grown. The trade is principally with the U.S. About 320 miles of railroad were in operation in June, 1940, and there are good harbours at San Juan and Ponce. The Constitution recently approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local self-government. Legislation functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 27 members (2 from each of 8 senatorial districts and 11 at large) and the House of Representatives of 51 members (1 from each of 40 representative districts and 11 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for a term of 4 years. A Supreme Court of 5 members is appointed by the Governor, with the advice and consent of the Senate. There are 8 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. The Governor appoints all inferior judges. Puerto Rico is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but not a vote. Great improvement has been made in the progress and welfare of the island during the present century—it is self-supporting, free public schools are established throughout, a system of good roads reaches every

Ψ Seaport.

important city and town, public buildings are attractive and well built, health and sanitary measures are completely modern. The capital, Ψ San Juan, had 223,949 inhabitants in 1950, other towns being Rio Piedras 132,369, Ψ Ponce 99,190, Ψ Mayaguez 58,788, Ψ Caguas 33,733, Ψ Arecibo 28,500, Bayamon 20,245.

Governor, Luis Muñoz Marín, elected 1948; re-elected 1952.
Resident Commissioner, Antonio Fernós Isern.

AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of 76.5 square miles and a population of 18,602 in 1950, distributed as follows:—Tutuila and Aunu'u 15,621; Rose Island, uninhabited; Manu'a Group (Ofu and Ta'u Islands) 2,817; and Swain's Island (annexed May 13, 1925) 164. The population in 1955 was estimated at 21,500.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Ψ Pago Pago (pop. 1950, 3,531), the capital and seat of government. The remaining islands have an area of about 30 square miles. Tuna and copra are the chief exports.

Under an Executive Order of the President, which became effective on July 1, 1951, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, an advisory bicameral legislature and a judiciary. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces.

Governor, R. Barrett Lowe.
Secretary, Alan M. MacQuarrie.

TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude 1° to 20° north and from longitude 130° to 172° east. They cover an ocean area of 3,000,000 square miles but have a total land area of only 687 square miles. There are 66 separate islands and island groups in the Trust Territory. The population in 1955 was 64,000. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary markedly among island groups and even more among islands and atolls in the same geographic area. Nine mutually unintelligible languages are spoken in the territory.

The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947. From the cessation of hostilities to that date, the area was administered under United States Military Government. On July 18, 1947, the islands were placed under the jurisdiction of the Secretary of the Navy. On July 1, 1951, civilian government was established with the transfer of responsibility for the Trust Territory to the Secretary of the Interior. By July 17, 1953, responsibility for the administration of all the islands in the

Northern Marianas, except Rota, had been re-transferred to the Secretary of the Navy.

For administrative purposes, the territory is divided into seven districts: Saipan, Rota, Koror, Yap, Truk, Ponape and the Marshalls. Local governments exist within each district.

High Commissioner (vacant).

Deputy High Commissioner, D. H. Nucker.

Temporary seat of government: Agaña, Guam.

VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1950 of 26,654. St. Thomas (28 sq. miles) has a population of 13,811; St. Croix (84 sq. miles) has a population of 12,096; St. John (20 sq. miles) has a population of 747. St. Croix exports sugar and rum; Ψ St. Thomas is famous for its harbour.

CAPITAL, Ψ Charlotte Amalie (pop. 11,463), contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, Walter Gordon.

Government Secretary, Charles K. Claunch.

ALASKA

Alaska is the largest peninsula of the North American continent and includes an area of approximately 586,400 square miles or one-fifth the area of the United States. The population on April 1, 1950, totalled 128,643, of which 33,884 were Alaska Natives (Eskimos, Indians and Aleuts).

Alaska was acquired by the United States in 1867 when the Territory was purchased from Russia for \$7,200,000. The present Organic Act which created the Territory of Alaska was enacted in 1912 and provides the basis for the Territory's government. The Governor is appointed by the President of the United States. The Territory every two years elects a delegate to the Federal Congress. The Territorial Legislature meets biennially in odd-numbered years and consists of two houses, the Senate with 16 members and the House of Representatives with 24 members. The University of Alaska is widely recognized for its mining courses and is a growing centre for Arctic research.

The principal industry of Alaska is its fisheries, and the total annual value of its production is in excess of \$100,000,000. Alaska produces 85 per cent. of the U.S. production of canned salmon. Mining is also important to the economy of the Territory; since 1880 the total value of mineral production has been about one billion dollars. Total timber resources of Alaska are estimated in the order of 435 billion board feet. The interior of Alaska is served by the Alaska Railroad, owned and operated by the U.S. Government. The line extends from the port of Seward northwards 470.6 miles to Fairbanks. The principal cities in the interior are connected with each other by road and to the United States and Canada via the Alaska Highway, built by the United States during the Second World War. The Alaska Highway extends from Dawson Creek, British Columbia, Canada, to a junction with Alaska's Richardson Highway, near Fairbanks; only 302 miles of this 1,523-mile road are in Alaska. The Territory is also served by steamship and airlines and lies on one of the principal air routes to the Orient.

Ψ Seaport.

Governor, B. Frank Heinzelman.

CAPITAL.—Juncos (population 5,956).

Other cities are Anchorage (pop. 11,254), Fairbanks (pop. 5,771); and Ketchikan (pop. 5,305).

THE PANAMA CANAL

The Panama Canal and its adjuncts, including the related commercial enterprises in the Canal Zone, are operated by the Panama Canal Company, which was formed on July 1, 1917, under the provisions of the Panama Canal Company Act. The Canal Zone is governed by the Canal Zone Government, which was established simultaneously with the new Canal Company. Both organizations are headed by Major-General W. E. Potter, U.S.A., who holds the joint title of Governor of the Canal Zone and President of the Panama Canal Company.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation which conducted surveys during a period of two years and reported to an international congress held at Paris in May, 1879 over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Inter-oceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorized the President in 1902 to purchase the rights and property of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognized by the United States, and a treaty was ratified on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognized by this treaty. Under the terms of a treaty between Panama and the United States, signed at Panama in January 1955, the United States increased its annual annuity to Panama from \$430,000 to \$1,030,000 and agreed to hand over to Panama some land no longer needed for the operation of the Canal and to extend various commercial and other privileges to the Republic.

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 300 to 2,000 feet

wide at bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, 1 step at Pedro Miguel and 2 at Miraflores on the Pacific side, and transit from sea to sea occupies 7 to 8 hours (passage through locks 3 to 3½ hours). The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 42 feet in the Atlantic entrance. The depth through Gaillard Cut is 45 feet.

Including only ocean-going vessels, 300 Panama Canal net tons measurement or over, against which tolls were collected, the volume of commercial traffic passing through the Canal during each of the last 23 fiscal years is shown below:—

Fiscal Year	No. of Transits	Canal *Net Tons	Cargo Tons
1933	4,162	21,094,000	18,161,165
1934	5,234	26,410,000	24,704,009
1935	5,180	25,720,000	25,309,527

UNITED STATES REPRESENTATIVES IN GREAT BRITAIN

EMBASSY

(1 Grosvenor Square, W.1)

(GROsvenor 9000)

Ambassador Extraordinary and Plenipotentiary in London, His Excellency Winthrop W. Aldrich.

Minister and Deputy Chief of Mission, Hon. Walworth Barbour.

Minister and Chief, United States Operations Mission, Hon. Winthrop G. Brown.

Counsellors, Andrew B. Foster (Political); E. Tomlin Bailey (Consular); W. Bradley Connors (Public Affairs); Martin Tank (Economics).

1st Secretaries, Dwight J. Porter; Norris B. Chipman; Arthur R. Ringwalt; Evan M. Wilson; Joseph S. Henderson; James S. Swihart; M. Gordon Knox; James H. Lewis; Neal E. Kim; Robert B. Parke; Peter Rutter; John A. Chappelear; J. Wesley Adams, jr.

2nd Secretaries, Robert C. Davis; John E. Mellor; Russell L. Gibbs; Ruth A. Lovell; Edward J. Dembski; St. John A. Bargas; Normand W. Redden; John B. Penfold; Rockwood H. Foster; Dayton S. Mak; Dwight E. Scarbrough; Raymond Thomsen; Thomas J. Hunt; James D. Moffett; Kenneth W. Martindale; Richard D. Geppert; Margaret J. McClellan; Frances D. Howell; Robert B. Warner; James Relph; Robert J. Ballantyne.

3rd Secretaries, Robert F. Andrew; Judith Laikin; J. Theodore Papendorp; John E. Williams.

Air Attaché, Brig.-Gen. John M. Sterling, U.S.A.F.

Army Attaché, Brig.-Gen. William H. Hennig, G.S., U.S.A.

Senior Assistant Army Attaché, Col. Conn L. Milburn, Jr., G.S., U.S.A.

Senior Assistant Air Attaché, Col. Richard A. Curtis, U.S.A.F.

Naval Attaché and Naval Attaché for Air (vacant).

Senior Assistant Naval Attaché, Captain Joseph A. Ruddy, Jr., U.S.N.

Attachés, Robert W. Bean (Financial); Harvey E. Overesch; Dr. Eric Englund (Agriculture); Frederick A. Motz (Agriculture); Abraham Sirkin (Public Affairs); Dr. Myron L. Koenig (Cultural Affairs); Daniel DeBardeleben; Gillespie S. Evans; Emil A. Kekich (Commercial); Edgard D. Brooke (Public Affairs); Peter Abeille (Maritime); Robert L. Gastineau (Agriculture); Joseph Godson (Labour); Clinton H. Green (Public Affairs); Ernest J. Warlow (Administration); Charles R. Howard; Chester L. Cooper; Harry B. Fisher; Cleveland Cram; Larry F. Diehl (Agriculture); W. Allan Jackson (Information); Michael T. Canfield.

CONSULAR REPRESENTATIVES

England:—

London (Consulate-General and Consular Section), American Embassy, 1 Grosvenor Square, W.1. (GROsvenor 9000).

Consul-General, E. Tomlin Bailey.

Consuls, Joseph S. Henderson; John B. Penfold; Normand W. Redden.

Vice-Consuls, Robert F. Andrew; Lillian Finnla; Richard D. Geppert; Frances D. Howell; Thomas J. Hunt; Judith Laikin; Margaret J.

McClellan; Kenneth W. Martindale; Gertrude M. Meyers; Joseph E. Olenik; Josephine Pasquini; Robert B. Warner; John E. Williams.

Birmingham—Consul, Walter W. Hoffman.

" Vice-Consul, David B. Ortmann.

Liverpool—Consul-General, John F. Stone.

" Consul, Vernon B. Zirkle.

" Vice-Consuls, Lois Day; S. Paul Miller, jr.

Manchester—Consul-General, Rufus H. Lane.

" Vice-Consuls, William D. Wolle; David B. Timmins.

Southampton—Consul, Robert J. Cavanaugh.

" Vice-Consuls, Harold L. Davey; William F. Ryan.

Wales:—

Cardiff—Consul, Neil M. Ruge.

" Vice-Consul, James O. Beiden.

Scotland:—

Edinburgh—Consul-General, Eldred D. Kuppinger.

" Vice-Consul, John A. Brogan III.

Glasgow—Consul, Robert W. Moore.

" Vice-Consuls, Donald S. Harris; John A. Tarin; Frank J. Pipich.

Northern Ireland:—

Belfast—Consul-General, Edward Anderson.

" Vice-Consuls, George Mitchell; Richard P. Owen.

UNITED STATES OPERATIONS MISSION TO THE U.K.

1 Grosvenor Square, W.1

(GROsvenor 9000)

Director, Hon. Winthrop G. Brown.

U.S. AMBASSADOR TO CANADA

Ambassador Extraordinary and Plenipotentiary, Hon. Livingston Merchant.

U.S. AMBASSADOR TO AUSTRALIA

Ambassador Extraordinary and Plenipotentiary (vacant).

U.S. AMBASSADOR TO NEW ZEALAND

Ambassador Extraordinary and Plenipotentiary, Hon. Robert C. Hendrickson.

U.S. AMBASSADOR TO UNION OF SOUTH AFRICA

Ambassador Extraordinary and Plenipotentiary, Hon. Henry Byroade.

U.S. AMBASSADOR TO CEYLON

Ambassador Extraordinary and Plenipotentiary, Hon. Philip K. Crowe.

U.S. AMBASSADOR TO INDIA

Ambassador Extraordinary and Plenipotentiary (vacant).

U.S. AMBASSADOR TO PAKISTAN

Ambassador Extraordinary and Plenipotentiary, Hon. Horace Hildreth.

U.S. AMBASSADOR TO REPUBLIC OF IRELAND

Ambassador Extraordinary and Plenipotentiary, Hon. William Howard Taft.

The United Nations

CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers at Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 21-Oct. 7, 1944. The design was discussed and criticised at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York.

The following seventy-six States are members of the United Nations:—

Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Byelorussian Soviet Socialist Republic, Cambodia, Canada, Ceylon, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Egypt, Ethiopia, Finland, France, Greece, Guatemala, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Israel, Italy, Jordan, Laos, Lebanon, Liberia, Libya, Luxembourg, Mexico, Nepal, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Portugal, Roumania, Republic of Ireland, Salvador, Saudi Arabia, Spain, Sweden, Syria, Thailand, Turkey, Ukrainian Soviet Socialist Republic, Union of South Africa, Union of Soviet Socialist Republics, United Kingdom, United States of America, Uruguay, Venezuela, Yemen, Yugoslavia.

The principal organs of the United Nations are:—(1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

1. THE GENERAL ASSEMBLY

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year in regular session normally on the third Tuesday in September. Special Sessions may also be held.

The work of the General Assembly is divided between six Main Committees, on each of which every Member has the right to be represented:—

(1) Political and Security (including the regulation of armaments); (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Trusteeship (including Non-Self Governing Territories); (5) Administrative and Budgetary; (6) Legal. There is also an *ad hoc* Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—a General Committee and a Credentials Committee; and two standing committees—an Advisory Committee on Administrative and Budgetary Questions and a Committee on Contributions.

The General Assembly appoints such *ad hoc* committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission.

2. THE SECURITY COUNCIL

The Security Council consists of eleven Members, each of which has one representative and one vote.

There are five permanent Members (China, France, U.K., U.S.A., U.S.S.R.) and six non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of seven Members. On all other matters the affirmative vote of seven Members must include the concurring votes of the permanent Members, and it is this clause which makes the *Veto* possible. The only exception to this rule is that in regard to measures for peaceful settlement a party to a dispute must refrain from voting.

Until 1952 two separate Commissions, the Atomic Energy Commission and the Commission for Conventional Armaments, reporting to the Security Council, dealt with different aspects of the armaments problem. On January 21, 1952, the General Assembly approved the establishment of a new Disarmament Commission, bringing atomic and conventional armaments under one body. A sub-committee of the Disarmament Commission, consisting of representatives of Canada, France, U.K., U.S.A. and U.S.S.R., held 18 meetings in London between March 19 and May 4, 1956.

A Committee on the Admission of New Members was set up by the Security Council on May 17, 1946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of a representative of each of the members of the Security Council.

The Security Council also establishes *ad hoc* committees and commissions which may be required from time to time for special purposes. For example, on August 25, 1947, a Committee of Good Offices on the Indonesian Question was established (the name was later changed to the United Nations Commission for Indonesia). A United Nations Commission for India and Pakistan was established on January 20, 1948, and a United Nations Truce Commission for Palestine on April 23, 1948.

3. THE ECONOMIC AND SOCIAL COUNCIL

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Transport and Communications, Statistical, Human Rights, Social, Status of Women, Narcotic Drugs, Population, International Commodity Trade, Regional Economic Commissions for Europe, Asia and the Far East, and Latin America. The Council also supervises and co-ordinates the work of ten specialized agencies established to cover the main fields of international co-operation.

United Nations Children's Fund UNICEF

United Nations, New York.

London Office: 14-15 Stratford Place, W.1

Established by the United Nations in 1946, to meet the emergency needs of children, particularly in war devastated countries. In 1950 emphasis was

shifted to long-range needs of children in under-developed areas. In 1953 the United Nations General Assembly approved unanimously the indefinite extension of the Fund's mandate. UNICEF is financed by voluntary contributions from Governments and from the public. It was calculated that some 38,000,000 children and mothers in 95 countries would benefit from major UNICEF programmes in 1956.

4. TRUSTEESHIP COUNCIL

The establishment of a Trusteeship Council in connexion with territories placed under United Nations supervision through individual Trusteeship Agreements was made possible after the General Assembly on December 13, 1946, approved the following eight Trusteeship Agreements: *New Guinea* (agreement submitted by Australia); *Ruanda-Urundi* (agreement submitted by Belgium); *French Cameroons and French Togoland* (agreements submitted by France); *Western Samoa* (agreement submitted by New Zealand); *British Cameroons, British Togoland and Tanganyika* (agreements submitted by the United Kingdom); a ninth agreement was afterwards approved concerning *Nauru* (administered by Australia on behalf of Australia, New Zealand and U.K.).

A Trusteeship Agreement for the former Japanese mandated islands, the *Marshall, Marianas and Carolinas*, was submitted by the United States to the United Nations, and after approval by the Security Council, came into force on July 18, 1947.

A Trusteeship Agreement for the former Italian Colony of *Somaliland* was approved by the General Assembly on Dec. 2, 1950.

The Trusteeship Council is composed of countries administering Trust Territories; permanent members of the Security Council; and enough other countries (elected by the General Assembly for three-year terms) to make an equal division between countries which administer Trust Territories and countries which do not.

The functions of the Trusteeship Council are to consider reports from administering authorities; examine petitions in consultation with the administering authority; make periodic inspection visits; and check conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

5. THE INTERNATIONAL COURT OF JUSTICE

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the court is an integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court held its inaugural meeting at The Hague on April 18, 1946.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

The 15 judges of the Court (which has its seat at The Hague) were elected by the Security Council and the General Assembly in February, 1946, their terms of office being determined by lot. The General Assembly and the Security Council, at simultaneous but independent elections on October 22, 1948, re-elected the five judges whose terms were to expire in February, 1949.

The first case to come before the Court was the *Corfu Channel Dispute* between U.K. and Albania. On April 9, 1949, the Court ruled that Albania was responsible under international law for the explosions on two British warships which occurred on October 22, 1946, in Albanian waters and for the damage and loss of human life that was the result. By its judgment of December 15, 1949,

the compensation due from Albania to the United Kingdom was assessed at £843,947. The Court further ruled that by subsequent acts of the British navy in Albanian waters, the United Kingdom violated the sovereignty of Albania. The Court stated that this declaration constituted in itself appropriate satisfaction.

On May 26, 1957, the U.K. Government submitted a complaint in connection with the Anglo-Iranian Oil Company's case. Persia challenged the competence of the Court, and the Persian argument was subsequently upheld by the Court by nine votes to five.

In the *Ecrehos and Minquiers* case involving the U.K. and France, the Court unanimously decided, on Nov. 17, 1953, that Sovereignty over the islets belonged to the U.K.

THE SECRETARIAT

The Secretariat is composed of the Secretary-General, who is the chief administrative officer of the Organization, and an international staff appointed by him under regulations established by the General Assembly. The Secretary-General is appointed for a term of five years.

Secretary-General, Dag Hammarskjöld (Sweden).

Under Secretaries, Ralph J. Bunche (U.S.A.);

I. S. Tchernychev (U.S.S.R.).

Do. (Conference Services), Victor Hoo (China).

Do. (Public Information), Ahmed S. Bokhari (Pakistan).

Do. (Economic and Social Affairs), Philippe de Seynes (France).

Do. (Trusteeship and Information from Non-Self-Governing Territories), Benjamin Cohen (Chile).

Do. (Political and Security Council Affairs), Dragoslav Protić (Yugoslavia).

Director, Office of General Services, David B. Vaughan (U.S.A.).

Director-General, Technical Assistance Administration, Hugh L. Keenleyside (Canada).

Chairman, Technical Assistance Board, David Owen (U.K.).

BUDGET OF THE UNITED NATIONS

The financial year coincides with the calendar year. On February 13, 1946, the General Assembly established a Working Capital Fund of \$25,000,000 (U.S.).

For the year 1956, the appropriation was \$48,566,350. The scale of assessments for the 1956 budget for British Commonwealth countries was: Australia, 1.80 per cent.; Canada, 3.63 per cent.; India, 3.25 per cent.; Pakistan, 0.68 per cent.; New Zealand, 0.48 per cent.; Union of South Africa, 0.78 per cent.; United Kingdom, 8.55 per cent. The United States contribution was 33.33 per cent.; U.S.S.R. was 15.28 per cent.; France was 6.23 per cent.; and China was 5.62 per cent.

UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANIZATION

UNESCO

Unesco House, Avenue Kléber, Paris, 16^{ème}.

The purpose and functions of the United Nations Educational, Scientific and Cultural Organization, as stated in its Constitution, are: "to contribute to peace and security by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of

race, sex, language or religion, by the Charter of the United Nations; to collaborate in the work of advancing the mutual knowledge and understanding of peoples. . . . to give fresh impulse to popular education and to the spread of culture; . . . to maintain, increase and diffuse knowledge."

The three main bodies of the Organization are: the General Conference which meets every two years to approve the programme and budget, an Executive Board of 22 members and the Secretariat with Headquarters in Paris. In addition, National Commissions are set up in Member States to serve as a link with Unesco and carry out the programme of the Organization.

The programme of Unesco is now of a continuing nature, with priority tasks. Its principal sections relate to education, natural sciences, social sciences, cultural activities, mass communication, and technical assistance. It is with education first and foremost that Unesco is concerned, its main objectives being the extension and improvement of education and the promotion of free and compulsory primary education. The Organization is also engaged in providing education for Arab refugee children and in investigating the action to be taken in Korea for the restoration of education in that country. Unesco also seeks to increase the international movement of persons.

While in its various fields of activity, Unesco's efforts are more and more concentrated on the realization of certain articles of the Universal Declaration of Human Rights, its task is carried out in a number of ways. Thus, the Organization has set up a clearing house of information. It has established several international professional organizations. It calls seminars and meetings of experts to deal with technical problems and to prepare programmes of work. Missions of technicians are sent to member states to study educational and other problems facing these countries. Pilot projects and training centres have been started to experiment in methods for solving problems. International action in the form of agreements and conventions is also promoted to achieve Unesco's aims. The budget for 1955 and 1956 stands at \$21,617,830.

Director-General, Luther H. Evans (U.S.A.).

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

FAO

Viale delle Terme di Caracalla, Rome.

The Food and Agriculture Organization of the United Nations was established in October, 1945, as an agency to further separate and collective action of member nations for the purposes of:—

- (i) Raising levels of nutrition and standards of living of the peoples under their respective jurisdiction.
- (ii) Securing improvements in the efficiency of the production and distribution of all foods and agricultural products.
- (iii) Bettering the condition of rural populations, and thus contributing toward an expanding world economy.

FAO works toward these ends by (1) collecting, analysing, interpreting, and disseminating information relating to nutrition, food and agriculture and agricultural products; (2) promoting and where necessary recommending national and international action; and (3) furnishing technical assistance to governments that request it.

The general policies of the organization are directed by its Conference on which each of the

72 member nations has one representative. A council composed of 24 member nations, acts for the Conference between its sessions.

The budget, voted by the member nations at the Conference, has increased slowly but steadily since the Organization was founded, and at the 1955 Conference was fixed at \$6,600,000 for 1956 and \$6,800,000 for 1957. To this is added a sum allocated from the UN Special Fund for Technical Assistance, which in 1956 was approximately \$8,000,000. Under this fund FAO operates its share of the Expanded Technical Assistance Programme, through which, by June 1956, over 1,300 experts had been sent on assignments covering the whole field of the Organization's activities. At that time, some 450 experts were at work in 60 countries, and over 900 fellowships for training of experts from those countries had also been awarded under the Programme.

Acting Director-General, Sir Herbert Broadley, K.B.E.

Secretary-General, Marc Veillet-Lavalley.

INTERNATIONAL CIVIL AVIATION ORGANIZATION

ICAO

International Aviation Building, Montreal, Canada (with regional offices in Lima, Paris, Cairo, and Bangkok).

The International Civil Aviation Organization came into being on April 4, 1947, when the required number of states (26) ratified the Convention on International Civil Aviation which was drawn up at the International Civil Aviation Conference held at Chicago, U.S.A., in November-December, 1944.

The objectives of the Organization are described in the Preamble to the Convention on International Civil Aviation as "to ensure that international civil aviation should be developed in a safe and orderly manner and that international air transport services should be established on the basis of equality of opportunity and operated soundly and economically."

ICAO's governing bodies are the Assembly and the Council. The Assembly is the legislative body, composed of delegates from member states with each state being entitled to one vote; the Council is the executive body, composed of 21 members elected by the Assembly. The first meeting of the Assembly was held in Montreal from May 6 to 27, 1947. The Third Council of ICAO was elected by the Seventh Session of the Assembly in 1953.

President of the Council, Dr. Edward Warner.

Secretary-General, E. C. R. Ljungberg.

INTERNATIONAL LABOUR ORGANIZATION

ILO

International Labour Office, Geneva, Switzerland.

The ILO, established in 1919 as an autonomous institution associated with the League of Nations, is a tripartite organization, in which governments, employers and workers are directly represented. It seeks through international action to improve labour conditions, raise living standards, and promote economic and social stability. In 1946, the United Nations and the ILO concluded an agreement under which the ILO was recognized as the specialized agency responsible for international action in the above fields towards the accomplishment of the purposes set forth in the ILO's Constitution.

The ILO consists of the International Labour Conference, which usually meets yearly, the Governing Body, and the International Labour Office.

The Conference is composed of national delegations comprising two government representatives and one delegate each from the most representative worker and employer organizations within each country, together with their advisers.

The 40-member Governing Body is composed of the representatives of 30 Governments, ten worker members and ten employer members. It is selected by the Conference every three years. It selects items for the agenda of the Conference, and supervises the work of the Office and of the various committees and commissions.

Ten Governments hold seats on the Governing Body because of their industrial importance. These are at present Canada, China, France, Federal Republic of Germany, India, Italy, Japan, U.S.S.R., the United Kingdom and the United States.

The Office undertakes research on labour, social and economic questions, acts as an advisory service to Governments, and prepares documents on the items of the agenda of the various conferences and meetings. It also publishes a number of periodicals, including the *International Labour Review*, *Occupational Safety and Health*, *Industry and Labour*, *Legislative Series*, and the *Year Book of Labour Statistics*. In addition, it issues frequent reports on a wide range of social and economic questions. Most of these are published in English, French and Spanish.

One of the ILO's principal functions is the formulation of international standards in the form of International Labour Conventions and Recommendations. Member countries are required to submit Conventions to their competent national authorities with a view to ratification. If a country ratifies a Convention, it agrees to bring its laws into line with its terms and to report annually how these regulations are being applied. More than 1,500 ratifications of 104 Conventions have been deposited to date. Machinery is available to ascertain whether Conventions thus ratified are effectively applied.

Recommendations do not require ratification, but Member States are obliged to consider them with a view to giving effect to their provisions by legislation or other action. Member States also undertake to report regularly on their position in regard to Recommendations and unratified Conventions.

OFFICERS OF THE GOVERNING BODY

Chairman, Sir Guildhaume Myrddin-Evans (U.K.—*Government Member*).

Vice-Chairman, Pierre Waline (France—*Employers' Member*); Sir Alfred Roberts (U.K.—*Workers' Member*).

Director-General, David A. Morse.

Deputy Director-General, Jef Rens.

Asst. Directors-General, Raghunath Rao; C. Wilfred Jenks; Luis Alvarado; W. Yalden-Thomson; Dr. Abbas Mustapha Ammar.

Treasurer, F. H. Wheeler.

Director, London Branch Office, G. A. Johnston.
38-39 Parliament Street, S.W.1.

Other branch offices are located at Ottawa, Washington, D.C., Paris, New Delhi, Bonn, Rome, Tokyo and Rio de Janeiro.

GENERAL AGREEMENT ON TARIFFS AND TRADE

GATT

c/o ICITO, Palais des Nations, Geneva.

The Economic and Social Council of the United Nations established, on February 28, 1946, a Preparatory Committee of the International Conference on Trade and Employment to prepare an agenda and a draft convention for an International Trade Organization for consideration at the Conference. The ITO was designed for the expansion of world trade and the removal of trade barriers on a world-wide scale.

The draft convention, or Charter, was worked out by a Preparatory Committee which met in 1946 and 1947. During the second session at Geneva in 1947, it was decided to proceed with multilateral tariff negotiations among the members of the Committee.

The Charter was discussed at a conference held at Havana (Nov. 1947–March, 1948), the final act being signed by 54 States. Early in 1951, however, the United States Government indicated that it did not intend to ratify the Havana Charter, but was looking towards the strengthening of the General Agreement on Tariffs and Trade (GATT). Through the operation of GATT there have been four tariff conferences, as a result of which countries representing four-fifths of world trade have reduced or "frozen" their tariff rates on over 60,000 items. In the field of commercial disputes, arising from breaches of the GATT fair trading rules, many complaints have been investigated and settled at the annual sessions of the member countries.

In the winter of 1954–1955 the member countries undertook a comprehensive review of the Agreement. They reaffirmed the basic objectives of the Agreement, including the principle of non-discrimination in trade; they decided to prolong the firm validity of the tariffs bound under the Agreement; they drew up new and more flexible rules for meeting the problems of countries in early stages of development; and they drew up the constitution for a permanent organization to administer the GATT. This will be known as the Organization for Trade Cooperation and it will come into existence when it has been accepted by countries accounting for a high proportion of world trade.

WORLD HEALTH ORGANIZATION

WHO

Palais des Nations, Geneva.

The World Health Organization came into being on April 7, 1948, after its constitution had been ratified by 26 U.N. member states. On June 1, 1955, WHO had a total of 84 members and 4 associate members.

Since 1948, nine World Health Assemblies have been held. The 1956 Assembly was held in Geneva in May. Prof. J. Pariset (France) was President.

Director-General, Dr. M. G. Candau (Brazil).

Deputy Director-General, Dr. P. Dorolle (France).

UNIVERSAL POSTAL UNION

UPU

Schoshaldenstrasse 46, Berne, Switzerland.

The Universal Postal Union was founded at Berne, Switzerland, by the Postal Convention, October 9, 1874. The Union was extended and improved by 13 Postal Congresses between 1874 and 1952.

The Union is composed of all the countries of the world with the exception of the Maldives and Laccadive Islands. The International Bureau functions as the central office of the Union. The Union was established to alleviate the uncertainty, confusion and excessive cost of international postal communications by uniting its member countries in a single postal territory for the reciprocal exchange of mail. The Bureau acts as a liaison organ, and furnishes information and advice to the countries belonging to the Union.

INTERNATIONAL TELECOMMUNICATION UNION

ITU

Palais Wilson, Geneva, Switzerland.

The Convention establishing an International Telegraph Union was signed at Paris in 1865. The first International Radiotelegraph Convention was signed at Berlin in 1906.

In 1932, at Madrid, the International Telegraph Convention and the International Radiotelegraph Convention were merged to form the International Telecommunication Convention. The Madrid Convention of 1932 was replaced by the Atlantic City Convention of 1947 and this in turn was replaced by the Buenos Aires Convention of 1952.

Under the Atlantic City Convention, the structure of the I.T.U. was considerably developed. This structure was not radically changed by the Buenos Aires Convention. It consists of a Plenary Conference, Administrative Conferences and the permanent organs of the Union: the Administrative Council, the General Secretariat, the International Frequency Registration Board (I.F.R.B.), the International Telegraph Consultative Committee (C.C.I.T.), the International Telephone Consultative Committee (C.C.I.F.) and the International Radio Consultative Committee (C.C.I.R.).

The main purpose of I.T.U. is "to maintain and extend international cooperation for the improvement and rational use of telecommunication". I.T.U. also promotes the development and most efficient operation of technical facilities. It allocates the radio frequency spectrum and registers radio frequency assignments to avoid harmful interference between radio stations of different countries, encourages the establishment of as low rates as possible and promotes the adoption of measures for ensuring safety of life through the co-operation of telecommunication service.

The seat of the Union was removed from Berne to Geneva in 1948.

Secretary-General, Dr. Marco Aurelio Andrada.

THE OFFICE OF THE UNITED NATIONS HIGH COMMISSIONER FOR REFUGEES

UNHCR

Palais des Nations, Geneva

The Office of the United Nations High Commissioner for Refugees, established on January 1, 1951, provides international protection, under the auspices of the United Nations, to refugees who because of fear of political, religious or racial persecution have left their countries of origin and have thereby lost their nationality either *de jure* or *de facto*, and have not acquired full rights of citizenship in their country of asylum.

The Office promotes the conclusion and ratification of international conventions and supervises their application; and it encourages governments to pass legislation and adopt special measures in favour of refugees, particularly regarding their admission, their right to work, social security and their legal

status. The Office, in addition, seeks to promote the finding of permanent solutions to problems of refugees, through co-ordination of the efforts of government and private organizations, in the field of resettlement, of economic and social integration in countries of first or second asylum, and in industry, agriculture and trade.

In October 1954, the UN General Assembly authorized the High Commissioner to undertake a programme designed to achieve permanent solutions particularly for the refugee camp population, and established the United Nations Refugee Fund (UNREF) for the purpose of carrying it out before the expiration of his mandate at the end of 1958.

An UNREF Executive Committee consisting of seventeen States Members of the United Nations and three non-member States was appointed to give directives to the High Commissioner in carrying out his programme; to determine the general policies under which the operations of the Fund should be planned, developed and administered, and to determine an annual financial target and an annual operational plan. One session was held in 1955 and two in 1956.

The Office was awarded the Nobel Peace Prize for 1954 and the money was used to bring to an end the refugee camp on the Greek island of Tinos.

High Commissioner, G. J. van Heuven Goedhart (Netherlands).

Deputy High Commissioner, James M. Read (U.S.A.).

THE UNITED NATIONS ASSOCIATION OF GREAT BRITAIN AND NORTHERN IRELAND

UNA

25 Charles Street, W.1.

The general purpose of UNA is to encourage people to think seriously about international affairs and the need for popular understanding and support for the attempt to organize a just and peaceful international system through the United Nations.

Its policy is: (1) to promote friendship, understanding and co-operation among the peoples of the world; (2) to win active public support for the United Nations; (3) to ensure justice for all nations and the welfare of all peoples by the full use and development of the United Nations; (4) to see that Great Britain carries out her obligations under the Charter, including, if necessary, the use of arms to uphold the law.

CHIEF OFFICERS

Joint Presidents, Gilbert Murray, O.M., D.C.L., LL.D., D.Litt.; Dame Kathleen Courtney, D.B.E.
Chairman of the Executive Committee, Maj.-Gen. L. O. Lyne, C.B., D.S.O.
Director General, C. W. Judd, C.B.E.
Hon. Treasurer, H. Davies.
Secretary, D. H. Ennals.

SCOTTISH NATIONAL COUNCIL

17 York Place, Edinburgh.

President, Sir Gordon Lethem, K.C.M.G.

Secretary, D. Tweddle.

WELSH NATIONAL COUNCIL

Welsh National Temple of Peace and Health,
Cathays Park, Cardiff.

President, G. Harris, M.C.

Secretary, W. Arnold.

Foreign Countries

The following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

Salaries and Allowances.

The Salaries of Officers of Branch "A" of H.M. Foreign Service are shown below. In addition foreign allowances and furnished accommodation (or rent allowances in lieu thereof) are assigned to Officers serving abroad:—

Grade I—£4,500.	Grade V—£2,200.
Grade II—£3,250.	Grade VI—£1,700 to £2,200.
Grade III—£2,850.	Grade VII—£1,150 to £1,570.
Grade IV—£2,600.	Grade VIII—£695 to £855.
Grade IX—£470 to £640.	

ABYSSINIA. See Ethiopia.

AFGHANISTAN

(Afghānistān)

King of Afghanistan, H.M. Zahir Shah, born Oct. 15, 1914, acceded Nov. 8, 1933 (on the assassination of his father, Nadir Shah); married Nov. 7, 1931, Humaira, daughter of Sardar Ahmad Shah Khan, and has surviving issue four sons and two daughters: H.R.H. Prince Ahmed Shah Khan, b. Sept. 23, 1934; H.R.H. Prince Mohammad Nadir, b. 1941; H.R.H. Prince Shah Mahmud Khan, b. 1946; H.R.H. Princess Bilqis, b. 1931; H.R.H. Princess Maryam, b. 1936; and H.R.H. Prince Daud, b. 1949.

EMBASSY IN LONDON

31 Princes Gate, S.W.7.

[Kensington: 7507.]

Ambassador in London, H. E. Dr. Najib-Ullah (1954).

1st Secretary, Abdul Kayoum Atayee.

2nd Secretary, Said Waheed Abdullah.

Afghanistan lies to the N. and W. of Western Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles, and the population is estimated (1945) at 10,000,000. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Gelzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Moslems, except the Hazzars and Kizilbashs, who belong to the Shia sect.

Afghanistan is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus, to the Oxus (or Amu Darya, "Mother of Rivers") which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese: from there on the branch line from Merv, and thence N.E. was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission in 1948. The Indo-Afghan frontier was settled by the Durand

agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into seven major provinces, Kabul, Mazar, Kandahar, Herat, Eastern, Southern and Qataghan, and five minor provinces, the Farah-Chakhansur, Girishk, Qhazni, Badakshan and Maimana. Each province is under a Governor (called in major provinces *Nab-ul-Hakumah*, and in minor provinces *Hakin-i-Ala*).

Government.—Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organization, including offices for public works, posts, police, finance, trade, &c. The Army has been reorganized and is recruited by annual calls; service is for two years with the colours and eight with the reserve. The peace strength is about 64,000. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. Factories for munitions, and for various commercial products, have been erected in Kabul and elsewhere.

As the result of a British mission to Kabul in 1904-5, the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. Afghan troops crossed the Indian frontier on May 2, 1909, on which the Indian Government took immediate steps to expel them; fighting followed and Dacca was occupied by British troops, but overtures were made by King Amanulla of Afghanistan and a treaty of peace was signed in August. By this treaty Afghanistan is left formally free and independent. By treaty of Nov. 22, 1921, Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular officers. As successor state to the British Government in India, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty.

Under the Constitution of Oct. 31, 1931, there is a Senate of 43 nominated members and a National Council of 171 elected members, with a Grand Assembly (*Loe Jirgeh*) which is summoned on important occasions. The administration is entrusted to a Council of Ministers.

The laws of Afghanistan are based on the "Shariat," or Islamic law, and tribal custom.

Production.—Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakuli, and transport animals are bred. Silk, woollen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome and talc are found.

The following main roads are open to motor traffic, but are mostly unmetalled—Kabul-Khyber (175 miles); Kabul-Gardez (80 miles); Kabul-Kandahar-Chaman (380 miles); Kandahar-Farah-Herat (400 miles); Kabul-Bamian (140 miles);

Kabul - Mazar - i - Sharif (380 miles); Mazar-i-Sherif-Maimana-Herat (500 miles) and Kabul-Khannabad-Faizabad (450 miles). A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Goods are still conveyed by pack animals, but motor transport is rapidly taking the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (190 miles), and the road from Kandahar to Chaman (70 miles).

Language and Literature.—The languages of the country are Persian and Pushtu and Turki (spoken by Uzbaks and Turkoman tribes in the North). Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and a university (established in 1932) at the capital.

FINANCE. *Afghanis.*

National Income..... 800,000,000

The annual revenue consists largely of payments in kind. There are taxes on land, sales of animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties.

Afghani (of 100 *Puls*)=about *5d.* at official rate of exchange).

353.44 *Afghanis*=100 Indian Rupees.
508.71 " =100 Pakistani Rupees.
47.04 " =£1.
16.8 " =£1.

TRADE

Imports from U.K. (1955)..... £199,000
Exports to U.K. (1955)..... 931,104

Exports are mainly Persian lambskins (Karakuli), fruits, cotton, raw wool, carpets and spices, while the imports are chiefly cotton yarn and piece goods, metals, leather goods, tea, sugar, jute manufactures, paper and cement.

CAPITAL, Kabul (about 300,000). The chief commercial centres are Kabul and Kandahar (77,000). Other provincial capitals are Herat (75,000), Mazar-i-Sharif (42,000), Jalalabad (22,000) and Khanabad (18,000).

FLAG: Green, red and black, with white device in centre.

BRITISH EMBASSY

(Kabul)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Daniel William Lascelles, K.C.M.G. (1953).

1st Secretary, C. N. Jupp.

Military Attache, Col. R. R. Griffith, O.B.E.

2nd Secretaries, G. K. Dulling; E. C. Gamble.

3rd Secretary, B. O. White.

Kabul is distant 7,500 miles from London, transit 21 days; by air 4-6 days.

ALBANIA

Head of the State, Hadji Lechi, assumed office, July 24, 1953.

Prime Minister, General Enver Hodja, recognized by Gt. Britain, U.S.A. and U.S.S.R., Nov. 10, 1945.

On Nov. 10, 1945, the British, U.S.A. and U.S.S.R. governments decided to recognize the Albanian administration under Colonel-General Enver Hodja as the provisional government of Albania on the understanding that free elections would be held at an early date, in order that a truly representative government could be formed.

Elections were held in December, 1945, and on Jan. 11, 1946, the Constituent Assembly declared Albania an independent Republic, and on Aug. 7, 1946, Albania applied for admission to the United Nations, but its entry was vetoed by Great Britain and the U.S.A., who had broken off relations with the Albanian Government. The area of the Republic is estimated at 10,700 sq. miles, with an estimated population (1951) of 1,210,000.

Albania is almost entirely an agricultural country and the staple crops are wheat and maize.

CAPITAL: Tirana (pop. 30,000).

ANDORRA

A small, neutral principality situated on the southern slopes of the Pyrenees, between Spain and France with an approximate area of 180 square miles and population of approximately 6,000. It is surrounded by mountains which attain an altitude of from 6,500 to 10,000 feet. Historians place the origin between the eighth and ninth centuries. Andorra is divided into six Parishes each of which has four Councillors elected by popular vote to the Valleys of Andorra Council of Twenty-four. The Council is presided over by a President who is in charge of the Government of the country, with the support of a co-sovereignty between the Bishop of the Seu d'Urgell and the Head of the French Republic (this last as successor in the name of the Count of Foix). Each co-Prince nominates his own representative and has a Permanent Delegation and a Supreme Tribunal for the hearing of civil causes. These two Tribunes together form the Supreme Courts. The official language of the country is Catalan. Spanish *pesetas* and French *francs* are the accepted currency. A good road crosses the Valleys from Spain to France. Andorra has abundant deposits of iron and quantities of alum and lead, stone quarries, granite, jasper and marble. Timber includes pine, fir, oak, birch and box-tree. Potatoes and cereals are produced in the highlands and tobacco in the plains. The climate is naturally cold for six months, but mild in spring and summer. The mountain slopes are suitable for skiing, and it is estimated that 400,000 tourists visit the Valleys during the year. The imports from U.K. during 1956 were £26,012.

CAPITAL: Andorra la Vella (population 2,200).

FLAG: Three horizontal bands, azure, yellow, red; crown on yellow band.

ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Muscat and Oman.

The total area is estimated at 1,200,000 sq. miles

of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub Al Khali deserts), and the total population is believed to be about 10,000,000.

Language and Literature.—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in Egypt and the Sudan, Libya, Morocco, Algeria, Iraq, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and One Night"), historical and biographical studies, and resulting from the westernizing movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

THE KINGDOM OF SAUDI ARABIA

(al Mamlaka al Arabiyya as-Sa'udiyya.)

King of Saudi Arabia, H.M. King Saud bin Abdul Aziz, G.B.E., born 1902, succeeded Nov. 9, 1953. The Saud family previously ruled in Nejd but was deposed by Ibn al Rashid and took refuge in Kuwait. Ibn Saud, the father of the present king, occupied Riyadh in 1900 and conquered the larger part of Nejd in 1913. In 1921 he became *Sultan of Nejd*, conquered the Hejaz and became *King* in 1926. He changed the name of his Kingdom to *Saudi Arabia* in 1932.
Crown Prince, H.R.H. Amir Faisal bin Abdul Aziz, G.B.E., born 1904.

Foreign Affairs, H.R.H. Amir Faisal, G.B.E.
Finance, Sheikh Mohammed Suoor.
Interior, H.R.H. Amir Abdullah Faisal.
Defence and Aviation, H.R.H. Amir Mishaal.
Agriculture, H.H. Khalid bin Ahmed as Sidayri.
Education, H.R.H. Amir Fahd.
Commerce, Sheikh Mohammed Ali Reza.
Communications, H.R.H. Amir Sultan.

EMBASSY IN LONDON.

24 Kensington Palace Gardens, W.8.

Ambassador in London, His Excellency Sheikh Hafiz Wahba, K.C.V.O. (1930).
1st Secretary, Omar Sakfak.
and Secretary and Press Attaché, Mohamed Arab Hashem.

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd being also King of the Hejaz.

By the *Treaty of Jeddah* (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

The total area of the Kingdom is about 927,000 sq. miles, with an estimated population of not more than 6 millions.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 Ibn Saud threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Jebel Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hejaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square

miles of Central Arabia, including the Nafud and Dahana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at close on 3,000,000, the majority being Moslems of the Wahhabi movement. There is little agriculture, but wheat and barley are grown, and there is an experimental farm, irrigated from natural deep pools and covering 3,000 acres, at al-Khari, about 50 miles south of Riyadh. The principal occupation of the bulk of the population is camel and sheep raising, but oil makes by far the largest contribution to the economy of the country. Oil was found in commercial quantities at Dammam, near Dhahran in the Hasa in 1938, and by 1955 production of crude oil from field storage amounted to over 350,000,000 barrels per annum. Exports other than oil are negligible. The capital is Riyadh (700,000), and the principal trading centres are Hofuf (the chief town of the Hasa province) (200,000), Al Khobar and Dammam on the Persian Gulf littoral, Anazla, Buraida, Hail (20,000), and Jauif. The old ports (Persian Gulf) were Qatif, Uqair and Al Khobar, which were suitable only for sailing craft, but the Arabian-American Oil Company, which is exploiting the Hasa oil under a 60 years' lease, has built a deep-water port for its own purposes at Ras Tannura, and a new civil deep-water port, with a pier seven miles long, was brought into use at Dammam in 1950. A railway is now in operation from Dammam through Hofuf to Riyadh, and it is proposed to extend it to Jeddah via Hail and Medina.

The *Hejaz* ("The Boundary"—between Nejd and Tihamah) extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 122,500 sq. miles, with a population of from 1,000,000 to 1,500,000, including many nomad tribes. On the coast are the small ports of El Wejh, Yanbu', Rabegh, Gizan and Wajda, the main port of Saudi Arabia, where a new deep-water pier and port buildings were brought into use in 1950. Jeddah contains the ruins of the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the disused Saudi-Arabian section of the Hejaz Railway which is scheduled for reconstruction. The *Oasis of Khaibar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina (al-Madinat al-Munawwarat, "The City of Light")*, once the terminus of the Hejaz Railway, 820 miles from Damascus, has a permanent population of about 20,000 and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. *Mecca*, the birth-place of the Prophet, is 45 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 200,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. *Jeddah* (200,000) is the principal port and commercial centre.

Asir ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the

southern limit of Hejaz to the northern boundary of the Yemen, some 12 miles N. of the port of Meidi. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. According to ancient Arab geographers, Asir used to be considered as a part of the Yemen. The territory includes the Farsan Islands, where prospectors have searched for oil, but without success. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. Capital, Abha.

Trade and Finance.—Formerly the annual pilgrimage to the Holy Places of the Hejaz provided Saudi Arabia with virtually the whole of her means of payment for imports; it is estimated to have brought £10,000,000 in foreign exchange to the Hejaz in each of the years 1948–50. It is therefore not surprising that the foreign trade of the country was largely conducted by the merchant communities of Jeddah and Mecca. Industry was, and is, almost non-existent. Imports are estimated to have averaged about £2,500,000 annually before 1939, of which the United Kingdom contributed less than £100,000. India was traditionally Saudi Arabia's principal commercial connexion; and indeed the legal tender of Saudi Arabia, the silver riyal, is of the same weight and fineness as the old Indian rupee. Religious objections to usury have affected the development of banking in Saudi Arabia. Though paper money is widely used, it is not officially recognised as currency. It has virtually supplanted gold as a means of payment for transactions nevertheless. Exchange rates, which were formerly subject to violent fluctuations, have now been given a considerable degree of stability by the operations of the Saudi Arabian Monetary Agency. The country shared the inflationary experiences of other Middle East countries during the war years. The effect of oil developments and of investment, mainly American, in Saudi Arabia has been to revolutionize the country's foreign exchange position and greatly to increase the size of the market.

	1954	1955
Imports from U.K. . . .	£5,713,000	£7,816,660
Exports to U.K.	1,794,000	3,158,659

Communications.—The railway from the new port of Dammam to the oilfields at Abqaiq and through Hofuf to Riyadh was opened late in 1951. The only completed metalled road, apart from those in the oilfields area, connects Mecca with its Port of Jeddah, but a new road from Jeddah to Medina (about 410 miles) was partially completed by a British firm and the remainder has been completed by a local contractor. The Saudi Arabian Government employs Transworld Airlines to pilot and maintain the Government-owned Saudi Arabian Airlines with Dakota, Skymaster, Convair and Bristol aircraft. Scheduled services are flown between Jeddah, Taif, Riyadh, Hofuf and Dhahran. There are first-class airports at Dhahran, originally built by the United States Army as a military base, and at Jeddah. The other airfields named are being developed. Saudi Arabian airlines also maintain regular services to Cairo and Beirut. Twice-weekly services operated by Aden Airways, Arab Airways (both subsidiaries of B.O.A.C.), Air Liban and Misrair call at Jeddah, the route of Aden Airways including Cairo-Luxor-Jeddah-Port Sudan-Asmara-Kamaran-Aden and return.

Education.—There are over 300 Government schools, mostly primary, but including seven secondary schools and one preparatory school, which prepares students who have completed their secondary course for University training, in Egypt or elsewhere. There is no University in

Saudi Arabia. With three exceptions, all schools are maintained by the Government. Instruction is given to boys only. There are no girls' schools.

SAUDI ARABIAN FLAG: Green oblong, white Arabic device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

CAPITAL, Riyadh, population about 100,000.

THE SHAIKHDOM OF KUWAIT

Ruler, Shaikh Sir Abdullah as-Salim as-Sabah, K.C.M.G., born 1895, acceded Jan. 28, 1950.

Kuwait is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 5,800 square miles and a population estimated at about 200,000. The total European and American population was about 2,800 in 1956. The port of Kuwait, the capital (pop. about 180,000), is an entrepôt for goods for the interior, and for the export of pearls (in diminishing quantities), skins and wool. Imports for the year 1955 amounted to £32,600,000, while exports, including re-exports, amounted to £5,700,000, excluding oil. Kuwait was traditionally a dhow-building centre, but the craft is declining. The centre of the Kuwait Oil Company's production is at Burgan, south of Kuwait town. An oil port has been constructed by the company at Mina al Ahmadi, about five miles from Ahmadi, the company's administrative and residential centre. Production of crude oil in 1955 totalled 53,894,000 tons. In December, 1951, a new agreement was reached between the Shaikh of Kuwait and the Kuwait Oil Company, under which the Shaikh became entitled to an equal share of the Company's profits. The Company is jointly owned by the British Petroleum Company and the American Gulf Oil Corporation. Oil was also struck in the Kuwait-Saudi Arabian Neutral Zone to the South of the State early in 1953. The concession for this area is held by the American Independent Oil Co., which produced 620,376 tons of crude oil in 1955, and the Getty Oil Company.

As a result of the very considerable oil revenues, the Kuwait Government has embarked on a large scale development scheme and plans for social services. Waste gas from the oilfields produces steam used to generate electricity from four 7,500 kw. turbo-alternators and to distil from the sea 2,000,000 gallons of fresh water daily. Education is free to all Arabs in Kuwait and the demand is growing rapidly. In 1955–56 there were 13,500 boys and 6,800 girls at school. Further development projects include dredging for a deep water port, additional distillation plant, an extension to the power station, State housing, an abattoir and continued expansion of the road system.

Ships of British, Dutch and other lines make regular calls at Kuwait. B.O.A.C., Iraqi Airways and several Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. Wireless communication, previously operated by Cable and Wireless, Ltd., was taken over by the Telegraph and Telephone Department of the Kuwait Govern-

ment on Feb. 1, 1956. The Post Office is run by the British G.P.O. Banking is done by the British Bank of the Middle East and the National Bank of Kuwait. The currency is the Indian rupee.

FLAG: Red, with white lettering ("Kuwait" in Arabic).

British Political Agent, G.W. Bell, C.B.E.

Assistant Political Agent, A. K. Rothnie.

British Council Representative, in the Persian Gulf, J. I. G. Muir, D.S.C.

THE SULTANATE OF MUSCAT & OMAN

Sultan, Said bin Taimur, born, Aug. 13, 1910, succeeded his father (as 13th of his dynasty to be Sultan of Muscat and Oman), Feb. 10, 1932.

The independent State of Muscat and Oman is situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from near Tibba on the west coast of the Musandam Peninsula round to Ras Darbat Ali. Ras Darbat Ali marks the boundary between the Sultanate and the territory of the Sultan of Qishin and Soqatra, a Sultanate within the Aden Protectorate. A small strip of the coast on the east side of the Musandam Peninsula from Dibbah to Khor Kalba belongs to chiefs of Trucial Oman. The Sultanate extends inland to the borders of the Rub' al Khali or "Empty Quarter" as the South-Eastern Arabian Desert is called. Physically, the Sultanate consists of 3 divisions, a coastal plain, a range of hills and a plateau. The coastal plain varies in width from 10 miles in the neighbourhood of Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east, reaching its greatest height in the Jebel Akhdar region where heights of over 9,000 feet occur. The hills are for the most part barren, but in the high area round Jebel Akhdar they are green and there is considerable cultivation. The plateau has an average height of 1,000 feet. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain is known as the Batinah. It is fertile and prosperous, the date gardens extending for over 150 miles, Batinah dates (which ripen in the first half of July, well before the Basra dates) being famous for their flavour. The coast-line between Muscat and the province of Dhofar is barren and forbidding. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar cane is grown and cattle can be raised in this province. Frankincense is also exported. Its principal town is Salalah on the coast, while Ψ Murbat is the port. On the north coast of the Gulf of Oman is the port of Ψ Gwadar and a small tract of country surrounding the town belonging to the Sultan.

The town of Muscat is the capital and seat of Government of the Sultanate of Muscat and Oman. Possessing a natural harbour, though exposed to the north-west wind (*Shumal*), and at one time a town of some commercial importance, it has lost most of its trade, which has been transferred to the adjacent town of Matrah. Matrah is the starting point for the trade routes into the interior. Other ports on the Gulf of Oman are Sohar, Khaburah and Sur. None, however, provides sheltered anchorage.

The area of the Sultanate has been estimated as about 82,000 square miles and the population as 550,000. The inhabitants are for the most part Arab, but there is a strong infusion of negro blood, especially along the coast. The towns of Muscat (pop. 3,500) and Matrah (pop. 8,500) are composed of one third Indian, one third Baluch and one third Negro. The Baluchis have originally mostly migrated from Mekran and the Negroes

from Zanzibar. There are few Arab residents in these two towns. In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development if the water supply were more certain. The inland tribes breed large numbers of camel, which are prized in Arabia for their quality. There are no industries of importance.

The only port of call for steamers is Ψ Muscat (one of the ports on the mail route between Bombay and Basra). 162 vessels of all nationalities with a total tonnage of 524,248 entered the port in the foreign trade of Muscat in 1955. The mail service between Muscat and Basra is normally weekly in each direction, and Gwadar is also served by these steamers. The G.P.O., London, operates the post office in Muscat. The postage stamps are ordinary British stamps surcharged with their value in Indian currency. Cable and Wireless, Ltd., operates the telegraph office, and an automatic telephone service in Muscat and Matrah.

Inland transport is by pack animals. A motor road connects Muscat with Matrah and a motorable track extends to Khor Fakhan at the far end of the Batinah, a distance of 210 miles. Hajjar and Boshar are also connected by motorable tracks with Matrah. Cars run frequently between Muscat and the towns in the Batinah. Other routes are being developed, but none should be used without previous arrangement.

In December, 1951, a new treaty of friendship, to remain in force for 15 years, was signed between the United Kingdom and the Sultanate of Muscat.

FINANCE

Annual Revenue (estimated) Rs. 40,00,000

The common medium of exchange is the Maria Theresa dollar. On the coast the Indian rupee circulates, and is the official currency of the Sultanate, although not generally in use in the interior. There are also three denominations of copper coins, twenty, ten, and five, called "baizas." The normal rate of exchange is 200 baizas = 1 M.T. dollar = Rs. 2½ (approx.). The weights in use are one kiyas = the weight of six dollars or 5.9375 oz.; 24 kiyas = one Muscat maund; 10 maunds = one Farasala; 200 maunds = 1 Bahar. Rice is sold by the bag, other cereals by the following measurement: 40 Palis = one Farrah; 20 Farrahs = one Khandi.

TRADE

	1953-54	1954-55
Total imports	Rs. 2,05,34,000	Rs. 3,58,44,000
Total exports	1,92,84,600	1,77,10,000
	1954	1955
Imports from U.K.	£248,170	£328,088
Exports to U.K.	11,255	21,725

Trade is mainly in the hands of Hindu Baniyas and Muslim Khojas, many of whom derive British nationality by descent, and is mainly to and from India and Pakistan. The chief imports are cereals, tea, cigarettes, matches, sugar and cotton piece goods. The chief exports are dates, limes, pomegranates and dried fish.

CAPITAL, Ψ Muscat, population (estimated) 3,500. Muscat—British Consul-General, Major F. C. L. Chauncy, O.B.E.

THE KINGDOM OF YEMEN

King of the Yemen, Imam Ahmed bin Yahya Muhammad Hamid Ud Din, born 1895.

YEMEN LEGATION IN LONDON.

41 South Street, W.1.

[Grosvenor: 5246]

Minister, His Excellency Assayed Hasan bin Ali bin Ibrahim.

The late King, Imam Yahya Muhammad Hamid Ud Din, was assassinated in February, 1948, and was succeeded as Imam for a short period by Seyid Abdullah Ibn Al Wazir, the leader of the *coup d'état*. The latter's forces were subsequently defeated by the present Ruler (latterly the Heir Apparent, Seif Al Islam Ahmed), son of the Imam Yahya, who was proclaimed King of the Yemen on March 14, 1948.

Yemen, "the land on the right hand" (of Syria) and the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 4,000,000. It extends inland to the borders of the Hadramaut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, with an abundant and regular rainfall. The main exports are coffee, food-grains, hides, and raisins. Trade agreements have been concluded with a number of countries. The chief port of Yemen is Ψ Hodeida, which is noted for the export of coffee, shipped from Hodeida to Masawa and Aden, and thence to Europe. The Imam is the head of one branch of the Zeidi sect of the Shia Division of the Islamic religion.

FLAG: Red, with horizontal Arabian sword in centre with 3 stars above and 2 below.

CAPITAL, Taiz (pop. about 8,000); Sana'a has about 25,000 inhabitants, and Ψ Hodeida about 30,000.

British Chargé d'Affaires, W. N. Monteith.

BAHRAIN

Ruler, H. H. Shaikh Sir Sulman bin Hamad Alkhalifah, K.C.M.G., K.C.I.E., born 1895; acceded February 3, 1942.

The Bahrain Islands form an archipelago in the Persian Gulf 20 miles from al Hasa on the Arabian coast. Bahrain ("Two Seas"), the largest island, is 27 miles long and 10 miles wide. Muharraq, to the north east, 4 miles long and 1 mile wide, is connected with Bahrain by a wide causeway nearly two miles in length carrying a motor road. The deep-water channel between the two islands is spanned by a swing bridge. Other islands are Sitra, to the east (3 miles long and 1 mile wide); *Nabi Saleh* (about 2 miles in circumference) and several uninhabited islets. The islands are low-lying, the highest ground being a hill in the centre of Bahrain 450 ft. high.

The total area is about 213 square miles with a population of 110,000, of whom about half are the original inhabitants belonging to the Shia sect, the remainder, including the ruling family, being Sunnis. The Sunnis live mainly in the towns of Manamah and Muharraq. There is a community of nearly 2,000 British and Americans, including the staff of the Petroleum Company and other firms and a community of 5,000-6,000 Indians and Pakistanis—the majority of whom live in Manamah.

The ruling family (Al Khalifa) came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782.

About a twentieth part of Bahrain is cultivated, dates, citrus fruits and lucerne being the chief crops. Bahrain is the centre of the famous pearl fishing industry of the Persian Gulf, which lasts for six months during the summer. During the pearling season, Bahrain is visited by numerous Arab, Indian and continental pearl merchants. Oil was discovered in the island in 1932 operations being conducted by an American-owned company, the

Bahrain Petroleum Company, registered in Canada, under a concession granted by the Shaikh. Its refinery is the fifth largest in the world. Other island industries are boat-building, manufacture of sailcloth and reed mats and date cultivation.

The revenue of the State is derived from oil royalties and from customs duties which range from 5 to 15 per cent. *ad valorem* on all imports, and 2½ to 2 per cent. *ad valorem* on transit goods. Much of the trade of the Eastern Saudi Arabian territories, e.g. Nejd and Hasa, passes through Bahrain: it is in fact an entrepôt port. The chief imports are foodstuffs, textiles and clothing, timber and building materials, vehicles, machinery and manufactured goods, some of which are re-exported, and the chief exports are petroleum products and pearls.

Ψ Manamah, the capital and commercial centre, extends 1½ miles along the northern shore of Bahrain Island. Steamships make periodical calls, and Bahrain is a port of call on the B.O.A.C. air route to India and Australia, and for the services of several other air lines. The British Bank of the Middle East and the Eastern Bank have branches in Manamah. There is radio-telephone service between Bahrain and the U.K. Electricity from the Government station in Manamah supplies light and power in Manamah and Muharraq. Water is obtained from artesian wells, and is supplied to houses within the limits of the municipality.

The principal coin in use is the Indian rupee (13.285 = £1). British weights and measures are used.

FLAG: Red, with vertical white bar next to staff.

CAPITAL, Ψ Manamah; population, about 30,000. Secretary to the Government, G. W. R. Smith.

British Political Agent, C. A. Gault, O.B.E. (1954).

QATAR

Shaikh of Qatar, Alibin Abdullah bin Jasim al Thani, succeeded August 20, 1949.

Qatar is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It covers the peninsula of Qatar from approximately the Northern shore of Khor al Odaid to the Eastern shore of Khor al Salwa. The area is about 8,000 sq. miles, with a population estimated at 35,000.

Oil deposits are being exploited by a British Company, under a concession granted by the Shaikh, and the first oil shipment was made on December 31, 1949. About 5,500,000 tons were exported in 1955. Considerable development has resulted from this source of income. Outside Doha and the oil company's installations, conditions are primitive. The inhabitants are semi-settled tribesmen and Bedouin; apart from employment with the oil company and on development projects, pearling, which has greatly declined in recent years, and fishing, are the only alternatives to poor grazing as a means of livelihood. Such towns as exist are merely enlarged villages, with the exception of Doha, which boasts a bazaar, a good harbour for native craft, an airport, an increasing number of modern buildings, and an expanding population. The oil company has constructed a deep water port at Umm Said on the East coast of the peninsula. A regular air service connects Qatar with Sharjah on the Trucial Coast and with Bahrain, Kuwait, Beirut and Nicosia. The Shaikh has a British Adviser with a staff of British technical assistants. Wireless communications are managed by Cable and Wireless, Ltd. The Post Office is run by the British G.P.O. The currency is the Indian rupee.

Qatar is within the political charge of the British Political Agent who lives in Doha.

CAPITAL, Doha. **Population**. Approximately 20,000.

FLAG: White and coffee-coloured, white portion nearer the mast; vertical indented line comprising 17 angles divides the colours.

British Political Agent, D. C. Carden.

Adviser to the Government of Qatar, G. M. Hancock, O.B.E.

TRUCIAL STATES

Six Shaikhdoms, Ras al Khaimah, Umm al Qaiwain, Ajman, Sharjah, Dubai, and Abu Dhabi, on the Persian Gulf seaboard of the Oman promontory between Khor ash Sham and Khor al Odaid, and Fujairah, on the Gulf of Oman, have treaty relations with the British Government to prevent piracy and slavery and to maintain a perpetual truce in regard to all hostile acts at sea. Their territories have a combined area of approximately 30,000 square miles with a population of 75,000 to 85,000. The main port is Dubai, other centres being the coastal towns of Sharjah, Ras al Khaimah, Umm al Qaiwain and Abu Dhabi. The British Political Resident in the Persian Gulf, at Bahrain, through the Political Agent, Trucial States, is responsible for the external relations of the Shaikhdoms and all foreigners are subject to the legal jurisdiction of Her Majesty the Queen. Pearls and dried fish are the chief exports.

ARGENTINE REPUBLIC

(República Argentina.)

President (provisional), General de Division Pedro E.

Aramburu, assumed office Nov. 13, 1955.

Vice President (provisional), Rear-Admiral Isaac F. Rojas.

Asst. Military Attaché, Mario Gentile.

Consul-General, Alejandro A. Galarce.

Consulate-General, 52 Hans Place, S.W.1.

There are also Consulates in Liverpool and Cardiff.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. (For the statue of Christ the Redeemer, see Chile.) On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries: on the east are the great plains. Those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic consists of 23 provinces and one federal district, comprising in all 1,112,743 square miles, with an estimated population of 19,102,000 (July 1, 1955).

In 1954 births numbered 452,222 and deaths 159,809.

Immigration is encouraged. In 1953 the number of passengers arriving was 64,743, departing 45,908. The climate ranges from sub-tropical to cold temperate.

Government.—The estuary of La Plata was discovered in 1515 by Juan Diaz de Solis, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. A revolt in September 1955 forced the resignation of President Perón and an Interim Provisional Government was formed by the late General Eduardo Lonardi. The Provisional Presidency passed to General Pedro Aramburu in November 1955. Since the revolution the National Congress and the Provincial Legislatures have been suspended and the Provisional President has exercised legislative, executive and judicial powers. It is expected that normal constitutional government will be restored as a result of national and

provincial elections which are to be held at the end of 1957. Meanwhile, the Constitution enacted in 1949, during the presidency of General Perón, has been abandoned and the original Constitution of 1853 with 1859 amendments re-adopted.

Agriculture.—Of the total area about one-third is suitable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, horses, goats and pigs. The results of the harvests of 1954-55 and 1955-56 are shown below—

Crop	1954-55	1955-56*
	Metric Tons	Metric Tons
Wheat.....	7,690,000	4,820,000
Maize.....	2,546,000	..
Linseed.....	405,000	231,000
Oats.....	890,000	721,200
Barley.....	1,112,000	960,400
Rye.....	844,100	712,200
Birdseed.....	13,400	14,000
Sunflower Seeds.....	282,800	..

* Estimated.

Mineral Production.—Oil is found in various parts of the Republic and is obtained to a considerable extent at Comodoro Rivadavia (Chubut) and Tartagal (Salta) as also at Mendoza and in other districts. A natural gas pipeline between Comodoro Rivadavia and Buenos Aires has been in operation since 1949. The construction of an oil pipeline from Campo Durán (Salta) to a refinery at San Lorenzo and of another from Mendoza to the same refinery, and of a natural gas pipeline from Campo Durán to Buenos Aires, are projected. The oil output in 1954 and 1955 was as follows:—

	1954	1955
State.....	3,914,000	4,600,000
Private companies.....	784,600	700,000
Total.....	4,698,600	5,300,000

Tin, gold, silver, copper, tungsten, lead, zinc and coal are mined.

Industries.—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the wine industry are also important. In recent years great strides have been made by the textile industry and the development of a wide range of heavy and light industries is actively encouraged by the Government.

Communications.—There are 27,301 miles of railways, all of which are State property. The road network, including national and provincial roads, covers 82,436 miles, of which 6,951 are surfaced. There are air-services between Argentina and neighbouring Republics, Europe, Canada and the U.S.A. The tonnage of vessels entering Argentine ports was 8,349,392 in 1954 and 8,636,062 in 1955. Of the latter figure 721,361 tons were U.S., 820,910 tons were Italian, 1,608,793 tons Argentine and 1,417,877 tons British. There are 60 medium and short-wave broadcasting stations.

Defence.—The Army is organized in 6 divisions, and numbers about 3,000 officers, 5,000 N.C.O.s and 34,000 men on a peace footing.

The Navy consists of 5 cruisers, 11 destroyers, 6 frigates, 1 corvette, 8 minesweepers, 9 motor torpedo boats, 3 submarines, 27 landing craft, 7 oilers, 7 transports, a survey ship and auxiliary vessels; 4 squadrons Naval Air Arm. Strength about 2,000 officers and 25,000 men.

The Air Force consists of a number of operational squadrons and a training force. Operational aircraft include Meteor IV's and Lincoln bombers.

Education.—Primary Education is free and compulsory for four years between the ages of 6 and 14. The scattered population of the country districts constitutes a problem in attendance which is being gradually solved. Illiteracy of adults has fallen in the last 20 years; it is now almost non-existent except in the north and far south, where it is still about 42 per cent. Secondary Education is controlled by the National Government in National Colleges, in Normal Schools, and in Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are National Universities at Córdoba, Buenos Aires, San Miguel de Tucumán, Santa Fé, Mendoza, La Plata and Bahía Blanca.

Language and Literature.—Spanish is the language of the Republic and the literature of Spain is understood and appreciated by the people. There is a renaissance of letters before the break from the 19th century, particularly in the 20th century. Under the Perón régime many newspapers and reviews were closed down and others turned into Government mouthpieces. Since the September 1955 revolution Argentina has been regaining its distinguished position among South American countries for the standard of its newspapers, 26 major daily papers being published in Buenos Aires.

FINANCE

	(1956 Budget)	Paper pesos
Revenue.....	14,866,000,000	
Cash expenditure.....	15,739,000,000	
Expenditure against Bonds.....	6,300,000,000	

The Argentine National Debt.—The public consolidated and floating debt in 1956 amounted to 70,000,000,000 paper pesos.

2nd Sec., Dr. Walter de Comtes.

3rd Sec., Dr. Heinrich Gleissner.

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland. Its area is 34,064 square miles and its population 6,968,500 (1954).

Government.—The Austrian Republic comprises nine provinces (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1918 on the break-up of the Austro-Hungarian Empire. On March 13, 1938, as a result of the *Anschluss*, Austria (*Oesterreich*) was incorporated into the German Reich under the name *Ostmark*. After the liberation of Vienna in 1945, the Austrian Republic was reconstituted within the frontiers of 1937 and, after a period of provisional government, a freely elected Government took office on December 20, 1945. The country was divided into four zones occupied respectively by the U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January 1, 1938. It entered into force on July 27, 1955.

There is a National Assembly of 165 Deputies. At the last general elections in May, 1956, the Government Coalition of Austrian People's and Socialist Parties increased its large majority by nine seats. The present state of the parties is as follows:

Austrian People's Party.....	82
Socialist Party.....	74
Freedom Party (right wing).....	6
Communists.....	3

Religion and Education.—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 14, and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz and Innsbruck.

Language and Literature.—The language of Austria is German, but the rights of the Slovene- and Croat-speaking minorities in Carinthia, Styria and Burgenland are protected. The press is free. There are now 11 daily papers in Vienna and 23 in the provinces, as well as numerous weeklies and monthlies.

Production and Industry.—Agriculture is the most important industry, the arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and sheep. Timber forms a valuable source of Austria's indigenous wealth with about 35 per cent. of the total land area consisting of forest areas. Coniferous species predominate and account for more than 80 per cent. of the timber under cultivation. Hard-wood trees are mainly confined to the Vienna and Burgenland areas. Spruce is the most common among the conifers (about 60 per cent. of the total) and beech is the most prevalent of the broad leaf trees.

Austria has important heavy industries. Production figures for 1955 include (in thousands of metric tons): iron ore 2,838, pig iron 1,508, crude steel 1,823, raw magnesite 992, nitrogenous fertilisers 634, paper 394, chemical pulp 403. In addition 68,814 motor cycles and motor-scooters, 14,328 tractors and 5,414 motor lorries were produced.

Hydro-electric power offers great possibilities

in Austria. Much has already been done to develop it, and a long-term plan has been evolved for further development including greater export of electric current to surrounding countries. Production in 1955 was 10,751 million kWh.

Minerals.—There are large iron ore deposits and, in Eastern Austria, large oil deposits. In addition there are useful deposits of brown coal, magnesite, salt and lead. There are also limited deposits of copper.

FINANCE.

Budget

	1955 (Schillings)

A Kingdom of Western Europe, with a total area of 11,750 square miles and a population, Dec. 31 1955 (including Eupen and Malmédy) of 8,896,000. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxembourg, and on the W. by the North Sea.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 49° F. (summer 65°, winter 37°).

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Since 1938 there has been an increase in the Flemish population by 100,000 and a decrease in the Walloon population of about the same number. Nearly all the inhabitants are Roman Catholics.

GOVERNMENT.—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September, 1944. A monument at Hertain in the province of Hainaut (where British forces crossed the frontier on Sept. 3, 1944), set up by the Anglo-Belgian Union, was unveiled on St. George's Day, 1949.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The Senate is partly directly and partly indirectly elected (or co-opted) for 4 years. 206 members out of 175 are directly elected. The Chamber of Representatives

consists of not more than 1 per 40,000 inhabitants and is elected directly by all adult nationals.

The elections of April 11, 1954, returned to the Senate 73 Social Christians (Catholics), 72 Socialists, 22 Liberals, and 2 Communists, total 169; and to the Chamber of Representatives 95 Social Christians (Catholics), 86 Socialists, 25 Liberals, 4 Communists, 1 Christian Flemish People's Union and 1 Independent, total 212.

PRODUCTION.—Belgium is essentially a manufacturing country. With no natural resources except coal, of which an average of 30,000,000 tons is mined yearly, industry is based largely on the processing for re-export of imported raw materials. A large proportion of the population is engaged in agriculture and forestry, the former supplying four-fifths of the population's needs. Principal industries are coal, steel and metal products (Mons, Charleroi, Liège, Namur, Hainaut, Brabant and Limburg), textiles (Ghent, Bruges, Courtrai, Verviers, etc.), glass, nitrogen, heavy chemicals, sugar, breweries, etc. Steel output in 1954 was 4,886,600 tons.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 261 State grammar and high schools. In addition there are 83 elementary schools under the control of the State and 296 under the control of local government authorities. There are 1,037 private colleges and secondary schools. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are free institutions. After considerable opposition, Ghent University was in 1930 turned into a purely Flemish institution.

LANGUAGE AND LITERATURE.—Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainaut, Namur, Luxembourg, Liège and the southern half of Brabant. The town of Brussels is bilingual. The official languages are both Flemish and French, and also German in the districts acquired after the 1914-18 war. The literature of France and the Netherlands is supplemented by a current of indigenous Belgian literary activity, in both French and Flemish. Maurice Maeterlinck (1862-1949) was awarded the Nobel Prize for Literature in 1911. Louvain library, which ranked among the great libraries of the world, was destroyed by German invaders in the war of 1914-18; reconstructed, mainly by American funds, after peace was declared, it was again destroyed in May, 1940, by German invaders. There are about 58 daily newspapers (French and Flemish) in Belgium.

COMMUNICATIONS.—On Dec. 31, 1954, there were 4,918 kilometres of normal gauge railways operated by the Belgian National Railways, of which 235 kilometres were electrified; the length of light railways operated in 1954 was 2,401 kilometres (of which 1,178 were electrified). On Dec. 31, 1954, there were 582,564 telephone subscribers in Belgium. Ship canals include Ghent-Terneuzen (18 miles, of which half is in Belgium and half in the Netherlands; constructed 1825-1827); Roupe (20 miles, by which ships drawing 18 ft. reach Brussels from the sea; opened in 1922); and Bruges (from Zeebrugge on the North Sea to Bruges, 6½ miles; opened in 1922). The Albert Canal (79 miles), which figured prominently in the fighting (Sept. 1944), for the relief of Belgium and the Netherlands and for the invasion of Germany, links Liège with Antwerp; it was completed in 1939 at the cost of £13,500,000, and accommodates barges up to 1,350 tons. Plans for the expansion and modernization of the port of Antwerp were announced in June, 1956. The estimated cost of the project is £30,000,000, of which the State will contribute £25,000,000, and work is expected to be complete by 1963. Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheldt from Antwerp-Ghent and the Brussels-Charleroi Canal will be widened or deepened to take barges up to 1,350 tons. These improvements are expected to be completed in 1966 and to cost £78,500,000. There are 9,709 kilometres of State roads and 1,329 kilometres of provincial roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1954) of 82 vessels (430,322 tons), in addition to which there are 422 fishing boats (26,781 tons).

The Belgian National Airline operates regular services between Brussels and London, Manchester and many continental centres, as well as overseas services to the United States and the Congo. A passenger and mail-carrying helicopter service, the first of its kind in the world, was inaugurated in 1953. Many foreign air-lines call at Brussels.

The Capital, BRUSSELS, had a population (Dec. 31, 1954) of 976,399 (with suburbs). Other towns are Antwerp, the chief port (603,625); Ghent (229,177), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; Liège (439,436), the centre of the iron industry, and Charleroi (237,005), the important coal-mining and metallurgical centre; Mechlin or Malines (63,172); Ostend (53,125); Bruges (51,650). Brussels is 224 miles from London; transit, 8 hours by rail and sea.

NATIONAL FLAG: 3 vertical bands, black, yellow, red.

THE BELGIAN CONGO

Governor-General, His Excellency M. Léon Petillon.

The Independent State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908. Situated between long. 12°-31° E. and lat. 5° N.-13° S., the colony comprises an area of 909,654 sq. miles, with a native population (Dec. 31, 1955) of 12,562,631 and a non-native population of about 97,371, of which about 78 per cent. are Belgians.

It is administered by the Minister of the Colonies at Brussels, assisted by a Colonial Council of 14 members, of whom 8 are nominated by the King, 3 by the Senate and 3 by the Chamber. The Governor-General in Leopoldville is assisted by a Government Council of nominated members.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 227 miles in length. A narrow-gauge line runs from Boma to Tchela in the Mayumbe (87 miles). Above Leopoldville the river and its numerous affluents are navigable by steamer for about 1,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (78 miles). Another line from Kindu to Albertville on Lake Tanganyika (444 miles) connects the West Coast of Africa with British East Africa and the East Coast. The Katanga-Bukama Railway (443 miles) links up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. The Sakania-Port Franqui Railway (1,134 miles) makes it possible to travel by train direct from Cape Town to Port Franqui, a distance of 3,400 miles. This new route plays an important part in the export of copper from the Katanga mines, its possibilities being limited only by the capacity of the Port of Matadi. Other railways are Aketi-Kombwa-Mungbere (447 miles), Kwomba-Bondo (75 miles); Tenke-Dilolo (324 miles), which joins the Benguela Railway in Portuguese Angola; and Manono-Mayumba (32 miles). An important new line has recently been opened from Kamina on the Sakania-Port Franqui railway to link this at Kabalo with the Kindu-Albertville line. Regular internal air services are established from Leopoldville to Bukavu, Libenge, Coquilhatville, Luluabourg, Stanleyville, Lusambo, Elisabethville, Matadi, Moanda and Kik-

wit, and Elisabethville to Bukavu, Irumu and Stanleyville. External air services are operated to Kano, Tripoli, Rome, Lisbon, Cairo, Athens, Brussels and Johannesburg, and to New York (Pan-American). Two local lines operate feeder lines and a charter service to various smaller centres.

Motor roads including private roads total 76,950 miles, of which 19,750 miles are classified as of national importance. Principal roads include those from Leopoldville to Kikwit, Luluabourg and Elisabethville, from Luluabourg to Bukavu and Usumbura, from Stanleyville to Bukavu, and in the north, the Rue Royale Congolaise from Aketi to Redjaf on the Nile in the Sudan. Extensive road building is planned, of which 1,500 asphalted miles will be completed by 1960. These will include a direct route between Stanleyville and Bukavu and thence to Usumbura. A complete system of telegraphic communication has been established throughout the Colony and is connected with the international system.

The West Coast District has rather scanty rain (40 inches), but on the Mayumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing, and malaria is under control in Leopoldville and Matadi.

Extensive forests cover the central districts.

Production.—Oil palms are plentiful, and supply an increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. The metallic mineral output in 1955 was: copper, 235,107 tons; raw zinc concentrates, 124,167 tons; coal, 479,925 tons; manganese ore, 461,732 tons; cobalt (alloys), 8,227 tons; (granulated), 5,080 tons; cassiterite, 15,815 tons and smelted tin, 11,545 tons. Refined gold amounted in 1955 to 11,359 kg.; diamonds (Lubilash) 124,213,199 carats and (Kasai) 628,298 carats. Extensive radium deposits exist in the Elisabethville Province, where there are enormous deposits of copper. Bukama is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravels are worked in the south. A 10-year plan, covering the needs of the population, public equipment, and agricultural and industrial development, was approved by the Belgian Legislature in 1950. The plan is financed from loans not exceeding 48 milliards Congo francs (about £343,000,000).

Language, Religion and Education.—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common language in the East and South, and Lingala along the river. It is estimated that there are 5,700,000 native Christians in the Colony (Roman Catholic 4,990,000, Protestant 710,000). Missionaries co-operate with the Government in educational matters, and more than half the total expenditure on native education consists of grants to schools established by the various missions. Determined efforts are being made to lower the illiteracy figure. There are public libraries in urban centres for the white population and for such of the natives as can read French, English, or other European languages.

CAPITAL, Leopoldville (pop. 299,121; 26,355 whites). Principal towns, Ψ Matadi (62,473); Elisabethville (133,016); Jadotville (62,066); Stanleyville (57,873); Luluabourg (42,521); Coquilhatville (30,696); Kolwezi (41,856) and Ψ Boma (26,574).

* Including Ruanda-Urundi.

The chief exports are palm-kernels and palm oil, cotton, cocoa, gum-copal, rubber, ivory, copper, gold, tin, cobalt, zinc, radium, wolfram, rubber and tute substitutes and diamonds.

Ruanda and Urundi (Mandated July, 1919, now Trust Territory), formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 20,540 square miles, with a total native population (1954) of 4,261,933, 5,559 Europeans, and 2,471 Asiatics. The territories lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The chief crop is coffee which forms one of the territories' most important exports. Other exports are livestock and hides derived from the large herds maintained by the African population. The administrative capitals are Nianza (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi). There are 4,870 miles of roads and no railways. Budget (1956): Revenue francs 647,000,000; Expenditure francs 746,000,000.

CONSULAR OFFICES.

There is a British Consulate-General at *Leopoldville* and a Consulate at *Elisabethville*.

BHUTAN

Bhutan (area, about 18,000 sq. miles; pop. about 700,000, mainly Buddhists) is an independent State bounded on the North and East by Tibet, on the South by India, and on the West by Sikkim, which is now a Protectorate of the Republic of India. In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains complete independence, issues its own passports and has diplomatic representatives in Tibet as well as in India. It also receives from the Government of India an annual payment of about £35,000 as compensation for portions of its territory annexed by the British Government in India in 1864. The principal cottage industries are weaving, metal works and crafts, and the main exports are timber, rice and wheat. The present Ruler is Maharaja Jigme Dorji Wangchuk who was born in 1929 and succeeded his father in March, 1952. The Government of India has a diplomatic representative whose headquarters are situated at Gangtok, capital of the neighbouring State of Sikkim.

CAPITAL, Punakha.

BOKHARA. See U.S.S.R.

BOLIVIA
(República de Bolivia)

President of the Republic, Señor Hernán Siles, assumed office, August 6, 1956.

EMBASSY IN LONDON.

106 Eaton Square, S.W.1

[Sloane: 3231.]

Ambassador (vacant).

Consulate, 106 Eccleston Mews, S.W.1.

Consul-General, Señor Don Carlos Daza Lavandén.

There are Bolivian Consular Offices in Liverpool, Birmingham, Hull, Cardiff and Glasgow.

The Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30' and 69° 45' W., and its area is estimated at 475,000 square miles with an estimated population (Dec. 31, 1953) of 3,990,000. The Republic derives its name from its liberator, Simon Bolívar (born 1783, died 1830).

The executive power is vested in a President elected for 4 years by direct popular vote. A President is ineligible for re-election for a further term until 4 years have elapsed after a former term has ended. In May, 1951, a military *coup d'état* took place and a *junta* of senior officers was formed under the leadership of General Ballivian. In April 1952, after three days of heavy fighting, the National Revolutionary Movement took over the government of the country.

The National Congress consists of a Senate of 27 members elected for 6 years, and a Chamber of Deputies of 112 members elected for 4 years. One-third of the Senators and one-half of the Deputies retire every two years. Presidential and Congressional elections were held on June 17, 1956, at which the National Revolutionary Movement won all the seats in the Senate and a large majority in the Chamber of Deputies; Señor Hernán Siles (N.R.M.) was elected President and assumed office on August 6.

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamore, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosí are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after those of Malaya and Indonesia, the largest in the world, 44,239 fine tons (metric) being exported in 1954: copper, antimony, wolfram, bismuth, salt and sulphur are also found, and petroleum is being produced in growing quantities. The Republic has been self-supporting in petroleum and its by-products since January 1954 and exports have started to the Argentine, Chile, Brazil, Paraguay and Peru. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, indigo, indiarubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state, but the Government plans to encourage their development under a policy of "diversification of the economy." There are 1,454 miles of railways in operation. New lines are under construction from Corumbá to Santa Cruz (405 miles) and from Yacuibá to Santa Cruz (312); the first of these is almost complete and the second is expected to be

finished within three years. Work on a third new line, from Cochabamba to Santa Cruz, was suspended some years ago. There are about 10,950 miles of telegraph wire, and wireless services between Riberalta, La Paz, Cobija, Capitandí (Chaco). There is direct railway communication to the sea at Antofagasta (32 hours), Arica (20 1/2 hours), and Mollendo (4 days), and also to Buenos Aires (3 1/2 days); by rail lines run from Oruro to Cochabamba, and from Río Mulato to Potosí, and from Potosí to Sucre, the legal capital. The principal railway line is the Antofagasta and Bolivia railroad (749 miles), which is British owned. Communication with Peru is effected by rail to Guayaquil and thence by steamer across Lake Titicaca to the railroad at Puno.

Commercial Aviation in Bolivia is conducted by Pan American-Grace Airways and Braniff International Airways (American) and Lloyd Aéreo Boliviano (Bolivian), the two former providing international connexions with U.S.A., West coast South American countries, Canal Zone, Brazil and Argentina; Lloyd Aéreo Boliviano, attending to local flights, links La Paz with Oruro, Cochabamba, Santa Cruz and Trinidad, &c., and connects with LAN of Chile, Argentine Airlines and Cruzeiro do Sul of Brazil.

Bolivia is without a sea-coast having been deprived of the ports of Tocopilla, Cobija, Meñillones, and Antofagasta by the "Pacific War" of 1879-1882. The Peace Army amounts to about 5,000 all ranks, the War Effective being about 105,000.

Language and Literature.—The official language of the country is Spanish, but the Indian inhabitants (about two-thirds of the population) speak either Quichua or Aymará, the two races being more or less equal in numbers.

The Roman Catholic religion is established and subsidized. Elementary education is compulsory and free and there are secondary schools in urban centres. The high percentage of illiterates is yielding to modern methods; all illiterates under 21 are nominally compelled to attend school. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are many other institutions offering university instruction. Bolivian literature has not yet produced authors of world-wide renown. There are five daily newspapers in Bolivia, with an estimated daily circulation of 87,000.

Estimated expenditure (1956).... Bs.74,045,850.069
Bs.= Bolivianos.

Until May 14, 1953, there were four official rates of exchange, Bs.60=United States \$1, Bs.100=U.S.\$1, Bs.130=U.S.\$1 and Bs.245=U.S.\$1. The rate of exchange in any particular transaction depended on the degree of necessity of the import in question in terms of the Bolivian national economy. Non-essential goods could be imported with privately acquired foreign exchange. On May 14, however, the Government issued eight Supreme Decrees which, among other things, established a single official rate of exchange of Bs.100=U.S. \$1 for a wide range of imports together with a free market for less essential imports. The rate of the dollar on the official free market in May, 1956 was about 6,000. Licences are required for all imports.

TRADE.

	1954	1955
Exports to U.K....	£10,917,585	£10,792,324
Imports from U.K....	1,525,456	2,048,453

The principal exports are tin, lead and antimony ores, wolfram, cocoa and hides; Bolivia also ranks

as the second rubber-exporting country in South America after Brazil. The chief imports are wheat and flour, sugar, iron and steel products, machinery and textiles.

SEAT OF GOVERNMENT, La Paz. Population (1946) 300,000. Other large centres are Cochabamba (76,500), Potosí (40,000), Santa Cruz (33,000), Sucre, the legal capital and seat of the judiciary (30,000), Tarija (17,000), and Oruro (50,000).

FLAG: Three horizontal bands: Red, yellow, green.

Consul, Senhor Lourdes de Vincenzi.

Vice-Consul, Senhor Nisio de Madeiros Baptista Martins.

There is a Brazilian Consulate-General at Liverpool and Consulates at Southampton, Cardiff and Glasgow and an Honorary Consulate at Newcastle-on-Tyne.

POSITION AND EXTENT.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Álvares Cabral, Portuguese navigator, is bounded on the

north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 16' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W., being 2,685 miles from north to south, and 2,690 from west to east, with a coast-line on the Atlantic of 4,604 miles. The Republic comprises an area of 3,289,440 square miles with a population (estimated July, 1956) of 60,000,000.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Mato Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are *Serra do Mar* in São Paulo; the *Serra Geral* (Caparaó 9,393 feet) between Minas Gerais and Espírito Santo, the *Serra do Mantiqueira* (Itatiaia, 9,163 feet), and the *Serra do Espinhaço* (Itacolomi, 5,748 feet), in the south-east of Minas Gerais; the *Serra do Paranaíba*, between Goiás and Minas Gerais, the *Serra dos Aymores*, which divide Espírito Santo from Minas Gerais; and the *Serra do Gurgueia*, *Branca* and *Araripe*, which envelop Piauí.

Brazil is unequalled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajós*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaya* flow northwards from the Plateau of Mato Grosso and the mountains of Goiás to the Gulf of Pará. The *Parnaíba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Gerais and traverses Bahia on its way to the eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Mato Grosso, flows through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the *Iguassú*, which unites with the Upper Paraná at the Brazil-Argentine-Paraguay boundary, are the majestic *Falls of the Iguassú* (200 ft.), and on the São Francisco are the no less famous *falls of Paulo Afonso* (260 ft.).

GOVERNMENT.—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was deposed and a republic was proclaimed. Constitutional Government, under the Constitution of 1891, was suspended after the revolution of 1930. Dr. Getúlio Vargas, who had been Chief of the Provisional Government since 1930, was elected President and assumed office on July 20, 1934. By a *coup d'état* of Nov. 10, 1937, he closed Congress, abolished the old political parties and issued a new Constitution. On Sept. 18, 1946, the *Estado Novo* established by Vargas was superseded by a new constitution, limiting the Presidential term to 5 years (in place of 7) and restoring a Congress of two chambers. In October, 1955, elections took place in which Dr. Juscelino Kubitschek was elected the new President.

PRODUCTION.—There are large and valuable mineral deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome, nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious stones are also found. The mineral wealth is still

exploited to only a very limited extent. Production is increasing, but is capable of great further development. The iron ore deposits are particularly rich. The estimated production of iron ore in 1955 was 3,600,000 tons. Oil has been found in Bahia, the production in 1955 being 2,000,000 barrels, and prospecting is in progress in Amazonas and Pará. Coal production is about 2,000,000 tons a year. One million tons of steel, 2,500,000 tons of cement and 3,900,000 litres of refined petroleum products were produced in 1955. A motor industry is being developed as well as certain of the heavier industries, such as the manufacture of railway wagons. Light metal manufactures, light electrical equipment, textiles, leather, foodstuffs, chemicals and pharmaceuticals, ceramics and glass are also produced in quantity.

Brazil's agricultural and vegetable extractive produce is abundant, coffee, cotton, maize, sugarcane, cocoa, rice, citrus fruits and bananas, being the main agricultural products, and timber, rubber, carnauba wax, herva-maté, jute and other fibres being the main vegetable extractives.

The main exports of agricultural produce in 1955 were:—

	Metric Tons	Value \$U.S.
Coffee	822	844,000,000
Cotton	176	131,000,000
Cocoa	122	91,000,000

Coffee is grown mainly in the States of São Paulo and Paraná and to a lesser extent in Minas Gerais and Espírito Santo.

DEFENCE.—The peace effective of the Army is about 200,000 all ranks. The Navy consists of 2 cruisers, 15 destroyers and escorts, 11 corvettes, 3 submarines, 15 submarine chasers, a sail training ship, 3 ocean-going tugs, 2 survey vessels, a river monitors and various auxiliaries. The strength of the Navy is about 25,000 officers and men. The Air Force has about 800 aircraft, and is the largest in South America.

EDUCATION.—Primary education is carried out by State governments and municipalities and private initiative, in some cases with a Federal subsidy; there were 84,250 schools with 5,654,000 pupils in 1952. Secondary education is carried out by the Federal government at the Colégio Pedro II founded in 1837, which is the only federal institution for secondary education; by state governments all over the country through States Colleges; and by private colleges under federal inspection. In 1954, there were approximately 536,000 pupils enrolled at secondary schools. Technical education is carried out by Federal, State and private institutes, and the number of pupils in them is over 240,000. Higher education is carried out by 18 Federal, State and private universities.

LANGUAGE AND LITERATURE.—Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers; 25 daily newspapers are published at Rio de Janeiro.

COMMUNICATIONS.—In 1954 there were 37,205 kilometres of railways in service, of which 2,630 kilometres were of broad (1.6 m.) gauge, 33,574 kilometres of 1 m. gauge and 1,063 kilometres of narrower gauges. The greater part, 28,955 kilometres, (78 per cent.) is owned by the Federal Government and a further 3,454 kilometres (9 per cent.) are owned by State Governments. Traffic carried in 1953 was—Passengers 325,000,000, Freight 33,000,000 tons, Livestock 3,600,000 head. The two largest ports are Rio de Janeiro, which was used by 13,579,000 tons of shipping in 1953 and Santos, which was used by 13,277,000 tons in 1953.

Seven foreign airlines, Air France, SAS, KLM, Aerolíneas Argentinas, Swissair, Iberia and Alitalia (in addition to Panair do Brasil and another Brazilian company, Varig) operate services between Brazil and Europe. Pan American World Airways, Braniff and Aerovias Brasil operate services between Brazil and U.S.A., and there are connections with all Latin American countries. Eight major domestic airlines, as well as the Brazilian Air Force, maintain services throughout the country.

Postal facilities in Brazil include 4,500 post offices and over 40,000 miles of telegraph. In 1954, 680,000 telephones were in use, of which a large proportion were automatic.

FINANCE.

	1955	1956*
Revenue...	Cr. 55,671,000,000	Cr. 70,960,000,000
Expenditure...	Cr. 63,287,000,000	Cr. 71,505,000,000

* Estimated.

The external debt of Brazil on Dec. 31, 1955, was: Union, £12,562,000 (\$U.S. 57,717,000); States, £12,149,000 (\$U.S. 35,654,000); Municipalities, £2,348,000 (\$U.S. 5,623,000). Internal debt, Dec. 31, 1955, amounted to: Union, Cr. 10,558,000,000; States, Cr. 17,600,000,000.

The unit of currency is the *Cruzeiro* of 100 *Centavos*. The official selling rates of the Bank of Brazil (June, 1956) were Crs. 52.6060 = £1, Crs. 18.82 = U.S. \$ 1, but for trade there is a complicated system of exchange bonuses for exports and exchange premiums for imports, which produce in effect a large number of different rates, while invisible transactions are carried out through a free market on which the quotations have in the twelve months preceding June 30, 1956, fluctuated between Crs. 180 and Crs. 240 = £1.

TRADE (1955)

Total Imports	Cr. 245,955,000,000 (\$U.S. 1,307 m. *)
Total Exports...	26,131,000,000 (\$U.S. 1,423 m. *)

* Valued at official exchange rate.

	1954	1955
Imports from U.K....	£8,951,191	£6,561,559
Exports to U.K....	36,998,985	31,863,568

The principal imports are fuel oils, machinery, vehicles, wheat, chemicals, industrial raw materials and newsprint. The principal exports are coffee, cotton, cocoa, timber, iron ore, sugar, fruit, tobacco, wax, hides and skins and fibre. Coffee accounts for over one-half of total export values.

CAPITAL. Rio de Janeiro. Population (1950), 2,550,000. Other large centres are São Paulo, 2,250,000; Rio Salvador (Bahia), 424,142; Recife (Pernambuco), 534,468; Rio Belém (Pará), 260,608; Belo Horizonte (Minas Gerais), 360,313; Fortaleza (Ceará), 280,084; Niterói (Rio de Janeiro), 190,147; Curitiba (Paraná), 183,863; Porto Alegre (Rio Grande do Sul), 401,213; Campos (Rio de Janeiro), 240,829; Santos (São Paulo), 206,920.

FLAG: Green, with yellow lozenge in centre; blue sphere with white band and stars in centre of lozenge.

LEGATION IN LONDON.

12 Queen's Gate Gardens, S.W.7.
[Western: 9400]

Mimster, Dimitre Halov (1954).

The Republic of Bulgaria is bounded on the north by Roumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is approximately 43,000 square miles, with a population (1947) of 7,022,206. The prevailing religion of the Bulgarians is the Eastern Orthodox Church (83 per cent.); Moslems (Turks and Pomaks) (14 per cent.) and various others (3 per cent.). For secular purposes the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobruja to Roumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. The armistice with the Allies was signed in Moscow, Oct. 28. On Sept. 9 a *coup d'état* gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobruja to Bulgaria.

GOVERNMENT.—On Sept. 8, 1946, a referendum was held, at which, according to the published results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a Republic. On Oct. 27, a general election to a Grand National Assembly (with power to make a constitution) was held; the Opposition won 101 seats out of 465. According to the new Constitution the legislature is a single chamber National Assembly or *Subranie* elected by adult suffrage on the basis of one deputy to every 30,000 inhabitants for a maximum term of four years. The Opposition Agrarian Party was suppressed on Aug. 24, 1947.

following the pronouncement of the death sentence on its leader, Nikola Petkov. The opposition newspapers ceased to appear after April, 1947. Nine opposition Social Democrats continued to sit in the National Assembly until they were placed under restraint in July, 1948. The Government Social Democratic Party fused with the Workers' (Communist) Party on Aug. 11, 1948.

Bulgaria linked herself to the other countries of Eastern Europe by a series of treaties of friendship, collaboration and mutual aid, the first of which was signed with Yugoslavia on November 27, 1947. This was followed by similar treaties with Roumania (January 16, 1948), the Soviet Union (March 18), Czechoslovakia (April 26), Poland (May 30) and Hungary (July 6). The treaty with Yugoslavia was abrogated in 1949.

PRODUCTION.—Bulgaria is essentially agricultural, the principal crops being beet, rye, wheat, barley, oats, maize, tobacco, oleaginous seeds, soya beans, fodder, fruits, vegetables and cotton. The livestock includes sheep, goats, cattle, pigs, horses, asses and mules. There are brown and black coal deposits, certain of which produced (1947) 4,046,000 tons. The present annual production is approximately 7,500,000 tons. Production of hydro-electric power is being developed. There is a large variety of thermal and mineral springs, several of which have been modernized. Certain areas are well mineralized with copper, lead, zinc, iron and manganese, and the Government has announced special efforts to develop these ores on account of the present shortage of agricultural exports. There are large deposits of bituminous shale and indications of petroleum. Alluvial gold is found in many places. There is a small but developing ore industry in N.E. Bulgaria. Output in 1955 was 150,000 tons. Since 1949 a campaign to industrialize the country has been in progress and several heavy industrial installations, including an iron and steel works and a chemical works, are now in operation.

DEFENCE.—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but it is believed at present to be at least 200,000 strong.

EDUCATION.—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, and in 1956 there were 6,654 general educational institutions, 339 gymnasias, 1,090,000 students and schoolchildren and 54,366 teachers.

Before September 9, 1944, illiteracy stood at 32 per cent. of the population. In 1950 it was claimed that only 19 per cent. of the population remained illiterate.

There are 20 universities (known as Higher Educational Establishments and including universities proper and Academies of Music, Science, etc.), including those of Sofia, Plovdiv and Varna. In 1956 there were stated to be 36,000 students at Bulgarian Universities.

LANGUAGE AND LITERATURE.—Bulgarian is a Southern Slavonic tongue, closely allied to Russian (see U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature, chiefly educational and popular. The alphabet is Cyrillic, as in Russia. In 1956 there were 6 daily newspapers in Sofia.

COMMUNICATIONS.—On Jan. 1, 1947, there were 13,360 miles of road open, and new roads have since been built to an estimated length of 560 miles. There were 2,676 miles of normal and 327 miles of narrow-gauge railway open. On Dec. 31, 1940,

there were 870 post offices, 669 telephone exchanges and 877 telegraph offices. In 1941 vessels cleared at Black Sea ports numbered 7,424 (665,239 tons), and 17,626 vessels (4,075,118 tons) cleared at Danube ports.

FINANCE. 1956 leva

Budget revenue (estimated) 18,474,400,000
Budget expenditure (estimated) . . . 17,574,400,000

Before the war the principal imports were raw, semi-manufactured and finished textiles, metals and manufactures, industrial and agricultural machinery, implements and tools, chemicals, tanning materials, mineral and vegetable oils, greases, fats, gums, wax, paper, hides, leather, glassware, china and porcelain, drugs and medicines, sawn timber, rubber. The principal exports were cereals and flour, bran, tobacco, eggs, beans, poultry and dairy produce, sunflower seed and cake, vetches, goat, sheep and lamb skins, attar of roses, live-stock, nuts, fruits, silk cocoons, charcoal, hardwoods, copper matte and lead ore. Trade up to 1944 was principally in the hands of Germany and at the present time 92 per cent. of trade is with the U.S.S.R. The 1955 harvest was average.

Trade with U.K., 1955.—Imports, £1,119,614; Exports to U.K., £3,490,516.

CAPITAL, Sofia. POP. (1947), 434,888, at the foot of the Vitosha Range, the capital and commercial centre, is on the main railway line to Istanbul, 338 miles from the Black Sea port of Varna (77,762) (closed to foreign shipping) and 125 miles from the Black Sea port of Burgas (113,044) (closed to foreign shipping). Other important trading and industrial centres are Plovdiv (125,440) and Pleven (38,097).

FLAG: 3 horizontal bands, white, green, red.

BURMESE EMBASSY IN LONDON

194 Charles St., Berkeley Square, W.1.

Ambassador, His Excellency Maha Thray Sithu U Kyin (1955).

Area and Population.—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between 9° 58' and 28° N. latitude and 92° 11' and 101° 9' E. longitude, with an extreme length of approximately 1,200 miles and an extreme width of 575 miles. In the north the frontier with Tibet and China has not yet been demarcated; the north-west frontier touches Pakistan and the Republic of India; the Bay of Bengal forms the western frontier and on the north-east and east Burma marches with the Chinese province of Yunnan, French Indo-China and Siam. The area of the Union includes Burma proper with the Chin Hill and Kachin Hill tracts (192,158 sq. miles), the Shan States (57,816 sq. miles) and the Karenni States (4,519 sq. miles) making a total of 254,493 sq. miles. The population of the 233,492 sq. miles of British Burma covered by the census operations of 1931 was 14,547,756, showing a density of 62 persons to the square mile. The population of the Union may be estimated at 17,500,000 to 18,000,000, showing an estimated density of 61 persons to the square mile.

Physical Features.—Burma falls into four natural divisions, Arakan (with the Chin Hills region), the Irrawaddy basin, the old Province of Tenasserim, including the Salween basin and extending southwards to the Burma-Siam peninsula, and the elevated plateau on the east made up of the Shan States. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razi (19,296 ft.) in the northern Kachin hills. Mt. Popa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladen-Lemro in Arakan, the Irrawaddy-Chindwin in Central Burma, and the Salween which flows through the Shan Plateau.

Races, Language and Religions.—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Tai groups. The three important non-indigenous elements are Indians and Pakistanis (about 800,000), Chinese (about 300,000), with Europeans and Anglo-Burmans numbering in all about 10,000. Burmese, Shan, Karen, Kachin and Chin are the chief languages. Buddhism is the religion of 85 per cent. of the people, with 5 per cent. Animists, 4 per cent. Moslems, 4 per cent. Hindus and rather less than 3 per cent. Christians.

Government.—Burma formed part of British India until April 1, 1937, when it became a separate territory with a considerable measure of self-government. The country was invaded by the Japanese in December, 1941, and until October, 1945, the Civil Government functioned in India.

In September, 1946, a new Executive Council

was appointed, consisting of a coalition of the main political parties. By agreement in London this body subsequently became the Interim Government. In April, 1947, elections were held for a Constituent Assembly, and in June, 1947, the Assembly adopted a resolution declaring that Burma's status should be that of an independent Sovereign Republic.

The Treaty which made Burma an Independent State outside the British Commonwealth was signed in London on Oct. 17, 1947, and came into force on Jan. 4, 1948. The Treaty regulated matters arising out of the transfer of power and defines the future relations of the two governments "in terms of complete freedom, equality and independence." The terms of the Treaty were implemented in the Burma Independence Act, which received the Royal Assent on Dec. 10, 1947. The Act also provided for the cessation of the suzerainty of the Crown over the Karenni States and under the new constitution all the frontier areas came within the federal framework of the Union. Provision was made for option to retain British nationality.

In March, 1948, the Burma Communist Party went into open revolt against the Government. The President declared a state of emergency on August 10, 1948, and martial law was applied to 16 districts of Central and Southern Burma a few days later. At the end of January, 1949, the Karens also rebelled and in June they proclaimed their own State with its capital at Toungoo. Toungoo, however, was retaken in March, 1950, and the Rangoon-Mandalay road, which had long been closed to traffic, was freed in April. In the following years the Government carried out operations against the insurgents and by June, 1955, the activities of the Communists and army mutineers had been reduced to isolated acts of banditry and sabotage, and the state of internal security and law and order has shown a very great improvement. The Karen rebel "capital" of Papun was retaken in March, 1955. This was the last district headquarters then remaining in rebel hands.

Burma asked the British Government for financial assistance early in 1949, and accepted the offer of a loan of £6,000,000 sterling from five Commonwealth countries (the United Kingdom, India, Pakistan, Ceylon and Australia) in March, 1950. Burma joined the Colombo Plan in 1952.

The first general election under the new Constitution, during the second half of 1951, resulted in the return to power of the "Anti-Fascist People's Freedom League," of which the Burma Socialist Party is the principal constituent. At the second general election in April, 1956, the A.F.P.F.L. returned to power with a reduced majority (171 out of 250 seats). The Opposition consists mostly of members of the National Union Front, which has strong Communist sympathies.

Defence.—The Defence Agreement annexed to the Treaty of 1947, under which a British Services Mission provided instructors, was ended on Jan. 3, 1954, at the request of the Burmese Government, and no fresh agreement has been reached. Burma has an army of fair strength and quality, but both the navy and air force are very small.

Education.—The literacy rate is high compared with other Asiatic countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture. The University of Rangoon was founded in 1920, with a Medical College, an Engineering College and a Teachers' Training College attached. There are intermediate colleges at Mandalay, Moulmein and Kyaukpadaung (in Arakan). Good progress is be-

ing made in re-organization and extension of the educational system and rebuilding after war-time neglect and destruction. An important feature of this programme is a "Mass Education" Scheme aimed at the adult population of the rural areas.

Finance.—The chief sources of revenue are customs duties, commercial taxes and excise duties; the chief head of expenditure are defence, social services, civil administration and economic development. The budget estimates for 1954-55 were: income £84,084,000; expenditure £108,442,000. The deficit of £24,358,000 to be covered will depend on the proceeds of state-controlled rice exports.

Production, Industry and Commerce.—The chief agricultural products are rice, sesamum, maize, jowar (millets), cotton, beans, wheat and grain. Rice cultivation is the mainstay of Burma's economy; before the war Burma was the world's largest exporter of rice, her total production of over 7,000,000 tons a year being raised from 12,000,000 acres or 70 per cent. of the country's total cropped area. The pre-war yearly average of rice exports was over 3,000,000 tons. In 1952-53 (Oct. to Sept.) exports reached 1,200,000 tons. The net area sown in 1938-39 was 17,387,241 acres, two-thirds of the population being dependent on agriculture for their livelihood. The marketing of rice and other agricultural produce is now a state monopoly. Reserved forests covered 19,913,930 acres. 1,470,333 acres were irrigated. The principal export after rice is teak, of which some 200,000 tons were exported annually. Burma is fairly rich in minerals, especially petroleum, rubies, jadeite, and wolfram. Of these petroleum is the most important. Production for 1953 was 37,647,000 gallons. A new refinery has been built at the main oil-field, and it is hoped that future annual production will exceed 60,000,000 gallons. The production of petroleum is in the hands of a joint venture between the Burmah Oil Company and the Union Government. It is not the only such venture and others are envisaged.

The former preferential duties for certain goods manufactured in the Commonwealth were ended on Oct. 1, 1953. Trade with the United Kingdom in 1955 was valued at: Imports, £21,918,347; Exports to U.K., £8,202,052.

Communications.—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (500 miles from its mouth) and carrying much traffic.

ψ The chief seaports are Rangoon, Moulmein, Akyab and Bassein.

The Burma Railways had a total length in 1940 of 2,300 miles, extending to Myitkyina, on the Upper Irrawaddy. The *Burma Road* from Lashio to Kunming (in the Chinese Province of Yunnan) was constructed in 1937-39, with a total length of approximately 800 miles. Since the war a considerable network of internal air services has come into being. The airport at Mingaladon, about 9 miles north of Rangoon, has been reconstructed and handles much international traffic.

Chief Towns.—The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1952), about 740,000. Mandalay, the chief city of Upper Burma had a population of (1952) 182,000, Moulmein one of 99,000 and Bassein 77,000. Pagan, on the Irrawaddy S.W. of Mandalay, contains many sacred treasures and objects of interest to antiquaries.

NATIONAL FLAG.

The Union flag is red, with a canton of blue bearing a large white five-pointed star surrounded by 5 smaller stars of like pattern and colour.

BRITISH EMBASSY.

(Rangoon.)

British Ambassador (vacant).

There is a *British Consulate* at *Maymyo*. Transit from London to Rangoon: by sea, 26-35 days; by air, 2-5 days.

Representative of British Council, H. T. Lawrence, M.B.E., 30 Strand Road, Rangoon.

CHILE

(República de Chile.)

President (1952-1958), General Carlos Ibañez del Campo, assumed office, Nov. 4, 1952.

CABINET.

(May 25, 1956.)

Minister of the Interior, Colonel Benjamin Videla Vergara.

Foreign Affairs and Mines, Osvaldo Sainte-Marie Soruco.

Finance and Economy, Oscar Herrera Palacios.

Justice, Mariano Fontecilla Veras.

National Defence, Almirante Francisco O'Ryan.

Public Works, Adalberto Fernandez.

Agriculture, Lands and Colonization, Santiago Wilson.

Labour and Public Health, Dr. Raúl Barrios Ortiz.

Minister Secretary-General of the Government, Mario Ciudad V.

EMBASSY IN LONDON.

3, Hamilton Place, W.1.

[Mayfair: 8382.]

Ambassador in London, Señor Don Enrique Balma-ceda (1953).

Minister-Counsellor, Señor Don Higinio Gonzalez.

Counsellor, Señor Don Oscar Bustamante.

Commercial Counsellor, Señor Don Pedro Alvarez.

Secretary, Señor Don Antonio Gandarillas.

Naval Attaché, Admiral Erwin Gundlach.

Assistant Naval Attaché, Capt. Harold Hyslop.

Civil Attaché, Señor Don Calixto Rogers.

Consulate, 3 Hamilton Place, W.1.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. 17° 15' and 55° 59' S., and long. 66° 30' and 75° 48' W. Extreme length of the country is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid.

Among the island possessions of Chile are the *Juan Fernandez group* (2 islands) about 350 miles distant from Valparaiso, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (Robinson Crusoe) shipwreck. *Easter Island* (27° 8' S. and 109° 28' W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been

determined. The area of the island is about 45 sq. miles.

Chile is divided into 25 provinces and the total area of the Republic is estimated at 290,000 square miles, with an estimated population of 6,150,000 (Dec. 1953). In 1929 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of £1,200,000. Included in the total are four racial divisions: (a) Spanish settlers and their descendants; (b) indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish Indians; and (d) European immigrants.

In 1953 the registered births per thousand inhabitants numbered 30; marriages 7.5; and deaths 11.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipú* (April 5, 1818), achieved the independence of the nation. Under the present Constitution (Aug. 30, 1925), the President is elected by direct choice of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of 147 Deputies. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll. Chilean women obtained equal voting rights with men on Dec. 21, 1948, before which they only participated in municipal elections.

PRODUCTION, &c.—Agriculture and mining are the principal occupations, though industrial development is being actively encouraged by the Government. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, Chili-pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish in the central zone and fruit is an important export item. Excellent wines are produced and exported and are becoming more widely known in world markets. There are large timber tracts in the central and southern zones of Chile, some types of which are being exported to Europe in increasing quantities. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. The production of refined copper in 1955 was 434,000 metric tons. The rainless north is the scene of the only commercial production of nitrate of soda (Chile salt-petre) from natural sources in the world. Production in 1955 (including potassium nitrate) was 1,540,000 metric tons. Chile also produces iodine, manganese ore, coal, and a small quantity of gold. 2,308,000 metric tons of coal and 1,523,000 metric tons of iron ores were produced in 1955. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Production of refined sulphur has hitherto been in relatively small quantities. Annual production is between 45,000 and 50,000 metric tons. Local consumption is on the increase. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945, and the Government has been promoting the industry ever since. Production in 1955 was 409,680 cubic metres. An oil-duct 70 kilometres long now joins the principal field in Cerro Manantiales with Clarence Bay. The first export shipment was made in February, 1950, and in 1953 a total of 150,248 metric tons was exported. The total production is now being refined at Concon, a few miles north of Valparaiso. A large steel plant was completed and started operation during 1950 at Huachipato, near Concepcion.

In 1955 the total of all iron and steel products amounted to 217,111 metric tons.

In recent years a considerable cotton and woollen textile industry has developed. Minor industries include tanning, flour milling, lumbering, distilling, fish canning and whaling, brewing, and the manufacture of starch soap, biscuits, rope, glassware, plastic goods, pottery, paint, boots and shoes, hosiery, millinery, cheese, furniture, matches, brushes, cordage, paper and cigarettes. Domestic industries include weaving and embroidery.

COMMUNICATIONS.—The bulk of the country's commerce is distributed along its lengthy sea-board in Chilean ships, which have a virtual monopoly of cabotage. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America or via the Panama Canal to Europe or via the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine in 1955 numbered 122 vessels of a total gross tonnage of 213,317. Under a new law promulgated in June, 1956, 50 per cent. of Chile's foreign trade must be carried by Chilean vessels.

The first railway was opened in 1851 and there are now 6,100 miles of track. A line runs from Pisagua in the north to Puerto Montt in the south. With the completion of a section of 435 miles from Corumbá, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentina) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaíso on the Pacific with Buenos Aires, crossing the Andes at 11,500 ft. In 1949 there were 12,500 miles of telegraph, 1,302 post offices and 55,000 miles of telephone.

DEFENCE.—All able-bodied male citizens from 19th to 45th year must serve in one of the armed forces for a training period of 2 years in the Navy or one year in the Army or Air Force. In 1955 the Army had 6 infantry and artillery divisions and 1 cavalry division with a total strength of 2,200 officers, 10,000 regular other ranks plus 20,000 conscripts annually. In addition there is a paramilitary police force of "Carabineros" of some 20,000 officers and men. The Air Force had 370 pilots (150 active) and 4,700 other ranks plus 1,000 conscripts with a strength of some 180 aircraft. The Navy consisted of 1 battleship, 2 cruisers, 6 destroyers (2 operational, 4 reserve), 3 frigates, 3 corvettes, 2 submarines, 1 submarine depot ship, 3 transports and various other small fighting ships. The present strength of the Navy's personnel is estimated to be 336 officers and 11,300 regular ratings plus 1,000 conscripts.

EDUCATION is free, elementary education being compulsory since 1920; there were (in 1950) 535,237 pupils at elementary, and about 150,000 at secondary schools. There are 5 Universities (2 in Santiago, 2 in Valparaíso, and 1 in Concepción). The religion is Roman Catholic.

LANGUAGE AND LITERATURE.—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señorita Gabriela Mistral, for Chilean verse and prose. There are over 100 newspapers and a large number of periodicals, including some devoted to professional, scientific and social subjects.

FINANCE

	1955
Revenue (Financial Year).....	137,935,600,000
Expenditure (Financial Year)....	159,019,600,000
Internal Debt (Dec. 31, 1955):—	
Direct—Long Term.....	33,059,510,551
Short Term.....	58,240,887

Sterling.....	£888,811
U.S.....	\$2,009,996

Chile's official exchange rate registered with the International Monetary Fund is Ch. \$110=U.S. \$1. The official "free" rate of exchange in June, 1956, was Ch. \$497=£1.

EXTERNAL TRADE.

	1954	1955
	Gold Pesos	Gold Pesos
Total imports....	1,665,000,000	1,827,000,000
Total exports....	1,957,000,000	2,304,000,000
Imports from U.K.....	£4,206,220	£4,378,034
Exports to U.K....	12,884,500	22,770,286

Since 1949 the gold peso has been worth about 15.6d.

The principal exports in 1955 were metallic and non-metallic minerals (refined copper, ingots and bars, nitrates, etc.), cereals, vegetables, fruit and wool. The principal imports in 1955 were industrial oils, raw cotton, chemicals, machinery, tools, electrical and transport equipment and sugar.

CAPITAL. Santiago (June, 1952) 1,506,889 (Greater Santiago). Other large towns are:—
 Valparaíso (222,238), Concepción (133,573), Temuco (90,957), Viña del Mar (88,196), Chillán (67,311), Talca (63,602), Antofagasta (62,844), Valdivia (60,077), Talcahuano (63,133), Iquique (40,865), Punta Arenas (37,990).
 Punta Arenas, on the Straits of Magellan, is the southernmost city in the world.

FLAG: 2 horizontal bands, white, red; in top quarter a white star on blue square, next staff.

BRITISH EMBASSY.

(Calle Bandera 227, Piso 3° Santiago (Casilla 72D))

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Charles Empson, K.C.M.G. (1955).

Chancery, Calle Bandera 227, Piso 3°, Santiago.
 First Secretary and Consul, J. N. Henderson.
 Naval Attaché, Capt. H. T. Harrel, R.N.
 Air Attaché, Group-Capt. W. J. O. Coleman, D.F.C.

First Secretary (Commercial), J. H. Wright.
 First Secretary (Information), J. P. Waterfield.
 First Secretary (Labour), W. M. Wylie.
 Second Secretary (Commercial), R. C. Robinson.
 Third Secretary (Information), N. L. Shearman.

BRITISH CONSULAR OFFICES.

There are British Consular Offices at Santiago, Antofagasta, Tocopilla, Iquique, Valparaíso, Concepción, Coquimbo, Valdivia, Osorno and Punta Arenas.

BRITISH COUNCIL.—Acting Representative of the British Council in Chile, R. A. H. Duke, Teatinos 307, Santiago.

There are Anglophil Societies at Santiago, Valparaíso and Concepción.

BRITISH CHAMBER OF COMMERCE IN THE REPUBLIC OF CHILE, Calle Bandera 227 (Piso 4°) Casilla 4087, Santiago and Calle Blanco 689, Casilla 1676, Valparaíso (Branches at Concepción, Talcahuano and Punta Arenas).

Valparaíso is distant from London 9,000 miles *via* Panama, and 11,000 *via* the Strait; transit 28 to 45 days.

CHINA

(Ta Chung-Hua Jen-Min Kung-Ho Kuo—The People's Republic of China.)

Chairman of the Central People's Government Council, Mao Tse-Tung, born 1893, assumed office 1949.

Vice-Chairman, Gen. Chu Teh.

Prime Minister and Foreign Minister, Chou En-Lai.

Deputy Prime Ministers, Gen. Lin Piao; Gen. Ho Lung; Gen. Chen Yi.

LONDON OFFICE.

49 Portland Place, W. 1.

Chargé d'Affaires, Huan Hsiang.

AREA AND POPULATION.—Estimates of population vary considerably. A census was carried out in June, 1953, and on Nov. 1, 1954, the National Bureau of Statistics, Peking, announced a final figure of 582,603,417 for the population of mainland China. 11,743,320 Chinese were estimated to be resident or studying abroad. The Bureau stated that 51.82 per cent. of the mainland population were males and 48.18 per cent. females; the birth rate averaged 37 per 1,000 and the death rate 17 per thousand. Distribution of the population by nationalities was:—

Chinese..... 547,283,057 Mongolians... 1,462,956
Tibetans.... 2,775,622 *Tribal peoples

Manchus.... 2,418,931 Other 6,718,025

* Incl. many aboriginal or primitive tribes in remote western districts of Western China. The total area has been stated as approximately 4,300,000 sq. miles.

THE PROVINCES OF CHINA.

The National Bureau of Statistics, Peking, published in 1954 the results of the 1953 Census of Population. Populations of the Chinese provinces, including Tibet and Inner Mongolia are shown below. The Provinces of Jehol and Sikang were abolished on July 19, 1955, their territories being divided up; those of Jehol among Hebei, Liaoning and the Inner Mongolian Region; those of Sikang being absorbed by Szechwan Province.

* Manchuria.

† These 4 Eastern Provinces constitute the "East China People's Government" set up by the Communist Central Government in January, 1950. This regional régime includes the large centres of Shanghai, Nanking, Tsingtao and Foochow.

§ These 3 Provinces constitute the "North-Western China People's Government."

§ Sinkiang (Chinese Turkestan) was converted into Sinkiang-Uigur Autonomous Region in July, 1955. Autonomous local governments were set up by the various nationalities in the area—Uigurs, Kazakhs, Tadzhiks, etc. Sinkiang is the largest province of China, about one-sixth of the whole area of the country. Some 80 per cent. of its population are Uigurs, of the Moslem religion.

GOVERNMENT.—On October 10, 1911, the party of reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed at Wuchang.

Many years of internal dissension followed the establishment of the Republic, but in 1928 the Kuomintang (Nationalist Party) achieved supremacy and established a one-party government in Nanking which was accorded recognition by the Foreign Powers. After more than seven years of war with Japan (July 7, 1937, to Aug. 5, 1945), disputes arose between the Central Government and the Chinese Communists. There were hopes of a peaceful settlement in January, 1946, when, as a result of mediation by General George C. Marshall (then President Truman's special Envoy in China) an armistice was signed at Chungking and an all-party Consultative Conference was convened to resolve the disputed issues. These hopes of agreement were disappointed and hostilities broke out again.

On April 18, 1947, President Chiang Kai-shek attempted to unite the country by declaring one-party rule in China at an end and by announcing the formation of a new State Council to include representatives of the main political parties. The Communists declined to co-operate in the formation of this body and the Central Government's offer to reserve a number of seats for Communist representatives was later withdrawn.

A National Assembly was elected on Nov. 21, 1947, for six years. It had the power to elect and recall the President and Vice-President of the Republic, to amend the Constitution and to ratify amendments thereto proposed by the Legislative Yuan.

The year 1949 was marked by a rising tide of Communist successes. In January, 1949, Marshal Chiang Kai-shek resigned office as President and the authority of the Nationalist Government rapidly declined as province after province was occupied by Communist forces. The Nationalist Government abandoned Nanking on April 23, 1949, and headquarters were removed to Chungking. In August, the Communist forces advanced into South China, and by January, 1950, the Nationalists retained control only in the islands of Formosa (Taiwan) and Hainan, and in some remote parts of Western China. Taipei, in Formosa, is now the Nationalist capital.

On Sept. 30, 1949, the "People's Political Consultative Conference" of 636 Delegates meeting at Peking elected a council of 56 members and a National Committee of 180 members to make proposals and recommendations to the Council.

On October 1, Mao Tse-tung, Chairman of the Central People's Government, proclaimed at Peking the inauguration of the People's Republic of China.

The U.S.S.R. broke off negotiations with the Nationalist Government on October 2, 1949, and established diplomatic relations with the Central People's Government. The régime was recognized by all the Communist-dominated countries, by Great Britain on Jan. 6, 1950, and by a number of other countries.

Industrial Ministries.—Ten new Ministries were created on May 12, 1956, with the object of promoting the industrialization of China. They are the Ministries of Metallurgy, Power Equipment, Food, Chemical Industry, Building Materials, Timber, Marine Products, Land Reclamation, City Construction and City Services. The first and second Ministries of Machine Building were continued and the Ministries of Heavy Industries, Local Building and Municipal Construction were abolished. A National Economic Commission and a National Technological Commission were also set up.

LOCAL GOVERNMENT.—In June 1950 the Communist Government passed legislation to set up provincial and city councils to be responsible for local government until provincial and city people's congresses should be elected.

DEFENCE.—An order introducing compulsory military service for all men between the ages of 18 and 40 was passed by the Chinese Parliament in 1955. Regulations were also approved for the creation of an officer corps with ranks similar to those of the Russian Army. Nearly 80,000,000 men were made liable for service in the Army (3 years), the Navy (5 years) or the Air Force (4 years). It was announced that the new Army would be organised in 14 combat and supporting corps, including a "political" division to serve with front-line troops.

RELIGION.—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. All three are professed and practised by Chinese other than Moslems, Christians and Jews.

EDUCATION.—Under the Nationalist Government education was compulsory from the age of 6 to 12. This policy is stated to have been continued by the Communists. In 1952 there were about 550,000 primary schools in operation with about 45,000,000 pupils. There were also 5,100 secondary schools, with about 2,000,000 pupils. The majority of the 35 provinces have provincial universities in addition to national and private institutions. In August, 1950, the Communist Government took over all schools supported by foreign missions, and in October, 1950, closed the Roman Catholic University in Peking.

LANGUAGE AND LITERATURE.—The Chinese language has many dialects. Cantonese, Hakka, Swatow, Foochow, Wenchow, Ning-po and Wu, and, most important, Mandarin (of which the standard form is Pekinese). There are many sub-dialects of Mandarin, some of which are closely allied while others diverge so much as to be almost separate dialects. Chinese literature is among the richest in the world and paper has been employed for writing and printing for nearly 2,000 years, movable wooden blocks having superseded carved wooden slabs many centuries ago. Confucian books of religion, histories, works dealing with philosophy and the arts, poetry, and literary criticism, novels and romances are abundant and many have been translated into other tongues. In

1937 there were 337 daily newspapers and 1,881 periodicals published at Nanking, Shanghai, Peking, Tientsin, Hankow, Canton and other large centres. All English-language newspapers in China had been closed down by March, 1951. As from Jan. 1, 1956, all Chinese newspapers appeared with characters printed horizontally, instead of in vertical form, and reading from left to right. Official approval was given in February, 1956, to a 30-letter Latin alphabet to replace some 30,000 ideographic characters at present used in written Chinese. The new alphabet has been introduced for trial in a Government campaign to modernize Chinese writing and eradicate illiteracy.

CURRENCY AND EXCHANGE.—The yuan was re-valued with effect from March 1, 1955 on the basis of 10,000 old yuan for one new yuan. From the same date the official exchange rates for sterling and dollars were altered to:

6.893 yuan = £1; 2.46 yuan = \$1.

PRODUCTION AND INDUSTRY.—China is essentially an agricultural and pastoral country. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops. In June, 1950, an Agrarian Reform Law, redistributing the land, was passed.

It was stated officially in August, 1955, that food grains, including rice, would be rationed in all Chinese cities by November, 1955, and that rationing was already in force in the provinces of Shantung and Shansi.

Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities, and flour and rice milling have grown important in late years. The mineral wealth of the country is very great, coal of excellent quality being produced; iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundantly found. Oil is produced in the province of Kansu and in South Manchuria.

Details of the first Chinese Five Year Plan, 1952-57, were released in 1955. 1957 targets for agricultural and industrial production compared with the actual 1952 results were:

	1952 actual (tons)	1957 target (tons)
Agricultural		
Grain	163,900,000	192,800,000
Cotton	1,304,000	1,635,000
Jute and Hemp	300,000	365,000
Tobacco	221,000	390,000
Sugar-cane	7,142,000	13,150,000
Industrial		
Coal	63,500,000	113,000,000
Steel	1,350,000	4,120,000
Cement	2,860,000	6,000,000
Electricity (million kilowatt-hrs.) ...	7,260	15,920

A further Twelve Year Plan for Agriculture was announced in 1956.

TRADE.

The value of the Special Trade of China (imports retained for home consumption and Exports of merchandise of home produce or manufacture) is

shown below for a series of years in Standard Dollars.

Year	Imports	Exports
1939.....	\$1,333,954,000	\$1,027,247,000
1940.....	2,027,743,000	1,970,121,000
1941.....	1,444,340,000	191,700,000
1942.....	3,114,320,000	164,460,000
1943.....	1,501,160,000	412,110,000
1947.....	10,681,326,570	6,376,504,300

The principal articles of export were animal; and animal products; oils; textiles fibres ores and metals and tea. The principal imports were raw cotton, cotton yarn and thread; oils, fats and soap; motor cars and ships; books, paper and paper-making materials; chemicals; metals and ores; and dyes, paints and varnishes.

	1954	1955
Imports from U.K..	£6,825,913	£7,867,609
Exports to U.K.....	8,958,694	12,360,599

COMMUNICATIONS.—Of the total area of China about half consists of table lands and mountainous districts where communications and travel are generally difficult and dangerous, the highest point being *Minyas Konka* (24,900 ft.) about 150 miles west of Chungking. To open up sea communications from the south-west the *Burma Road*, over 770 miles in length from Lashio, Burma, to Kunming in Yunnan, was constructed in 1937-39. The road was the chief highway for war supplies to China, until cut by the Japanese in 1942; the success of the Allies in Burma in 1945 restored the use of the road and of communication between Yunnan and Burmese ports. Motor lorries perform the journey in seven days, in contrast with the difficult and lengthy pack-mule transit before the road was constructed. There is motor road and railway connexion between Chungking and French Indo-China. In districts not served by roads the principal means of communication from E. to W. is afforded by the rivers, of which the principal are the Yangtse (3,400 miles), Hoangho or Yellow (2,600) and the West River (1,650), and from N. to S. by the Grand Canal.

Railways.—The length of the railways is less than 8,000 miles, inclusive of the Manchurian lines, or less than one-fifth (per 100 sq. miles) of those available in Turkey. It was announced on June 23, 1955, that a 200-mile railway linking Litang with the port of Tsamkong, on the Liuchow Peninsula off Hainan Island, had been completed. Major railway projects now under construction are two new lines across Mongolia and Sinkiang and a line linking Lanchow with Kunming.

Shipping.—The China Merchants Steam Navigation Co. has a fleet of 31 ships of an aggregate tonnage of 60,000. In 1947 the number of vessels entered and cleared for abroad was 31,751 with a total tonnage of 9,980,000. Of these totals 19,366 vessels (1,412,260 tons) and 16,343 junks (1,325,994 tons) were under the Chinese flag and 3,682 vessels (8,997,219 tons) were under foreign flags.

Telegraphs connect Peking with Europe and Tibet. There are about 97,000 miles of land lines and several high-power wireless installations. Telephones, municipal and long-distance, are in general use in the settled and trade areas, and wireless telephony has been installed in the large centres.

SPECIAL TERRITORY

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The

area is estimated at 461,000 square miles with a population of 1,273,969 (1953 Census.) About one-fifth of the male population are monks and polyandry is common. There is an army with an establishment of 10,000 all ranks, consisting of infantry serving on a militia basis and armed with modern weapons. India imports from Tibet wool, borax, salt, and musk; musk, horn and herbs are sent to China. The imports are chiefly cotton and woollen goods, grain, hardware, glass, sugar, biscuits, dried fruits and tobacco, with silver bullion and coined rupees to balance the excess of exports. The present currency is reckoned in *sangs* (mostly paper). The 1939 value was about 8 *sangs* = 1 rupee, which has risen in favour of Tibet to about 3½ *sangs* = 1 rupee (1946). Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces.

Between the 7th and 9th centuries A.D. Tibet was a successful military power whose boundaries extended far into Shensi (China) and for a time to the kingdom of Magadha (India). Later, the influence of Buddhism softened earlier military aggressiveness and Tibet remained in contact with, and was influenced (but not dominated) by, its Mongolian and Chinese neighbours until early in the 18th century when the Manchu Emperor of China, K'anghsi, taking advantage of internal dissensions in Tibet, invaded the country and established officers at Lhasa. Manchu authority in Tibet appears to have been always loose and by the end of the 19th century was merely nominal.

The Anglo-Chinese Convention of 1890 under which a trade mart was opened at Yatung wa, persistently flouted by the Tibetans and as a result a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes, and for payment of an indemnity.

From 1906 the Chinese took advantage of the confusion which followed the withdrawal of the British expedition from Tibet to establish by force a greater degree of authority in Tibet than they had previously enjoyed. This lasted only until 1912 when the Tibetans took the opportunity provided by the Chinese Revolution against the Manchus to evict the Chinese from Lhasa and to drive them beyond the Salween. They brought back the Dalai Lama who on the Chinese invasion had taken shelter in India.

In 1918 Chinese aggression on the border led to successful retaliation by Tibet in which the Chinese were driven beyond the upper waters of the Yangtse, but from 1931 to 1933 there was confused fighting on the China-Tibet border, as a result of which the Tibetans lost their hold on most of the territory to the East of the Upper Yangtse which they reoccupied in 1918. Since then the Upper Yangtse has remained roughly the *de facto* frontier between Tibet and China.

In October, 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left Lhasa and set up his Government at Yatung, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby Tibet accepted Chinese suzerainty. The Communist army was allowed entry into Tibet and a Communist military and administrative headquarters set up.

PRINCIPAL CHINESE CITIES.—The Communist Government has reinstated Peiping as the National capital, under its old name of Peking. From 1928 to 1949 the capital was Nanking. Peking had a

population of 2,768,149 at the 1953 Census. The population of the principal ports and trade marts is estimated as follows: Nanking, 1,020,000; Amoy, 240,000; Antung, 200,000; Canton, 1,496,000; Changsha, 700,000; Chefoo, 250,000; Chinkiang, 220,000; Chungking, 1,110,000; Foochow, 400,000; Hangchow, 600,000; Hankow (including Wuchang and Hanyang), 800,000; Harbin, 698,000; Hsinking, 420,000; Ichang, 110,000; Kirin, 150,000; Mengtsz, 200,000; Mukden, 1,551,000; Newchwang, 170,000; Ningpo, 300,000; Shanghai, (1953) 2,204,417; Shasi, 150,000; Soochow, 300,000; Swatow, 200,000; Tientsin, (1953) 2,693,831; Tsingtao, 756,000; Wanhsien, 300,000; Wenchow, 140,000; Wuchow, 100,000; Wuhu, 140,000.

FLAG OF "PEOPLE'S REPUBLIC."—The "Gate of Heavenly Peace" at Peking, superimposed on the national flag, with a large star and four small stars at the top, and a wheel at the base. The whole is encircled by ears of wheat and rice.

BRITISH EMBASSY, PEKING.

Ambassador (vacant).

Minister and Chargé d'Affaires, Hon. C. D. W. O'Neill, C.M.G. (1955).

Counsellor, A. Price, C.M.G.

1st Secretaries, C. T. Crowe; J. F. Ford, O.B.E. (Chinese Secretariat).

2nd Secretaries, D. F. T. Luard; M. P. Buxton.

BRITISH CONSULAR OFFICES

There is a British Consular Office at Shanghai.

COLOMBIA

(República de Colombia.)

President, Lt.-General G. Rojas Pinilla, assumed office June, 1953.

EMBASSY IN LONDON.

3 Hans Crescent, S.W.1.

[Kensington: 9177.]

Ambassador Extraordinary and Plenipotentiary, His Excellency Don Jose Maria Villarreal.

Minister-Counsellor, Dr. Francisco Gonzalez.

Counsellor, Dr. Hernando Manrique Alvarez.

1st Secretary, Dr. Carlos Escallon Villa.

Consulate-General, 23 Pont Street, S.W.1.

Consul-General, Dr. Simón Martínez.

Consul Auxiliary, Carlos Gerlein.

There are Colombian Consular Offices at Liverpool and Glasgow.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 66° to 79° W. long., with an estimated area of 461,606 square miles, and a population (1955 estimate) of 13,000,000.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Jiménez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1821-1824. In 1819 Simon Bolívar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted.

In 1903 Panama seceded from Colombia, and is now a separate Republic.

In normal times there is a Congress of two Chambers, Senate (56 members) and Chamber of Deputies (112 members) but on June 13 1953, the Armed Forces assumed power and the country is now governed by decree.

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic.

The principal rivers are the Magdalena, Cauca, Atrato, Caqueta, Meta, Putumayo and Patia. The Patia flows through the famous Minima Gorge of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guatara) is spanned by the Rumiachaca Arch, or Inca's Bridge, of natural stone. On the Rio Bogota is the Great Fall of Tequendama, 480 feet in height.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; in 1953 some 394 million barrels of petroleum were produced and prospecting for new sources of production is in progress in many parts of the Republic. The principal agricultural products are coffee, cotton, bananas, rice and maize, and in some parts tobacco, wheat and other cereals. Manufactures, mainly for home consumption, consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, asbestos-cement goods, many pharmaceutical products, rubber goods, including motor tyres, furniture, boots and shoes, confectionery, cigarettes, beer, cement, glass containers and, since the latter part of 1954, steel.

The Navy consists of 2 destroyers, 3 frigates, and some small craft, with personnel about 2,500; a battalion of Colombian army has just returned from service with the United Nations forces in Korea. The first railway was opened in 1855, about 1,914 miles being open in 1949. A new railway is at present being constructed in the Magdalena Valley, which will link the departmental lines running down to the river, and is planned to reach the Atlantic coast. The Dorada Railway, 70 miles of 3 ft. gauge connecting La Dorada and Ambalena, was bought from its British owners by the Colombian Government in July, 1956, together with a 44 mile aerial ropeway connected to the railway, for \$1,000,000. There are about 2,200 miles of rail in use at present. There were also (1955) some 13,125 miles of metalled roads, of which 8,440 miles are national highways and the remainder departmental and municipal highways; this excludes "dirt" roads (passable by motors in dry weather only). Colombia was granted loans totalling \$47,300,000 (118,500,000 pesos) by the International Bank, towards the total of 515,000,000 pesos expected to be required to complete the rehabilitation of highways which is now in progress. The national telephone and telegraph system consists primarily of wireless links between the more important centres. Large appropriations have been made for modernization of the country's telecommunication system. A large volume of traffic is carried on the River Magdalena, which is navigable for 900 miles. The main port for Bogota is La Dorada, 592 miles from Barranquilla. There are daily passenger and cargo air services between Bogota and Barranquilla, Bogota and Medellin and Bogota and Cali. There are also subsidiary services to Cartagena, Santa Marta,

Manizales, Pereira, Armenia Pasto, Buenaventura, Barrancabermeja, Popayan, Ipiales, Bucaramanga, Cúcuta and Villavicencio. There are daily services to the U.S.A., Lima and Quito, a weekly service to London *via* Jamaica and a daily service *via* New York. There are also four weekly air services direct to Europe and a direct twice-weekly service to Caracas. New York can be reached in one day and air mail is delivered to the United Kingdom 3 to 5 days after leaving Bogotá. There are wireless stations in the main cities, and a television station in Bogotá with relays to Manizales, Medellín and Cali.

Roman Catholicism is the established religion.

Language and Literature.—Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing illiteracy and it is estimated that about 60 per cent. of those over 20 years of age can read and write. In addition to the National University at Bogotá (founded in 1572) there are universities in the towns of Medellín, Cartagena, Popayan and Manizales and the department of Nariño. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

COSTA RICA

(República de Costa Rica.)

President (1953-58), Señor José Figueres, elected Nov. 8, 1953.

LEGATION IN LONDON.

Flat 5, Evelyn Mansions, Carlisle Place, S.W.1.
 Minister, Señora Virginia Prestinary de Gallegos.
 1st Secretary, Señor Don Franz Heck-Prestinary Gotay, Vice-Consul.
 Consulate-General, 65 London Road, Stanmore, Middlesex.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17' and 11° 10' N lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and an estimated population (Dec. 31, 1955) of 969,640. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile.

The chief ports are Limón, on the Atlantic coast, through which passes most of the coffee exported, and Puntarenas on the Pacific coast. Bananas are principally exported from Golfito and Quepos, ports which have been developed on the Pacific Coast by the United Fruit Co. In 1954 ships of a gross tonnage of 1,958,041 entered at Costa Rican ports. About 400 miles of railroad are open. The country is well provided with airways, and Pan-American Airways, K.L.M., LACSA and TACA call at San José, while feeder services link the main centres of population with the capital.

Spanish is the language of the country. Education is compulsory and free, but it is mainly from the lessened class that the executive, legislature and judicature are recruited.

FINANCE 1955

Revenue.....	Colones 261,750,030
Expenditure.....	253,424,173

EMBASSY IN LONDON.

28 Hyde Park Street, W.2.

[Ambassador: 1987.]

Ambassador in London. His Excellency Señor Dr. Roberto González Mendoza y de la Torre.

Consul-General. Señor Don Julio A. Brodermann (220, High Holborn, W.C.1).

Consul-General. Liverpool, Señor Eusebio Román.

Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population (estimated, 1955) of 6,125,000.

The island of Cuba was visited by Christopher

Columbus during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was separated to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war. In 1898 the government of the United States intervened and despatched the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1900, a republican government was again inaugurated. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new Constitution was promulgated in 1940, but its operation was suspended for various periods until February 24, 1955, when the Government elected on November 1, 1954, took office.

Of the total area of 28,000,000 acres, there were (1953), about 5,750,000 acres under cultivation, of which 61 per cent. was under sugar. Tobacco, sweet potatoes, bananas, rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are sugar and tobacco: sugar crop (1955) 4,400,000 long tons; tobacco crop (1955) 80,155,230 lb.; the chief product of the forests is mahogany. White cedar is also used for boxing the tobacco crop. The live-stock includes (1952) 4,042,125 cattle and 460,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

8,710 route miles of railroad are open (public service 3,059; private lines on plantations and in mining areas 5,651) and about 12,000 miles of telegraph line; there are about 3,600 miles of roads. The island forms an important stopping place for many international airlines.

Language and Literature.—Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728 but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. Public libraries have been established and there is a flourishing daily press with wide circulations.

FINANCE.

	1954	1955
Revenue (Estimated)...	\$311,862,000	\$307,048,903
Expenditure (Estd.)...	311,414,000	291,535,000
Public Debt (Dec. 31)...	395,111,600	581,797,842

Nominally \$=U.S.\$, U.S. currency ceased to be legal tender in Cuba on June 30, 1951 (see also p. 84).

TRADE.

Imports, 1954.....	\$487,888,770
Exports, 1954.....	539,047,690
Imports from U.K., 1955.....	£4,848,295
Exports to U.K., 1955.....	7,028,944

The exports are principally sugar, molasses and tobacco; the imports are food and beverages, textiles and machinery.

CAPITAL, Ψ Havana (pop., Census 1953, 783,162); other towns are Ψ Santiago (166,565), Holguin (226,644), Camagüey (204,254), Santa Clara (144,630), and Ψ Cienfuegos (99,000).

FLAG: Five horizontal bands, blue and white (blue at top and bottom) with red triangle, close to staff, charged with silver star.

CZECHOSLOVAK EMBASSY IN LONDON.

6-7 Kensington Palace Gardens, W.8.

[Bayswater: 9191.]

Czechoslovak Ambassador in London, His Excellency M. Jiří Hájek (1955).

Military and Air Attaché, Lt.-Col. Oldřich Příbyl.

Asst. Military and Air Attaché, Major Josef Bartusek.

Commercial Counsellor, M. Oldřich Nový.

Commercial Attaché, M. Vojtech Homola.

Attachés, M. Václav Táborský; M. Jan Mrázek.

Area and Population.—Czechoslovakia, formerly part of the Austro-Hungarian Mon. chy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory thus affected having an area of 53,700 square miles.

Since the War of 1939-45 the territory and population of the Republic have undergone change. By a treaty with the Soviet Union (June 29, 1945) Ruthenia was ceded to U.S.S.R., thus reducing the area by over 4,000 square miles and the population by over 750,000. In addition, the expulsion of the Sudeten German minority sanctioned at the Potsdam Conference has been completed and the latest estimate of the population (Jan. 1, 1950) is 12,536,000.

Government.—In September, 1938, Adolf Hitler demanded the cession of the Sudeten districts. On Sept. 29, 1938, a Four Power Conference at Munich acquiesced in the annexation of the territory on the understanding that no further demands would be made, but on March 14, 1939, Nazi troops invaded Czechoslovakia, in flagrant violation of the terms of the Munich Conference, and two days later Adolf Hitler proclaimed that Czechoslovakia had "ceased to exist": a "Slovak State" was established and Bohemia and Moravia were declared a Protectorate of the Reich.

On July 22, 1940, Great Britain recognized the Czechoslovak National Committee set up in London as a provisional Czechoslovak Government, and on July 18, 1941, Great Britain fully recognized the Czechoslovak Government headed by President Benes.

Following the liberation of Eastern Slovakia by Soviet forces in 1945, President Benes and most of the members of his Government left London for Moscow for discussions with the Czechoslovak émigré movement in the Soviet Union on the formation of a new Government which would have its seat on Czechoslovak territory. The composition and programme of this Government, which was headed by M. Z. Fierlinger, were announced at Kosice in Slovakia on April 4, 1945. The Kosice Government included equal representation of four Czech parties (Czech Socialists, Social Democrats, Communists and Popular Party) and two Slovak parties (Democrats and Communists).

The first elections in the liberated Republic were held on May 26, 1946, the Communists emerging as the leading party with 38 per cent. of the votes cast. On July 3, 1946, K. Gottwald, the Communist leader, formed a Government of parties participating in a National Front. The uneasy alliance between the parties was terminated by a crisis precipitated by the mass resignation on February 20, 1948, of Ministers representing parties opposed to the Communists in protest against the widespread introduction of Communists into the police force by the Communist

Minister of the Interior. The Communist Party, with the aid of Action Committees, seized power, and on February 25 a new Government, predominantly Communist, was formed. On May 30, 1948, new elections were held, the choice lying between a single joint election list of parties in the National Front, and a blank vote. The Government claimed that 90 per cent. of the electorate voted and that 89 per cent. of the votes cast were for the National Front. Dr. Benes resigned from the Presidency on June 7. The Communist control of the country is now unqualified. The first Five-Year plan which came to an end in December 1953 was largely concerned with extending heavy industry and industrializing Slovakia. It is officially claimed that production doubled during the plan, but it is also admitted that the economy has been thrown out of balance by poor progress in the development of ore reserves, fuel, power and agricultural production.

Language and Literature.—Czech and Slovak are the official languages but the literature is mainly Czech in Bohemia, Moravia and Silesia. The Reformation gave a widespread impulse to Czech literature, the writings of Jan Hus (who was martyred in 1415) familiarising the people with Wyclif's teaching. This impulse endured to the close of the seventeenth century when Amos Komensky, or Comenius (1592-1670) was expelled from the country. Under Austrian repression, and with the outlawing of the national language, there was a period of stagnation until the national revival in the early nineteenth century. Modern prose drama and fiction are represented by several authors of international reputation, notably K. M. Capek-Chod (1860-1927), F. X. Svoboda (1860-1943), Jaroslav Hilbert (1871-1936), Viktor Dyk (1877-1931), Arnost Dvorak (1880-1933), Ivan Olbracht (b. 1882), K. Capek (1880-1938), and Vladimir Vancura (1891-1944). Liberty of the press ceased with the violation of independence in 1939. It was temporarily restored on the liberation of the country. After the Communist coup of February 20, 1948 however, freedom of the press was "curtailed." All papers and periodicals were forced to follow the party line and a number of publications were banned. On July 1 serious cuts were made in internal print distribution, causing a further decline in the number of papers and periodicals available.

Education.—Before the Nazi invasion there were about 16,000 public and private elementary schools, with about 1,800,000 pupils and about 400 secondary and technical schools with 160,000 students. The Czech University of Prague was founded in 1348. There is also a university at Brno and additional universities are being instituted in other important towns. The number of students is now several times the pre-war figure. In the 16th century there was a University at Olomouc which was closed by the Habsburgs at the end of the Thirty-years' War. In 1947, President Benes opened a new University at Olomouc. Slovakia has its own university at Bratislava.

Finance.—The Czechoslovak currency is the Czechoslovak Koruna (Kcs=Czechoslovak crown) of 100 heller. From the devaluation of the pound in 1949 up to May 30, 1953, the exchange rate was Kcs. 130.58=£1. From June 1, 1953 the rate has been Kcs. 20.16=£1. This change took place as the result of an internal currency reform when a new currency was issued at a basic exchange rate of Kcs. 1.00 of the new currency for Kcs. 5.00 of the old. The new foreign exchange rate represents an appreciation of the new crown by 38.94 per cent. The Budget estimates for 1954 total Kcs.

87,572,954,000 for expenditure and Kcs. 87,803,121,000 for revenue.

Trade with U.K., 1955: Imports, £2,822,237; Exports to U.K., £4,315,440.

CAPITAL, Prague (Prah), on the Vltava (Moldau), the former capital of Bohemia with a population (1948) of 922,000. Other towns are Moravska Ostrava (181,000), Brno (Brunn) in Moravia (273,000), Bratislava, where the Danube forms the southern boundary of the Republic (184,000), and Plzen (Pilsen) (121,000).

Vice-Consul, G. S. Larsen (Commercial Secretary).

Vice-Consul, C. Jacobsen.

Vice-Consul, T. F. Germer.

AREA AND POPULATION.—A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'–57° 45' N. lat., and 8° 5'–15° 12' E. long., with an area of 16,608 square miles, and a population estimated (January, 1955) at 4,406,000. In 1955 there were 76,369 births, 39,885 deaths and 34,973 marriages.

GOVERNMENT.—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, for not more than 179 members, including 2 for the Farøe and 2 for Greenland. The voting age is 23 years. The first elections for the new *Folketing* were held on September 22, 1953. The Social Democrats obtained 74 seats: Moderate Liberals 42; Conservatives 30; Social Liberals 14; Single Tax Party 6; Communists 8; Farøe 2; Greenlanders 2; Slesvig Party (German Minority) 1.

EDUCATION is free and compulsory, the schools being maintained by taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1478) and Aarhus (1933).

LANGUAGE AND LITERATURE.—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1805–1875), Soeren Kierkegaard (1813–1855) and Georges Brandes (1842–1927), with Henrik Pontoppidan (1857–1943) and Karl Gjellerup (1857–1919), who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen (1873–1950), who received the same award in 1945. In 1952 there were 271 daily newspapers in Denmark, of which 12 were published in Copenhagen.

PRODUCTION AND INDUSTRY.—Twenty-four per cent. of the population live exclusively by agriculture, and about 48 per cent. by manufactures and trade. The chief products are wheat, rye, oats, barley, potatoes, seeds, cattle, horses, pigs and dairy produce; manufactures based on imported raw material cover most of the home consumption.

COMMUNICATIONS.—Mercantile marine (ships above 100 gross tonnage) (December, 1955) 746 ships, with a gross tonnage of 1,609,000. In 1955 there were 4,690 kilometres of railway and 1,365,506 kilometres of telegraph and telephone lines.

	1956–57
Revenue (Budget estimate).....	Kr. 4,780,300,000
Expenditure (Budget estimate)...	4,333,300,000
Government Debt (March 31, 1955):—	
Internal.....	7,014,000,000
External.....	1,358,000,000
Rate of Exchange—Kr. 19.36 = £1 (see also p. 84).	

	1955
Total Imports.....	Kr. 8,101,092,000
Total Exports.....	7,193,065,000

	1954	1955
Imports from U.K.	£82,119,510	£73,672,462
Exports to U.K.	124,474,708	120,731,673

The principal imports are solid and liquid fuels,

pulp, paper and cardboard; wood and cork fertilizers, textiles, iron and steel, machinery, vehicles, food and feeding-stuffs. The chief exports are dairy produce, bacon, meat, eggs, livestock, seeds, machinery and ships.

CAPITAL. Ψ Copenhagen. Population (1950), 974,901. Other centres are Ψ Aarhus, 116,167; Ψ Aalborg 79,806; Ψ Odense, 100,940; Ψ Horsens, 35,898; Ψ Randers, 40,098; Ψ Esbjerg, 48,205; Ψ Fredericia 25,981; Ψ Kolding, 31,017; Ψ Vejle 29,448 and Roskilde 26,355.

There are also Vice-Consulates at Aarhus, Esbjerg, Horsens and Odense.

BRITISH CONSUL.

Kastelsvej 40, Copenhagen. Representative, O. M. Williams, M.B.E.

Outlying Parts of the Kingdom

The outlying parts of Denmark have about 55,000 inhabitants. The FAROE, or Sheep Islands (540 sq. m. pop. (1950) 31,667), capital, Thorshavn, are governed by a Lagting of 25 members, and send 2 representatives to the *Folketing* at Copenhagen. On September 14, 1946, the Lagting, with the consent of the Danish Government, for its own guidance held a plebiscite on the Farøe. About one-third of the electors did not, however, take part in the voting: of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At a subsequent general election for the Lagting a great majority voted in favour of remaining a part of the Kingdom of Denmark with a certain extent of home rule. In 1948 the Farøe received a certain measure of home rule. Special Faroese affairs are administered by a council of 3 members. GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m., population, Dec. 31, 1952, 24,768), is divided into 3 provinces (West, North and East). Greenland is under the administration of the Prime Minister's Department. West Greenland (capital Godthaab) has a *Landsraad* of 14 members and sends 2 representatives to the *Folketing* at Copenhagen. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department; discoveries of lead were made in 1948. Imports from U.K. (1954), £212,000 (coal). The United States of America has acquired certain rights to maintain air bases in Greenland.

Copenhagen, distant from London 728 miles; transit 36 hours.

DOMINICAN REPUBLIC

(República Dominicana.)

President, General Hector B. Trujillo Molina,
assumed office Aug. 16, 1952.

EMBASSY IN LONDON.

[Sloane: 6727]

Ambassador Extraordinary and Plenipotentiary in
London, Dr. Luis Thomen (1954).

Consulate-General

Flat 2, Colette Court, 126 Sloane Street, S.W.1.

[Sloane: 5321]

Consul-General, Señor Federico Llaverrías.

There are also Consular Offices at Liverpool,
Manchester, Nottingham, Grimsby, Southampton,
Cardiff, Edinburgh, Glasgow and Belfast.

The Dominican Republic, formerly the Spanish
portion of the island of Hispaniola, is the oldest
settlement of European origin in America.

The island was discovered by Christopher Colum-
bus in December, 1492, who named it "La
Española" or "Little Spain." In 1496 he ordered
his brother, Bartholomew Columbus, to found
the capital at the mouth of the Ozama River, on the
south of the island, which city he called Santo
Domingo. The island immediately became the
objective for adventurous Spanish colonists, who
exploited the native Indians for the sake of the
gold found in the streams. African negroes were
imported for the sugar and other plantations both
in Santo Domingo and Haiti.

In 1821 Santo Domingo broke away from Spain
and declared itself independent, but in 1822 it was
invaded and subjugated by its negro neighbours
from the west, the Haitians. The latter were
driven out on Feb. 27, 1844, when the Dominican
Republic was definitely proclaimed by the natives.

The country was occupied by American marines
from 1916 until the adoption of a new Constitution
in 1924. In July, 1924, a properly elected Consti-
tutional Government was installed, with complete
authority over all matters except the collection of the
Customs and the redemption of foreign obligations,
which continued to be administered by an American
official. On Sept. 24, 1940, a new convention was
signed at Washington; this provided for the with-
drawal of the U.S. Receiver-General, the Customs
to be collected by the Dominican Government, and
the whole public revenue to be deposited in an
agreed bank, the service of the debt being recog-
nized as a first charge on the deposit. Congress
consists of a Senate of 24 members, elected for
5 years, and of a Chamber of Deputies of 52
members, also elected for 5 years.

The Dominican Republic lies between Cuba on
the west and Puerto Rico on the east and covers
an area of about 19,322 square miles, with a
population of 2,539,325 (Oct. 1955). The climate
is tropical in the low lands and semi-tropical
to temperate in the higher altitudes. According
to local classification there are 885 miles of first class
and 1,125 miles of second class and inter-communal
roads in the Republic. There is a direct road from
Ciudad Trujillo to Port-au-Prince, the capital of
Haiti, enabling the journey from capital to capital to
be made in one day. There are about 60 miles
(Sánchez-La Vega) of public railway, and a
telephone system connects practically all the towns
of the republic. There are 12 wireless stations, and
the All America Cable Company and the Dirección
General de Comunicaciones maintain an efficient
service with all parts of the world. Radio Com-
munications of America have a wireless station in
Ciudad Trujillo.

Spanish is the language of the Republic and
education has made considerable progress.

Sugar, cocoa beans, coffee and tobacco are the
most important crops. Other products are
mahogany, furniture woods, log wood, divi-divi,
cotton, wax, honey, maize, bananas, hides, turtle-
shell and starch.

The Republic is served by seven airlines, Pan-
American, KLM, Caribair, Delta Air Lines, Com-
pañía Brasileira de Aviación (VARIG), Compañía
Cubana de Aviación, and the Compañía Domini-
cana de Aviación, all using the General Andrews
Field at Ciudad Trujillo leased to Pan-American.

Revenue	\$129,680,681	\$122,729,500
Expenditure	125,274,963	119,972,890
	† Estimated.	

One Dominican Peso = \$1.00 U.S. (see also p. 84).

TRADE

	1954	1955
Imports	\$82,827,010	\$97,652,566
Exports	119,726,923	114,849,773
Imports from U.K. ...	£781,266	£1,081,010
Exports to U.K.	10,553,959	10,987,414

The chief imports are motor cars, bicycles,
motor cycles, whisky, radios, textiles, tyres, paints
and confectionery; the chief exports are sugar,
tobacco and coffee.

The principal export to U.K. over a number of
years has been sugar.

CAPITAL, Ciudad Trujillo (formerly called Santo
Domingo), population (estimated Jan., 1955),
248,228. Other centres are Santiago de los
Caballeros (62,905); San Pedro de Macoris (22,106);
San Francisco de Macoris (17,888) y Puerto Plata
(16,509); Barahona (16,298); La Vega (15,793) and
La Romana (15,653).

FLAG: Red and blue, with white cross.

Ambassador in London, Señor Don Luis Antonio
Peñaherrera (1956).

Minister-Counsellor, Señor Don Jorge Espinosa.

Naval Attaché, Capitán Don Manuel Nieto.

1st Secretary, Señor Dr. Don Rodrigo Valdez.

3rd Secretary, Señor Don Ramiro Peñaherrera.

Consuls at Liverpool, Birmingham and Glasgow.

Area and Population.—Ecuador is an equatorial
State of South America, the mainland extending
from lat. 1° 38' N. to 4° 50' S., and between
75° 20' and 81° W. long., comprising an area,
reduced by boundary settlements (Jan. 29, 1942)
with Peru, to about 226,000 sq. miles.

The Republic of Ecuador is divided into 18 provinces and one territory. It has a population estimated (Jan. 1954) at 3,514,812, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconcagua, in the Chilean sector (22,976 ft.), the highest peaks in Ecuador being Chimborazo (20,498 ft.), Iliniza (17,405 ft.), Carhuarazo (16,515 ft.), Cotacachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sinchoga (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The *Galapagos* (Tortoise) *Islands*, forming the province of Colon, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population of 1,346. The capital is San Cristobal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the *Antarctic Humboldt Current*. The islands export guano and orchilla moss. There is an increasing amount of fishing, mainly for the North American market.

Government.—The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Viceroyalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 21, 1822). A new constitution was issued on Dec. 31, 1946. Elections were held on June 3, 1956 and Señor Ponce Enriquez was elected President.

Production and Industry.—The chief products are bananas, cocoa, coffee, rice, petroleum, straw hats, vegetable ivory and balsa wood. The petroleum, like the products of Ecuador's farm lands and cotton industry, which are extensive, is almost wholly consumed internally. Small amounts of gold, silver and lead are mined, and emeralds and rubies are occasionally found.

Communications.—There are about 2,000 miles of permanent roads and 2,500 miles of roads which are only open during the dry season. There are 695 miles of railway, including the railway from Quito to Guayaquil. The main north-south railway is now being extended north-west towards the coast at San Lorenzo. Four commercial air lines (Panagra, Area, Braniff and Avianca) operate international flights, linking Ecuador with New York, Miami, Lima, Santiago, Rio de Janeiro, etc. Area and other Ecuadorian companies operate internal services between all important towns.

Defence.—The standing Army has a strength of about 8,000. There is an Air Force of some 40 front line aircraft and a small Navy. All are being advised by U.S. missions.

Language and Literature.—Spanish is the language of the country. The electorate of Congress is confined to adult male and female citizens who can read and write and in recent years considerable headway has been made in reducing the high figure of illiteracy. 4 daily newspapers are published at Quito and 6 at Guayaquil. Elementary education

is free and compulsory. In 1952-53 there were 358,031 pupils at the 3,776 primary schools and 32,390 pupils at the 182 High Schools. The 5 Universities (at Quito, Guayaquil, Cuenca, and Loja) had 4,562 students in the same year.

FINANCE 1956

Revenue (Budget Estimates) ... Sucres 870,000,000
Expenditure (Budget Estimates) ... 870,000,000
Internal Debt (July 31, 1955) ... 297,991,000
External Debt (do.) ... \$U.S. 36,189,000

Official rate of Exchange: Sucres 42.42 = £1.
(See also p. 84.)

As from Jan. 1, 1954, imports were classified under two headings. List I contains essential and semi-essential items which are payable at the official rate of exchange. List II contains luxuries and semi-luxuries which are payable at the free rate of exchange (Sucres 49 = £1, approx.). Import licences are required for all merchandise and these are issued by the Central Bank of Ecuador.

TRADE

	1954	1955
Imports.....	U.S. \$86,045,000	U.S. \$89,663,125
Exports.....	100,220,000	89,861,731
Imports from U.K....	£2,798,569	£4,303,720
Exports to U.K.....	206,042	167,539

In 1953 the United States sent about 53.4 per cent. of Ecuadorian imports and received about 64.3 per cent. of her exports.

The chief exports are cocoa, coffee, bananas, rice, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats and coffee; the chief imports are textiles, machinery, foodstuffs, and manufactured goods.

CAPITAL, Quito. Population (1954), 229,949. ♀ Guayaquil (287,266) is the chief port; other centres are Cuenca (57,338); and Riobamba (34,268).

FLAG: Three horizontal bands, yellow, blue and red (the yellow band twice the width of the others).

Hafez Hassan; Mahmoud Fawzi Bishr.
Commercial Counsellor, Mohamed Chedid.
Commercial Attaché, Hani Abou Rida.
Agricultural Counsellor, Gamil Aboul Fetouh.
Cultural Counsellor, Abdel Hamid El-Batrik.
Cultural Attaché, Moursi Saad El-Din.
Hon. Attaché, Abdel Aziz Ghaib.
Consulates-General, 26 South Street, W.1; 425
Derby House, Exchange Building, Liverpool.

AREA AND POPULATION.—The total area of Egypt is estimated at 1,000,000 square kilometres (386,110 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles), with a population enumerated in June, 1954, as 22,651,000 (including nomads).

There are three distinct elements in the native population. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *Fellahin* (*fellah*—ploughman, or tiller of the soil). The *Fellahin* have been mainly of the Moslem faith since the conquest of the country in the 7th century, but there are about 1,000,000 Coptic and Greek Orthodox Christians in Egypt. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi-Halfa, of mixed Arab and negro blood. The *Bedouin* and *Nubians* are Moslems.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberged (or St. John's Island). This territory lies between 22° and

32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is coterminous with the Anglo-Egyptian Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollum to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Anglo-Egyptian Sudan) at 'Uweinât Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddâns* (12,431 square miles) and the area of lakes at 641,000 *jezan* (1,039 square miles), a total of 8,308,000 *feddâns* (13,470 square miles).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,850 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*, an arid region, containing some depressions, whose springs irrigate small areas known as *Oases*, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Bahariya, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by *wadis* (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone Plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the *wadis*, and running water (mostly brackish) is found at a few points.

Religions.—At the Census of 1947 there were 19,037,984 Moslems, 1,273,371 Coptic and Greek Orthodox Christians, 50,200 Roman Catholics, 203,256 other Christians (Protestant and Reformed Churches), and 65,639 Jews. The chief Moslem religious authorities in Egypt are the *Sheik el Gam el Azhar* and the *Mufti el Dî-yor el Masriya*.

Government.—From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D.

640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811 and was eventually made hereditary governor of Egypt and the Sudan by a firman from the Sultan of June 1, 1841.

In 1882, a military revolt, headed by an officer of the Egyptian Army (*Ahmed Arabi Pasha*), assumed alarming proportions and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation until 1936 (see below).

During the War of 1914-18 a British Protectorate over Egypt was declared (Dec. 18, 1914) and Khedive Abbas Hilmi was deposed. He was succeeded by Hussein Kamel, with the title of Sultan, who died Oct. 9, 1917, being succeeded by his brother, Ahmed Fuad. The British Protectorate terminated on Feb. 28, 1922, and Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of King Farouk, the *Anglo-Egyptian Treaty* was signed in London (Aug. 26, 1936); the military occupation by British troops was terminated and Ambassadors were duly accredited at the Courts of St. James's and Cairo.

The security of Egypt was threatened after the outbreak of war in 1939 and reinforcements were sent from Britain and the Dominions. Axis troops invaded Egypt in 1940 and fierce fighting ensued, with Allied victories and reverses, until the decisive victory in "The Battle of Egypt" (Oct.-Nov. 1942) drove the enemy out of the country. In July, 1952, following a military *coup d'état*, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic, Gen. Neguib himself assuming the Presidency. In November, 1954, General Neguib was deposed by Lt.-Col. Gamal Abdel Nasser and the military council. On June 23, 1956, Col. Nasser assumed office as President, after an election at which voting was compulsory, and he was the only candidate.

Constitution.—On the same day, a new Constitution, details of which had been announced in January, 1956, was adopted at a further plebiscite, 99.8 per cent. of the voters being in favour. Under its terms, a "National Union" (formed in a manner defined by the President) will nominate candidates for a National Assembly, under rules still to be defined; political parties remain suspended, but membership of the National Union, a Popular Front organization will be open to "all Egyptians of good reputation"; all citizens over 18, including women, are entitled to vote and voting is compulsory.

A term of 5 years is laid down for the National Assembly which will have legislative and administrative powers and will nominate the President, subject to public referendum. The President, during a 5-year term of office, will formulate the general policy of his Government, and propose or veto laws, although the Assembly will have power to over-ride his veto by a two-thirds majority; he

will be Commander-in-Chief of the armed forces and have authority to declare war with the Assembly's approval; he may nominate or dismiss officials.

The Constitution guarantees the independence of the judiciary, judges not being liable to dismissal. Egypt is divided into administrative units for local government by Provincial Councils which will be responsible for all public services. Citizens are guaranteed freedom of person, life, residence and religious faith. Freedom of the press and publication is safeguarded "within limits prescribed by law".

Defence.—The strength of the Army, in which service is now compulsory for everyone, is more than three times its pre-war (1939) strength. It has recently acquired a supply of more up-to-date equipment. In addition, the Egyptian Air Force has increased its strength with the accession of Soviet Bloc arms. A small Navy has been built up over the last few years. Under the Suez Canal Base Agreement of October 1954, the withdrawal of all British Forces from Egypt was completed by June 18, 1956.

Language and Literature.—Arabic is the official language of Egypt and since the last quarter of the 19th century an Arabic daily press has modernized the spoken idiom. The rich literature of Arabia is an inheritance from Islam and in the past half century indigenous poetry and drama have given abundant evidence of vitality. French and English are secondary languages in urban areas. In 1951 18 daily newspapers were published in Cairo (9 Arabic, 1 English, 2 Armenian, 5 French, 1 Greek) and 9 at Alexandria (1 Arabic, 4 Greek, 4 French). By June, 1954, the number of Arabic daily newspapers published in Cairo had been reduced to 5.

Education on native lines has long been given in elementary vernacular schools. Religious schools have largely been replaced by State schools. The number of students in State educational institutions rose from 1,479,649 in 1943 to 1,900,877 in 1952, and of these 66,995 and 177,996 were over 16 years of age in 1943 and 1952 respectively. In addition to secondary schools, there are Technical colleges and 3 universities, 2 in Cairo and 1 in Alexandria, as well as Al Azhar, the most famous Moslem University in the world, which continues to provide education on traditional lines and maintains a number of institutions in the provinces.

Agriculture.—The principal crops grown during *Saif* (summer) are cotton, rice, sugar cane, and sorgho (maize). *Nili* (flood) part of *Saif*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally begins in July; the principal crops are maize and rice. *Chitwi* (winter) begins in November and ends in June; the principal crops are cereals, berseem (a variety of clover) and—maul in Upper Egypt—beans, lentils, onions and helba.

Live Stock.—At the 1947 Census there were 28,000 horses, 1,126,000 asses, 1,321,000 cattle, 1,240,000 buffaloes, 1,875,000 sheep, 1,476,000 goats, 196,000 camels and 50,000 swine.

Minerals.—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration

and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuits entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organization are chiefly foreign. The principal products are petroleum, manganese ore, phosphate rock, gypsum, natron, and sulphate of sodium.

Manufactures and Industries.—The principal articles of Egyptian manufacture are cotton and woollen fabrics, silks, embroideries, rayon yarns and fabrics, artificial fertilizers, glassware, soap, vegetable oils, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery, cigarettes and cement.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connection runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line to the frontier at Sollüm, thus joining Tripoli to Egypt. In 1952-53, 78,242,000 passengers and 4,686,000 tons of merchandise were carried, the total receipts being £14,585,000 and the estimated operating expenses £14,103,000. The gauge is standard (4 ft. 8½ in.). There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 283 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 983 miles of light railways exploited by public companies.

A swing bridge, constructed during the Second World War, across the Suez Canal at El Firdan, established connexion between Cairo and Beirut, Syria, over the northward extension of the Palestinian railway system from Halfa to Tripoli (Syria), and there is now a continuous line linking the Libyan port of Tobruk and the former Turkish capital of Istanbul, although, since the Palestine conflict, there has been no through traffic.

Roads and Caravan Routes.—A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollüm and thence to connect with the coast road in Libya. The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—For the SUEZ CANAL, see Index. —Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollüm and Matruh on the Mediterranean, Tor, Abu Zenima, Zetita, Jemsa and Hurgada in the Gulf of Suez, and Safage, Qoseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line has its headquarters at Alexandria and a depot at Suez. Other Egyptian shipping companies are the Alexandria Navigation Company and the Société Misr de Navigation Maritime. In 1952, 26,524 mercantile steamers (127,663,000 tons) entered the principal Egyptian ports.

Posts and Telegraphs.—There were, in 1947, 6,193 post offices and stations. There were on March 31, 1947, 12,000 miles of State telegraph and 145,000

miles of State telephone wire. In addition, the Eastern Telegraph Company has lines throughout the country. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarraf* (village tax-collector).

FINANCE

	1954-55	1955-56*
Revenue (Budget).	£E227,800,000	£E238,300,000
Expenditure (do.).	227,800,000	238,300,000

In 1955-56, the supplementary budget of the Government capital works was £10,000,000. Permanent Social

* Estimated.

£E (Egyptian pound of 100 piastres) = £1 os. 6½ d. sterling. Rate of Exchange (May, 1956)—(Buying) Piastres 97-40 = £1; (Selling) Piastres 97-60 = £1. (See also p. 84.)

TRADE

	1954	1955
Total Imports...	£E162,278,000	£E182,266,000
Domestic Exports.	136,708,000	136,995,000
Imports from U.K.	£21,083,000	£28,678,925
Exports to U.K...	16,724,000	9,758,219

The principal imports are textiles, metals, and manufactures thereof, coal and coke, chemicals, machinery, vehicles, foodstuffs, timber and wool and paper. The exports are principally raw cotton, rice, mineral products and onions.

CAIRO, the capital (population 1947, 2,100,436) stands on the E bank of the Nile, about 24 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân el-Khalili, the Hamzawi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character. The Anglican Cathedral of All Saints overlooks the Nile and occupies a site presented to the British colony by the Egyptian government.

Ψ **ALEXANDRIA** (pop. 1947, 928,237), founded 332 B.C. by Alexander the Great, was for over 2,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World." Alexandria now contains two ex-royal palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. Other towns are: Tanta (139,965), Ψ Port Said (178,432), Mansura (102,709), Asyût (90,378), Faiyûm (74,314), Zagazig (82,912), Mahalla el Kubra (115,509), Damanhur (84,983), Minya (69,667), Ψ Suez (108,250), Beni Suef (57,464), Ψ Damietta (68,520), Giza (53,620), Qena (43,037), Shibin el-Kom (41,836), Sohga (43,334), and Ψ Rosetta (28,698).

FLAG: Green, with white crescent (convex side to flagstaff), and three 5-pointed white stars (arranged in an equilateral triangle) between the horns.

BRITISH DIPLOMATIC OFFICERS

(The Embassy, Kasr-el-Doubara, Cairo)

British Ambassador, His Excellency Sir Humphrey Trevelyan, K.C.M.G., C.I.E., O.B.E. (1955).
H.M. Minister, F. R. H. Murray, C.M.G.
Commercial Minister, W. Godfrey, C.B.E.
Naval Attaché, Capt. P. J. Norton, D.S.C., R.N.
Military Attaché, Brigadier H. V. Fraser, O.B.E., T.D.

Air Attaché, Air Commodore G. A. G. Johnston, C.B.E.

Counsellor and Consul-General, J. B. T. Judd.

Counsellors, T. W. Garvey, C.M.G.; J. A. de C. Hamilton, C.M.G., M.C.; T. S. Tull, D.S.O., O.B.E.

Oriental Counsellor, T. E. Evans, C.M.G., O.B.E.

Labour Counsellor, K. J. Hird.

Legal Counsellor, W. M. Graham, C.M.G., C.B.E.

Counsellor (Financial), F. Milner, C.M.G.

Civil Air Attaché, B. G. Barnard.

BRITISH COUNCIL.

Representative in Egypt, H. P. Croom-Johnson, C.B.E., 22 Sharia Adly Pasha, Cairo.

There are British Institutes at Cairo and Alexandria.

BRITISH CHAMBER OF COMMERCE OF EGYPT, 20 Sharia Soliman Pasha, Cairo; 1 Rue Centrale, Alexandria, and P.O. Box No. 65, Port Said.

CAIRO is 2,520 miles from London: transit *via* Trieste, 5 days: *via* Marseilles, 6 days.

ETHIOPIA

(Ya Ityopia Nigusa Nagast Mangist)

Emperor of Ethiopia, His Imperial Majesty Haile Selassie I, K.C., G.C.B., G.C.M.G., G.C.V.O., LL.D., son of the late Ras Makonnen, Governor of Harar; born July 23, 1892; married in July, 1911, Waizero (Lady) Manen, daughter of Degazmatch Asfau Mikael, son of Negus (King) Mikael of Wollo; crowned as Negus Oct., 1928; proclaimed Emperor April 2, 1930; crowned as Emperor Nov. 2, 1930; in exile 1936-1940; led his patriot army 1940-41; returned to his capital May 5, 1941.

Crown Prince, H.I.H. Prince Asfa Wossen, G.C.V.O., G.B.E., eldest son of the Emperor, born July 27, 1916; married May 9, 1932, Walatta Israel daughter of Ras Siyum, whom he divorced in 1945, when he married Waizero Madferiah Worq, daughter of Major-General Ababa Damtaw.

The Duke of Harar, H.I.H. Prince Makonnen Haile Selassie, G.C.V.O., second son of the Emperor, born Oct., 1923; married Feb. 10, 1946, Woizero Sara Gizaw.

EMBASSY IN LONDON

17 Princes Gate, S.W.7

[Kensington: 72121]

Ambassador, H.E. Ato Emmanuël Abraham (1956).

2nd Secretary, Ato Kifle Tsegaye.

3rd Secretary, Ato Getachew Tadesse.

Cultural Attaché, Ato Bekke Yilma.

Position and Extent.—Ethiopia (or Abyssinia) is an inland country in North-Eastern Africa, bounded on the North by the former Italian Colony of Eritrea, which was federated with Ethiopia under the Ethiopian Crown in September, 1952, in accordance with the United Nations Resolution of Dec. 2, 1950; on the South by Kenya; on the West by the Anglo-Egyptian Sudan; and on the East by French and British Somaliland, and the former Italian portion of Somaliland, which is now being administered by Italy as a Trusteeship territory, the northern and eastern neighbours cutting it off from access to the Red Sea, from which it is distant about 40 miles along the greater part of the Eritrean boundary. The area is estimated at 350,000 square miles, with a population officially estimated at 16,000,000, of whom fewer than one-half are of the ruling race of Amharas and the remainder mainly Gallas, Guraghi, Sidama, Agao, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.

Ethiopia is mainly a mountainous country, volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simien

range in the north; many other mountains exceed 10,000 ft. The lower country and valley gorges are very hot; the higher plateaux are well watered, with a genial climate. On the high plateau there are two main seasons in the year, a dry winter, October to May, and a rainy summer from June to September, with a season of "small rains" occurring generally in March. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

The Amharas, who inhabit the provinces of Tigre, Begemdir, Gojjam, Wollo, parts of Shoa, and many of the Gallas, are Christian (a branch of the Coptic Church). The head of the Coptic Church is the Coptic Patriarch at Alexandria, who appoints the Abuna (Metropolitan Bishop) of Ethiopia on the recommendation of the Council of the Ethiopian Church. Since 1950 Bishops have been appointed by the local Metropolitan Bishop, without direct recourse to Alexandria. Moslems predominate in some areas, notably Harar and Jimma, the Moslem centre being at Harar.

Government.—Under the Constitution of 1931, restored in 1942, the absolute power of the Emperor is subject to certain limitations. There is an Upper Chamber of Nobles, nominated by the Emperor, and a Lower Chamber nominated by nobles and local chiefs.

Production and Industry.—The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, &c., flourish; in the middle zone maize, wheat, barley, coffee, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provided 55 per cent. of the country's total exports by value in 1954-55. The forests are a potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people.

Communications.—A railway links Addis Ababa, the capital, *via* Dire-Dawa, with Jibuti, 486 miles away. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara in Eritrea, with a branch from Dessie to Assab on the Red Sea Coast. Gondar is linked to Asmara by a road through Axum and Adua. Others run from Addis Ababa west to Leketmi, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and in the East from Dire Dawa to Harar and British Somaliland. In September, 1950, Ethiopia was granted a loan of U.S. \$5,000,000 by the International Bank for Reconstruction and Development for the extension and repair of the highway system. The Ethiopian Air Lines maintain regular services from Addis Ababa to Jimma, Gore and Gambela; Dabra Markos, Gondar and Asmara; Dire-Dawa; and certain other provincial towns. External services are operated to Jibuti, Aden, Port Sudan, Cairo, Khartoum, Nairobi and Athens.

Defence.—A Ministry of Defence has been instituted. The armed forces comprise the Imperial Army which includes the Imperial Bodyguard, the Imperial Air Force and the Imperial Navy. The Army consists of infantry, artillery, engineers, signals, ordnance, and supply services, and has an armoured squadron of light tanks and armoured cars. The Imperial Bodyguard consists of infantry; with some artillery and armoured cars, and one of its seven battalions has been in Korea under the United Nations flag since April 1951. An American Military Mission trains the Army, and Swedish officers are employed in the Ministry of

Defence. The Imperial Air Force comprises three attack squadrons and a flying training school. The aircraft are of British and Swedish manufacture and the training staff is Swedish.

The Imperial Navy, which has just been started with the formation of a Naval School at Massawa with Norwegian instructors, has at present no ships nor trained personnel.

The Police force is under a British Commissioner who is assisted by a few British officers. Swedish officers are employed in the police training school.

Education.—Elementary education is provided without religious discrimination, by Government schools in the main centres of population; there are also Mission schools. In or near the capital are several Secondary Schools, an University College, a Technical School, an Agricultural School, a Theological College, and a Teacher-training College; also cadet-schools for the Army, Imperial Guard, Air Force, and Police. Amharic is the official language of instruction, with English as the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by institutes which provide evening classes in Addis Ababa.

FINANCE

	1952-53	1953-54*
Revenue.....	£14,731,300	£17,334,300
Expenditure.....	14,731,300	17,334,300

* Estimated.

Currency.—A new Ethiopian currency was issued by the State Bank of Ethiopia in July, 1945, at an exchange rate of Ethiopian \$10 = £1, backed almost entirely by sterling securities. The East African shilling remained legal tender temporarily but not the Maria Theresa dollar, although it continued to be widely used in the Provinces. In November, 1946, a Proclamation was issued by which the use and possession of Maria Theresa dollars were forbidden, and all coins had to be surrendered to the Ethiopian authorities at a rate of two Maria Theresa dollars to three Ethiopian dollars. Ethiopia did not devalue her currency in line with sterling in September, 1949, and a rate of E\$7 = £1 has been maintained since that date.

TRADE

	1954-55*
Total Imports.....	£23,225,508
Total Exports.....	21,998,862
Imports from U.K., 1955.....	2,470,780
Exports to U.K., 1955.....	1,227,169

* September 10, including Eritrea.

The chief imports by value are cottons, silks, sugar, tyres, vehicle parts and petrol; the principal exports by value being coffee, hides and skins, oil-seeds, flour, cereals and pulses.

CAPITAL. Addis Ababa (estimated population 400,000), also capital of the province of Shoa; other provincial capitals are Makale (Tigré), Gondar (Begemdir), Dessie (Wallo), Debra Markos (Gojjam), Lekemti (Wallega), Goré (Habbabor), Jimma (Kaffa), Chencha (Gamu-Gofa), Yirgalem (Sidamo), Aselle (Arusi), and Harar (Harar). Besides these, Dire-Dawa, Gambela, and Aduwa are towns of some importance. There are ancient architectural remains at Aksum, Gondar, Lalibela and elsewhere.

ETHIOPIAN FLAG: Three horizontal bands: green, yellow, red.

BRITISH EMBASSY

(Addis Ababa)

Ambassador, His Excellency Geoffrey Warren Furlonge, C.M.G., O.B.E. (1956)..... £3,800
1st Secretary, J. E. Killick.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Addis Ababa, Asmara, Harar and Mega.

ERITREA

A former colony of Italy, Eritrea extends from Ras Kasar, 18° 2' N., to Ras Demoiira, 12° 42' N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Ethiopia, and on S.E. by French Somaliland. It consists of a high, mountainous hogsback interposed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The mountains range up to 10,000 ft. and Asmara, the capital (pop. 123,000, 14,500 Italians), stands at 7,800 ft. above mean sea level. Total area, 48,350 square miles, with a population of about 1,000,000, of whom about 20,000 are Europeans. Of the population about half are Coptic Christians and the remaining half are Moslems.

Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1952, when in accordance with a resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown. A new Constitution for Eritrea, drawn up by the U.N. Commissioner, and approved by the Eritrean Constituent Assembly, was ratified by the Emperor Haile Selassie on August 11, 1952. The Government of Eritrea has legislative, executive and judicial powers in domestic affairs, and its jurisdiction extends to all matters not vested in the Federal Government, including health, education, welfare, law and order, the levying of taxes and adoption of a budget. Defence, currency, foreign affairs, finance, foreign trade and communications (including ports) are within the jurisdiction of the Federal Government. The Federation of Eritrea with Ethiopia was ratified by the Emperor Haile Selassie on September 11, 1952, and came into effect with the final handing over of authority by the British Administration at midnight on September 15, 1952.

Full executive power is, subject to certain safeguards, in the hands of a Chief Executive elected by the Assembly to hold office during its own term, but not responsible to the Assembly. The single chamber Assembly is elected by all adult males of federal nationality. There is also in Eritrea a representative of the Emperor who has certain formal rights and prerogatives not affecting Eritrea's autonomy. English was adopted as the official language of the Eritrean Assembly.

Chief Executive of Eritrea, Fitawrari Asfaha Wolde-Mikael, appointed 1955.

Massawa (pop. 27,000) is the chief port, where there is a good harbour, other centres being Keren (10,000), Decamere (9,000), Adi Ugri, Agordat and Tessenai. A railway from Massawa runs to Asmara and thence inland to Keren and Agordat, with projected extensions towards the S.E. boundary.

FINLAND

(Suomi)

President, Dr. Urho Kaleva Kekkonen, born 1900, elected Feb. 15, 1956 for term of six years.

CABINET

(March 1, 1956.)

Prime Minister, K. A. Fagerholm (Social Democrat).
Minister for Foreign Affairs (vacant).
Interior, V. Väyrynen (Social Democrat).
Finance, A. Simonen (Social Democrat).
Transport and Public Works, E. Palovesi (Agrarian).
Agriculture, M. Miettunen (Agrarian).
Education, J. Virolainen (Agrarian).

Defence, E. Skog (*Social Democrat*).

Trade, K. Kjeemola (*Agrarian*).

Social Affairs, E. Saari (*Finnish People's Party*).

FINNISH EMBASSY IN LONDON

66 Chester Square, S.W.1

[Sloane: 0771]

Ambassador in London, His Excellency Monsieur Sakari Tuomioja (1955).

Area and Population.—A country situated on the Gulfs of Finland and Bothnia, with a total area of 130,127 square miles, of which 70 per cent. is forest, 9 per cent. cultivated, 1 per cent. lakes and 12 per cent. waste and other land, population (Jan. 1, 1953) 4,116,000. In 1954 the birth rate was 21.5 per 1,000, death rate 9.1 per 1,000. The infant mortality rate is 31.6 per 1,000 live births. 96 per cent. of the people are Lutherans, 1.7 per cent. Greek Orthodox and 2.3 per cent. belong to other religious bodies. The loss of Karelia meant resettling about 480,000 refugees mainly on some 46,000 new farms provided by the Government, partly from holdings exceeding 62 acres and partly by purchase.

The Åland Archipelago (Åhvenanmaa), a group of small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a population (1952) of 18,545 (97 per cent. Swedish-speaking). The islands have a semi-autonomous status.

Government.—Under the Constitution there is a single Chamber (*Eduskunta*) for which women are eligible, now composed of 200 members, elected by universal suffrage of both sexes. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

The last general election was in March, 1954. The present state of the Parties is as follows: Social Democrats 54, Agrarian 53, People's Democrats (mainly Communists) 43, Conservatives 24, Swedish People's Party 13, National Party 13. The extreme Right, which was represented before the War, is banned by the Peace Treaty.

Defence.—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the army is limited to a force not exceeding 34,000. The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8-11 months. None of the defence forces has the full complement permitted.

Education.—Primary education is compulsory and free for all children from 7 to 15 years, and in 1951-52 there were 492,000 in attendance at primary schools, with 101,000 in secondary schools and 31,000 in colleges for vocational training. There are 11 Higher Schools with 4,400 students, and in addition to the State University of Helsinki (about 9,000 students) there is a Finnish-speaking University (450 students) and a Swedish-speaking University (550 students) at Turku.

Language and Literature.—Most Finns are bilingual. 91.2 per cent. speak Finnish as their first language, 8.6 Swedish and the remaining 0.2 per cent. other languages (mainly Lapps living a nomadic life in the North). Since 1883 Finnish has been on an equal footing with Swedish as the official language of Finland, but since independence in 1919 Finnish has slowly been displacing Swedish. In

literature also, until the close of the eighteenth century, Swedish was dominant, but awakening Finnish nationalism in the early years of the nineteenth century and the establishment of an association for the promotion of Finnish literature in 1831 gave Finnish the status of a literary language. There is a vigorous modern literature. Eemil Sillanpää was awarded the Nobel Prize for Literature in 1939. There are 65 daily newspapers in Finland.

Production and Industry.—Agriculture and forestry are the principal occupations of the people. The cultivated area is small (about 6,000,000 acres in 1950 including 2,400,000 acres under hay). The main crops are hay, oats, wheat, rye, barley and potatoes. The *Live Stock* (1954) included 326,000 horses, 1,885,000 cattle, 903,000 sheep, 546,000 swine and 4,003,000 poultry. The productive forest area covers 53,500,000 acres and is a great source of wealth, exceeding that of every European country except Russia. The growing stock comprises 48,384,000,000 cu. ft., including bark, of which 45.5 per cent. is pitch pine, 32.2 per cent. spruce, and the rest largely birch. Saw mills, and the manufacture of wood pulp, cellulose, paper, plywood and prefabricated houses provide employment for about 61,000 factory workers. There is no coal, and mineral resources, with the exception of copper ore, are limited.

Communications.—There are 3,117 miles of railroad and a well-developed telegraph and telephone system. There is railway connexion with Sweden and U.S.S.R., passenger boat connexion with most of the countries of Western Europe, and telephone communication with most countries of the world. External civil air services are maintained by BEAC (as far as Stockholm), Aero Oy (Finnish Airlines), Scandinavian Airlines System and Pan American Airways. Aero Oy and Aero Flot (the Soviet State Airlines) between them maintain a daily service with Moscow. Aero Oy maintains an extensive internal air service. Aero Flot maintains a service twice a week with Leningrad and Moscow, and Czech State Airlines twice a week with Prague. The merchant fleet (April, 1956) consists of 301 steamships (418,000 tons gross), 163 motor vessels (306,000 tons gross), and 115 sailing ships (including those with auxiliary engine) (11,000 tons gross).

FINANCE		1956
Revenue (Budget).....	Marks	221,400,000,000
Expenditure (do.).....		230,400,000,000
Debt (March 1956).....		124,000,000,000
Finnish Mark 646 = £1 (see also p. 84).		

TRADE		1955
Total Imports.....	Marks	179,960,000,000
Total Exports.....		181,259,000,000

		1954	1955
Imports from U.K.....	£	31,733,826	£42,026,439
Exports to U.K....		59,003,462	75,276,304

The principal imports are raw materials, foodstuffs, machinery and manufactured goods. The exports are principally the output of the timber mills (timber, cellulose and paper).

CAPITAL, Ψ Helsinki (Helsingfors). Population (1953) 394,500; other towns are Ψ Turku (Åbo), 107,000; Tampere (Tammerfors), 105,000; Lahti, 45,000; Porl (Björneborg), 43,000; Oulu (Uleåborg), 38,000; Ψ Vaasa (Vasa), 35,000; and Kuopio, 33,000.

FLAG: White with blue cross.

NATIONAL DAY: December 6.

(a), (b), (c). These Departments correspond with the districts of Alsace and Lorraine.

AREA AND POPULATION.—The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 2° 45' W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 207,076 square miles, divided into 90 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the

Treaty of Frankfurt (May 30, 1871) amounted to 5,602 square miles; that regained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles, making the 1939 area of France (exclusive of Algeria) 212,895 square miles, with a population (census of May, 1954) of 42,731,445, of whom 1,451,752 were foreigners. The population of Metropolitan France on Jan. 1, 1956, was estimated at 43,430,000 by the French National Institute of Statistics. During 1955 there were 800,000 births, 520,000 deaths and 315,000 marriages.

GOVERNMENT.—The monarchical system of government was overthrown by the *French Revolution* (1789–1793), and the *First Republic* endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the *First Empire* in 1804. The monarchy was restored in 1814, and also after the “Hundred Days” of Napoleon (March 20–June 29, 1815), until the *Second Republic* of 1848, which became the *Second Empire* on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the *Third Republic* was set up. The constitution of the *Third Republic* vested the legislative power in a Chamber of Deputies (numbering 618 in 1940) elected for 4 years, and a Senate (numbering 314 in 1940) elected for 9 years, one-third retiring every 3 years. The executive was vested in the President, who was elected for 7 years by the Senate and Chamber assembled in Congress. The President of the Republic selected a President of the Council of Ministers from among the leaders of the various political groups and confirmed his choice of colleagues.

On Sept. 1, 1939, Germany invaded Poland, thus precipitating war with France and Great Britain, who had (March 31, 1939) given an open pledge to support Poland against aggression.

On June 17, 1940, the late Marshal Pétain sought terms of surrender from the Germans. A number of French troops had reached British ports after the evacuation of the British Expeditionary Force from Dunkirk and St. Valéry, and on June 23, 1940, after stating that the French Government had capitulated before all means of resistance had been exhausted, General de Gaulle announced the formation of a Provisional National Committee “to defend that part of the French Empire which has not yet been conquered by Germany and to free that part of France still under the yoke of the invader.”

On June 3, 1943, after prolonged negotiation, there was set up a *French Committee of National Liberation*, which was recognized by the United Nations on August 26, 1943.

Paris was liberated on August 25, 1944, and on October 13, 1944, the de Gaulle administration was recognized by the United Nations as the government of France.

Under the de Gaulle administration there was a single chamber legislature (The National Consultative Assembly) which met at Algiers until France was liberated. The enlarged Consultative Assembly met in the Luxembourg Palace (Paris), formerly the Senate House, on Nov. 7, 1944.

Following the Referendum of Oct. 21, 1945, a Constituent Assembly was elected with the task of drafting a new constitution.

Under the new Constitution, adopted by a majority of 1,132,011 in a National Referendum on Oct. 23, 1946, the Legislature consists of the National Assembly and the Council of the Republic. Both Chambers are elected on a territorial basis, the National Assembly by universal direct suffrage and the Council of the Republic by the communal and departmental Councils through universal

indirect suffrage. The Constitution was revised in November, 1954 and now provides that legislation (except financial bills, which must be introduced in the National Assembly) can be initiated by either house. Before a bill can become law it must be adopted in the same form by both houses. In the event of failure to agree after a limited period of time the text adopted by the National Assembly prevails.

In January, 1956, a General Election was held, and the resulting composition of the National Assembly was:—

Party	Seats
Communists.....	150
Socialists.....	94
Radicals.....	70
M.R.P.....	72
Moderates.....	96
Gaullists.....	22
Poujadists.....	52
Others.....	38
Total.....	594

PRODUCTION.—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beet-root (for the manufacture of sugar), hops, &c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

The harvest in 1955 was:—	(Quintals)
Wheat.....	103,788,700
Oats.....	35,803,400
Barley.....	26,649,600
Rye.....	4,393,800
Maize.....	9,991,400

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent, as the names Bordeaux, Burgundy, Champagne, &c., universally testify. Production in 1955 was about 57,000,000 hectolitres. Cider-making is also an important industry. The live stock (1955) included 17,600,000 cattle, 8,100,000 sheep and lambs, 7,800,000 pigs, 2,200,000 horses and 1,250,000 goats. The mineral resources include coal, pig iron, copper, lead, silver, antimony and salt. Over 55,300,000 tons of coal were mined in 1955 (excluding the Saar production). The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, cottons, woollens, carpets, linen, silk and lace.

LANGUAGE AND LITERATURE.—French is the universal language of France and of a large proportion of the people of Belgium, Luxembourg, Switzerland, Italy, Egypt, Tunisia, Algeria, Mauritius, Haiti, the Province of Quebec, Canada, and of the State of Louisiana, U.S.A., to whom the almost inexhaustible literature of France is a treasured heritage. The work of the *French Academy*, founded by Richelieu in 1635, has established *le bon usage*, equivalent to “The King’s English” in Great Britain. French authors have been awarded the Nobel Prize for Literature on 8 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1937), Roger M. du Gard (1937), André Gide (1947) and François Mauriac (1952).

DEFENCE.—The personnel of the Defence Forces in mid-1956, was—Army 860,000 (including *Gendarmerie* of 63,000); Navy 73,000; Air Force 160,000. The French Navy included 2 battleships, 3 aircraft carriers, 5 cruisers, 26 destroyers and 13 submarines.

EDUCATION.—The educational system is highly developed. *Central Administration* comprises (a) Ministry of National Education with Secretariats of State for Technical Education, Youth and Sports, and for Fine Arts; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades; and (b) Departmental Councils, presided over by the *préfet*, charged especially with primary education. (i.) *Primary* education is secular, compulsory and free, the school age being 6 to 14. Schools are for boys, for girls, or mixed. (ii.) *Secondary*: State lycées, communal colleges, and many private establishments, 7-yr. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern languages. Sévres school and the Sorbonne (University of Paris) are among the well known establishments. (iii.) *Special* Schools are numerous. (iv.) There are 17 *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix (A.D. 1409), Alger, Besançon (1485), Bordeaux (1442), Caen (1432), Clermont (1808), Dijon (1722), Grenoble (1339), Lille (1530), Lyon (1808), Montpellier (1725), Nancy (1572), Paris (1500), Poitiers (1431), Rennes (1735), Strasbourg (1567), and Toulouse (1230).

ARCHAEOLOGY, ETC.—There are dolmens and menhirs in Brittany, prehistoric remains in Dordogne, cave drawings in Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Caesar found Gaul "divided into three parts" and described three political groups—Aquitanians south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgae from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, &c., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and XVIIIth century châteaux survived the French Revolution.

COMMUNICATIONS.—The length of the *Routes Nationales* is about 50,000 miles, and of other roads 388,000 miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways having a length of 8,500 km. The Rhône is navigable for 1,200-ton vessels from the sea to Switzerland.

The system of railroads in France is very extensive. The length of lines of general interest, inclusive of local lines, open for traffic on July 1, 1953, was 45,660 km., of which 4,460 km. were electrified. The lines left open in Sept. 1944 totalled only 11,125 miles, but the work of reconstruction then begun has restored the pre-war figure. Traffic in 1955 totalled 27,800,000,000 passenger-kilometres and 46,800,000,000 ton-kilometres.

Civil Aviation.—In 1955 passengers/kilometres flown by aircraft of French airlines totalled 2,264,276,000, of which 2,351,069,000 were by Air France.

Shipping.—The French mercantile marine on May 21, 1955, consisted of 722 ships of 3,597,218 tons gross, of which 87 were passenger vessels (848,572 tons), 120 tankers (1,031,766 tons) and 515 cargo vessels (1,716,880 tons).

FINANCE 1955
Total revenue (*Budget*)..... Fcs. 3,450 milliard
Ordinary expenditure (*do.*)..... 3,957 milliard

The *Public Debt*, on November 30, 1955, amounted to Fcs. 5,809.7 milliard, of which the external debt accounted for Fcs. 1,051.4 milliard.

Currency.—The unit of currency is the *franc* of 100 centimes. Since September 1949, the exchange value has been 980 francs = £1 and 350 francs = \$1 U.S. (See also p. 84.)

COMMERCE
The principal imports are wool, cotton, chemicals, coke, crude oil, oleaginous fruits and seeds, machinery, raw skins, timber, rubber, copper and coffee. The principal exports are chemical products, iron and steel, textiles (silk and cotton), automobiles, wine and other agricultural products, soaps and perfumes, and glass.

FRENCH FOREIGN TRADE

	1954 Francs	1955 Francs
Imports ..	1,522,016,014,000	1,646,400,000,000
Exports ..	1,512,337,096,000	1,695,800,000,000
Imports from U.K. ..	£64,153,285	£71,773,966
Exports to U.K. ...	97,108,582	136,711,825

ALGERIA
Algeria.—Algers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. Since 1881 the three northern departments of Algeria—Algers, Oran, and Constantine—have formed an integral part of France, under a Governor-General, assisted by a Consultative Council of 15 official members and a Superior Council of 60 members. Algeria sends 14 Senators and 30 Deputies to Paris. Algeria lies between 8° 45' W. to 12° E. longitude, 37° 6' N. to an undetermined S. limit about 19° N., covering an area estimated at 847,500 square miles, with a population (estimated, 1955) of 9,125,000, including 1,250,000 Europeans, mostly French. The total value of imports in 1951 was 203 billion francs, and of the exports 135 billion francs. The bulk of trade is with France. Trade with the United Kingdom in 1955 was valued at: Imports, £2,315,217; Exports to U.K., £18,611,092. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, corkwood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1939 there were over 3,000 miles of railroad open for traffic; and in 1938 the number of ships engaged in foreign trade entering Algerian ports was 3,956. The principal town is Ψ Algers, the capital (municipal population, 1948, 416,758), a most important coaling station and much frequented as a health resort; other large towns are Ψ Oran (362,295), Constantine (159,541), Ψ Bone (94,021), Sidi bel Abbès (78,679), Tizi Ouzou (27,897), Ψ Philippeville (53,242), Mascara (57,500), Tlemcen (85,345), Ψ Bougie (52,283), and Ψ Mostaganem (99,490).

Southern Algeria, consisting of the Territories of Ain Sefra, Ghardaia, Touggourt and the Saharan Oases, was formed into a separate colony on Dec. 24, 1902. The population of Southern Algeria at the census of 1948 was 816,993 (included in the figure given above).

Minister Resident and Governor-General, M. Robert Lacoste.

CAPITAL OF FRANCE. Paris, on the Seine.

Population (1954), (*Paris ville*) 2,850,189. The population of Greater Paris (within 15-mile radius) is approximately 5,500,000. Twenty-three other cities exceeded 100,000 at the Census of 1954— Ψ Marseilles (661,492), Ψ Lyons (471,270), Toulouse (268,863), Ψ Bordeaux (257,946), Ψ Nice (244,360), Ψ Nantes (222,790), Strasbourg (200,921), Lille (194,616), St. Etienne (181,730), Ψ Toulon (141,117), Ψ Le Havre (139,810), Nancy (124,797), Rennes (124,122), Reims (121,145), Ψ Rouen (116,540), Grenoble (116,440), Clermont Ferrand (113,391), Dijon (112,844), Le Mans (111,891), Ψ Brest (110,713), Roubaix (110,067), Limoges (105,990) and Angers (102,142).

The chief towns of Corsica are Ajaccio 32,997 and Bastia 53,000.

Paris is distant from London 267 miles.

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

ROYAL CAMBODIAN EMBASSY IN LONDON

24, Phillimore Gardens, W.8.

[Western: 4354]

Ambassador in London, His Excellency Monsieur Au Chheun.

Counsellor, M. Koun Wick.

Attaché, M. Kim Xum.

AREA AND POPULATION.—A kingdom with an area of some 70,000 square miles and a population of 4,500,000 (estimated), Cambodia is situated between Thailand to the west and South Vietnam to the east. It is bordered on the north and south respectively by Laos and the Gulf of Siam.

HISTORY.—Once a powerful kingdom, which as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Two years earlier Prince (then King) Norodom Sihanouk had promulgated a constitution providing for parliamentary government. The Geneva Conference of 1954 took Cambodia further along the road to independence by ensuring the withdrawal of French and Vietnamese forces from the country, and the process was completed when, in January, 1955, Cambodia became financially and economically independent not only from France but also from Laos and Vietnam. General elections were held in September 1955 in which representatives of all sections of the community, including former resistance elements, participated, and there is no longer any internal armed opposition to the Cambodian authorities. The present government is drawn from the Popular Socialist Community, a movement formed by Prince Norodom Sihanouk who abdicated from the throne in March 1955, in favour of his parents King Norodom Suramarit and Queen Kossamak, after a reign of 14 years. The Community holds all 91 seats in the National Assembly.

GEOGRAPHY, ECONOMY AND COMMUNICATIONS.—Cambodia is largely underdeveloped and underpopulated with an agricultural economy, the bulk

of its people being rice-growing farmers living in the basins of the Mekong and Tonlé Sap rivers. In addition to rice, which is the staple crop (some 200,000 tons exported annually), the major products are rubber, livestock, maize, wood and freshwater fish. Rice and rubber are the main exports. Seventy-five per cent. of the total land area is virgin forest abounding in wild life of all kinds, including big game. The climate is tropical monsoon with a rainy season from May to October.

The country has some 4,000 kilometres of roads, of which about a quarter are hard-surfaced and passable in the rainy season. There is one railway which runs from Phnom-Penh to the Thai border, where it connects with the Thai railway system. Phnom-Penh is a river port capable of receiving ships of up to 2,500 tons all the year round. A deep water port is under construction at Kompong Som on the Gulf of Siam and this will be linked by road to Phnom-Penh. There is as yet no large-scale industry. A Two Year Plan for economic development was published in January, 1955.

There is no Cambodian airline at present, but Air Vietnam and Thai Airways operate services between Phnom-Penh and Saigon and Bangkok. There are flights also to Siemreap where the famous ruins of Angkor Wat are situated. Cargo boats from Singapore and Hong Kong visit Phnom-Penh regularly.

CULTURE AND EDUCATION.—Cambodian culture is predominantly Indo-Siamese and is distinct from Annamite culture which is largely derived from China. The state religion is Buddhism of the "Little Vehicle". There are fairly large Chinese and Vietnamese minorities. The national language is Cambodian, although French is widely spoken and is still largely the official language of government and commerce. There are over 2,000 primary schools; 4 lycées; 8 colleges; and 2 technical schools. There are also in Phnom-Penh a training school for teachers, a Buddhist Institute, a National Institute of Law and Economics and a Medical School.

The official rate of exchange (1956) was 97.7 riels = £1.

Trade with U.K.—Total imports from U.K. in 1955 were valued at £188,477; exports to U.K., £311,519.

CAPITAL, Phnom Penh. Population (estimated, 1956), 550,000.

Laos

EMBASSY IN LONDON

5 Palace Green, W.8

Ambassador Extraordinary and Plenipotentiary, H.R.H. Prince Tiao Khampan (1955).

Laos includes the former Kingdoms of Luang Prabang and Vientiane and the Principality of the Champassak, now united under King Sisavang Vong (born 1885) of the House of Luang Prabang. The country has an estimated area of 90,000 square miles. In 1948, the population was given as 1,500,000; it is now probably slightly over 2,000,000. The administrative capital is Vientiane (estimated population, 30,000-40,000). The independence of the kingdom within the French

Union was recognized by France in July 1949. This relationship has been amplified and completed by the Treaty of October, 1953. Laos was invaded by the Communist Viet Minh in the spring of 1953. Under the terms of the Geneva Armistice Agreements of July, 1954, the Viet Minh troops were to evacuate Laos by November of that year. The two Northern Provinces of Sam Neua and Phong Saly still remain however under the effective control of the rebel *Pathet Lao* forces.

Vietnam

President of Southern Vietnam, Ngo dinh Diem.

VIETNAM EMBASSY IN LONDON

12 Victoria Road, W.8

[Western: 3765]

Ambassador Extraordinary and Plenipotentiary, Ngo Dinh Luyen (1956).

Counsellor, Nguyen Khac Bang.

1st Secretary, Ha Vinh Phuong.

2nd Secretary (Commercial), Nguyen Trien Dan.

Attaché, Va Khac Thu.

Since the Geneva Conference of July 1954 Vietnam has been divided into two zones.

The Southern Zone has an area of 66,000 sq. miles. Its population was estimated in 1943 at 9,648,970. The capital is Saigon (1953 population of Saigon-Cholon: 1,614,200). Other principal towns are Hue (1953 population: 96,400) and Tourane (1953 population: 57,400). Saigon and Tourane are the main ports. Rice and rubber are the chief products. Trade with the United Kingdom in 1955 was valued at: Imports from U.K., £1,248,918; Exports to U.K., £1,263,677.

On October 23, 1955, a referendum showed a large majority in favour of the deposition of the former Chief of State, Bao Dai, and the election of Ngo dinh Diem to his place. The latter was accordingly proclaimed Chief of State on October 26, and his first act was to declare Vietnam a Republic of which he became the President. An elected assembly is now considering the future constitution of the Republic. The Government of the Republic of Vietnam in Saigon is recognised by the United Kingdom, the United States, France and other members of the United Nations as the legal government of Vietnam.

BRITISH EMBASSY

Saigon

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Hugh Southern Stephenson, K.C.M.G., C.I.E., O.B.E.

The Northern Zone has an area of approximately 63,000 sq. miles. Its population was estimated in 1943 at 12,963,900. The capital is Hanoi (1953 population: 297,900) and the chief port is Haiphong (1953 population: 188,600). Rice and coal are the chief products. The title by which the Northern authorities style themselves is the Government of the Democratic Republic of Vietnam. The President of the Republic is Ho chi Minh. The effective organs of government are the Lao Dong (or Workers') Party and the Fatherland Front. Both are avowedly Communist and the former "recognises that the Vietnam Revolution is an

integral part of the World Revolution led by the Soviet Union". The Vietminh authorities in the Northern Zone are recognised by the U.S.S.R., China, and most of the satellite states as the government of Vietnam.

There is a Consulate General at *Hanoi* and a Vice-Consulate at *Haiphong*.

FEDERATION OF FRENCH WEST AFRICA

The Federation of French West Africa extends from Mauritania to Dahomey, and has a total area of 1,799,159 square miles and a population (1945) of 16,000,000 (Europeans, 32,000). The capital of the Federation is *Ψ Dakar* (Senegal), which had a population (1948) of about 150,000. The revenue and expenditure of French West Africa were balanced in 1951 at 17,114,000,000 *Fr.* The trade of the Federation of French West Africa in 1951 was valued at 61,336,000,000 *Fr.* for imports and 38,702,000,000 *Fr.* for exports, the principal exports being ground-nuts (almost entirely from Senegal), palm kernels, palm oil, cocoa, cabinet woods, bananas, gold and cattle. French West Africa consists of *Senegal* (77,814 sq. miles, pop. 1,999,000), capital, *St. Louis*; *Mauritania* (322,244 sq. miles, pop. 560,000); *French Guinea* (96,865 sq. miles, pop. 2,262,000); *Ivory Coast* (189,029 sq. miles, pop. 2,224,000); *Dahomey* (47,144 sq. miles, pop. 1,505,000); and the inland colonies of *French Sudan* (582,457 sq. miles, pop. 3,350,000) and the *Niger* (483,520 sq. miles, pop. 2,162,000), *Governor-General of French West Africa*, M. Bernard Cornut-Gentille (1951).

Trustee Territories.—Between Dahomey and the Gold Coast Colony lies the French sphere of the former German colony of *Togoland* (20,404 sq. miles, pop. 1,015,000); capital, *Lomé* (34,000); and between (British) *Nigeria* and the French Congo the French sphere of the former German colony of *Kamerun* (143,415 sq. miles with a population of 3,073,000). *High Commissioner of French Cameroon*, Roland Pré.

FRENCH EQUATORIAL AFRICA

French Equatorial Africa (capital, *Brazzaville*), consists of the *Gaboon* (106,181 sq. miles, pop. 409,000), capital, *Ψ Libreville* (pop. 20,000), *Ψ Port Gentil* (12,000); *Middle Congo* (160,000 sq. miles, pop. 684,000), capital, *Brazzaville* (pop. 87,000); connected by railway with *Ψ Pointe Noire* (39,000); *Ubanghi Shari* (230,000 sq. miles, pop. 1,072,000), capital, *Bangui* (pop. 67,000) and *Chad* (481,000 sq. miles, pop. 2,241,000), capital, *Fort Lamy* (pop. 23,000).

FRENCH EAST AFRICA

French East Africa consists of *French Somaliland* (9,000 sq. miles, pop. 62,000, including 2,300 Europeans). Capital, *Ψ Jibuti* (pop. 17,000). French Somaliland is separated from the *Aden Protectorate* by the Straits of *Bab el Mandeb* and occupies the coast of N.E. Africa round the Gulf of *Tajura*, extending about 80 miles inland (Ethiopia).

A railway from *Jibuti* crosses the S. boundary and runs *via* *Diredawa* to *Addis Ababa*, the capital of Ethiopia.

Governor of French East Africa, M. Numa Sadoul.

MADAGASCAR

Area, 228,000 square miles, pop. (1950) 4,369,000. *Madagascar* is 240 miles distant from the S.E. coast of Africa, and is the fifth largest island in the world. It has been a French Protectorate since 1890. In 1896 the Hova dynasty was suppressed, the administration being entrusted to a Governor-General. An insurrection was launched on March 20, 1947, by a native movement led by the Hovas. It was speedily crushed and the leaders arrested.

Agriculture and cattle raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. Trade of Madagascar in the year 1954, in millions of francs CFA, was:—

Cotton textiles...	2,744	Wheat flour...	460
Vehicles, etc. ...	2,618	Coffee	7,669
Machinery	1,685	Tobacco	1,158
Chemical products	1,556	Cloves	1,003
Metal goods	1,401	Vanilla	728
Iron bars, etc. ...	1,172	Rice	565
Wines and spirits	1,007	Clove essence...	482
Petroleum products	1,003	Raphia	417
Made-up textiles	977	Sisal	363
Electrical goods	822	Graphite	346
Cement	616	Canned meat...	306
		Butter beans...	287
		Ground nuts...	283

The capital *Tananarive* (formerly *Antananarivo*), has a population of 177,734; other towns are *Ψ Majunga* 42,080, *Ψ Tamatave* (the chief port) 40,331, *Ψ Diego Suarez*, 32,766, *Fianarantsoa*, 27,841, and *Ψ Tulcar*, 19,695. The trade of Madagascar (1953)—Imports, *Fr. CFA* 22,631,856,500; Exports, *Fr. CFA* 14,837,439,000. Trade with the United Kingdom (1955).—Imports, £556,260; Exports to U.K., £1,095,435. *Fr. High Commissioner*, M. Soucaudaux (1954).

Dependencies of Madagascar are the *Comoro Archipelago* (capital, *Zandzi*), consisting of the islands of Great Comoro, Anjouan, Mayotte and Mohilla and of certain islets, the total area being about 800 sq. miles, with a population (1950) of 169,000. In the Mozambique Channel are *Juan de Nov*, Europe Island and Bassas da India, the last being uninhabited. *La Réunion* (formerly *Île de Bourbon*), about 420 miles E. of Madagascar, has been in occupation since 1643, and has had the status of an overseas department. Area about 1,000 sq. miles, population (1950) 261,647; capital, *St. Denis* (39,000). Assigned to the administration of Réunion are the distant islands of *St. Paul* (3 sq. miles), *New Amsterdam* (27 sq. miles) and *Kerguelen* containing whaling and fishing stations (1,100 sq. miles). The *Crozet Islands* (200 sq. miles) and *Adélie Land* (see p. 722), in the Antarctic Continent are also dependencies of Réunion.

In AMERICA.—Off the south coast of Newfoundland are two small groups of islands, of which the largest are *St. Pierre* and *Miquelon*. In the West Indies is *Martinique* (capital, *Ψ Fort de France*, pop. 66,006, with *Ψ Trinité*, 39,173 and *Ψ Marlin* 31,366) and *Guadeloupe* (capital, *Ψ Pointe à Pitre*, 44,551, *Ψ Basse Terre*, pop. 13,638), with *Marie Galante* (*Ψ Grand Bourg* 12,827), *Île des Saintes*, *Petite Terre*, *St. Bartholomew*, and *St. Martin*. In South America, is *French Guiana* (capital, *Ψ Cayenne*, 12,000). Included in *French Guiana* is a group of islands (*St. Joseph*, *Île Royal*, and *Île du Diable*) known as *Îles du Salut*. On *Devil's Isle*, *Captain Dreyfus* was imprisoned from 1894–1899. The total area of French possessions in North and South America is 35,320 square miles, with a population of 588,000.

Martinique, *Guadeloupe*, *Reunion* and *French Guiana* were raised to the status of *Départements* of France, as from Jan. 1, 1947.

In OCEANIA.—New Caledonia (7,200 sq. miles, pop. 65,000, capital, *Ψ Noumea*) is a large island in the Western Pacific, 700 miles E. of Queensland, with dependencies, the *Île of Pines*, the *Wallis Archipelago*, the *Loyalty Islands* (*Mahé*, *Lifou*, *Uvée*, &c.), the *Huon Islands* and *Tutuana* and *Alofi*. New Caledonia was discovered in 1774 and annexed by France eighty years later; from 1871 to 1896 it was a convict settlement. The Society

Islands (Tahiti, Moorea, &c., capital Papeete), an archipelago in the South Pacific, have an area of about 650 sq. miles, and a population of about 63,000; the Marquesas (Nukahiva, Hiva-0a, &c.), 500 sq. miles, pop. 3,000; Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c.); the Tubuai Islands (Rurutu, Raivavae, Rimatava, &c.); Rapa Island; Makatea; and Maiao Island.

GERMANY

* Deutsches Reich (German Realm)

THE HISTORY OF GERMANY from 1863-1945 is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North Germanic Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace-Lorraine from France, the North Germanic Confederation and three South German States became the Germanic Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

At the outbreak of the War of 1914-1918, Germany was a Confederate League bearing the name German Empire (Deutsches Reich) under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 1863, including all her colonies.

GERMANY BETWEEN THE TWO WARS.—On Nov. 9, 1918, two days before Germany sued for an Armistice from the victorious Allies, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In January, 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female). The Assembly met at Weimar (Feb. 6, 1919), and elected Friedrich Ebert President of the Republic, a position he occupied until his death (Feb. 28, 1925) when Field Marshal Paul von Hindenburg was elected in his stead. Von Hindenburg was re-elected April 10, 1932, the rival candidate being Adolf Hitler, who was born at Braunau, Austria (April 20, 1889) and had migrated as a young man to Bavaria. A General Election of 1933 provided Hitler's party, the *Nationalsozialistische Deutsche Arbeiter Partei* (National Socialist German Workers' Party, or Nazis) with an absolute majority in the legislature (*Reichstag*) and Hitler became Prime Minister (Chancellor), a position which became fused with that of President at the death of von Hindenburg (Aug. 2, 1934), and Adolf Hitler exercised supreme and uncontrolled authority in the Reich.

THE WAR OF 1939-1945.—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating war with France and Great Britain, who had (March 31) given a pledge to support Poland against aggression.

* Nazi historians referred to the National Socialist régime as *Dritte Reich*. The First was the Holy Roman Empire, established in A.D. 962 by Otto I of Saxony, enduring until 1806. The Second was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871, and endured until 1918. The Third was established by Adolf Hitler in 1933.

Germany invaded and occupied Denmark (April, 1940), Norway, Belgium, the Netherlands and Luxemburg (May, 1940); France was then attacked and sued for peace in mid-June. The lightning war against Britain began on August 11, 1940, but the *Luftwaffe* attack, which was to prepare the way for invasion, was defeated. In April, 1941, Yugoslavia was invaded and Germany joined Italy in attacking Greece and Crete. On June 22, 1941, the U.S.S.R. was invaded. In 1942 the Nazi empire reached its height. The boundaries of Greater Germany included Alsace-Lorraine, Luxemburg, Eupen-Malmédy, large areas of Poland, Memelland and Slovenia; Germany and her satellites controlled all European countries except the British Isles, Spain, Portugal, Switzerland, Sweden and parts of European Russia, as well as large tracts of North Africa. The turning point came in November, 1942, with the Soviet victory at Stalingrad and the British at El Alamein. In 1943 a Soviet offensive threw the invader back almost to the Polish frontier, and the Western Allies, after defeating the Axis in North Africa, landed in Italy. In June, 1944, the Second Front opened on the Normandy beaches and by September, 1944, Germany itself was the battlefield. On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.

THE POST WAR PERIOD.—After the surrender the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R., and the rest of East Prussia and all the area lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15, 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but retained political autonomy (see Saarland). The Potsdam agreement also laid down that Germany should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount needed to support a peacetime economy and that existing capital equipment surplus to these requirements should be removed as reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945.) The agreement further dealt with denazification, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by a Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provisions in full. Quadripartite control became a

dead letter when the Russians withdrew from the Control Council in 1948.

Federal Republic of Germany

President, Dr. Theodor Heuss, elected for five years, Sept. 12, 1949, re-elected for second term of five years, July 17, 1954.

CABINET

Federal Chancellor, Dr. Konrad Adenauer (C.D.U.).
Vice-Chancellor and Minister for Economic Co-operation, Franz Blucher (F.V.P.).

Foreign Minister, Dr. Heinrich von Brentano (C.D.U.).

Economic Affairs, Prof. Ludwig Erhard (C.D.U.).

Finance, Dr. Fritz Schäffer (C.S.U.).

Defence, Theodor Blank (C.D.U.).

Interior, Dr. Gerhard Schroeder (C.D.U.).

Labour, Anton Storch (C.D.U.).

Justice, Fritz Neumayer (F.V.P.).

Housing, Dr. Viktor-Emanuel Preusker (F.V.P.).

Agriculture, Dr. Heinrich Lübke (C.D.U.).

All-German Affairs, Jakob Kaiser (C.D.U.).

Refugees, Dr. Theodor Oberländer (C.D.U.).

Transport, Dr. Hans-Christoph Seebohm (D.P.).

Posts and Telegraphs, Dr. Siegfried Balke (C.S.U.).

Affairs of the Federal Council, Dr. Hans-Joachim von Merkatz (D.P.).

Family and Youth Questions, Dr. Franz-Josef Wümmeling (C.D.U.).

Without Portfolio, Dr. Hermann Schaefer (F.V.P.); Waldemar Kraft (C.D.U.).

F.V.P. = Free People's Party; **C.D.U.** = Christian Democratic Union; **C.S.U.** = Christian Social Union; **D.P.** = German Party.

EMBASSY IN LONDON

6 Princes Gate, S.W.7

[Knightsbridge: 1271]

Ambassador Extraordinary and Plenipotentiary, His Excellency Hans von Herwarth (1955).

Area and Population.—The area of the Federal Republic is approximately 96,700 square miles with a population estimated (1953) at 49,278,000, compared with 39,300,000 in September, 1939. The increase is largely due to the influx of refugees. Distribution of the population among the Länder in December, 1953, was:—

Schleswig-Holstein	2,344,700
Hamburg	1,722,800
Lower Saxony	6,605,200
North Rhine Westphalia	14,268,900
Bremen	607,900
Hesse	4,478,000
Bavaria	9,162,000
Baden-Württemberg	6,863,200
Rhineland Palatinate	3,225,200

Western Berlin, with a population of 2,198,000, is represented in the Federal Parliament and is treated as a Land for the purposes of finance, but has no voting rights.

Population of the principal cities and towns in the Federal Republic (Dec. 1953):—

Hamburg	1,722,800	Kiel	259,500
Munich	906,500	Mannheim	272,300
Essen	660,900	Lübeck	230,100
Cologne	670,300	Brunswick	237,000
Frankfurt	601,700	Wiesbaden	240,000
Dortmund	580,800	Oberhausen	227,000
Düsseldorf	594,800	Karlsruhe	211,900
Stuttgart	566,000	Augsburg	196,600
Bremen	483,500	Krefeld	188,700
Hanover	494,500	Kassel	181,500
Duisburg	454,900	Bielefeld	168,100
Wuppertal	392,800	Mulheim on	
Nürnberg	398,700	Ruhr	161,800
Gelsenkirchen	355,300	Solingen	157,900
Bochum	326,100	Hagen	168,100

Aachen.....143,200

München.....

Gladbach...135,800

Ludwigshafen...139,100

Oldenburg...122,200

Heidelberg...122,400

Bremerhaven...124,400

Bonn.....134,600

Herne.....115,900

Freiburg.....128,800

Osnabrück.....121,490

Reckling-

hausen.....117,600

Remscheid.....113,000

Vital Statistics.—There were 15.5 live births per 1,000 inhabitants in the Federal Republic in 1953, compared with 19.8 per 1,000 for the same area in 1938. There was excess of live births over deaths in 1953 of 4.5 per 1,000 and in 1938 of 8.4.

Government.—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone was later joined by the French zone and in 1948-49 a Parliamentary Council, elected by the Diets of the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 24, 1949. It provides for a President, elected for a five-year term, and for two houses, with a four-year-term of office, the lower elected by direct universal suffrage and the upper composed of delegates of the Länder. The results of the election for the lower house (Bundestag) held on Sept. 6, 1953, were as follows:—

Party	Numbers
Christian Democratic and Christian Social Unions	244
Social Democrats	151
Free Democrats	47
Refugee Party	28
German Party	15
Independents	2
Total	487

In April, 1956, 14 Free Democrats seceded to form a new party, the Free People's Party. All these figures exclude 22 non-voting members from Berlin (6 Christian Democrats, 11 Social Democrats and 5 Free Democrats of whom 2 have also now joined the Free People's Party).

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties concerned. The High Commissioners then became Ambassadors.

Membership of International Organizations.—The Federal Republic is not a member of the United Nations, but is a member of some of the specialized agencies, such as the International Labour Office, the International Bank for Reconstruction and Development and the International Monetary Fund. She is also a member of the Organization for European Economic Cooperation, the European Payments Union, the Council of Europe and the European Coal and Steel Community. The Federal Republic became a member of the North Atlantic Treaty Organization upon gaining full sovereignty in May, 1955, and also a member of Western European Union (the expanded form of the Brussels Treaty Organization).

Economic Position.—The division of the country gave rise to serious economic problems. The main areas of surplus food production were transferred to Poland and some of the principal centres of light industry (Berlin, Thuringia and Saxony) were lost

to the Soviet zone. As the lost food could not be replaced from West German sources the Republic is therefore more dependent on food imports than was the pre-war Reich, but most of the light industries have been rebuilt in the west. With United States and British help, economic recovery became unexpectedly rapid after the currency reform of 1948. In terms of 1936 prices the Gross National Product increased by 6.9 per cent. in 1953, as compared with 1952.

Agriculture.—The total agricultural area amounts to 14,200,000 hectares, of which 8,100,000 hectares was under plough in 1952. The forest area is 7,000,000 hectares. The 1953 harvest yielded 6,638,000 tons of bread grains, 2,072,000 tons of barley and 25,500,000 tons of potatoes. The livestock population at the end of 1953 included 11,641,000 cattle, 1,270,000 horses, 1,352,000 sheep and 12,435,000 pigs.

Industry.—The highly developed and diversified secondary industries are based on the great basic coal and steel industries of the Ruhr. The monthly average index of industrial production has developed as follows (1936=100):

	1948	1953
Basic Industry.....	50.7	142.8
Investment goods.....	51.4	175.6
Consumer goods.....	53.8	155.2
Food industry.....	76.6	147.6
Electric Power.....	112.2	212.0
Building.....	88.5	175.8

All industrial production ... 63.1 158.1

Hard coal production rose from 9,700,000 tons a month in 1936 to about 10,373,000 tons in 1953; brown coal from 4,700,000 tons to 7,046,000 tons; pig iron fell from 1,048,000 tons to 971,000 tons; crude steel rose from 1,235,000 tons to 1,285,000 tons, and rolled steel from 822,000 tons to 830,000 tons. An average of 30,762 passenger cars a month were produced in 1953 (1936, 14,520), 8,004 commercial vehicles (1936, 3,558), 127,715 tons of sulphuric acid (1936, 88,166), 26,600 tons of chlorine (1936, 8,214), 28,601 tons of cotton yarn (1936, 22,983) and 8,792 tons of woollen yarn (1936, 3,942). 515,000 dwellings were completed in 1953.

Labour.—Of the average of 15,663,000 employed in 1953, 10,720,000 were men. The average number of unemployed was 1,252,000, of whom 840,000 were men. In 1953, an average of 5,751,000 were employed in industry; coal mining absorbed 565,600; metallurgy, 264,700; mechanical engineering and vehicle production, 818,700; chemicals, 316,200; and textiles and clothing, 821,000. Productivity of labour in 1953 reached 113.3 per cent. of the 1936 level.

Finance.—Under the Federal constitution the yields of indirect taxes, other than the beer tax, accrue to the Federal Government, while direct taxes accrue to the *Länder*, who are obliged to transfer part of them to the central authorities. The principal items of central government expenditure are occupation costs and social charges (refugees, pensions, unemployment relief, etc.).

In 1952 an agreement was reached for the settlement of German pre-war and post-war foreign debts. An agreement was also signed whereby the Federal Republic will pay to Israel and Jewish organizations over a period of years reparations amounting to DM3.5 milliard.

Foreign Trade.—In 1953, imports (including Western Sector of Berlin) were valued at DM16.0 milliard and exports at DM18.5 milliard. 31 per cent. of imports consisted of foodstuffs and 33 per cent. of raw materials; 15 per cent. came

from the dollar area and 71 per cent. from the European Payments Union countries. 89 per cent. of all exports were manufactured goods. The dollar area took 12 per cent. of all exports and the E.P.U. area 73 per cent. Value of imports from the U.K. amounted to £76,928,590 in 1955 and exports to the U.K. to £91,477,254.

Communications.—The railways of the Federal Republic measure 18,950 miles and the classified roads 47,038 miles. In 1953 the railways handled 247,000,000 tons of goods and the inland waterways 201,000,000 tons. Railway rolling stock included, in 1953, 10,132 steam locomotives, 463 electric locomotives, 23,000 passenger coaches and 239,500 goods waggons. On Oct. 1, 1953 there were 1,188,711 passenger cars and 561,807 lorries. Ocean-going shipping under the German flag in Dec., 1953, amounted to 2,100,000 tons gross.

Social Welfare.—There is compulsory insurance against sickness, accident, old age and unemployment. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a minimum standard of living.

Law and Justice.—Judicial authority is exercised by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the *Länder*. Judges are independent and subject only to the law. The death sentence has been abolished.

Language and Literature.—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646-1716) to Kant (1724-1804), Fichte (1762-1814), Schelling (1775-1854) and Hegel (1770-1831); the drama from Goethe (1749-1832) and Schiller (1759-1805) to Gerhart Hauptmann (1862-1946); and in poetry, Heine (1800-1856). German authors have received the Nobel Prize for Literature on five occasions—Theodore Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), and Thomas Mann (1929). There are now over 1,200 daily papers.

Education.—School attendance is compulsory for all children between the ages of 6 and 14. For the school year 1952-53 there were 28,998 elementary schools, with 127,111 teachers and 5,500,000 pupils in the Federal Republic. In addition there were 693 intermediate schools with 266,409 pupils and 8,343 teachers, 1,527 secondary schools with 684,041 pupils and 31,735 teachers, 890 *Einheitsschulen* (combined elementary and secondary schools in Hamburg, Bremen and West Berlin) with 549,685 pupils and 17,030 teachers, and 909 special schools for backward children. In the winter term of 1952-53 the 17 universities, 7 technical universities, and 41 other institutions of university status in the Federal Republic registered a total of 120,036 students. The largest universities are in Munich, Bonn, Mainz, Cologne, Münster, Hamburg, Göttingen, Frankfurt and Heidelberg.

Religion.—According to the 1950 census there were 24,400,000 Protestants in the Republic, 21,600,000 Roman Catholics and 1,500,000 others.

CAPITAL. Bonn, in North Rhine Westphalia, on the left bank of the Rhine, 15 miles distant from Cologne. Population, 134,600. Bonn is a cathedral and university town.

King of the Hellenes, Paul I, born Dec. 14, 1901; acceded (on the death of his brother King George II), April 1, 1947; married Jan. 9, 1938, Princess

Frederika, daughter of the Duke of Brunswick (born April 18, 1917), and has issue:—

- (i) Crown Prince (*Dindaoh*) H.R.H. Prince Constantine, Duke of Sparta, born June 2, 1940.
- (ii) H.R.H. Princess Sophia born Nov. 2, 1938.
- (iii) H.R.H. Princess Irene, born May 11, 1942.

CABINET

(June, 1956)

Prime Minister, Constantine Karamanlis.

Deputy Prime Minister and Minister of Agriculture, Andreas Apostolides.

Minister of Co-ordination, Demetrios Helmis.

National Defence, Aristides Protopapadakis.

Foreign Affairs, Evangelos Averof Tositas.

Justice, Constantine Papaconstantinou.

Interior, Demetrios Makris.

Education, Petros Levantis.

Finance, Christos Thivaos.

Commerce and Industry, Panayotis Papaligouras.

Public Works and Communications, George Rallis.

Social Welfare, Mme. Lina Tsaldaris.

Merchant Shipping, Stelios Kotiades.

Labour, Leonidas Bournias.

Minister to the Prime Minister, Constantine Tsatsos.

Northern Greece, Vasileios Paparrigopoulos.

Without Portfolio, Gregorios Kasimatis.

ROYAL GREEK EMBASSY IN LONDON

51 Upper Brook Street, W.1

[Mayfair: 0694]

Ambassador Extraordinary and Plenipotentiary, His Excellency Monsieur Vassilios Mostras (1953).

Counsellors, J. Phrantzes; G. Bensis.

1st Secretary, J. Cambiotis.

2nd Secretary, M. Mouzas.

3rd Secretary, D. Frantzeskakis.

Naval, Military and Air Attaché, Captain E. Dimotakis.

Commercial Counsellor, N. Pierrakos.

Hon. Cultural Counsellor, P. Argenti.

Hon. Attaché, S. X. Constantinidi.

Consulate General and Department of Information, 3 Hyde Park Square, W.2.

There is a Consulate at Cardiff and Honorary Consulates at Birmingham, Bradford, Bristol, Dover, Falmouth, Hull, Immingham, Liverpool, Middlesbrough, Milford Haven, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton and Yarmouth, Swansea, Glasgow and Leith, and at Belfast.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Libyan and Ionian seas, and on the E. by Turkey, with an estimated area of 51,180 sq. miles. A census was held throughout the country on April 7, 1951, which estimated the population at approximately 7,600,000, including the population of the Dodecanese (126,000).

The area of the mainland is 41,328 sq. miles, and of the islands 9,854 sq. miles. The main divisions are: Macedonia (which includes Mt. Athos), Thrace, Epirus, Thessaly, Continental Greece (which includes the island of Euboea and the Sporades, or "scattered islands," of which the largest is Skyros), the Peloponnese (or Morea), the Dodecanese or Southern Sporades (12 islands occupied by Italy in 1911 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Simi, Khaiki and Kastellorizo, the Cyclades (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the Ionian Islands (Cephalonia, Corfu, Lefkas, Ithaki, and Zante),

the Aegean Islands (Chios, Lesbos and Samos). In Crete there was for over 1,000 years (3000 to 1400 B.C.) a flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Cnossos afford evidence of astonishing comfort and luxury. Greek civilization emerges about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the 10-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194-1184 B.C.).

Government.—The Independence of Greece dates from March 25, 1821 and was ratified by the Treaty of Adrianople (Sept. 12, 1829) and the Convention of London (Feb. 2, 1830), after a successful insurrection against the Ottoman Empire, to which the country had been subjected since the 15th century. After a succession of rulers of the Wittelsbach (Bavarian) and Glucksburg (Danish) dynasties the Kingdom was declared a Republic by the Constituent Assembly on March 25, 1924. On Oct. 11, 1935, it was again declared a Kingdom, and a plebiscite held on Sunday, Nov. 3, 1935, caused the return to the Throne of King George II. On October 28, 1940, Italy declared war on Greece and invaded the country from Albania, but within a month Greek troops, assisted at sea and in the air by Great Britain, expelled the invader and advanced in triumph into Albania. On April 6, 1941, Germany invaded Yugoslavia and Greece and came to the aid of the defeated Italian forces. British and Commonwealth ground forces were sent to the assistance of Greece, but the fresh onslaught led to her occupation by German, Italian and Bulgarian troops. By her own exertions and by Allied help Greece was freed in October, 1944.

There followed in December-January, 1944-5 a short period of civil war in which the Communists attempted to seize power by force. After a plebiscite held on Sept. 1, 1946, King George II was recalled. In 1947, Communist guerrilla disturbances assumed the proportions of civil war, which continued with increasing damage and destruction to the country until the summer of 1949 when the Greek Army's victories overwhelmed the guerrillas. Normal conditions were sufficiently restored throughout the country to enable a general election to be held on March 5, 1950. Since then, with the help of the Foreign Operations Administration (formerly E.C.A.), Greece has been tackling the formidable task of rehabilitation and reconstruction after ten troubled years; and has made steady, if slow, progress, despite political instability, and the diversion of public attention away from Greece's more urgent problems by the fomenting of the Cyprus issue, which has led to a sharp deterioration in relations with the United Kingdom. The period of firm government given to Greece by the Rally Government formed in 1952 by Field Marshal Papagos came to an end with his decline and death in October 1955. He was succeeded by the interim Government of M. Karamanlis, which was confirmed in office by the General Election of February 1956, at which his party (the National Radical Union) secured 165 seats in the Chamber out of a total of 300, the principal Opposition parties being the Liberal Democratic Union (41), the Liberal Party (26), the Democratic Party (20) and the United Democratic Left (18); there are also a number of smaller groups.

Defence.—The Navy has 80 ships, about half of which are on loan from Britain. The strength of the Army is 100,000. The Air Force consists of 15,000 men, twelve squadrons of fighter bombers, of which six are training squadrons, and two transport squadrons. In April, 1952, the British Military Mission and R.A.F. delegation left after

seven years' service in Greece. The British Naval Mission left in December, 1955.

Production.—Agriculture is the principal industry and employs more than half the population, the most important product being tobacco, which accounts for nearly half the value of total exports of Greece. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. Currants were originally grown round Corinth and were known as *raisins de Corauntz*, anglicized as currants. In the past seven years the production of cotton, rice and wheat has been greatly increased, mainly in an attempt to replace tobacco. The principal minerals mined are iron ore, iron pyrites, manganese, magnesite, chrome, bauxite, lead, zinc and emery. The chief manufactures are textiles (cotton, woollen, silk and rayon), chemicals, cement, glass, footwear and carpets. There are also metallurgical and ship-repairing industries. Many large projects are at present being carried out at the instigation of the American I.C.A. Mission. These are an electric power system covering most of the country, irrigation and land reclamation, the decentralization of industry and the development of lignite mining and its use for fuel.

Communications.—The 2,650 miles of Greek railways were all restored by the end of 1950, in spite of delays due to the activities of guerilla bands. All are now owned by the Greek State, with the exception of the Athens-Piraeus Electric Railway. The railway from Athens into the Peloponnese is metre gauge. Athens is linked with Istanbul, Paris (*via* Belgrade, Trieste, and Lausanne), Ostend (*via* Belgrade, Salzburg, Cologne and Brussels) and Vienna by direct sleeping-car services. Greek roads total 28,478 km. Of these, 14,033 km. are classified as National Highways, while 3,584 km. are asphalt and 13,615 km. oil-coated, macadam or gravel. In January 1955, Greek ships of more than 500 tons totalled 309 (1,242,075 tons) and Greek owned ships under foreign flags totalled 1,293 (8,923,562 tons). The Greek national air-line, T.A.E., flies various internal services, and it and other air-lines connect Athens directly with Rome, Belgrade, Istanbul, Smyrna, Nicosia, Beirut, Lydda, Cairo and points beyond.

Religion.—Over 96 per cent. of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Greek church recognizes the spiritual primacy of the Ecumenical Patriarch at Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece.

Education is free and compulsory from the age of 6 to 12 and is maintained by State grants. There are two Universities, Athens and Salonica, that of Athens being of wide repute.

Language and Literature.—The spoken language of modern Greece is descended by a process of natural development from the "Common Greek" of Alexander's empire. Official and technical matter is mostly composed in *Katharevusa*, a conservative literary dialect evolved by Adamantios Korais (Diamant Koray), who lived and died in Paris (1748-1833), but novels and poetry are mostly composed in *dimotiki*, a progressive literary dialect which owes much to John Psycharis (1854-1929). The poets Solomos, Palamas and Cavafis have won a European reputation.

CURRENCY

The Greek *drachma* has an official exchange rate of 84=£1 sterling and 30=U.S. \$1.

BRITISH COUNCIL

Representative, R. P. Hinks, 17 Philikis Etairias, Athens

GUATEMALA

(República de Guatemala)

PRESIDENT

Colonel Carlos Castillo Armas, assumed office Sept. 1, 1954.

LEGATION IN LONDON

30 Collingham Gardens, S.W.5

[Fremantle: 7463]

Envoy Extraordinary and Minister Plenipotentiary in London, Señor Don Delfino Sánchez-Latour (1956).

There is a Consulate-General at Liverpool and Consuls at Glasgow and Belfast.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. long from 88° 12' 49' to 92° 13' 43', and comprises an area of

42,042 square miles, and a population (at the census of 1950) of 2,788,122. There is a single chamber legislative assembly of 68 members and a cabinet of 10 of whom 9 are Ministers of State. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec., 1917. The country is well watered by numerous rivers; the climate is hot and malarious near the coast, temperate in the higher regions. The rainfall in the capital is 57 in. per annum. The chief Ψ seaports are San José de Guatemala and Champerico on the Pacific and Livingston, Santo Tomás and Puerto Barrios on the Atlantic side.

Language and Literature.—Spanish is the language of the country, and since the establishment of the University in the capital education has received a marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in the Spanish tongue.

HAITI

(République d'Haiti)

President, Gen. Paul Eugene Magloire, born 1907; assumed office, Dec. 6, 1950.

Foreign Affairs, M. Joseph D. Charles.

EMBASSY IN LONDON

11 Bruton Street, W.1

Ambassador in London, H. E. Monsieur Joseph L. Dèjean (1954).

Secretary, M. Remy Bastien.

Attaché, Mrs. P. E. St. Lot.

The Republic of Haiti occupies the western third of the island of Santo Domingo, formerly known as Hispaniola, which, next to Cuba, is the largest island in the West Indies.

The area of the Republic is estimated at 10,500 sq. miles with a population (1950 census) of 3,111,973, negroes being in the great majority. There are, however, many mulattoes and others with varying admixture of white blood, especially in the towns. About 1,000 British subjects, chiefly of British West Indian origin, reside in Haiti.

A French colony under the name of Saint-Dominique from 1697, the slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in 1802 and died in captivity in 1803. Resistance was continued by Jean Jacques Dessalines, also a former black slave, who, on January 1, 1803, declared the former French colony to be an independent state. It was at this time that the name of Haiti was adopted. It is an aboriginal Indian word meaning mountainous. Dessalines became Emperor of Haiti, but was assassinated in 1806. Political chaos with a succession of tyrannies and republics continued until U.S.A. intervened in 1915, when a treaty was signed whereby certain public services were to be controlled by U.S. officials. On Oct. 1, 1931, the U.S. officials in charge of Public Health, Public Works, and the Agricultural Technical Service, were withdrawn. The last U.S. troops left Haiti on Aug. 15, 1934. U.S. control of the revenue of Haiti officially ended on October 1, 1947.

The present constitution (November, 1950) provides for a Senate of 22 members and a Chamber of Deputies of 37 members. The President is elected by popular franchise for a term of six years, and is not immediately re-eligible. Women are at present restricted to voting in municipal elections, but the constitution contemplates the extension to them of full political rights in the near future.

Production, Industry, etc.—In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion. In recent years measures for agricultural rehabilitation have been taken with the aim of a gradual restoration of the productiveness of the country. The main project now approaching completion is a scheme for the irrigation of more than 70,000 acres of the Artibonite valley for which the Import-Export Bank has approved a loan of \$27,000,000. The principal products are coffee, bananas, logwood, cocoa, cotton, sisal, sugar and molasses and essential oils. Coffee accounts for about two-thirds of total exports and is the mainstay of the country's economy. Exports of bauxite will begin in 1957 and copper mines in the Terre Neuve area will be brought into production in the near future. Lignite is known to exist in commercial quantities and a contract has been signed with a Haitian/Canadian company for its exploitation. Exploration is going on in the country for the above mentioned minerals and also for manganese, oil and iron. Gold, silver and tin exist, but not in significant quantities. Manufactures have increased during the last five years. The tourist trade is expanding rapidly and is now an important source of income.

Communications.—Under the Government's five year rehabilitation plan the highways of Haiti are slowly being asphalted and renewed. Until this programme was started there were very few good roads and internal communications were very bad. A loan of \$2,600,000 has been obtained from the International Bank for Reconstruction and Development to finance an improved road maintenance

and repair organization. Railway communications are negligible, the only passenger route being from Port-au-Prince to Verrettes via St. Marc. Air services between the capital and the principal provincial towns are maintained by the Aviation Corps of the Haitian Army, which operates a civil incorporated company. The principal towns and villages are connected by telephone and/or telegraph. The complete telephone, telegraph and internal radio communications system is now being renewed by a United Kingdom firm; the work will take about 3 years.

Air services by Pan-American World Airways and other air lines are regular and frequent, and there are weekly sailings for passengers and freight for New York and Panama by the Panama Line. Freight sailings are frequent for the U.S.A., Canada and Europe. Sailings between Haiti and Jamaica are infrequent. External telegraph, telephone and postal services are normal. (Air mail transit U.K./Port-au-Prince 3-4 days.)

Climate.—The climate is tropical with comparatively little difference in the temperatures between the summer (March–Oct.) and the winter (Nov.–Feb.). The temperature at Port-au-Prince rarely exceeds 95° F., but the humidity is high, especially in the autumn.

Language and Literature.—French is the official language of the country, but most of the people speak a debased dialect known as Creole French. Education is free but estimates of illiteracy are as high as 95 per cent. In 1954 there were 6 principal French daily newspapers published at Port-au-Prince and 1 English weekly.

BRITISH EMBASSY (Port-au-Prince)

Ambassador Extraordinary and Plenipotentiary and Consul-General. His Excellency Sidney Simmonds, O.B.E. (1955)

(plus allowances) £1,500 to £2,000

1st Secretary (Labour). H. R. Atkin (resident in Mexico City).

2nd Secretary and Vice-Consul. G. Davies.

Air Attaché. Wing-Cdr. C. V. Beadon (resident in Caracas).

Junior Attaché (Commercial). J. McC. O. Robertson.

HONDURAS

(Republica de Honduras)

Supreme Chief of State. P. M. Julio Lozano Diaz (1955).

HONDUREAN LEGATION IN LONDON

15 Mount Street, W.1

[Grosvenor: 6153]

Chargé d'Affaires. Dr. Carlos Roberto Reina.

Consulate-General in London. 15 Union Court, E.C.2.

Vice-Consul (in charge). Herbert C. Cock.

There are Consulates General in Liverpool and Manchester, and Consular Offices at Birmingham, Newcastle and Glasgow.

Honduras, one of the five Republican States of Central America, lies between lat. 13° and 16° 30' N. and long. 83° and 89° 41' west, with a seaboard of about 400 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast 77 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador. The Republic contains a total area of approximately 44,482 square miles and a population of 1,505,465 (1950 census revised) of mixed Spanish and Indian blood. There is a strong foreign negro (British West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras, but possesses well watered fertile valleys and wooded tablelands. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century, Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

Under the revised Constitution of 1936, the Legislature consists of a single Chamber Assembly of 56 members elected by popular vote in the ratio of one deputy per 25,000 inhabitants. The executive authority is vested in the Supreme Chief of State who is assisted by a Council of nine Ministers. The Republic is divided into 17 departments and one territory, La Mosquitia, which is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, coconuts, tobacco, beans, maize, rice and tropical fruits. Cattle raising is becoming an increasingly important industry, a large number of cattle being exported to the neighbouring countries every year. Honduras is also a timber producing country, the most important woods being pine, mahogany and cedar. There are large tracts of uncultivated land.

The mineral resources of the country are reputed to be considerable, but production of gold and lead has declined in the past year or two as the accessible deposits are being worked out. In the year ending June 30, 1954, production of gold was 49,516 oz. troy and of silver 5,807,028 oz. troy. The principal mines are American owned.

831 miles of railway were in operation in the year 1954, chiefly to serve the banana plantations and the Caribbean ports. The total road mileage is approximately 1,570, the greater part of which is in poor condition, but improvements are now being made and new roads built. There are 15 airports in use in Honduras, exclusive of numerous small landing and emergency fields. There are three international air services (TACA Internacional, PAA and TAN) and two domestic air services

(SAHSA and ANHSA). There are 2,979 miles of telephone lines 4,981 miles of telegraph lines and 369 post-offices.

Ψ The chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated on Tiger Island in the Gulf of Fonseca, on the Pacific side.

Language and Literature.—The language of the country is Spanish. Primary and secondary education is free and compulsory and, although there is still a great deal of illiteracy, it is gradually diminishing. There is no recognized native literature.

FINANCE		1955-56

Education, Albert Konya.

Towns and Village Communities, Janos Szabo.

State Control, Arpad Hazi.

First Secretary of Hungarian Workers' Party, Ernő Gerő.

LEGATION IN LONDON

(35 Eaton Place, S.W.1)

[Sloane: 4048]

Minister in London, Janos Katona (1953).

Consulate, 46 Eaton Place, S.W.1 (Sloane: 4462).

Area and Population.—The area of Hungary may be stated at approximately 36,000 sq. miles with a population (Dec. 1954) of over 9,750,000.

Government.—By unanimous vote of the National Assembly, Hungary was re-constituted a Kingdom in 1920, after having been declared a Republic on Nov. 17, 1918. Hungary joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the War of 1939-45 on the side of Germany. In December, 1944, a Provisional Government of Liberation was set up in Debrecen under the leadership of General Bela Miklós. On Jan. 20, 1945, the Government was dissolved, and the frontiers of Hungary were withdrawn to the limits existing in 1937.

The first four years of the Republic saw fundamental changes in the social structure. Under a Land Reform Act (March 15, 1945) all the former class of great landowners were dispossessed and the land was distributed among the peasants in small holdings with a maximum area of 1,422 acres. In 1946 the mines and heavy industry were nationalized and were followed in December, 1947, by the banks, and in 1948 by practically the whole of industry and by the schools. Towards the end of 1948 the Government began a campaign to liquidate the "Kulaks" with a view to forcing the peasantry into co-operatives and ultimately establishing collective agriculture. In 1949 practically all the industries previously unaffected were nationalised. In May, 1949, the Democratic People's Party was dissolved, and a new election held in which no opposition was allowed to participate. The People's Front obtained 95.6 per cent. of the votes, and in June an overwhelmingly Communist Government was appointed. A decree of February 18, 1952, nationalizing much house property, almost completed the socialization of the entire economy. On May 17, 1953, general elections were held. As in 1949 only a single list of candidates was put forward. From mid-1953 to April, 1955, Mr. Imre Nagy was Prime Minister and introduced a more moderate policy based largely on the development of agriculture rather than of heavy industry as in the previous "Stalinist" period. But in the next fifteen months Mr. Rakosi, who had retained the key post of Party Secretary, was in control again, with Mr. Hegedüs as his Prime Minister. Mr. Rakosi's fall on July 18, 1956, was followed by many party and government changes.

Production, Industry, etc.—The greater part of the area of Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the

world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The 1955 crop of breadgrains, according to official announcements, reached 2,680,000 tons as against 23,000,000 the previous year; maize also increased from 2,630,000 to 2,920,000 tons (official estimate) but potatoes and sugar beet declined from 2,260,000 and 2,300,000 to 2,080,000 and 2,220,000 tons respectively. Rice yields suffered a setback. In the mountainous districts there are rich deposits of coal and bauxite and the latter supply an expanding aluminium industry. Oil wells situated mainly in Western Hungary feed local refineries whose products are sold at home and abroad. Crude oil is also exported. A Three Year Plan launched in 1947 was succeeded in 1950 by a Five Year Plan with the objective of transforming Hungary into a predominantly industrial country with a well-developed but subsidiary agriculture. Targets under the plan were substantially raised in 1951, but in July, 1953, the Government admitted that this Plan had been over-ambitious and the pace of industrialization was reduced in favour of the development of agriculture and production of consumer goods. In May, 1954, it was announced that the Second Five Year Plan would not start until 1956 to permit its co-ordination with the plans of the other Communist countries and that it would continue the policy inaugurated in July, 1953. The draft principles of the Second Five Year Plan were published only in April, 1956, and had not been finally approved by the end of July. While still stressing the importance of heavy industry, the draft placed less emphasis on iron and steel and more on the development of the chemical industry (including synthetic materials), power production and specialized types of engineering. Production figures for 1955 revealed in the draft plan and elsewhere included: crude oil 1,600,000 tons, coal 22,300,000 tons, steel 1,600,000 tons, rolled steel 883,000 tons, bauxite 1,290,000 tons, alumina 154,800 tons, aluminium 37,000 tons, electricity 5,400,000,000 kwh.

No part of Hungary touches the sea. The length of navigable rivers is 687 miles, and the Republic possesses important fishery preserves in the Danube in addition to those in Lake Balaton.

Religion and Education.—About two-thirds of the Magyars are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—infant schools 3-6, general schools 6-14 (compulsory), vocational schools (15-18), secondary schools (15-18), universities and adult training schools (over 18). It is estimated that there were approximately 50,000 university students in 1954.

Language and Literature.—Magyar, or Hungarian, is one of the Finno-Ugrian languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteenth and twentieth centuries are Mihály Vörösmarty (1800-1855), Sándor Petőfi (1823-1849), János Arany (1817-1882), Andrei Ady (1877-1919) and József Attila (1905-1937). The teaching of Russian is compulsory in schools for children from the ages of 13 to 18 years. 5 daily newspapers are published in Budapest. The provincial newspapers are, for the most part, echoes of the Budapest party papers.

FINANCE

Revenue.....	1955 Forints 43,358,000,000
Expenditure.....	42,171,000,000

The Pengo (of 100 Filler) was superseded in August, 1946, by a new currency, the Forint (of 100 Filler). The exchange value (June, 1954) was

32-87 Forints = £1. A tourist rate of Forints 64-80 = £1 was introduced in July, 1956.

Minister Plenipotentiary, His Excellency Leslie Arthur Charles Fry, C.M.G., O.B.E. (1955) £3,000

1st Secretary, C. L. S. Cope.

3rd Secretary, R. M. Russell.

Consul, Miss J. H. Fish.

Military Attaché, Col. J. N. Cowley.

Air Attaché, Group Capt. W. D. David, D.F.C., A.F.C.

Budapest is distant 1,126 miles from London, transit by rail 45-48 hours.

ICELAND

(Island)

President (Aug. 1, 1954 to July 31, 1956), Asgeir Asgeirsson.

Prime Minister (July 24, 1956), Hermann Jonasson.

Foreign Affairs, Guðmundur I. Guðmundsson.

LEGATION IN LONDON

17 Buckingham Gate, S.W.2

[Victoria: 5337]

Minister Plenipotentiary in London, His Excellency Agnar Klemens Jónsson (1951).

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 1° 22' to 24° 35' W. long., with an estimated area of 40,500 square miles, or greater than that of Ireland. The population was 159,302 in 1955.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but, since the constitution granted in 1904, the assembly (*Althing*) had been more or less independent of the Government at Copenhagen in internal questions. On the German invasion of Denmark in April, 1940, the Icelandic Government was temporarily invested with the royal power by a resolution of the *Althing*.

On May 23, 1944, by plebiscite, the Act of Union of Dec. 1, 1918, was repealed and a new constitution adopted under which a republican form of government was instituted. The new constitution was proclaimed on June 17, 1944, at Thingvellir, where the *Althing* was founded in 930 A.D. The membership of the *Althing* was maintained at a maximum of 52, of whom 14 are elected to form the Upper House.

The principal products of the island are fish, fish oils, mutton, wool and ponies. The principal exports are fish, herring oil, fish meal and sheepskins; the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, coal, oil and petrol, cotton goods, tobacco, spirits, hardware, and timber.

The mercantile marine consisted (1955) of 686 steam and motor vessels (including 118 motor vessels of under 12 tons each) of 97,975 gross tons (motor vessels 633 of 67,884 tons, steam 53 of 30,091 tons). 641 of the total number are fishing vessels. Iceland is in direct telegraphic communication with Great Britain.

A regular weekly air service is maintained between Renfrew and London and Reykjavik (about 5 hour journey). There are also air services from the island to Scandinavia and U.S.A. On June 26, 1948, the Final Act of the International Civil Aviation Organization conference was signed, pledging States concerned with North Atlantic air travel to share the cost of providing and maintaining equipment and facilities in Iceland essential to safety on that route.

Language and Literature.—The ancient Norraena (or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

FINANCE		1954
Revenue	Krónur	551,117,000
Expenditure	"	452,577,000
External Debt	"	214,006,000

Secretary, Labour Affairs, A. M. Siregar.

Situated between latitudes 6° North and 11° South and between longitudes 95° and 141° East, Indonesia comprises the islands of Java and Madura, the island of Sumatra, the Riouw-Lingga Archipelago (which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Riouw"), the islands of Bangka and Billiton, part of the island of Borneo, Celebes Island, the Mohucca Islands (Ternate, Halmahera, Buru, Ceram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), part of Timor Island, and the islands of Bali and Lombok, with a total area of 735,000 miles, and a population estimated at 80,000,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War, 1939-45, a strong nationalistic movement manifested itself and sporadic fighting between Netherlands and Indonesians occurred throughout the Netherlands' Colonies, the position being complicated by the presence of Japanese forces. British and Indian troops were landed in Java and Sumatra to assist in restoring order and suffered many casualties. The protracted failure to reach a political settlement led to military action by the Netherlands' government against the Indonesian Republic and on two occasions, in July, 1947 and December, 1948, the Security Council of the United Nations entered the dispute and set up a Good Offices Committee to assist in reaching a settlement. In the Netherlands a Bill providing for the transfer of sovereignty to Indonesia and ratification of the agreements reached at a Round Table Conference at The Hague was passed on December 21, 1949. Formal transfer of sovereignty by the Netherlands took place on December 27, 1949. A provisional federal constitution was adopted and the country named the United States of Indonesia. Union with the Netherlands was ended on Aug. 20, 1954, although the agreement was never ratified by the Indonesian Parliament.

On August 15, 1950, a new provisional constitution was proclaimed. The country, under the name of the Republic of Indonesia, is divided

into ten provinces: West Java, Central Java, East Java, North Sumatra, Central Sumatra, South Sumatra, Borneo, Célèbes, Lesser Sunda Isles and the Moluccas. Each province is constitutionally guaranteed broad regional autonomy. The first General Election for the House of Representatives was concluded on November 30, 1955, and the results were officially announced on March 1, 1956. A coalition government was formed by the three principal non-Communist parties which commands 189 seats in the House out of a total of 260. One of the first acts of the new Government was to pass a law unilaterally abrogating all previous treaties and agreements with the Netherlands governing relations between the two countries.

Elections have also taken place for membership of the Constituent Assembly which must draft a new Constitution.

Finance.—The Indonesian Government announced on August 5, 1956, that Indonesia no longer recognized, and refused to pay any debts to the Netherlands. The statement gave the net debt to the Netherlands as 3,661,000,000 guilders (approximately £349,000,000).

Production.—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg and cinnamon are produced mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estate companies. Rubber, tea, coffee and tobacco are also produced in quantity. Rice is a traditional staple food for the people of Indonesia and the islands of Java and Madura are important producers.

Indonesia is rich in minerals; petroleum, tin, coal and bauxite are the principal products; gold, silver, manganese phosphates, nickel and sulphur were produced in quantity before the Second World War and there are considerable deposits.

Trade.—Commodities valued at £11,290,831 were sold to the United Kingdom in 1955, the principal items being rubber, tea, petroleum and sugar. The value of exports from the United Kingdom in 1955, mainly of machinery, electrical equipment, aircraft, cars, cycles, and other vehicles, chemical and pharmaceutical goods, woven and piece goods and sewing thread, was £11,238,058. On February 4, 1953, the value of the Indonesian rupiah was fixed at 31.74 = £1 sterling.

Transport.—Work is now in progress on the reconstruction and equipment of railways which were operated successfully in Java and Sumatra before the war. In Java a main line connects Djakarta with Surabaya in the East of Java and there are several branches, including an inland line from Semarang on the North coast to Djogjakarta in the South. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago have been maintained for many years by a Dutch shipping line and a Government Shipping Board assisted the establishment of a number of shipping companies which now operate services among the islands. Transport by small craft on the rivers of the larger islands plays an important part in the export trade. Air services in Indonesia are operated by Garuda Indonesian Airways and the country is served by various international services, including those of B.O.A.C. There are approximately 46,500 miles of roads in Indonesia.

CAPITAL: Batavia (Java) was renamed Djakarta and is the capital of the Republic of Indonesia. Other important centres are: (Java) Surabaya, Semarang, Bandung, Tjiribon, Surakarta and

Djogjakarta; (Madura) Pamekasan (15,000); (Sumatra) Palembang (50,000), Medan (80,000) and Padang; (Célèbes) Macassar (20,000) and Menado; (Borneo) Banjarmasin, Balikpapan and Pontianak; (Moluccas) Ternate (9,000); (Bali) Singaradja (9,500); (W. Timor) Kupang (10,000).

FLAG: Red and white. **LANGUAGE:** The official language of Indonesia is the Indonesian Language (Bahasa Indonesia). **NATIONAL ANTHEM:** *Indonesia Raya*. August 17 is celebrated as INDEPENDENCE DAY in Indonesia.

Asst. Cultural Attaché, Dr. J. M. El-Wahabi.

Area. etc.—Lying between the Rivers Euphrates and Tigris, Iraq extends from Turkey on N. and N.E. to the Persian Gulf on the S. and S.E., and from Iran on E. to Syria and the Arabian Desert on W., the approximate position being between 37° to 48° E. long., and from 37° to 30° N. lat.

The total area of Iraq is about 172,000 sq. miles, the distance from Basrah in the south to Mosul in the north being approximately 500 miles.

Population (1947 census):—

Liwa	Males	Females	Totals
Bagdad.....	401,904	403,389	805,293
Hillah.....	125,998	135,905	261,903
Diylalah.....	134,282	139,054	273,336
Diwanayah....	163,129	220,058	383,787
Dulaim.....	96,708	96,586	193,294
Kerbalah.....	133,346	143,324	276,670
Kut.....	104,715	120,077	224,792
Basrah.....	172,583	179,456	352,039
Amarah.....	139,987	168,121	308,108
Muntafik.....	149,596	220,210	369,806
Mosul.....	290,597	310,992	601,589
Arbil.....	108,252	132,021	240,273
Kirkuk.....	132,079	153,799	285,878
Sulaimani....	99,994	122,738	222,732
Total.....	2,253,170	2,546,330	4,799,500

The *Liwa* is the present Iraqi unit of administration, the *vilayet* being the former Ottoman unit.

Of the total population there were in 1935 Moslems 3,136,632 (five-thirteenths being Sunni and eight-thirteenths Shiite), Christians 201,375, Jews 90,970, and other religions, 41,134 (Mandaeans, Yazidis, Bahais, &c.). Almost the entire Jewish population has now emigrated to Israel.

The *Euphrates* (which has a total length of 1,700 miles from its source, to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dag, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles) the latter rising in the north-west of Erzerum in the Dumlu Dag. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, of Diarbekir, Van and Bitlis conjoin.

Government.—Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal (3rd son of ex-King Hussein of the Hejaz) was elected King of Iraq. The constitution is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Chamber of Deputies of 143 members elected by manhood suffrage, and a Senate of not more than a quarter of the total number of Deputies; the Senators are appointed by the King. Under the decision of a Commission of Judges and Senators the heir apparent must be a male, and in the absence of a male the nation will select a successor.

Production and Industry.—Iraq is capable of supporting a considerably greater population if irrigation is developed and extended. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley, beans, rice, dates and Indian corn; wheat averages 464 lb. per acre, barley 612 lb., and rice over 370 lb. Cotton growing is successful in some years. Tobacco from the northern *liwas* is sufficient for the needs of the country. The Iraq Petroleum Company's crude oil production for 1950-55 was:—

	Long Tons		Long Tons
1950.....	6,161,000	1953.....	27,220,000
1951.....	8,114,000	1954.....	29,566,747
1952.....	18,067,000	1955.....	32,726,660

Few industries are yet established on any scale but an increasing industrialization is taking place under both private enterprise and Government

action. Existing industries include cement, building materials, flour milling, cigarettes, soap, beer, steel furniture, tanning and textiles.

Communications and Trade.—The country is being rapidly opened up and communications improved and secured, particularly in the hitherto inaccessible northern districts. The expenditure of 70 per cent. of all oil royalties received (a minimum of £25,000,000 oil royalties per annum is guaranteed, but the Iraq Government is at present receiving about £70,000,000 per annum) is directed by a Development Board set up in 1950, with six Iraqi members, one British and one American. A new programme of public works is under way, including flood control, dams and irrigation, roads and bridges, housing, schools and hospitals and the establishment of local industries. The port of Basrah is well equipped and able to handle expeditiously all sea-borne trade. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 2½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. A new channel across the Fao Bar has recently been dredged. The desert route between Bagdad and the Mediterranean carries an increasing amount of traffic, though most goods reaching Iraq are still sent *via* Basrah. Exceptional floods in the spring of 1954 caused serious damage in Central Iraq and interruptions to communications.

Airports for the use of international air traffic have been provided at Bagdad and Basrah (Maqil). The latter serves as a terminus for air traffic originating in the oil fields of the Persian Gulf, and is used as a staging post by the main international airlines operating between Europe and the Far East. In addition to frequent services through Basrah, BOAC provides a service five times a week between London and Bagdad, which is also served by Iraqi Airways and airlines of Egypt, Iran, the Lebanon, Jordan, France, the Netherlands, Scandinavia and Italy. Iraqi Airways, run as a Department of Iraqi State Railways with BOAC technical advice, operates a daily service to Basrah and the Persian Gulf and services from Bagdad to Mosul, Beirut, Cairo, Damascus and Teheran.

Iraqi State Railways provide a regular passenger and goods service between Bagdad and Basrah by the metre gauge line completed in 1920, which also extends northwards to Khanaqin, Kirkuk and Erbil. The railway line from Bagdad to Mosul, linking up through Syria and Turkey with the Mediterranean and the Bosphorus, is standard gauge.

Language, Literature and Archaeology.—The language is mainly Arabic (see Arabia) and English is widely used in commerce, science and the arts.

There is evidence that an advanced civilization had been reached in the alluvial valley of the Euphrates while Europe was in a state of barbarism. Astronomy, geometry, engineering and land surveying were cultivated by the Sumerians of Mesopotamia, and various arts reached a point of perfection by 3000 B.C., as investigations at Ur of the Chaldees have shown. Sumerian culture spread from Mesopotamia to Crete and Egypt and to Greece. In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C.

Excavations in 1946 at Ici Abu Shahran, 24 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world.

Hillah, the ancient city on the left bank of the Shatt el Hillah, a branch of the Euphrates, about 70 miles south of Bagdad, is near the site of Babylon and of the "house of the lofty-head" or "gate of the god" (Tower of Babel).

Mosul *Lava* covers a great part of the ancient kingdom of Assyria, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul.

Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the Garden of Eden. The "Tree of Knowledge," which had stood there "from time immemorial," withered and died in December, 1946.

FINANCE 1954-55

Total revenue	ID48,512,000
Total expenditure	57,609,370

The Iraqi Dinar of 1,000 Fils = £1 sterling.

TRADE
(Excluding oil)

	1953	1954
Total imports	ID68,688,000	ID74,137,000
Total exports	19,069,000	17,975,853

Imports from U.K., 1955, £26,532,885. Exports to U.K., £32,538,122.

The principal imports are iron and steel, mechanical and electrical machinery, motor cars, cotton and rayon piecegoods, sugar and tea; and the chief exports are crude petroleum, cereals, dates, raw wool, hides, live animals and raw cotton.

CAPITAL.—The chief city is Baghdad, the former capital of the Abbasid dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has a population of 552,047; of the other towns Mosul has a population of 340,541 and ψ Basrah, 206,302.

BRITISH EMBASSY

(Saleh Al Din Street, Karkh, Baghdad)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Michael Robert Wright, K.C.M.G. (1955).

Counsellor, R. W. J. Hooper, C.M.G., D.S.O., D.F.C. Counsellor (Commercial), W. J. M. Paterson.

Counsellor (Oriental), R. A. Beaumont, C.M.G., O.B.E.

H.M. Consul, E. P. Wiltshire.

1st Secretaries, A. R. H. Kellas; G. J. Tarr; P. Wilkinson (Commercial); S. H. Dearden, M.B.E. (Information).

2nd Secretaries, H. W. S. Cornish; R. R. G. B. Smedley (Vice-Consul); J. R. C. McGlashan; R. S. Glover (Information), E. A. Pearson (Oriental); C. C. Smellie (Oriental).

3rd Secretaries, P. Moberly (Commercial); T. C. Barker.

Military Attaché, Brig. N. F. B. Shaw, D.S.O., O.B.E.

Assistant Military Attaché, Major R. G. Lawson. Chaplain, The Ven. C. V. Roberts.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Baghdad, Basrah, Mosul and Kirkuk.

BRITISH COUNCIL.—Representative of the British Council in Iraq, J. B. S. Jardine, O.B.E., King Ali Bridge Street, Rashid Street, Baghdad.

ISRAEL

(Yisrael)

President of the Republic, Isaac Ben Zvi, born Nov. 24, 1884, elected President of Israel, December 8, 1952.

CABINET

(November 2, 1955)

Prime Minister and Minister of Defence, David Ben Gurion (Mapai).

Foreign Affairs, Mrs. Golda Mayer (Mapai). Agriculture, Kadish Loos (Mapai).

Social Welfare and Religions, Moshe Shapira (National Religious Party).

Labour, Mordechai Namir (Mapai).

Finance, Levi Eshkol (Mapai).

Education and Culture, Zalman Aranne (Mapai).

Justice, Pinhas Rosen (Progressive).

Police, Bechor Shalom Shitreet (Mapai).

Posts, Dr. Yosef Burg (National Religious Party).

Interior, Israel Bar Yehuda (Ahdui Ha'avoda).

Commerce and Industry, Pinhas Sapir (Mapai).

Transport and Communications, Moshe Carmel (Ahdui Ha'avoda).

Development, Mordechai Bentov (Mapai).

Health, Israel Barzilai (Mapai).

Minister of State, Peretz Naphtali (Mapai).

NOTE:—Mapai = Labour Party.

EMBASSY IN LONDON

2 Palace Green, Kensington, W. 8

Ambassador in London, His Excellency Eliahu Elath (1952).

Consulate, 2A Palace Green, W. 8.

Area and Population.—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. 29° 30'–33° 15' N. and long. 34° 15'–35° 40' E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South.

The area is estimated at 8,050 square miles out of the 10,429 square miles comprised in the whole of Palestine (the remainder being occupied by Jordan and Egypt). The population was estimated (April, 1956) at 1,816,819, of whom 1,615,438 were Jews, the remainder mostly Arabs. These figures result from the gradual process of Jewish immigration during the 30 years preceding Israel's independence (in 1912 there were only 83,790 Jews in Palestine out of a total population of 752,048). During the upheavals of 1948–49 some 600,000 Arabs left the country as refugees and settled in neighbouring countries.

Hebrew is the official language of Israel. Arabic is also used extensively in Government publications and on coins and stamps. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the Knesset for the simultaneous translation of all speeches into Arabic.

Physical Features.—Israel comprises four main regions: (a) the hill country of Galilee and Judaea and Samaria, rising in places to heights of 2,460 to 3,940 ft.; (b) the coastal plain from the Gaza strip to north of Acre, including the plain of Esdraelon running from Haifa Bay to the south-east, and cutting in two the hill region; (c) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheba, to an apex at the head of the Gulf of 'Aqaba; and (d) parts of the Jordan valley, including Lakes Hula, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from a main source near Banyas at a height of 1,140 feet above sea-level and enters Lake Hula (Waters of Merom) 220 feet above sea-level. Between Lakes Hula and Tiberias (Sea of Galilee) the river falls 926 ft. in 11 miles and becomes a turbulent stream. Lake Tiberias is 666 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other principal rivers are the Yarkon and Qishon. The largest lake is the Dead Sea (shared between Israel and Jordan); area 405 sq. miles, 1,286 feet below sea-level, 51.5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation.

The water, therefore, contains an extraordinary high concentration of mineral substances. The highest mountain peak is Mount Atzmon, 3,962 feet above sea-level, near Safad, Upper Galilee.

Climate.—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but is made comfortable in most parts by daily refreshing westerly winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

Antiquities.—The following are the principal historic sites in Israel: Jerusalem: the Church of the Dormition and the Cenaculum on Mount Zion (the principal Christian and Moslem Holy Places of the Jerusalem area are in Jordan territory). Ein Kerem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and mediæval days, such as Ascalon, Caesarea, Athlit Megiddo and Hazor.

History.—The early history of Palestine, from the time when Moses led the Jews from Egyptian bondage towards the *Promised Land* to the time of the *Diaspora* (Dispersion) in the second century of the Christian Era, can be found in the Books of the Old Testament and in the Works of Josephus. Before the dispersion it had become the cradle of Christianity and the *Holy Land* of the Christian World, but after the break up of the Roman Empire, into which it had been brought by Pompey in 63 B.C., it was conquered by Islamic Arabs (A.D. 634), remaining under the Crescent as part of the Ottoman Empire (except for a break from 1098 to 1187 under the Crusaders) until Allenby's victory over the Germano-Turkish forces in the plain of Armageddon (Megiddo) on September 19, 1917.

On November 2, 1917, a statement, afterwards known as *The Balfour Declaration*, was made by the British government that Britain viewed with favour the establishment in Palestine of a home for the Jewish people. This principle was incorporated in the mandate to Britain, which came officially into force on Sept. 29, 1923. For 25 years Great Britain administered Palestine and laid the foundations of modern self-government.

The British mandate ended at midnight on May 14, 1948 when the Jewish National Council proclaimed a Jewish State of Israel, with David Ben Gurion as Prime Minister. On the following day Palestine was invaded by Syrian and Lebanese troops in the north, by the Transjordan Arab Legion and the Iraqis in the east and by the Egyptians in the south. On June 30 the last British troops left Haifa, which was taken over by Israel.

Hostilities ceased in January, 1949. The four armistice agreements signed under United Nations auspices in 1949 left Israel in occupation of various areas originally allotted to the Arab State. The situation as at present governed by the terms of the armistices has not yet been stabilized by peace treaties between Israel and any of its neighbours. The Arab parts of Palestine occupied by Jordan were formally incorporated with the latter in April, 1950. Egyptian forces occupy the "Gaza strip," a small coastal area with an Arab population.

Government.—There is an Executive Council nominated by the leading political party and appointed by the President, and a single-chamber

Parliament (*Knesset Israel*) of 120 members. The present Cabinet is based on a coalition between *Mapai* (Labour), the largest party, and various parties to the left and right excluding the extreme of both, and has a two-thirds majority in the *Knesset*: *Mapai* (Labour) has 40 seats. *Herut* (outgrowth of *Irgun Zvai Leumi*), 15; *General Zionists*, 13; *National Religious*, 11; *Achdut Ha'avoda*, 10; *Mapam* (Left Socialist), 9; *Communist*, 6; *Poalei Agudat Israel*, 6; *Progressives*, 5; *Arab pro-Mapai* parties, 5. The *National Religious Party* is included in the coalition.

Immigration.—The Declaration of Independence of May 14, 1948, laid down that "the State of Israel will be open to the immigration of Jews from all countries of their dispersion." The Law of Return, passed by the *Knesset* on July 5, 1950, provides that an immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. Since the establishment of the State 788,566 immigrants had entered Israel from 50 different countries by April, 1956.

Education.—Elementary education for all children from 6 to 13 years is compulsory. In the 1955-56 school year the number of pupils was 302,061 in 1,270 elementary and secondary schools, of which about 122 were Arab schools attended by 24,529 pupils. There are more than 300 schools of other types. The Hebrew Technical College at Haifa provides courses in engineering, architecture, aeronautics and other technical subjects. The Hebrew University, at Jerusalem, has 523 professors, lecturers and assistants, with about 3,000 students. A new university was opened near Tel Aviv on August 8, 1955, under the name of the Bar-Ilan University. The Weizmann Institute of Sciences at Rehovot is engaged in pure and applied research.

Finance.—Government expenditure for the fiscal year 1955-56 totalled £1,805,000,000 while revenue during the same period was £1,747,900,000.

The unit of account is the Israel pound of 1,000 *prutot*. The effective rate of exchange is £1.50=£1 sterling.

COMMUNICATIONS

Railways and Roads.—Israel State Railways started operating in August, 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lydda, Naharia, Beersheba, and intermediate stations. In June, 1956, the total railway network amounted to 620 kms. There were approximately 1,977 km. of paved roads. In December, 1955, there were approximately 54,300 licensed vehicles.

Shipping.—Israel's merchant marine in February, 1956, included 35 vessels with a total displacement of 130,000 tons. In 1955, 1,466 ships with a net tonnage of 2,699,554 entered Israel ports. Cargo unloaded during the year amounted to 1,537,984 tons and cargo loaded to 626,537 tons.

The chief ports are *Ψ*Haifa, a modern harbour, with a depth of 30 ft. alongside the main quay; *Ψ*Jaffa and *Ψ*Tel Aviv, where there are small craft harbours, and large vessels anchor at open roadstead. *Ψ*Acra has an anchorage for small vessels, and a fishing port is under construction at *Ψ*Caesarea.

Civil Aviation.—Cyprus Airways operate three weekly services between Nicosia and Lydda, and one weekly between Nicosia and Haifa. Two of these services have connections with the Viscount service operated by B.E.A. from Nicosia to London. Israel National Airlines (El Al) operate the routes Lydda-New York via London, Lydda-Johannesburg and Lydda-Istanbul for passengers, and a freight service to Germany. During 1955 1,373 aircraft arrived at Lydda and Haifa airports, carrying 36,613 passengers and 699,218 kilograms

of freight. 43,191 passengers and 515,190 kilograms of freight left through the two airports.

PRODUCTION AND INDUSTRY

Agriculture.—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to sub-tropical crops such as sorghum, millet and mangoes. The famous "Jaffa" orange is produced in large quantities in the coastal plain for export; other kinds of citrus fruits are also grown and exported. The citrus yield during the 1955-56 season was approximately 11,000,000 cases. Of this total, 7,800,000 cases were exported, of which about 3,100,000 went to the U.K. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes can be grown in the autumn and in the winter. Since the establishment of the State of Israel, beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing has also been extended, and production (mostly from fish ponds) reached 10,417 tons in 1955. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production, but the number of new deep wells is being extended and a plan to bring water to the Negev from the Yarkon river is nearly completed. A large part of the dairy industry is dependent on the production of fodder crops under irrigation; areas under fodder crops have doubled. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

Industry.—Among the more important industries are citrus and by-products, manufactured food products, pharmaceuticals, textiles and wearing apparel, artificial teeth, polished diamonds, plywood, cement, plastics, light engineering and the assembly of motor cars and trucks.

TRADE

	1955
Imports	£585,974,000
Exports	158,692,000
Imports from U.K.	£9,399,912
Exports to U.K.	£7,765,873

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal exports are citrus fruits and by-products, polished diamonds, plywood, cement, artificial teeth, finished and semi-finished textiles and pharmaceutical drugs.

ISRAEL INDEPENDENCE DAY, 1957—*Iyar 5, A.M. 577 (May 6, 1957).*

CAPITAL, Jerusalem, population (Jan. 1, 1956), 146,000. Other principal towns are Tel Aviv-Jaffa (363,000); Tel Haifa and district (158,000); Ramat Gan (58,000).

FLAG: White, with two horizontal blue stripes, the Shield of David in the centre.

JERUSALEM

Jerusalem and District is at present divided between Israel and Jordan under the terms of the armistice arranged at the end of hostilities. The Old City, which contains 34 of the 36 recognized Holy Places, is under the control of Jordan; the New City, with 2 Holy Places, is under Jewish admini-

stration. A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israeli parliament on Jan. 23, 1950.

BRITISH EMBASSY

Chancery: 192 Hayarkon Street, Tel Aviv; Consular and Visa Sections: Farmers' Building (Beit Haikarim).

British Ambassador, His Excellency Sir John Walter Nicholls, K.C.M.G., O.B.E. (1954).

Press Counsellor, Signor Francesco Antinori.

Italian Consulate General, 38 Eaton Place, S.W.1.

Consul General, Signor Piero Vinci.

Consul General, Signor Giangiacomo Di Thiene.

Vice-Consul, Signor Alberto Cavaglieri.

AREA AND POPULATION.—Italy is a Republic in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands (with certain dependencies hereinafter noted). Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia,

etc., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area may be estimated at 301,000 sq. kilometres, about 131,000 sq. miles, with a population (Census, Nov., 1951) of 47,020,536.

Births in 1954 numbered 848,202, deaths 433,459, and marriages 349,549.

Physiography.—On the west of the peninsula are wide and fertile plains, with ample streams and sheltered seaports, but on the east the spine of the Apennines runs close to an inhospitable coast for the greater part of its length and except for the harbours of Brindisi and Otranto there is little shelter from the storms of the Adriatic. The Alps form the northern limit of Italy, dividing it from France, Switzerland, Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak, is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (220 miles) and Adige in the north, Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The *Rubicon*, a small stream flowing into the Adriatic near Rimini (and now usually identified with the Fiumicino) formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Caesar did in 49 B.C., thus "invading" Italy in arms) is a step definitely indicating an aggressive course of action.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848 to 1870, in which the great patriots Mazzini (born 1805; died 1872), Garibaldi (born 1807; died 1882) and Cavour (born 1810; died 1861) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 1870. In 1871 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known as *Il Duce* (The Leader), was born July 29, 1883, and was continuously in office as Prime Minister from June 30, 1925, until July 25, 1943, when the Fascist régime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by the late King Viktor Emmanuel under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title of King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with a referendum on the question of Republic or Monarchy. The Referendum resulted in 12,717,923 votes for a Republic and 10,779,284 for a Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President was elected.

As a result of the General Election of April 18, 1948, in which the Christian Democrats were returned as the leading party with a majority in the Chamber, Signor de Gasperi formed a Coalition Government: of Christian Democrats, Liberals, Republicans and those Right Wing Socialists who had left Nenni. The elections of July, 1953, resulted in a position of deadlock, and after Signor de Gasperi had formed a short-lived minority Government, he was succeeded as Prime Minister by Signor Pella. The latter formed a

Christian Democrat Government, which was supported in Parliament by the Monarchist Party, but he resigned in January, 1954. In February, 1954, a Coalition of Christian Democrats, Social Democrats and Liberals was formed by Signor Scelba, with the support of the Republican Party. Signor Scelba's Government resigned in June, 1955, and was succeeded in July by a similar coalition headed by Signor Segni.

THE NEW CONSTITUTION.—On Dec. 22, 1947, the Constituent Assembly approved the new Constitution laying the foundation of the Italian Republic, Article I of which states "Italy is a Democratic Republic founded on work. Sovereignty belongs to the people who exercise it in the forms and within the limits of the Constitution."

PRODUCTION.—Agriculture (including the growing of grapes, olives, chestnuts and rice) is the principal industry. Italian vines are numerous and celebrated, and olives and olive-oil are produced in the South, chiefly in Apulia; while fruit abounds and is largely exported; wheat production had been greatly stimulated under the Fascist régime, and has made further progress since the War. The cultivation of the silkworm forms an important industry. Italy is generally poor in mineral resources, but the discovery and rapid exploitation since the war of large quantities of natural methane gas in North Italy is likely considerably to reduce the costs of industrial production and the requirements of imported coal. The production of sulphur is important and among other minerals produced are iron pyrites, mercury, lead, zinc, aluminium, potassic salts and iron ores. Marble is quarried in considerable quantities. Salt and tobacco are Government monopolies.

The chief manufactures are woollens, cotton, silk, rayon, hemp, and linen yarns and tissues, iron and steel and their products, shipbuilding, gloves, motor vehicles, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE.—The Army has been reorganized. It consists of about 230,000 men. The Navy consists of 2 battleships, 3 cruisers, 6 destroyers and also anti-submarine vessels, minesweepers and coastal craft. The Air Force consists of about 2,000 aircraft, of which about 1,000 are training types.

LANGUAGE AND LITERATURE.—Italian is a Romance language derived from Latin and has been classified as Gallic-Italian, spoken in the north and north-west (Piedmont, Lombardy and Emilia); Venetian; Tuscan and Roman, in central Italy (Tuscany, Latium, Umbria, the Marches, Campania, Abruzzi and Apulia); and Ibero-Italian in Sicily and Sardinia and in Calabria and Liguria. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265-1321; Petrarch, 1304-1374; and Boccaccio, 1313-1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474-1533; Machiavelli, 1469-1527; Tasso, 1544-1595). Modern Italian literature has many noted names in prose and verse, notably Carducci (1835-1907) and Gabriele d'Annunzio (1864-1938). The Nobel Prize for Literature has been awarded to Italian authors on three occasions—G. Carducci (1906), Signora G. Deledda (1926), and Luigi Pirandello (1934). In 1954 there were 110 daily newspapers published in Italy, of which 21 were published in Rome, 6 in Genoa and 14 in Milan.

EDUCATION.—Primary education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the 26 Universities are of very ancient foundation, Bologna, Genoa, Macerata, Naples, Padua and Perugia in thirteenth century; Siena, Rome, Pisa, Pavia and Ferrara in fourteenth century; Catania and Turin in fifteenth century; Parma, Messina and Urbino in sixteenth century.

COMMUNICATIONS.—Serious damage was done to the Italian railway system by the war, but by the end of 1948 the work of restoring the tracks was almost completed. A large programme for rebuilding stations, replacing and increasing rolling stock, and for repairing and building new roads has been carried out, special attention being given to a large-scale development programme for Southern Italy. The Italian Mercantile Marine has been restored to over 4,000,000 tons compared with 3,500,000 tons before the war.

CURRENCY

In May, 1956, the Italian *Lira* was quoted at approx. 1,755 = £1. (See also p. 84.)

TRADE

	1955
Imports	£1,691,000,000,000
Exports	£1,161,000,000,000
	1955
Imports from U.K.	£57,684,617
Exports to U.K.	£55,605,490

Imports consist chiefly of mineral oils, iron and steel, coal, cotton, wool, machinery, apparatus and their parts, coffee, copper, timber, wheat, rubber and wood pulp.

The principal exports are fresh fruit and vegetables and various fruit and vegetable preserves, motor vehicles, machinery, apparatus and their parts, artificial fibres and yarns, office machinery, chemical fertilizers, pneumatic tyres, rice, cycles and motor cycles and the products of the artisan industries.

The principal imports from the U.K. in 1955 were machinery, apparatus, and their parts, coal, wool and wool manufactures, tractors and vehicles, iron and steel manufactures, chemical and electrical products, dried and salted fish, cinema films, nickel and alloys; the principal exports to the U.K. in 1955 were fresh and dried fruit and vegetables, tomato preserves, textiles and yarns of wool and artificial silk, cycles and motorcycles and motor-cars, rice, vermouths, essences and essential oils, worked marble, hides.

CAPITAL. Rome, founded according to legend by Romulus in the year now known as 753 B.C., is situated on the Tiber, 15 miles from its mouth. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire, and became the capital of Italy when the kingdom was established in 1872. Population (1951), 1,687,735. Other towns are Milan (1,295,700), Ψ Naples (1,041,130), Turin (737,000) and Ψ Genoa (678,000). Florence (388,480), Bologna (350,000), Ψ Venice (323,400), Ψ Trieste (273,450), Ψ Bari (275,490), Verona (199,030), Ψ Livorno or Leghorn (148,810), Ψ Taranto (106,720), Brescia (153,180), Ferrara (138,700), (125,200), Ψ Torre A. Ψ Rimini (78,960), Ψ Savona (70,410), Ψ Torre del Greco (63,430), Ψ Brindisi (62,730); in Sicily, Ψ Palermo (506,150), Ψ Catania (208,855), Ψ Messina (231,430), Ψ Trapani (77,060), Ψ Marsala

(75,890), Ψ Syracuse (71,710), and in Sardinia, Ψ Cagliari (140,520).

TRIESTE.—From June 12, 1945, the area of Trieste was administered by Allied Military Government; Zone A, including Duino and the city and harbour of Trieste, by Anglo-U.S. forces and Zone B, including the towns of Capodistria, Pirano and Cittanuova by Yugoslavia. Provision for setting up a Free Territory of Trieste, included in the Italian Peace Treaty signed in Paris on Feb. 10, 1947, proved to be unworkable and military occupation of the two Zones continued until 1954, when an agreement was concluded in London on Oct. 5 between Italy, Yugoslavia, the United Kingdom and the United States, partitioning this territory between Italy and Yugoslavia along the line of demarcation of the two Zones, with a minor frontier rectification in favour of Yugoslavia. Zone A, an area of about 90 square miles with a population of 302,000, was formally handed over to Italian administration on October 26, 1954.

ITALY'S FORMER COLONIES, &c.

The future of the former Italian colonies was determined by the General Assembly in a resolution of November 21, 1949, and subsequent subsidiary resolutions.

For LIBYA see separate article.

In Somalia authority was transferred on April 1, 1950, by the United Kingdom to Italy. Somalia is to become an independent and sovereign state on December 2, 1960.

Under a United Nations resolution of December 2, 1950, Eritrea constitutes an autonomous unit federated with Ethiopia under the sovereignty of the Ethiopian crown. See ETHIOPIA.

Somalia comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 11° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. The total area, including the territory of Jubaland (and the port of Ψ Kismayu), transferred from Kenya by Great Britain in 1945, is about 220,000 sq. miles, and the population is estimated at 1,254,000. The capital is Ψ Mogadishu, on the Indian Ocean, estimated population 70,000.

Panellaria Islands (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 10,000.

The *Pelagian Islands* (Lampedusa, Linosa and Lampione) are part of the Province of Agrigato and have an area of 8 sq. miles, pop. 3,000.

BRITISH EMBASSY

Villa Wolkonsky, Via Conte Rosso, Rome.
British Ambassador, His Excellency Sir (Henry) Ashley Clarke, K.C.M.G. (1953).
Minister, H. A. F. Hohler, C.M.G.
Minister (Commercial), K. Unwin, C.M.G., O.B.E.
1st Secretaries, C. M. Le Quesne; K. C. Christofas, M.B.E.; H. C. L. Gibson, C.M.G.; R. H. G. Edmonds, M.B.E.; E. F. James, O.B.E.; C. T. Isolani, M.B.E. (Information Officer); F. C. S. Bayliss, M.B.E., T.D.; G. G. Hannaford, O.B.E.; C. H. Henderson, M.B.E.; E. J. Kerly; F. Smitherman, M.B.E. (Head of Consular Section).
2nd Secretaries, S. Cremona, O.B.E.; T. A. E. Shute; H. M. Shone; R. K. W. Sloan; A. F. R. Harvey.
3rd Secretaries, D. M. Day; F. J. Gaunt.

(*Financial*); Takeo Iguchi (*Asst. Press*); Naohiro

Kumagi (*Visa*).

Consul-General, Masao Kanazawa.

Area and Population.—The Japanese Empire consists of 4 large and many small islands situated in the North Pacific Ocean between longitude 156° 30' East and 119° 18' West, and between latitude 20° 25' and 50° 55' North, with a total area of 368,480 square kilometres (142,270 square miles) and a population (Jan. 1955) of 88,500,000.

Japan Proper consists of, Honshu (or Mainland), 230,532 sq. k. (89,011 sq. m.), Shikoku, 82,773 sq. k. (32,348 sq. m.), Kyushu, 42,079 sq. k. (16,247

sq. m.), Hokkaido, or Yezo, 77,096 sq. k. (29,764 sq. m.). The various parts of China which had been throughout the years of Japanese expansion and aggression leased or annexed, e.g. Formosa and the Kwantung Province, reverted to Chinese sovereignty after the War of 1939-45.

After the unconditional surrender to the United Nations (Aug. 15, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15, 1945), and the status of parts of the former Japanese Empire has yet to be determined. A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952.

British participation in the occupation of Japan was virtually over by May, 1950, at which date the British Commonwealth Occupation Force was reduced to 3,000 Australians. However, the outbreak of hostilities in Korea in June, 1950, resulted in the despatch to Korea of British Forces from the United Kingdom, Australia, New Zealand and Canada to participate in the United Nations action. The main base of this force was established in Japan at Kure, and the Japan element of the British Commonwealth Forces in Korea at its peak amounted to approximately 6,000 troops. On July 1, 1956, the base was moved to Inchon, Korea, and only a small residual force remains in Japan. It was expected that all Commonwealth troops would have left Japan by the early part of 1957.

Under the terms of the United States-Japan Security Treaty of Sept. 8, 1951, United States forces remained to defend Japan after the coming into effect of the Peace Treaty. As Japan's own forces are built up, it is expected that the United States forces will be gradually withdrawn.

Vital Statistics.—Japan proper contained (Oct. 1955) 89,269,278 inhabitants. The average annual increase between 1950 and 1955 was 1,213,928. The birth rate in 1955 was 19.3 per 1,000 and the death rate 7.8 per 1,000 (the lowest recorded in Japan). The Ainu, remnant of the indigenous inhabitants, are still found in the island of Hokkaido.

Physiography.—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyushu. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical to sub-arctic zones. Heavy snowfalls are frequent on the western slopes of Hokkaido and Honshu, but the Pacific coasts are warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing, offering abundant opportunities for the supply of hydro-electric power.

Government.—According to Japanese tradition, Jimmu, the first Emperor of Japan, ascended the throne on Feb. 11, B.C. 660. Under the Constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house. A new constitution approved by the Supreme Allied Commander was published on March 6, 1946, superseding the "Meiji Constitution" of 1889 and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France. Among the most important innovations are the abandonment of

the doctrine of Imperial Divinity, the renunciation of war, and the establishment of a Supreme Court.

The new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

The Japanese peace treaty came into force on April 28, 1952, after ratification by Argentina, Australia, Canada, Ceylon, Mexico, New Zealand, Pakistan, the U.K., the U.S.A. and Japan herself. Japan thereupon resumed her status as a sovereign and independent power.

A general Election in Feb. 1955 resulted in a victory for the Democratic Party as the largest party in the Diet, though still in a minority. In November, 1955, the Democratic and Liberal parties amalgamated to form the Liberal-Democratic Party. A committee of four, including the Prime Minister, Mr. Hatoyama, was appointed to lead the party, but Mr. Hatoyama remained Prime Minister and formed his third Cabinet with an overwhelming majority. The strength of the Parties in June 1956 was as follows:—Lower House: Liberal-Democratic Party 299, Socialist Party 153, Communists 2, Labour Farmers 4, Others 4, Vacancies 5; Upper House: Liberal-Democrats 122, Socialists 67, Green Breeze Society (*Ryokufukai*) 44, Independents 8, Communists 1, Labour Farmers 2, Vacancies 6.

Agriculture and Livestock.—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. There were in 1954 over 24,500,000 hectares of forest, which include the *Cryptomeria japonica*, *Pinus massoniana*, *Zelkova keaki*, and *Pawlonia imperialis* in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. In 1954 there were 5,422,608 hectares under cereals (rice 3,051,176 hectares—60 per cent.). The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 9,500,000 metric tons being produced annually. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown. Mulberry trees are now cultivated on only 173,995 hectares (about a quarter of the pre-war area) and silk is playing a reduced part in Japanese exports.

Minerals.—The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum and salt, but iron ore and coal are among the principal post-war imports to supply deficiencies at home.

Commerce and Industry.—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including mining, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan at the end of 1955 was 41,410,000, about 17,000,000 being paid workers; of the remainder, some 10,820,000 were classed as proprietors, and another 12,980,000 were family workers. Of the total labour force, some 15,000,000 were engaged in agriculture, only

540,000 being paid employees. About 40 per cent. of paid industrial workers were organized into trade unions.

Communications.—There were 27,783 kilometres of Government and private railroad (steam and electric) in March, 1955. The mercantile marine of Japan and her dependencies reached 6,000,000 gross tons in 1941, but more than three-quarters of it was sunk during the war. By the end of March, 1956 it had been rebuilt to 3,954,000 gross tons, and it is intended to reach a total of 4,500,000 gross tons of ocean-going vessels (3,000 gross tons or over) by 1961-62.

Armed Forces.—After the unconditional surrender of August, 1945, the land forces were disarmed and disbanded and all aircraft were confiscated by the occupying forces. Although the present Constitution of Japan prohibits the maintenance of armed forces, an inter-11 security force, known as the National Police Reserve, came into being at the end of 1950. In October 1951, this Force was renamed the National Safety Force and together with a Coastal Safety Force was placed under a National Safety Agency. By January 1953, the National Safety Force had reached its authorized strength of 110,000. In March 1954 a Mutual Defence Agreement for the supply of equipment and materials was concluded with the United States. In June, the mission of the forces was extended to include the defence of Japan against direct and indirect aggression, the Agency was renamed the Defence Agency, the forces under it the Ground Self Defence Force and the Maritime Self Defence Force respectively and a new arm, the Air Self Defence Force, was created. During 1955, the strength of these forces was increased to 150,000, 10,400 and 10,350 respectively. By June, 1956 the M.S.D.F. consisted of 185 ships of 70,000 tons and a Naval Air Arm of some 80 planes of which 48 were for A/S and patrol duties. A further 20 ships of 10,400 tons were on order or under construction. The Japan Air Self Defence Force (J.A.S.D.F.) at the end of 1955 had 66 piston-engined primary trainers, 130 piston-engined advanced trainers, 50 jet-engined advanced trainers and 16 troop-carrying aircraft.

Religion.—All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. The Roman Catholic Church has an archbishop and three suffragan bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has 8 Japanese bishops and is an autonomous branch of the Anglican communion. There is also an United Protestant Church.

Education.—According to the laws passed in 1947, education on elementary level (6-year course) and lower secondary level (3-year course) is free, compulsory and co-educational. Upper secondary schools (3-year course) are mainly established and maintained by prefectures, and are co-educational. They have several courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. There are 2- or 3-year junior colleges and 4-year universities. Some of the 4-year universities have graduate schools. In March, 1956, the total number of these junior colleges and universities was 495, 91 of which were established and maintained by the State, while 77 were established and maintained by prefectures and cities, and 327 were private institutions. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaido (Sapporo), Kyushu (Fukuoka), Osaka and Nagoya.

Language and Literature.—Japanese is said to be one of the Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries

A.D., when the Chinese characters came into use. Most Japanese who have received school education can read and write the Chinese characters in current use (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is compulsory in almost all middle and high schools. In March, 1956, there were 794 libraries open to the public (33 National Diet libraries, 715 state and 46 private) with 18,546,523 volumes. In addition, there are 528 University libraries with 23,000,000 volumes. In 1955 there were 145 daily newspapers in Japan, of which 15 were published at Tokyo, 11 at Osaka and 13 in the Nagoya region. Japan's present total newspaper circulation is estimated at 34,000,000 copies and 2.63 per household.

FINANCE

The Budget for the 1956-57 financial year, ending on March 31, is estimated to balance at Yen 1,034,922,520 for revenue and expenditure on the general account.

The official rate of exchange of yen 360 = 1 U.S.\$ was established on April 25, 1949, and (after Japan's accession to the International Monetary Fund) was confirmed by the Fund on May 11, 1953. The official yen/sterling rate fluctuates to reflect the current middle market rate quoted in London for the \$U.S. The service of Japan's external bonded debt (except for certain small French franc issues) was resumed in December 1952. Interest on the \$1,000,000 worth of outstanding foreign bonds and \$1,000,000 worth of U.S. dollar bonds is being paid at the full contractual rates, and arrears of interest are being paid concurrently.

FOREIGN TRADE

	1955
Total Imports.....	U.S. \$2,477,019,000
Total Visible Exports*.....	" 2,010,328,000
Imports from U.K.....	£13,155,211
Exports to U.K.....	£23,903,855

* With invisible exports (most of which were accounted for by U.S. spending in Japan) included, the favourable balance on current account was \$535,300,000 in the fiscal year ended March 31, 1956.

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal imports consist of foodstuffs (wheat, rice, barley, soya beans, sugar, edible oils), cotton, wool, mineral oils, rubber, iron ore, coking coal, salt, wood pulp, hides, chemicals and machinery. Principal exports consist of cotton and rayon textiles, silk, heavy and light machinery, ships, steel, copper, canned goods, chemicals, pottery, tea, paper, bicycles, toys, sewing machines and cameras.

CAPITAL OF THE JAPANESE EMPIRE, Tokyo, formerly called Yedo, population Oct. 1, 1940, 6,778,804. Its population on Dec. 31, 1955, was 8,224,163. The other chief cities had the following populations in late 1955.

OTHER JAPANESE CITIES

Osaka, Honshū.....	2,547,321
Kyoto, Honshū, ancient capital.....	1,204,017

JORDAN

(The Hashemite Kingdom of The Jordan)

King of the Jordan, Hussein, G.C.V.O., born November 14, 1935, succeeded on the deposition of his father, King Talal, Aug. 11, 1952, assumed constitutional powers, May 2, 1953, on coming of age; married, April 19, 1955, Princess Dina Abdulhamid of Iran. Prime Minister, Said el-Mufti. Minister for Foreign Affairs, Fawzi al Mulqi.

JORDANIAN EMBASSY IN LONDON

7 Palace Green, W.8

[Western: 3685]

Ambassador, Assayed Baha Ud-Din Toukan (1956)

Counsellor, Assayed Kemal Homoud.

Military and Air Attaché, Colonel Karim Ohan.

Attaché, Assayed Riad Sherif Sabri.

Area and Population.—The Hashemite Kingdom of the Jordan is made up of two areas: Western Jordan, which includes the districts of Hebron, Jerusalem and Nablus, and Eastern Jordan, which includes the districts of Ma'an, Kerak, Beiga and Ajlun. The union of East and West Jordan was effected by a decision taken unanimously by both houses of the Legislature on April 24, 1950. The union was recognized a few days later by the British Government subject to certain reservations on the subject of Jerusalem. The Kingdom is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. The majority of the population are Sunni Moslems and Islam is the religion of the state. The estimated population is 1,400,000 persons on the east bank, of whom about 500,000 are displaced Palestinians.

Government.—The Executive consists of a Council of Ministers and the legislature of a Senate (20 persons nominated by the King) and a House of Representatives, consisting of 40 elected members.

Production and Industry.—West Jordan is fertile, but severely eroded. East Jordan (the old Amirate of Transjordan), consists of a fertile mountainous area and the eastern half of the Jordan valley which are productive; the rest of the country is arid steppe. Jordan's only industrial product of note is raw phosphate, of which about 160,000 tons were exported in 1955.

Communications.—The Hejaz Railway runs (with the exception of the first few miles) through Jordan territory from Deraa to Ma'an. During the Second World War, 24 miles of line were laid from Ma'an to Ras Naqb; there are good roads to all the chief towns in the country.

KOREA

(Chosun.)

Korea is situated between 120° and 128° E. long., and between 34° and 43° N. lat., and the southern and western coasts are fringed with innumerable islands, of which the largest is Cheju-do (Quelpart). Its area is 82,225 sq. miles with an estimated population of about 28,000,000, of whom about 21,000,000 live south of the present dividing line. The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice, barley, and other cereals, beans, cotton, tobacco and hemp. Fruit-growing and sericulture are also practised. Ginseng, a medicinal root much affected by the Chinese, is largely grown at Kaesong (formerly Songdo), now in North Korean hands and forms a rich source of revenue. Gold, copper, coal, iron, graphite, tungsten and other minerals are distributed throughout the country, but are more abundant in the north. The principal exports before the war were rice, beans, silk, fish, fish-oil and manure. Normal trade relations with foreign countries were suspended during the war of 1939-45, but foreign business men have been permitted to return to South Korea since July 15, 1947. Trade with the United Kingdom in 1955 was valued at: Imports, £1,797,166; Exports to U.K., £22,331. The south is devoted mainly to agriculture, and most of the limited industries are in the north.

Late in the fourteenth century the Emperor Yi Tan, whose social reforms dominated Korea for five hundred years, changed the capital from Kaesong (Songdo) to Seoul, population (Census, 1955), 1,574,868; other centres are ΨPusan (1,045,183); Taegu (487,252) and ΨInchon (327,967), formerly Chemulpo. Pusan is the principal port. Inchon, though close to the capital, has a tide variation of over 20 feet.

U.S.A.—U.S.S.R. Occupation.—After 35 years of Japanese rule, Korea was occupied by troops of the U.S.A. and the U.S.S.R. in 1945. The 38th parallel was fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of

all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for a National Assembly under the supervision of a Temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

Republic of Korea

President, Dr. Syngman Rhee, re-elected for 4 years, May 15, 1956 (third term).
Vice-President, Dr. Chang Myon.

KOREAN LEGATION

36 Cadogan Square, S.W.1.

[Kensington: 8025]

Envoy Extraordinary and Minister Plenipotentiary, Hon. Myo Mook Lee (1951).

The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites. It has an area of 96,930 sq. km. (37,426 sq. miles) and a population (Census, 1955) of 21,526,374. A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31. The Assembly passed a Constitution on July 12, and on July 20 elected Dr. Syngman Rhee as the first President of the Republic of Korea for four years. On August 15, 1948, the Republic was formally inaugurated and American Military Government came to an end. All U.S. troops were withdrawn by the end of June, 1949. In the third general election held on May 20, 1954, President Rhee's Liberal Party won a clear majority. Over 90 per cent. of the electorate are said to have voted. The final revised Budget for the year ending June 30, 1956, was balanced at Hwan 195,501,443,700, as below:

	Revenue	Expenditure
General	66,026,756,600	100,480,975,400
National Defence	69,954,219,000	200
Rehabilitation	59,520,468,100	95,020,468,100

The Financial Year will in future match the calendar year and a budget for the second six months of 1956 has been passed at Hwan 73,500,000,000. The rate of exchange is fixed by bilateral agreement with the U.S.A. at Hwan 500 = \$1 (1,400 = £1), subject to review.

The Republic of Korea has an army of about 700,000 men, organized in 20 divisions and 10 reserve divisions, a small navy mainly for coast protection duties and a small air force.

BRITISH LEGATION

Seoul

Minister, His Excellency Andrew Charles Stewart, C.M.G., O.B.E. (1955).

1st Secretary, D. Malcolm, T.D.

Military Attaché (vacant).

Air Attaché, Group-Capt. R. C. Keary (resident in Tokyo).

and Secretary, C. Gardner.

Commercial Secretary, S. Stephenson.

Vice-Consul, E. A. Owen.

Democratic Peoples' Republic of Korea.—Meanwhile in the Russian-occupied zone north of the 38th parallel the Democratic People's Republic had been set up with its capital at Pyongyang;

a Supreme Peoples' Soviet was elected in September 1948, and a Soviet-style Constitution adopted. Recognition had been given by the U.S.S.R. and its satellites. In January, 1949, the Soviet Government announced that all Russian troops had been withdrawn from Korea by the end of December, 1948.

The Korean War.—In December, 1948, the General Assembly of the United Nations appointed a second Commission to visit Korea to endeavour to facilitate the re-unification of the country. The Commission arrived in Seoul in February, 1949, and continued its work throughout the summer. Later in the year the General Assembly resolved that the Commission should continue its work for another year. Meanwhile the country remained effectively divided into two along the line of the 38th parallel, until the aggression of June 25, 1950, when the North Korean forces invaded South Korea. On the same day, at an emergency meeting of the United Nations Security Council, a resolution was adopted calling for immediate cessation of hostilities, and the withdrawal of the North Korean armed forces to the 38th parallel, requesting the U.N. Korean Commission to keep the Security Council informed on the implementation of the resolution, and calling on all member states to render every assistance to the United Nations in the execution of this resolution, and to refrain from giving assistance to the North Korean authorities. On Sept. 4 the Commission officially reported that North Korea was responsible for the war.

The fighting was ended by an armistice agreement signed by the U.N. Commander-in-Chief and the commanders of the North Korean army and the Chinese People's "Volunteers" on July 27, 1953. By this agreement the line of division between North and South Korea remained in the neighbourhood of the 38th parallel. The Geneva Conference, which discussed Korea from April 26 to June 15, 1954, failed to agree on measures for re-unifying the country.

LEBANON

President of the Republic of Lebanon, Camille Chamoun, elected Sept. 23, 1952.

CABINET

Prime Minister and Minister of the Interior, Abdallah Yafi.

Minister of State, Saeb Salaam.

Foreign Affairs, Selim Lahoud.

Justice, Alfred Naccache.

Agriculture, Joseph Skaff.

Public Works and Information, Mohamed Sabra.

National Defence, Emir Majid Arslan.

Health and Social Affairs, Nazih el-Bizri.

Finance and National Economy, George Karam.

Education and Posts, Fuad Ghom.

LEBANESE EMBASSY IN LONDON

(21 Kensington Palace Gardens, W.8)

[Bayswater: 72651]

Ambassador Ibrahim el-Ahdab (1955).

Counsellor, M. Najati Kabbani.

Attaché, M. Souheil Frejly.

The republic of the Lebanon is in the Levant, covering a portion of the former Ottoman Empire taken from the Turks by British forces (with a small French detachment and some Arab forces under the Emir Faisal and Colonel Lawrence) in 1918, but following the Anglo-French Convention of September, 1919, Great Britain withdrew in favour of France, to whom a Mandate was granted by the Supreme Council of Allied Powers in 1920. The French authorities granted a Constitution and the first President of the Republic (under the Mandate) was elected in 1926.

In 1941 hostilities broke out between the French troops in Syria and Lebanon and the Allied Forces in the Middle East, the latter having been directed to prevent further Nazi penetration into French Mandated Territory. Hostilities ceased on July 11, 1941, and the French High Command agreed to remove the garrison.

In accordance with the undertaking given by the British and Free French Forces, Syria and Lebanon were declared to be independent and separate States. In 1943 the amended Constitution came into force and the first President of the independent Lebanon Republic was elected.

Under an agreement signed by General Catroux (on behalf of the French Committee of National Liberation) and by representatives of Syria and Lebanon "all powers and capacities exercised hitherto by the French under mandate" were transferred to the Syrian and Lebanese governments as from Jan. 1, 1944.

Lebanon forms a strip, about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Palestine frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Begaa*, in which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Begaa. The seaward slopes of the mountains have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Moslems and Druses.

Area and Population.—The total area of Lebanon is about 4,300 sq. miles, the population being estimated at 1,400,000 in 1955.

Production.—Fruits are the most important products and include olives, citrus fruit and apples. Tobacco, silk and cotton are also produced. There is little remaining of the famous cedars of Lebanon.

Railways.—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. A standard gauge railway also runs up the coast from Nakoura on the Palestine border, through Beirut to Tripoli, but the Beirut-Nakoura sector is not in use at present.

Roads.—All the principal towns in the country are connected by roads, for the most part good.

Civil Aviation.—Beirut International Airport is one of the most important traffic centres in the Middle East. Numerous international air services to all parts of the world pass through it, and local services connect with all Middle Eastern capitals except Tel Aviv. There are 3 national airline companies in the Lebanon serving the local routes. One of these companies enjoys the financial support of B.O.A.C. and operates a *Viscount* service.

Rivers.—The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch; the Litani flows southwards from Lebanon, turns westwards round the southern extremity of the range and flows into the Mediterranean.

Archaeology, etc.—Lebanon has some important historical remains. Baalbek (Heliopolis), contains the ruins of I-III century Roman temples (the Circular Temple, the Great Temple, and the Temple of Bacchus) and nearby is the largest cut

stone in the world (60 by 27 by 14 ft.), weighing 1,500 tons.

Language and Literature.—Arabic is the principal language (see Arabia), and French is also widely used. The use of English is increasing. There are 39 daily newspapers registered in Beirut (Arabic, 30; French, 4; Armenian, 4; English, 1), but not all appear regularly. There are also many weekly and monthly journals.

Education.—There are a French (R.C.) University, an American (undenominational) University and a Lebanese National University (which is chiefly a teachers' training college) in Beirut; there are several other higher educational institutions including an agricultural college in the Bekaa.

CHIEF TOWNS.— Ψ Beirut (population about 450,000) is the capital of the Lebanon. Ψ Tripoli (100,000), Zahlé (40,000), Ψ Sidon (25,000), Ψ Tyre (12,000) are other towns of importance.

FINANCE

Receipts and Expenditure, 1956 (Estimated), $\text{£}151,500,000$.

Currency. The monetary unit is the Lebanese £ (L); official rate $\text{£}1 = \text{£}16.19$. There is also an officially recognized free market in foreign currencies, which is used for nearly all commercial transactions. The free market rate for sterling is variable, but averages about $\text{£}19 = \text{£}1$.

TRADE

Principal imports: Gold and precious metals, cereals, cotton and woollen textiles, artificial and cotton yarns, iron and steel goods, petrol, oils, wood, pharmaceuticals, raw hides, sugar, motor-vehicles, live-stock.

Principal exports: Gold and precious metals, citrus fruits, wool, onions, cotton, textiles, apples and pears, scrap metal, vegetables, hides and skins, soap and butter.

Trade with U.K., 1955.—Imports, $\text{£}9,816,137$; Exports to U.K., $\text{£}1,922,713$.

There is also a considerable transit trade through Beirut, mainly in gold and crude oil. Lebanon is the terminal for two oil pipe lines, one, belonging to the Iraq Petroleum Company, debouching at Tripoli, the other belonging to the Trans-Arabian Pipeline Company, at Sidon. There are refineries at each end of the pipeline which can, to all intents and purposes, fulfil Lebanon's needs.

LEBANESE FLAG.—Red, white and red with a green cedar of Lebanon in the centre of the white band.

BRITISH EMBASSY

Beirut

British Ambassador, His Excellency George Humphrey Middleton, C.M.G. (1956).

Counsellor, I. D. Scott, C.I.E.

1st Secretaries, D. A. Prater; D. U. Jackson (Commercial); G. R. Gauntlett (Information); M. Arab, M.B.E.; R. M. Tesh.

Military Attaché, Lt.-Col. A. Graham.

Civil Air Attaché, B. G. Barnard.

The British Embassy also houses the Middle East Division and the Regional Information Development Office headed respectively by W. F. Crawford, C.M.G., O.B.E. (Counsellor) and P. G. D. Adams (Counsellor).

BRITISH COUNCIL

Representative, T. W. Morray, M.B.E., Beit Fauzi Azar, Sharia Sidani, Beirut.

LIBERIA

(Republic of Liberia)

President, Hon. William V. S. Tubman, elected May 6, 1943; installed Jan. 1, 1944; re-elected, May 1, 1951, for period till Dec. 31, 1955; re-elected May, 1955, for further 4 years.

Vice-President, William R. Tolbert.

Secretary of State, M. Dukuly.

Treasury, William E. Dennis.

Attorney-General, C. Abayomi Cassell.

Postmaster-General, McKimley A. Deshield.

Defence, Ernest C. B. Jones.

Interior, Harrison Grigsby.

Public Utilities, Henry B. Duncan.

Agriculture and Commerce, John W. Cooper.

LIBERIAN EMBASSY IN LONDON

21 Prince's Gate, S.W.7

[Kensington: 9405]

Ambassador Extraordinary and Plenipotentiary, His Excellency Clarence L. Simpson (1956).

Vice-Consul, C. H. Dickinson-Fredericks, 13 New Burlington Street, W.1.

An independent Negro Republic of Western Africa, occupying that part of the coast between Sierra Leone and the Ivory Coast, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude $8^{\circ} 50'$, a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognized since 1847 as an independent State. The population is estimated at 1,600,000.

The executive power is vested in a President elected for 8 years, assisted by a ministry; there are two houses of Legislature, the Senate, with 10 members elected for six years, and the House of Representatives with 24 members elected for four years. There is no regular army, but there is an enlisted frontier force of about 2,000 men. The new artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports.

Liberia is receiving assistance under President Truman's Point Four Programme and technicians have been sent from U.S.A. to carry out various projects. A loan of \$15,000,000 has been negotiated with the Import-Export Bank to finance road construction. UNESCO has sent a team of teachers to start scientific education at Liberia College.

FINANCE

	1954
Revenue	\$11,776,657
Expenditure	12,853,857
External Debt	3,866,350
\$ = U.S. Dollar.	

TRADE

	1954	1955
Imports	\$22,723,521	\$25,064,859
Exports	26,378,143	42,839,791
Imports from U.K.	£13,798,044	£5,780,061
Exports to U.K.	1,384,430	2,094,078

The principal exports are rubber, iron ore, raw gold, piasava, palm kernels, palm oil and small quantities of cocoa and coffee. Iron ore deposits have recently been discovered and its export is being rapidly developed. Statistics published show a total export of 203,543 carats of uncut diamonds for the year 1955. The chief imports are metals, machinery, rice, tobacco, Manchester goods, provisions, salt, hardware, glass and earthenware, building materials, vehicles and petroleum products.

The language of the Republic is English. British Weights and Measures (but American dollars) are used.

CAPITAL. Ψ Monrovia. Est. Pop. 35,000. Ψ Marshall (5,000) is the chief port for rubber shipments. Ψ Harper (Cape Palmas), pop. 2,000, is one of the smaller ports of entry.

FLAG: alternate horizontal stripes (5 White, 6 Red), with 5-pointed white star on blue field in upper corner next to flagstaff.

BRITISH EMBASSY.

Monrovia

British Envoy Extraordinary and Ambassador Plenipotentiary and Consul-General (vacant).

Monrovia, 3,650 miles distant; transit by English steamers from Liverpool, 11 to 20 days; also by Netherlands, German and U.S. vessels from Continent and U.S.A. Air France, Pan American Airways and British West African Airways aircraft call at Robertsfield, 50 miles from Monrovia.

LIBYAN EMBASSY IN LONDON

58 Princes Gate, S.W.7.

Ambassador. Assayed Mahmoud Muntasser (1954).

Counsellor. Assayed Omer Baruni.

and Secretary. Assayed Ali Sunni Muntasser.

and Secretary. Assayed Muhsen Omaier.

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Anglo-Egyptian Sudan, on the South by French Equatorial and French West Africa, and on the West by Algeria and Tunisia. It consists of the three provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 810,000 square miles and a population estimated (1954) at 2,091,000. The people of Libya are principally Arab with some Berbers in the West and African negroes in the Fezzan, and there is a considerable Italian minority in Tripolitania. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The Southern part of the country lies within the Sahara Desert. There are no rivers and, as rainfall is precarious, a good harvest is infrequent. Agriculture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Gadames, Jofra, Sebha, Gat, Jalo, Bir Hakim and the Kufra group in the South-East. Exports from Libya include wool, cattle, sheep and horses, esparto grass, olive oil, sponges and hides and skins. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials and consumer goods.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais and Apollonia, are interesting to archaeologists, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli.

Communications in Libya are good in the coastal area, where a motor road runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. Elsewhere roads are poor and the transport inland is confined to caravan and occasional motor bus routes. Small railway systems exist in the Tripoli and Benghazi areas. There are airports near Tripoli (Idriss el Awal) and Benghazi (Benina) regularly used by commercial airlines, and at El Adem (near Tobruk).

Government.—Libya was occupied by Italy in 1911-12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct., 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as *Libia Italiana*. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the General Assembly on Nov. 21, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations.

Libya has a federal form of government and an hereditary monarchy. Government is by a two-chamber parliament. The Senate of 24 members, equally divided between the three Provinces, is nominated half by the King and half by the three Provincial Legislative Councils. The first Senate was wholly nominated by the King, but in future half the members are to be nominated every four years. The House of Representatives is an elected body at present consisting of 55 members, 35 from Tripolitania, 15 from Cyrenaica and 5 from the Fezzan. Members are elected on a basis of one for every 20,000 inhabitants and elections of all members are to be held every four years. Legislation may be initiated by the King, the Senate or the House of Representatives, except laws concerning the Budget or taxation, which may not be introduced by the Senate.

The three Provinces of Tripolitania, Cyrenaica and the Fezzan are each administered by a Governor assisted by an Executive and a Legislative Council.

Currency.—Libya entered the Sterling Area on January 3, 1952, and a new currency was introduced on March 24, 1952. The £ Libyan is equal to the £ Sterling and is divided into 100 piastres and 1,000 millimes. There are seven denominations of notes (£10, 5, 1, ½, and ¼, 10 piastres and 5 piastres) and five denominations of coins (1 and 2 piastres, 5, 2 and 1 millimes).

Grants have been made by the United Kingdom, France, Italy and the United States to foster Libya's economic development and technical assistance is being provided by the United Nations and the United States.

A treaty of alliance and friendship between the United Kingdom and Libya, together with military and financial agreements, was signed at Benghazi on July 30, 1953. The United Kingdom will provide financial aid to Libya for 20 years, paying her in each of the first five years £1,000,000 for economic development and £2,750,000 to assist the Libyan budget. Libya will make military facilities available to British troops (including the R.A.F.) which will be stationed in Libya under certain conditions. The United States Government is permitted under the terms of the United States-Libyan Base Rights Agreement of Oct. 30, 1954, to maintain armed forces and installations in Libya. A separate exchange of notes governs the financial assistance which the United States Government will provide for Libya's economic develop-

ment during the period of this Agreement which runs until Dec. 24, 1970.

Trade with U.K., 1955.—Imports, £4,211,478; Exports, £1,351,911.

CAPITAL. Tripoli and Benghazi are the joint capitals of Libya.

The principal towns with the latest available estimates of populations are Tripoli (142,000); Misurata (63,000); Benghazi (60,000); Homs-Cussabat (56,000); Derna (16,000); Barce (10,000); Tobruk (3,000); Sebha (1,000).

FLAG. The Libyan National flag is a tricolour of red, black and green horizontal stripes, bearing a white crescent and star in the centre.

BRITISH EMBASSY IN LIBYA

Ambassador Extraordinary and Plenipotentiary, His Excellency Walter Gerald Cloete Graham, C.B.E. (1954).

Counsellor and Consul-General (Benghazi), A. S. Halford.

1st Secretary (Tripoli), T. Peters.

1st Secretary (Commercial), E. B. Dunipace.

There are British Consular Offices at Benghazi and Tripoli.

LIECHTENSTEIN

(Fürstentum Liechtenstein)

Prince, Franz Josef II., b. Aug. 16, 1906; suc. Aug. 25, 1938; married March 7, 1943, Countess Gina von Wilczek

A Principality on the Upper Rhine, between Vorarlberg (Austria) and Switzerland, with an area of 59.61 square miles and a population (estimated, 1955) of 14,757. The main industries are machines and tools, cotton spinning and weaving and other textiles, calculating machines, pottery, artificial teeth, sausage casings, various apparatus, foodstuffs, and leatherware. The chief products are cotton yarn, cotton material, screws, needles, pottery, artificial teeth, sausage casings, precision instruments (e.g.—measuring instruments), vacuum pumps, coating of lenses, leather gloves, calculating machines, cameras and accessories, feathers for bedding, transport belting, kitchen stoves, electrical motors, cocoa-butter, tinned goods, socks and stockings. Revenue (1955), 5,965,442 Swiss francs; Expenditure (1955), 5,967,250 Swiss francs.

Trade with U.K., 1955.—Imports, £174,958; Exports to U.K., £202,301.

The language of the Principality is German.

FLAG: Blue and Red (Blue at the top, red at the bottom, with a gold crown in the blue part).

CAPITAL, Vaduz. Pop. (1950) 2,735.

British Consul-General, C. H. A. Marriott, C.B.E. (1949) (resides at Zurich, Switzerland).

LUXEMBOURG

(Grand-Duché de Luxembourg)

Grand Duchess, H.R.H. Charlotte, G.C.V.O., born Jan. 23, 1896, succeeded (on the abdication of her sister) Jan. 9, 1919; married, Nov. 6, 1919, Prince Felix of Bourbon-Parma (H.R.H. the Prince of Luxembourg, K.B.E.). *Heir Apparent, The Hereditary Grand Duke (Prince Jean), born Jan. 5, 1921, married, April 9, 1953, Princess Joséphine-Charlotte of Belgium, and has issue, Princess Marie Astrid, born Feb. 17, 1954, and Prince Henri, born April 15, 1955.*

Prime Minister, Minister of Foreign Affairs, Foreign Trade and Viticulture, M. Joseph Bech.

Finance and Armed Forces, M. Pierre Werner.

Justice, Public Works and Transport, M. Victor Bodson.

Education and Interior, M. Pierre Frieden.

Economic Affairs, M. Michel Rasquin.

Commissioner General for Economic Affairs, M. Paul Wiltwartz.

Labour and Social Security, M. Nicolas Biever.

Public Health and Agriculture, M. Emile Colling.

EMBASSY IN LONDON

27 Wilton Crescent, S.W.1.

[Sloane: 6231]

Ambassador Extraordinary and Plenipotentiary and Consul-General, Monsieur André J. Clasen (1955).

Counsellor, M. Camille W. Dumont.

A Grand Duchy in Western Europe, bounded by Germany, Belgium, and France. Established as an independent State under the sovereignty of the King of the Netherlands as Grand Duke by the Congress of Vienna in 1815, it formed part of the Germanic Confederation, 1815-66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory. On the death of the King of the Netherlands in 1890 it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the Treaty of Versailles, 1919, Germany renounced her former agreements with Luxembourg in respect of the customs union, etc., and in 1921 an economic union was made with Belgium (Belgolux). The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxembourg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also a member of the European Coal and Steel Community, the High Authority and Court of which have their seat in Luxembourg. Besides Belgolux, Luxembourg is also a member of the Belgium-Netherlands-Luxembourg Customs Union (Benelux).

The area is 1,000 square miles; the population (estimated, 1955) 370,000, nearly all Roman Catholics. There is a Chamber of 52 Deputies, elected by universal adult suffrage for 6 years, one-half renewable every 3 years. Legislation is submitted to the Council of State. The Grand Duchy is rich in iron-ore and possesses an important iron and steel industry with an annual productive capacity of over 3,000,000 tons. The revenue for 1956 was estimated at Francs 3,796,986,000, expenditure Francs 4,350,541,000. The Luxembourg franc has at present the same value as the Belgian franc and the latter is legal tender in the Grand Duchy. Exchange Rate, 140 Francs = £1. There are approximately 140 miles of railway. Exports to the United Kingdom, 1955, £2,448,876; imports, £380,597. The capital, Luxembourg, pop. (1951) 63,951, is a dismantled fortress. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch but French is the official language; all speak German and many English.

BRITISH EMBASSY

Luxembourg

Ambassador Extraordinary and Plenipotentiary, His Excellency Malcolm Siborne Henderson, C.M.G. (1955).

1st Secretary and Consul, A. A. W. Landymore
Vice-Consul, W. T. Wright.

MEXICO

(Estados Unidos Mexicanos)

President (1952-1958), Señor Don Adolfo Ruiz Cortines, assumed office, Dec. 1, 1952.

CABINET

Minister of the Interior, Lic. Angel Carvajal.
 Foreign Affairs, Lic. Luis Padilla Nervo.
 Finance, Lic. Antonio Carrillo Flores.
 Communications and Public Works, Ing. Walter C. Buchanan (acting).
 Navy and Marine, Vice-Adm. Roberto Gómez Maqueo.
 Education, Lic. José Angel Ceniceros.
 Health and Social Affairs, Dr. Ignacio Morones Prieto.
 National Defence, General Matías Ramos Santos.
 National Economy, Lic. Gilberto Loyo.
 Labour, Lic. Adolfo López Mateos.
 Agriculture, Señor Gilberto Flores Muñoz.
 Hydraulic Resources, Ing. Eduardo Chávez.
 National Property, Lic. José López Lira.

MEXICAN EMBASSY IN LONDON

48 Belgrave Square, S.W.1

[Sloane: 4037]

Ambassador (vacant).

Minister-Counsellor, *Chargé d'Affaires* and Acting Consul-General, Señor Don Gustavo Luders de Negri.

and Secretary, Señor Don Enrique Llano.

Commercial Counsellor, Señor Don Francisco Quijano.

Area and Population.—Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30' N. lat. and 87° to 117° W. long., and comprising one of the most varied zones in the world. It comprises 29 states, a territories, and the federal district of Mexico, making in all 32 political divisions, covering an area of 758,000 square miles, with a population (1954 estimate) of 28,849,465.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of Lower California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltépetl ("El Pico de Orizaba") on the east. In February, 1943, a new volcano (*El Pariquitin*) was in eruption about 250 miles from Mexico City and 20 miles from the town of Uruapan, but is no longer active. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher level, form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 6,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, the *Rio Balsas* and *Rio Papaloapan*. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest

fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Pátzcuaro*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

Government.—The Toltec invaders of Mexico gave place in the 13th century to the Aztecs, who were conquered in the 16th century by Spanish adventurers under *Hernán Cortés*, whose remains have been definitely located in the Temple of Jesus, Mexico City. They are contained in a marble vault, with the funeral garments.

Spanish rule was established at *Tenochtitlán*, a 14th century Aztec city (now Mexico City), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810-1821. In 1810 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. From 1837-1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the execution of the Emperor gave rise to the new Republic, which has endured to the present day. Presidents are elected for six years only. There is no re-election.

Under the Constitution of Feb. 5, 1917 (subsequently amended in detail) Congress consists of a Senate of 99 members, elected for 6 years, and of a Chamber of Deputies at present numbering 161 elected for 3 years.

Archaeological Remains.—Mexico is rich in archaeological remains, and work is proceeding in every district to remove the earth covering which for many centuries has kept them from view. Near the City of Mexico at Teotihuacán are a number of pyramids forming part of the great ceremonial centre of a pre-Aztec culture believed to date from c. 100-500 A.D. The *Pyramid of the Sun* is 761 feet from N. to S., and 725 feet from E. to W., and rises to a height of 216 feet. The *Pyramid of the Moon* is 426 feet by 511 feet, and rises to 180 feet. Other places of interest are Monte Alban and Mitla near Oaxaca, Palenque and Bonampak (Chiapas), Chichén-Itzá and Uxmal (Yucatán), El Tajín (Veracruz) and Tula (Hidalgo).

Communications.—Veracruz, Tampico, Progreso, and Coatzacoalcas (Puerto Mexico) are the chief ports on the Atlantic, and Mazatlán, Guaymas, Acapulco, Manzanillo and Salina Cruz on the Pacific. Registered merchant marine amounted at the end of 1953 to 215,920 gross tons, with 663 ships. There were 23,301 kilometres of railway track open in Mexico in 1954. Work is proceeding on the reorganization, rehabilitation and re-equipment of the systems, and on extensions in the East and South-East of the Republic. Various loans from the United States and from the International Bank for Reconstruction and Development have recently enabled the railways to buy certain quantities of rails, diesel locomotives, shop equipment and spare parts. The South-Eastern Railway, providing the first land communication between the peninsula of Yucatán and the rest of Mexico, was opened in 1950. Early in 1952 the Government bought the U.S.-owned Southern Pacific Railway of Mexico, which is being extensively rehabilitated.

The total length of paved road under federal maintenance at the end of 1954 was 26,412 kms. The Pan-American Highway, providing through

communication from the U.S. border at Ciudad Juárez to the Guatemalan border, was opened in May, 1950. Other main routes which it is planned to construct are from the U.S. border at El Paso to the U.S. border at San Antonio.

Durango-Mazatlan. Main routes Ciudad Juárez-Mexico, Guadalajara-Nogales and Guadalajara-Manzanillo, Veracruz-Puerto México and Salina Cruz-Puerto México were completed by the present Government.

The National telegraph system's lines were 161,471 kms. in length in 1954. International telegraph services to the U.S. border are provided by the nationalized Mexican Telegraph Company, and thence through the U.S. to Canada and Europe. Telephone communications with Canada and Europe are similarly effected through the United States. There is an extensive internal network of air services, its routes measuring 193,256 kms. Registered civil aircraft numbered 2,503 at the end of 1955, of which 661 were commercial and 1,842 private. The principal international air services are Mexico-New York direct; Mexico-Vancouver, Mexico-Windsor (Ontario) and Mexico-Lima direct; Mexico-Montreal via Tampa (Florida); Mexico-Los Angeles; Mexico-Chicago via Monterrey, San Antonio and Dallas; Mexico-Havana via Merida and Mexico-Miami; and Mexico-Guatemala City and other Central American capitals.

Production.—The total acreage of arable land is estimated at 60,000,000 acres, though only some 25,000,000 acres are considered arable without artificial irrigation. Approximately 13,000,000 acres are under cultivation. Grazing land is estimated at 80,000,000 acres and about 50,000,000 acres are under forest. The principal agricultural crops are maize, beans, wheat, chile-pepper, sugar cane, coffee, cotton, tobacco, tomatoes, chick peas, rice, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). About half the world's supply of henequen comes from the province of Yucatan. The forests abound in mahogany, rosewood, ebony, and caoutchouc trees.

The livestock numbered 14,797,000 cattle, 4,838,000 sheep and 7,201,000 goats, 2,968,000 horses, 1,085,000 mules, 3,002,000 donkeys, 5,523,000 swine and 38,555,000 poultry.

The principal industry (apart from agriculture) is mining. The mineral wealth is very great; silver and gold, copper, lead, zinc, and quick-silver, iron and petroleum are the leading products.

PRINCIPAL MINERALS

	1954 (metric tons)	1955 (metric tons)
Gold.....	12	12
Silver.....	1,241	1,494
Copper.....	54,806	54,675
Lead.....	216,624	210,815
Zinc.....	223,749	269,399
Iron.....	314,000	430,000
Coal.....	1,313,609	..
Graphite.....	21,784	..
Manganese.....	83,185	..

Crude petroleum production amounted to 83,653,278 U.S. Barrels in 1954 and 89,402,179 U.S. Barrels in 1955.

In 1938, the Government expropriated the properties of the principal foreign oil companies

operating in Mexico. The oil industry is now being operated by a Government organization called *Petroleos Mexicanos*, the board of which consists of five representatives of the Government and four of the petroleum workers.

On April 18, 1942, Mexico agreed with U.S. Government as to the amount of indemnity to be paid for U.S. oil companies which had not already reached agreement with the Mexican Government, and payment of this indemnity was completed in 1946. On Sept. 1, 1947, it was announced that the Mexican Government would pay \$81,250,000 in compensation to the shareholders, predominantly British, of the Mexican Eagle Oil Co., Ltd., with 3 per cent. interest from Mar. 18, 1938, to Sept. 18, 1948. Annual indemnification payments of \$8,600,000 were made from 1948 to 1955.

Woollen and cotton spinning and weaving, the making of footwear, and other branches of industry, are encouraged by high protective duties.

Defence.—The Army has a strength of one Infantry brigade, the Presidential Guard and 52 regular infantry battalions, 21 regiments of cavalry and a small number of artillery and engineers. The Navy has some 36 ships of all kinds, and the Air Force some 160 aircraft.

Language and Literature.—Spanish is the official language of Mexico and is spoken by about 90 per cent. of the population. About 2,500,000 inhabitants speak Indian languages, but half of these speak Spanish as well. Of those speaking indigenous languages only about 30 per cent. speak Nahuatl, 9 per cent. Maya, 8 per cent. Zapotec, 7 per cent. Otomi and 10 per cent. Mixtec, the remainder speaking other varieties of the minor linguistic families. The National Library at the capital contains about 500,000 volumes. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

Education.—Education is divided into primary, secondary and university. Primary education is free, secular and nominally compulsory. In 1955 there were 25,613 primary schools with 3,298,728 pupils, 464 secondary schools with 73,104 pupils, and 547 technical and commercial secondary schools with 79,245 pupils. The National University of Mexico was founded in 1533 and re-organized in 1920. There are 9 other Universities, including one exclusively for women. The prevailing religion is Roman Catholic. In 1950, 42.5 per cent. of the population above 6 years old were illiterate; while progress in reducing illiteracy has been steady over the last few years, it has barely kept pace with the rapidly increasing population.

FINANCE

	1956
Estimated revenue (Budget)....	Pesos 6,700,000,000
" expenditure (do.)....	6,696,374,000
	1954
Bonded Internal Debt	2,776,400,000
Debts of Mexican States	3,800,000
External Debt	860,900,000
Total Consolidated Public Debt.....	3,641,100,000

As from April 19, 1954, by agreement with the International Monetary Fund, the Rate of Exchange has been fixed at 12.50 pesos = \$ U.S. (See also p. 84.)

TRADE

	1955
Total Imports.....	Pesos 11,046,000,000
Total Exports.....	9,464,000,000
Imports from U.K.....	£7,548,505
Exports to U.K.....	£7,007,324

The imports (mainly from U.S.A.) consist largely of machinery and implements for industry, mining

(on the river of that name), is a junction of the southern routes from the Chinese province of Perchili and the western routes from Urga, in N.W. Mongolia.

Government.—In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kialkhta was recognized as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledged the suzerainty of China over Outer Mongolia, but by the Russo-Chinese Treaty of Aug. 25, 1945, China recognized the complete independence of Outer Mongolia.

MOROCCO

(The Shereefian Empire)

Sultan. H.I.M. Mohammed ben Youssef (Mohammed V) born August 10, 1910.

CHIEF MINISTERS

Prime Minister. M'Barek el Bekkai.

Deputy Prime Minister. M'Hamed Zeghari.

Ministers of State. Driss M'Hammedi (and Minister of the Interior); Mohammed Cherkaoui; Ahmed Guedira (and Minister of National Defence).

Foreign Affairs. Ahmed Balafrej.

Justice. Abdelkrim Benjelloun.

Finance. Abdelkader Benjelloun.

Commerce. Ahmed Lyazidi.

Area, Climate and Population.—Morocco is situated in the north-western corner of the African continent between latitude 28°–36° N. and longitude 2°–11° W. with an area estimated at approximately 180,000 sq. miles, and a total population (estimated, 1955) of 10,000,000. It is traversed in the north by the Rif mountains and in a general S.W. to N.E. direction by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarro ranges. The northern flanks of the Middle and High Atlas Mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate, as are the whole of the Anti-Atlas and Sarro ranges. The north-westerly point of Morocco is the peninsula of Ceuta which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the Pillars of Hercules, the western gateway of the Mediterranean.

The climate of Morocco is generally good and healthy, especially on the Atlantic coast, the country being sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are 81° F. and 45° F.; for Marrakesh 101° F. and 40° F. respectively.

Government.—Before the Treaty of Fez of 1912 access to Morocco was limited, though the country had been for years in treaty relationship with various powers, notably France, Spain, the U.K. and the U.S.A. The Treaty of Fez provided for the establishment of a French Protectorate over Morocco and France became responsible for the foreign relations of the Sultan and for the defence and administration of the country. The subsequent Franco-Spanish Treaty of 1912 provided for the establishment of a Spanish "sphere of influence" extending over northern Morocco with the exception of the Zone of Tangier. In this Spanish sphere occurred the joint Franco-Spanish military operations against Abd el Krim, the Rif

leader, which culminated in his surrender in May, 1926. Ceuta and Melilla (see under Spain) are Spanish "State Territories." Ceuta, situated opposite Gibraltar, has been a Spanish possession since the close of the sixteenth century and Melilla, further east on a rocky promontory of the Rif coast, has been a Spanish possession since 1492. The Penon (Rock) of Alhumbas, Penon de Velez and the Zaffarin Islands are Spanish possessions. The pacification of the French Zone of Morocco was completed in 1934.

Tangier.—Before the war of 1914–1918, negotiations between the British, French and Spanish Governments took place but the outbreak of the war prevented the proposed international régime for Tangier from being put into operation. A new Convention providing by the Tangier Statute for the international administration of the Tangier Zone was, however, signed by the three Governments at Paris on December 18, 1923. It was brought into force on June 1, 1925, and modified by a Protocol of July 25, 1928, by which Italy adhered to it. Under the Convention only native affairs were reserved to the Shereefian authority. In March 1941 Spain suppressed the international administration, deposed the Sultan's representative in Tangier and substituted for him the Sultan's Khalifa in the Spanish Zone. In August 1945 a conference was held at Paris at which the United Kingdom, the U.S.A., France and Russia were represented to discuss the re-establishment of the international régime in Tangier. It was decided to put into force, with modifications, the Statute of 1928 and in October 1945 the last Spanish troops left the zone and the Sultan's representative, the Mendoub, returned to take up residence. The Committee of Control consisted of representatives of Belgium, France, Holland, Italy, Portugal, Spain, the United Kingdom and the U.S.A. In 1953 further reforms of the Statute came into force.

British capitulatory rights in the French Zone were abolished on January 1, 1938, by the terms of the Franco-British Convention of July 29, 1937 and it has been indicated that H.M. Government are prepared to revise the still valid Treaties covering such rights in the Northern (formerly Spanish) Zone.

Arrangements were completed during 1951 with France for the use of air bases in the French Zone by the U.S. Air Force. Bases have been constructed at Nouaceur, Sidi Slimane and Benguerir.

On August 20, 1953, Sidi Mohammed ben Youssef, Sultan of Morocco for 25 years, was dethroned, and exiled together with his family. Sidi ben Moulay Arafat was proclaimed Sultan in his stead but although a series of reforms was instituted as a progressive handing over of government to the Moroccans, the Nationalist movement increased rapidly and civil disturbances became serious. The insistent Moroccan desire for the return of their former Sultan led to the withdrawal in September 1955 of Sultan Moulay Arafat. Mohammed ben Youssef was reinstated as Sultan and he returned to Morocco on November 16, 1955. The formation of a Moroccan Government quickly followed; negotiations with France which opened in February 1956 culminated in a joint Franco-Moroccan declaration of March 2, 1956, which recognized Morocco's independence and sovereignty. Negotiations with the same end in view were then engaged with Spain, resulting in a similar joint declaration on April 7, 1956. Moroccan negotiations both with France and with Spain on matters of defence, finance, economic and cultural relations were in progress in July 1956. Negotiations were also started with the Powers interested in Tangier and it is uncertain

what elements of the international régime will be retained after the integration of the Tangier Zone into the independent Moroccan State.

Production and Trade.—Morocco's main sources of wealth are agricultural and mineral. The construction of dams for irrigation and for electric power is an important factor in the country's development. Its industries are in the main such as rely on local raw materials. Importance is also attached to the tourist trade.

Among agricultural, forest and animal products produced in sufficient quantity for export are barley, wheat, citrus fruits, early and canned vegetables, leguminous plants, esparto, vegetable fibre, cork, skins and hides, casings, raw wool, fish (preserved and canned). There were an estimated 27,150,000 head of livestock in 1955, sheep predominating.

Morocco's leading mineral exports are phosphates, manganese, iron ore, lead and zinc. Other minerals produced include coal, petroleum, cobalt, graphite, copper, molybdenum, tin, antimony, ochre and gypsum. Production of phosphates reached 5,329,000 tons in 1955 and almost as much was exported. There is an oil refinery at Petitjean; 102,000 tons of crude petroleum were extracted in 1955, sufficient to cover one-seventh of the country's needs.

Morocco's main import requirements are petroleum products, motor vehicles and tyres, building materials, cotton piece-goods, fabrics, agricultural and other machinery, chemical products, clothing, household-ware, sugar, green tea and other foodstuffs.

The trade of Morocco is chiefly with France and the franc area, the U.S.A., Germany, Cuba, China, Great Britain, Spain, Italy, Holland and Belgium.

Imports into the Southern Zone in 1955 were valued at 173,874,000,000 francs, and exports at 114,152,000,000 francs, of which imports from the U.K. were valued at £5,956,809 and exports to the U.K. at £8,727,810. The imports into the northern zone in 1954 were valued at 915,786,000 pesetas and the exports at 622,239,000 pesetas; imports from the U.K. in 1955 amounted to £403,825 and exports to the U.K. to £1,523,670. The imports into the Tangier Zone in 1955 were valued at 9,961,000 francs and the exports at 1,362,678,000 francs.

There are British Chambers of Commerce at Casablanca (101 Boulevard 4ème Zouave) and at Tangier.

Finance and Currency.—The unit of currency is the Moroccan franc (linked to the French franc) in the Southern Zone and the Spanish peseta in the Northern Zone. Both currencies are legal tender in the Tangier Zone. The financial and currency aspects of Moroccan unity and independence have yet to be worked out.

Southern Zone government expenditure in 1955 amounted to 112,000,000,000 francs. Provisional budget figures for 1956 reached 124,000,000,000 francs; of this 90 milliard constituted the Ordinary Budget and 34 milliard the Extraordinary Budget. A deficit of over 20 milliard is foreseen. Budget deficits have in the past been met by loans from France. The 1955-56 budget estimates for the Northern Zone were 519,553,781 pesetas, with an estimated deficit of 300,000,000 pesetas to be met by a loan from the Spanish Treasury. The Tangier 1956 budget showed estimated revenue of 2,177,149,000 francs and estimated expenditure of 2,147,430,000 francs.

Communications: Railways.—The railway runs south from Tangier to Petitjean. From this junction, one line runs eastwards through Fez

and Oujda to Algeria, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due South from Oujda skirts the Morocco-Algeria frontier and reaches Colomb-Bechar in Algeria, the beginning of the Mediterranean-Niger project. Moroccan railroads cover 1,092 miles and traction is electric or by diesel locomotives.

Roads.—In the Southern Zone the road network is extensive (9,000 miles of road suitable for year-round traffic and some 20,000 miles of dry-season tracks). In the Northern Zone an asphalt road links Tangier with Tetuan, branches north to Ceuta, and continues eastward through Villa San Jurjo to Mellila, and on to Oujda through Berkane.

Tangier is distant from London about 1,200 miles or 1 day by air, 4 days by sea. There are air services between Tangier and Gibraltar connecting with B.E.A. services to London. Air-France and Air-Maroc operate internal services and many between Morocco and towns in France. There are also regular services to other European countries and to Algeria, French West Africa, French Equatorial Africa and the Belgian Congo.

Languages.—Arabic and Berber. Spanish and French are also spoken, mainly in the towns, the European population in Morocco being about 500,000. Five French, two Spanish and four Arabic daily newspapers are published.

Education.—There are numerous Koranic schools in Morocco, with a few secondary schools attached to mosques and at Fez there is a religious university of great repute in the Moslem world. European and a few native schools have been established in the former French and Spanish Zones and there are special schools for Jewish pupils.

CAPITAL. Rabat (population 156,200). The other chief towns are: Casablanca (682,390); Marrakesh (215,310); Tangier (183,730); Fez (179,370); Meknes (140,380); Tetuan (82,500); Oujda (80,590); Safi (56,750); Port-Lyautey (55,900). The towns of Fez and Marrakesh were capitals at various times in Morocco's past history.

FLAG. Red, with green pentagram (the Seal of Solomon).

BRITISH EMBASSY

Rabat

Ambassador Extraordinary and Plenipotentiary, His Excellency Harold Wifrid Armine Freese-Pennefather, C.M.G.

Counsellor, L. F. L. Pyman.

2nd Secretary, A. Ibbott.

Military Attaché, Brigadier A. C. F. Jackson, C.B.E. (resident in Paris).

BRITISH CONSULAR OFFICES

There are British Consular Offices at Rabat, Tangier, Tetuan, Casablanca, Fez and Larache.

NEPAL

Sovereign, King Mahendra Bir Bikram Shah; succeeded, March 13, 1955.

NEPALESE EMBASSY IN LONDON

12A, Kensington Palace Gardens, W.8

[Bayswater: 1594]

Ambassador, His Excellency Rama Prasad Manandhar, C.B.E. (1955).

1st Secretary, J. N. Singha.

Military Attaché, Major-Gen. Sridhar Shamsher Jang Bahadur Rana.

Nepal (area about 54,000 sq. miles; pop. (1955), 8,337,537) lies between India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest

(29,000 ft.). Amid the mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, maize, etc., are grown. The chief trade route is that between Katmandu and the Bihar frontier, to link which an 80-mile road is in course of construction with Colombo Plan aid. Nepal exports rice and other grains, hides, oilseeds, *ghi*, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, salt, spices, petrol, metals, &c. The revenue realized chiefly from land rent, forests, customs, &c., is approximately £2,000,000. A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget. The inhabitants are Mongolian in type, and their religions are Buddhism and Hinduism. The aboriginal stock is Mongolian with a considerable admixture of Hindu blood from India. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in about 1769 and has since given its name to all. During the 1914-18 and the 1939-45 wars, the Nepalese Government rendered unstinted and unconditional assistance to the British Government in men, money and material.

Following the advice of a committee set up in April, 1947, the hereditary Prime Minister announced in February, 1948, the setting up of a constitution based on manhood suffrage according to the citizens the civil rights enjoyed in modern democratic states.

In January, 1951, Maharaja Mohun Shamsher, Prime Minister of Nepal, announced that the time had come for the liberalization of the Government, and on February 18, 1951, the Sovereign, as Constitutional Monarch, proclaimed that Nepal would henceforth be governed by a Constituent Assembly elected on adult suffrage. An Interim Government was formed consisting of a Cabinet of 10 members. Maharaja Mohun Shamsher retained the post of Prime Minister, but five ministers were nominated from the Nepali Congress Party, which had for some time been pressing for reforms. An Advisory Assembly of 80 members was formed. In November, 1951, Maharaja Mohun Shamsher resigned the office of Prime Minister, and a new Cabinet was formed by Matrika Prasad Koirala, the majority of the members coming from the Nepali Congress. Mr. Koirala resigned in August, 1952 and an Advisory Council governed the country till June 1953, when Mr. Koirala was again appointed Prime Minister. On February 16, 1955, the then Crown Prince was invested with full powers by the late King, and on March 2 he dissolved the Cabinet and assumed "direct rule" of the country.

King Tribhuvan died on March 13 and was succeeded by King Mahendra.

The Advisory Assembly was dissolved on June 10, 1955. Various political discussions took place during the remainder of the year, and a new Cabinet was formed on January 27, 1956, composed of Mr. Tanka Prasad Acharya as Prime Minister, three other members of the Praja Parishad (Socialist) Party and three former Royal Advisers. A general election is to be held on October 8, 1957. A Five-Year Plan for the country's economic development has been announced and is under active study.

CAPITAL, Katmandu (est. pop. 175,000).

BRITISH EMBASSY

British Ambassador, His Excellency (Richard Bartram) Boyd Tollinton, C.B.E. (1955).

NETHERLANDS (or HOLLAND)

(Koninkrijk Der Nederlanden)

Queen of the Netherlands, Her Majesty JULIANA, born April 30, 1909; married Jan. 7, 1937, Prince Bernhard of Lippe Biesterfeld, G.C.V.O., G.B.E. (PRINCE OF THE NETHERLANDS), born June 29, 1912. Her Majesty has issue:—

- (2) H.R.H. Princess Beatrix Wilhelmina Armgard, born Jan. 31, 1938.
- (3) H.R.H. Princess Irene Emma Elizabeth, born Aug. 5, 1939.
- (4) H.R.H. Princess Margriet Francisca, born (at Ottawa, Canada), Jan. 19, 1943.
- (5) H.R.H. Princess Maria Christina, born Feb. 18, 1947.

Queen Juliana, the fifth monarch of the Netherlands and of the Royal House of Orange Nassau, was solemnly inaugurated in the New Church at Amsterdam on September 6, 1948. Following the abdication of QUEEN WILHELMINA, her mother (who succeeded her father King William III. after a regency, Sept. 6, 1898, and abdicated Sept. 4, 1948, after a happy reign of 50 years, reverting to the title of Princess Wilhelmina), the succession passed onward by force of law and under the compact with the people of the Netherlands which William I first entered into in 1814, represented by the oath to the Constitution taken by the Queen in the presence of both houses of the States-General.

CABINET

(Sept. 19, 1956)

Prime Minister, W. Drees, Labour.
 Vice-Premier and Minister for the Interior, Prof. van Oyen, Labour (interim).

NETHERLANDS EMBASSY IN LONDON

38 Hyde Park Gate, S.W.7

[Knightsbridge: 5040]

Ambassador in London, His Excellency Dr. Dirk Ulpko Stikker, G.B.E. (1952).
 Counsellor, A. H. Hasselman.
 1st Secretaries, Baron D. W. van Lynden; Jonkheer J. L. R. Huydecoper.
 and Secretary, Baron A. N. Van Aerssen Beijeren van Voshol.
 Attaché, R. Pesch.
 Military Attaché, Lt.-Col. J. L. Hollertt.
 Naval Attaché, Capt. Baron C. W. T. van Boetzelaer, M.V.O.
 Assistant Naval Attaché for Air, Lt.-Comm. W. de Groot.
 Air Attaché, Lt.-Col. J. W. Thijssen.
 Press Attaché, Dr. A. de Vries.
 Special Attaché, Dr. Jane de Jongh.
 Commercial Counsellor, Dr. H. van Blankenstein.
 1st Secretary (Commercial), D. Edelman.

Civil Air Attaché, Dr. D. Goedhuis.
Agricultural Attaché, Dr. Tj. Bakker.
Asst. Agricultural Attaché, L. W. Binkhorst.
Financial Attaché, Jonkheer G. O. J. van Tets.
Chancellor, Miss M. L. Zaalberg.
Consular Section, 38 Hyde Park Gate, S.W.7.
1st Secretary (Consular), N. Brat.
Vice-Consul, J. H. Delgorge.

Area and Population.—The Kingdom of the Netherlands is a maritime country of Western Europe, situate on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces plus the North-East Polder (reclaimed part of the Zuider Zee) and containing a total area of 34,830 sq. kms. The population on April 1, 1956, was 10,851,859. The live birth-rate in 1955 was 22.5 per 1,000 of the population, and the death-rate 7.5.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief agricultural products are potatoes, sugar beet, cattle, horses, swine, butter, wheat, rye, barley, oats, beans, peas, flax-seed, cheese, poultry, eggs, vegetables, fruit and flower bulbs and there is an important fishing industry. Among the principal industries are engineering, motors, shipbuilding, iron and steel, incandescent lamps, radio, electrical and telecommunications equipment, cotton, woollen, linen and rayon spinning and weaving, earthenware, glass, leather goods, boots and shoes, chemical and pharmaceutical products, oils, paper and board, cigars, sugar, "genever" liqueurs, beer, clothing, bicycles, tyres and rubber products. Coal production (1955) was 11,895,000 metric tons. Diamond-cutting, though still an important industry, has declined considerably in importance, now employing about 1,400 hands, compared with about 3,500 before the war.

Government.—In 1815 the Netherlands became a constitutional Kingdom under King William I., a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 16th century. The States-General comprise the *Eerste Kamer* (First Chamber) of 100 members, elected for 6 years by the Provincial Diets; and the *Tweede Kamer* (Second Chamber) of 150 members, elected for 4 years by men and women voters of 23 years and upwards. Members of the *Tweede Kamer* are paid.

General elections were held on June 13, 1956, for a new Lower House of the States-General. Numbers of seats gained by the various parties were as follows, results at the 1952 election shown in brackets: Labour Party (30, 34); Catholic People's Party (30, 33); Anti-Revolutionary Party (*Protestant*) (12, 10); Party of Freedom and Democracy (*Liberal*) (9, 9); Christian Historical Union (*Protestant*) (9, 8); Communist (6, 4); Political Reform Party (*Protestant*) (2, 2); Catholic National Party (2, 0). On June 17, Dr. Drees, the outgoing Prime Minister, was invited by Queen Juliana to form a new coalition government. The composition of the new cabinet was still under discussion on September 30, 1956.

The Upper House of the States-General was elected by the Provincial Councils after the General Elections. Representation was: Catholic People's Party, 17; Labour Party, 15; Anti-Revolutionary Party, 7; Christian Historical Union, 6; Party of Freedom and Democracy, 4; Communist, 2. The Labour Party gained one seat from the Communist Party.

Defence.—The post-war army is being formed as a component of the North Atlantic Treaty

Organization. The Royal Netherlands Navy is being built up to a modern force of one aircraft carrier, 2 heavy cruisers, 12 modern destroyers and 6 submarines, supported by an escort force of 24 frigates and a considerable number of ancillary vessels. The Air Force, which since 1953 has been independent of the Army with the title "Royal Netherlands Air Force," has been reconstituted since the war, and now forms an integral part of the air defences of the N.A.T.O. countries. After a period of reorganization and expansion it has now attained a considerable strength consisting mainly of jet-fighters which are divided between an air defence and a tactical air command. Part of the latter is integrated into a N.A.T.O. tactical air force.

Language and Literature.—Dutch is a West-Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used by many people in the Netherlands West Indies. Afrikaans, one of the two South African languages, has Dutch as its origin, but differs from it in grammar and pronunciation. There are eleven national papers, four of which are morning papers, and there are several regional daily papers.

Education.—Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. Secondary schools for working classes are numerous, well equipped and well attended. The principal Universities are at Amsterdam, Groningen, Leiden, Nijmegen (R.C.), and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (economics), Wageningen (agriculture), and Tilburg (R.C.) (commercial).

Communications.—The total extent of navigable rivers and canals is 3,620 miles (large rivers comprising 695 miles) and of main roads 1,702 miles. On January 1, 1956, the total length of the railway system amounted to 1,980 miles, of which about 1,028 miles were suitable for electric traction. The mercantile marine on Jan. 1, 1956, consisted of 1,399 ships of total 3,689,111 gross registered tons, of which all but about 100 ships were registered in metropolitan ports.

TRADE 1954 AND 1955

In 1955 Dutch imports amounted to fls. 12.2 milliard and exports to fls. 10.2 milliard, so that imports were covered by exports to the extent of 84 per cent. The Netherlands have removed quantitative restrictions on the great majority of imports in accordance with the agreement between O.E.E.C. countries. A Common Benelux liberalization list came into force in June, 1955. The extent of liberalization on December 31, 1955, was 91.1 per

cent. Imports from U.S.A. have been liberalized to an approximately equal extent. Quota lists for United Kingdom-Netherlands trade each year in non-liberalized items are established each year by negotiation. During 1955 further progress was made towards the establishment of a common trade policy in the three countries (the Netherlands, Belgium and Luxembourg) which already form part of the Benelux customs union.

The rate of overall industrial production rose from 121 in 1954 to 151 in 1955, and that of production per worker from 127 to 132 (1949 = 100).

Imports from U.K., 1955..... £106,248,412
Exports to U.K., 1955..... 132,106,370

BRITISH CONSULAR OFFICES

There are British Consulates-General in Amsterdam and Rotterdam, and Consular Officers at Willemstad and Aruba in the Netherlands Antilles and at Paramaribo in Surinam.

BRITISH COUNCIL

Representative, E. R. H. Paget, 268 Heeregracht, Amsterdam.

OVERSEAS TERRITORIES

I. Netherlands New Guinea:—

The territory of Netherlands New Guinea (estimated population 1954, 775,000), comprises the western half of the island of New Guinea. Mount Wilhelm is the highest point in Oceania.

It was decided at the Round Table Conference between Holland and Indonesia that the future status of New Guinea would be decided by negotiation between the two parties within a year of the transfer of sovereignty to Indonesia on December 27, 1949. A joint Dutch-Indonesian Commission was formed to investigate the facts of the case, and reported back to the two Governments in 1950. As a result of the failure of the two sides of the Commission to agree, the position of New Guinea remains unchanged under Dutch sovereignty. Governor of Netherlands New Guinea, Dr. J. van Baal.

II. Netherlands' West Indies:—

"Nederlandsch West-Indië" comprise Surinam (Dutch Guiana) in South America, and certain islands in the West Indies known as the Netherlands Antilles (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of Surinam is about 54,000 sq. miles, with a population of about 230,000; area of Netherlands Antilles, 436 sq. miles, population, 174,000. Under

the Realm Statute which took effect on December 29, 1954, Surinam and the Netherlands Antilles received autonomy in domestic affairs, as parts of the Netherlands Realm under the Crown. Agreement on their new status was reached after prolonged negotiations between the Netherlands Government and representatives of the territories concerned. Bauxite is an important export of Surinam. The United Kingdom has a considerable trade with the Netherlands Antilles, U.K. Imports in 1955 being £34,735,647; Exports to Netherlands Antilles, £12,527,602. The administrative capital of Surinam is Paramaribo (pop. 83,000); the capital of Curaçao is Ψ Willemstad (pop. 45,000); of Aruba, Ψ Oranjestad; of Bonaire, Ψ Kralendijk; of St. Martin, Philipsburg; of Statius (St. Eustatius), Oranjestad; and of Saba, Bottom. Governor of Netherlands Antilles, A. A. M. Struycken. Governor of Surinam, J. van Tilburg.

NICARAGUA

(República de Nicaragua)

President (Sept., 1956—May, 1957), Col. Luis Somoza, elected September 30, 1956.

Foreign Affairs, Dr. Oscar Sevilla Sacasa.

NICARAGUAN EMBASSY IN LONDON

Ambassador and Consul-General, Dr. Don Rubén Dario (1953).

CONSULATE-GENERAL IN LONDON

18 Mount Street, W.1

[Grosvenor 6844]

Auxiliary Consuls, Jack Edward Salem; Theodor Palmers.

Area and Population.—Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'–15° N. lat. and 83° 40'–87° 38' W. long., containing an area of 57,145 English square miles and a population (1954 estimate) of 1,224,450, of whom about three-quarters are mixed blood. Another 15 per cent. are white, mostly of pure Spanish descent, and the remaining 10 per cent. are Indians, negroes or mulattoes. The latter group includes the Mosquitos, who live on the Atlantic Coast and were formerly under British protection.

Government.—The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1519 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution took effect on May 1, 1951. The President is elected by direct suffrage for six years. Congress comprises a Senate of 15 members (together with ex-Presidents of the Republic) and a Chamber of Deputies of 55 members.

Agriculture and Industry.—The country is mainly agricultural. The major crops are coffee, cotton, sesame, sugar, rice and maize. Bananas, beans, cocoa and imbecacuanha are also important. Live-stock and timber production, already considerable, are capable of unlimited expansion. Nicaragua possesses deposits of gold and silver, both of which are mined and exported by United States and Canadian concessionaires.

Communications.—There are 270 miles of railway, all on the Pacific side, 3,159 miles of telegraph and 3,216 miles of telephone, and there are several powerful wireless stations at Managua. An automatic telephone system has been installed in the capital. Transportation, except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the

Honduras frontier in the north to the Costa Rican border in the south; the interoceanic highway, running laterally to Rama, whence there is a natural waterway to Bluefields on the Atlantic, is progressing and admits of a through passage in dry weather.

Until the advent of aircraft, the Atlantic littoral was practically isolated from the rest of the Republic and the chief centres of population, but LANICA Airways now have a daily service between Managua and the Atlantic littoral.

Language and Literature.—The official language of the country is Spanish. In 1956 there were 5 daily newspapers published at Managua, and 4 in the provinces. Education is backward, at least 60 per cent. of the population being illiterate. There is a University at León.

Consul, A. A. Bouston.

Vice-Consul, Olav Sole.

Area and Population.—Norway ("The Northern Way"), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,650 km., and the frontier between Norway and the neighbouring countries is 2,555 km. (Sweden 1,643 km., Finland 716 km. and U.S.S.R. 296 km.). It is divided into 20 counties (*fylker*) and comprises an area of 323,917 sq. km. with a population (1953) of 3,375,000. In 1954 there were 62,739 births (18.5 per 1,000 inhabitants), 29,158 deaths (8.6 per 1,000) and 26,977 marriages (8.0 per 1,000); the infant mortality rate in 1954 was 21.4 per 1,000 live births.

The Norwegian coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does

not appear to set from the second week in May to the last week in July, causing the phenomenon known as the *Midnight Sun*; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23. During the long winter nights are seen the multiple coloured *Northern Lights* or *Aurora Borealis*, which have a maximum intensity in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia. A similar phenomenon occurs in the Antarctic and is known as *Aurora Australis*.

Production.—The cultivated area is about one-fourth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are agriculture and forestry, mining, manufactures, fisheries, whaling and shipping. The most recent figures showed that 34 per cent. of the population lived on industry, 22 per cent. on agriculture and forestry, 9 per cent. on trading, 9 per cent. on transport and communications and 6 per cent. on fishery and whaling. Manufactures are aided by great resources of water power, estimated at 9,200,000 kw. at 75 per cent. efficiency, of which over 2,000,000 kw. are utilized. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country. In 1954 the total catch amounted to 1,864,039 metric tons. Whale oil production, chiefly from pelagic whaling in the Antarctic, was, in 1954, 1,042,000 barrels.

Government.—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden, under a personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Lagting* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

On April 8-9, 1940, Germany invaded Norway, and it was not until June 7, 1945, that the King was able to return from Great Britain to Oslo.

Defence.—Norway is a member of the North Atlantic Treaty Organisation, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. Extensive reorganization of the Norwegian armed forces is in progress. Compulsory national service lasts 18 months in the navy and air force and 16 months in the Army.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo (opened in 1811) was attended by 3,261 students and the University of Bergen (opened in 1948) by 435 students in 1954. The Norwegian Technical High School in Trondheim possesses University status and awards degrees in engineering and architecture. In 1954 it was attended by 1,105 students.

Language and Literature.—Norwegian is a branch of the Scandinavian languages and is the language of the mainland and of Svalbard. Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed in the time of the Reformation and Ludvig Holberg (1684-1754) is regarded as the founder of Norwegian literature, although modern Norwegian literature dates from the establishment of a national university at Christiania (Oslo) in 1811 and with the writings of Wergeland (1805-1845). Some of the famous names are Henrik Ibsen (1828-1906) the dramatist, Bjørnstjerne Bjørnson (1832-1910) journalist, dramatist and novelist and Nobel Prize-winner in 1903, Jonas Lie (1833-1908) novelist, Knut Hamsun (1859-1952) novelist and Nobel Prize-winner in 1920, and Sigrid Undset (1882-1949), champion of Norwegian womanhood and herself a Nobel Prize-winner in 1928. In 1954 there were 93 daily newspapers in the country with a total circulation of 1,490,000, and 105 newspapers publishing on two or three days a week with a total circulation of 453,000.

Communications.—The total length of railways open in 1955 was 4,472 km., of which 82 were private lines. The length of telegraphs and telephones in 1954 was 75,675 km. (State, 69,450) with 2,570,000 km. of wire (State, 2,357,000).

Civil Aviation.—On scheduled airlines operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartsselskap (DNL) by Braathens South American and Far East Airtransport (SAFE), and by Vestlandske Luftfartsselskap A.S. and Widerøes Flyveselskap and Polarfly A.S. in 1955:—kilometres flown, 13,358,000; passengers carried, 321,195.

Mercantile Marine.—The Mercantile Marine, Jan. 1, 1956, consisted of 6,106 vessels of 7,766,000 gross tons (vessels above 25 gross tons). The fleet now ranks third among the merchant fleets of the world.

SVALBARD

(Spitzbergen and Bear Island)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitzbergen ("Povungt Mountain") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantlement of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 1,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. In 1953 the production of coal, the chief mineral of the archipelago, was 426,000 tons.

The Svalbard Archipelago lies between 74°-81° N. lat. and between 10°-35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitzbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 360 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour 2½ to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49' - 71° 9' N. lat. and 7° 53' 9" E. W. long.) was joined to Norway by law of Feb. 27, 1930.

Norwegian Antarctica

BOUVET ISLAND (54° 26' S. lat. and 3° 24' E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° 50' S. lat. and 90° 35' W. long.), was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNHILD LAND (from 70° 30' to 68° 40' S. lat. and 24° 15' to 33° 30' E. long.) has been claimed as Norwegian since Feb. 17, 1931.

On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

EMBASSY IN LONDON

45 Maitland Road, Lancaster Terrace, W.2

[Ambassador: 266a]

Ambassador in London, Dr. Roberto Arias.

Counsellor and Consul-General (London), Señor Don César A. Guillén.

1st Secretary, Señor Don Rodolfo Estripeaut, Jr.

2nd Secretary, Señorita Rosa Palacios.

Consul-General (Liverpool), Señor Don José Antonio Grimaldo.

There are Consular Offices of the Republic at Newcastle, Glasgow, Birmingham and Belfast.

Panama on the isthmus of that name which connects N. and S. America, was formerly one of the nine Departments of Colombia. After a revolt (Nov. 3, 1903) it declared its independence and established a separate Government, with a single chamber legislature elected every four years and now consisting of 42 elected members. The area of the Republic is 31,890 sq. m., the population (1950) was 805,285 (excluding Canal Zone). The soil is extremely fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, coconuts, cacao, coffee, and cereals. The shrimping industry is playing an increasingly important rôle in the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years. The estimated total of children of primary school age (7-12) in 1955 was 130,400 and the average monthly attendance at primary schools was 137,729; children of post-primary school age (13-19) numbered 118,650 and the average monthly enrolment was 27,727. In 1955-56 there were 1,128 primary schools (State, 1,048; Private, 80) and 99 post-primary schools (State, 21; Private, 78). 2,226 students were enrolled at Panama University in 1955-56.

Language and Literature.—The official language is Spanish. There are 6 daily newspapers published in the capital, 3 of which print editions in English. There is also one English weekly newspaper.

FINANCE

	1955

THE PAPAL STATE

(Stato della Città del Vaticano)

Sovereign Pontiff (261st), His Holiness Pope Pius XII. (Eugenio Pacelli), born in Rome, March 2, 1876, elected Pope (in succession to Pius XI.) March 2, 1939.

The office of the ecclesiastical head of the Roman Catholic Church (*Santa Sede* or Holy See) is vested in the Pope of Rome, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles with a population of 3,124,688. During the reign of Pius IX. (1846–1878), the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comacchio, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of Unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 lire in cash and the income at 5 per cent. on 1,000,000,000 lire State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City at the census in March, 1947, was 940.

PARAGUAYAN EMBASSY IN LONDON

518 Cornwall Gardens, S.W.7

[Western 1253]

Ambassador in London (vacant).

Charge d'Affaires, Señor Ricardo Brugada Lopez Moreira.

Consul-General, Dr. Victor Manuel Jara.

Area and Population.—Paraguay is an inland subtropical State of South America, situate between Argentina, Bolivia and Brazil. The area is computed at 157,000 square miles, with a population (1950 Census) of 1,408,000.

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draught. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asunción; but is liable to shrink unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or "endless," is drained by Lake Ypoa, a large lagoon, south-east of the capital. The Chaco, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is practically a dead level, though a slight and uniform rise westward is now known to exist; it suffers much from floods and still more from drought.

Government.—Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain.

The Senate was abolished under the constitution adopted in 1940 and replaced by a Council of State nominated by the government. The Chamber of Representatives comprises 40 members. In 1954 women were accorded civil rights.

Production.—About three-quarters of the population are engaged in agricultural and pastoral pursuits, cattle breeding being the principal industry. In addition to canned meat, timber, quebracho extract, cotton, hides, yerba maté, tobacco, and petit grain essence (which are the principal exports), mandioca, sugar, maize, rice, citrus fruits and edible oils are also produced for home consumption. Grape fruit is now exported. The production of rice, wheat and ground nuts is being encouraged by the government. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad.

Communications.—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 60 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). A direct shipping service between Liverpool and Asunción and a fortnightly service between Hamburg, Antwerp, Rotterdam and Asunción were inaugurated in Jan. 1954; and a shipping service from New York was started early in 1955. Five air lines operate services from Asunción. *Aerolíneas Argentinas* operates a service with Sunderland flying-boats six times weekly between Asunción and Buenos Aires, stopping at Corrientes. Twice a week this service also calls at the river ports of Rosario and Formosa, and once a week at Posadas. *Briniff* (American) have a bi-weekly service through Asunción between Buenos Aires and the United States (calling also at Lima and La Paz). *Panair do Brasil*, a Brazilian company affiliated to Pan American Airways, operates a weekly service between Rio de Janeiro and Santiago through Asunción, and a weekly service between Rio de Janeiro and Buenos Aires, stopping at Sao Paulo and Asunción. *Pluma* (Uruguayan) carries on a thrice-weekly service between Montevideo and Asunción, while *Real*, another Brazilian airline, operates a service four times a week between Montevideo, Buenos Aires and Asunción, and a daily service between Rio de Janeiro and Asunción, calling at Sao Paulo.

Defence.—There is a permanent military force of about 8,000 all ranks. Two gunboats and a number of torpedo boats patrol inland waters.

Language and Literature.—The language of the country is Guarani (the idiom of the most advanced tribe of Indian inhabitants with whom the Spanish explorers formed an alliance) but Spanish is spoken in the larger towns. Three daily newspapers are published in Asunción.

Education.—Primary education is free and compulsory. There are a few secondary and special schools and a national university with close on 1,000 students.

FINANCE 1956	
Estimated Revenue.....	Guaranies 2,127,200,000
Estimated Expenditure.....	" 1,759,124,220
External Debt (Dec. 1955).....	" 218,323,000
Internal Debt (Dec. 1955).....	" 270,655,000

Paraguay continues to pay interest on the External Sterling Debt (3% Loans of 1886-96, and 1915).

Currency.—On March 1, 1956, following the advice of the International Monetary Fund, two official rates of exchange were introduced as follows: for exports and essential imports Gs.60 = \$U.S.1 (168 = £1), for all other imports Gs.85 = \$U.S.1 (238 = £1).

In June 1956 the free market rate was about Guaranies 350 = £1.

Trade.—The imports are chiefly articles of food and drink, textiles, vehicles, and machinery. The chief articles of export are timber, tannin, cotton, hides and meat products. Trade with the United Kingdom in 1955 was valued at: Imports, £648,343; Exports to U.K., £1,024,994.

CAPITAL. Ψ Asunción, about 1,000 miles up the River Paraguay from Buenos Aires, Pop. (1950) 206,634; other centres being Ψ Encarnación 33,664. Concepción 28,357 and Villaría 26,000.

FLAG: Three horizontal bands, red, white, blue (with the Arms of the Republic on white band).

3rd Secretaries, Azizollah Eskandary; Majeed Mehran; Cyrus Behnam.
Attaché, Mas'ud Farzaad.
Military, Naval and Air Attaché, Brig.-Gen. Mahmoud Amini.
Asst. Military Attaché, Col. Eskandar Azmoudch.

Area and Population.—Persia comprises an area of 628,000 sq. miles, with a population variously estimated between 16,000,000 and 20,000,000. It is mostly an arid table-land, encircled, except on the east, by mountains, the highest in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert.

The Persians are mostly Shi'ah Moslems but amongst them are a few hundred thousand Zoroastrians, Bahais, Sunni Moslems and Armenian Christians. There is also a substantial Jewish community. Civil and Penal codes based on those of France and Switzerland are in force.

Government.—Persia was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. After the war of 1914-18, the subsequent troubles and the signature of the Soviet-Persian Treaty of 1921, a vigorous Prime Minister, Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah, who had been absent from the country for some time, was deposed by the National Assembly, which banded over the government to the Prime Minister, Reza Khan, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlavi.

Owing to Nazi German penetration before and during the early part of the war of 1939-45, the Shah and his Government tended so far to favour the Axis powers that, after the German invasion of the U.S.S.R. in 1941, counter-measures became necessary; British and Soviet Forces entered the country from south and north on August 25, 1941, and expelled the agents of the Axis. On September 16, 1941, Shah Reza abdicated and left the country, nominating the Crown Prince as his successor. The Prince ascended the throne under the title of Mohammad Reza Shah Pahlavi.

Under the Anglo-Soviet-Persian Treaty of Alliance of January 29, 1942, the independence and territorial integrity of the country were guaranteed by the United Kingdom and the U.S.S.R. Evacuation by the forces of both powers was to take effect within six months of the signature of the armistice with Germany and her associates. On September 9, 1942, Persia declared war on the Axis powers and on February 28, 1945, on Japan. During the remainder of the war with Germany, Persia became one of the principal routes of aid to the Soviet Union. United States Forces, which had joined British and Soviet troops in Persia to participate in the delivery of aid to Russia, were withdrawn from the country at the end of 1945. British troops evacuated Persia, in accordance with the Anglo-Soviet-Persian agreement, by March 2, 1946, six months after the conclusion of hostilities with Japan. Soviet troops, nevertheless, remained; and when Communist disturbances took place in the north-west part of Persia known as Azerbaijan, they refused to allow Persian forces to enter the area, with the result that an autonomous government was established at Tabriz. Soviet forces, however, eventually left the country in the month of May.

This belated evacuation took place in accordance with an agreement which included provision for the formation of a Perso-Soviet Oil Company to operate in the north of Persia, subsequently rejected by the Majlis, and an understanding that the question of Azerbaijan should be peaceably settled. In December, 1946, Persian Government forces entered the province, virtually unopposed by the partisans of the autonomous Government, which itself collapsed upon the flight of the revolutionary leaders into the Soviet Union. The Tudeh (Communist Party) was suppressed in 1949.

In March, 1949, the Shah issued an Imperial Firman convoking a Constituent Assembly to make certain revisions to the Constitution and the Assembly was duly elected and convened on April 21. After this Assembly the Senate was formed for the first time.

On March 17, 1951, the Majlis adopted a Bill for the nationalization of the Persian oil industry, and on March 20, the Bill was approved by the Senate. On April 28, the Majlis agreed to a resolution, which was passed on April 30 by the Senate, recommending the immediate taking over of all installations, including those of "the late Anglo-Iranian Oil Company." On April 29 the Shah appointed Dr. Mussadiq Prime Minister. The oil company sought arbitration, but this was rejected by the Persian government, and on May 26 the British government applied to the International Court of Justice at The Hague for a declaration that this refusal to submit to arbitration was illegal. The application was not approved.

In August, 1953 after the Shah had appointed Gen. Zahedi as Prime Minister, fighting broke out between his followers and those of Dr. Mussadiq. The Shah temporarily left the country, but Gen. Zahedi's forces were successful, and Dr. Mussadiq was arrested together with a number of the members of his former Cabinet. In December, 1953, diplomatic relations with Great Britain, which Persia had broken off in October, 1952, were re-established, and in August, 1954, the oil dispute was settled by an agreement, ratified on October 29, which provided for compensation to the A.I.O.C. and for the production, refining and sale of Persian oil by a Consortium in which the A.I.O.C. have a 40 per cent. share (*Production and Industry, below*).

For the purposes of local government the country is divided into 10 Provinces (*Ustans*) comprising 76 Sub-Provinces (*Shahristans*), under Governors-General and Governors, respectively.

Defence.—The present strength of the Persian Army, mainly conscript, is approximately 125,000, including 10,000 officers and 40,000 N.C.O.'s. The N.C.O. cadre is up to establishment but officers are still under strength. The army, to which is attached a U.S. Advisory Mission, is well-equipped by 1939 standards. The present strength of the Persian Air Force is approximately 4,000. It is equipped with about 90 aircraft (most of which are obsolescent or obsolete) supplied by the United States. Six jet trainers are planned, of which two arrived in May 1956. The gendarmerie, to which is also attached a United States Military Mission, has been re-organized. The Persian Navy consists of a small fleet of sloops, gunboats and motor-boats in the Persian Gulf and a few motor-boats in the Caspian Sea.

Education.—Since 1943 primary education has been compulsory and free. There are over 5,000 schools, with perhaps 300,000 pupils, and also a few foreign schools in Tehran; there are Universities in Tehran and Tabriz, and University Colleges at Isfahan, Meshed and Shiraz.

Language and Literature.—Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kásim Mansúr, or Firdausi (A.D. 939-1020), Omar Khayyam, the astronomer-poet (died A.D. 1122), Muslihu'd-Din, known as Sa-di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hafiz (died A.D. 1389). The Persian Press consists of a large number of Tehran and provincial newspapers and periodicals. Two Tehran dailies and three weeklies have circulations exceeding 20,000 copies. Circulations in the provinces are very small. English and French dailies are published in Tehran.

FINANCE 1956-57	
Estimated Revenue.....	Rials 15,784,000,000
Estimated Expenditure....	19,865,000,000

The deficit will be covered in part by United States aid, also by cutting back certain items of expenditure already approved and increasing the price of several Government-monopoly commodities. This budget contains practically no provision for development since transactions under this heading are provided for in the Seven-Year Plan budget.

The rial was tied to the U.S. dollar from December 21, 1939, and the official rate is now fixed at Rials 32.5 = \$U.S. 1 (Rials 91 = £1 sterling). The effective rate is that fixed by the Bank Mellí Iran for commercial transactions (Rials 76.5 = \$U.S. 1, Rials 214.2 = £1 sterling).

Production and Industry.—While petroleum is the principal product and by far the greatest export, Persia, except for its desert areas, is essentially an agricultural country and 80 per cent. of the inhabitants depend for their living on the land. Sheep and goats are numerous and good wool is produced. There are extensive forests in the north and west, the conservation of which is an urgent problem. The cultivation of opium has recently been prohibited. A certain amount of progress has been made in the development of industry. Apart from petroleum, the principal industries are carpet weaving, cotton ginning, spinning and weaving (Isfahan, Tehran and Shahi areas), wool spinning and weaving, jute sacks, silk goods (Chalus), sugar, tea, fruit, caviar (Iranian Fisheries Company, Pahlavi), meat canning, distilling and brewing, tobacco and cigarettes. The oilfields had produced over 200,000,000 metric tons of oil from their first output to Dec. 31, 1946, and subsequent figures (in metric tons) were 1946, 19,858,471; 1947, 21,737,949; 1948, 24,871,000; 1949, 26,807,000; 1950, 35,000,000; 1951 (to Oct.) 17,000,000. Oil shipments were resumed on Oct. 30, 1954, and production figures since then have been (metric tons): 1954 (Oct. to Dec.), 1,735,496; 1955, 15,772,000; 1956 (Jan. to Apr.), 7,596,000.

The former functions of A.I.O.C. (now renamed "British Petroleum Company") in Persia were taken over for an initial period of 25 years by a consortium of 8 oil companies (including A.I.O.C., one French, one Dutch and five U.S.), A.I.O.C. receiving from Persia £25,000,000 cash in the 10 years from Jan. 1, 1957, in compensation for its oil assets in Northern Persia and in settlement of losses since 1951; and from the other members of the consortium for their shares, about £214,000,000 payable over 20-25 years. The consortium is responsible for the production, refining and sale of Persian oil through two operating companies, while "non-basic" operations are undertaken by the National Iranian Oil Company.

Communications.—The principal roads are from the frontier of Iraq at Khusrúvi to Tehran; from Tehran, Arak, Ahwaz and Khorramshahr; via Qum, Isfahan and Shiraz to Bushire; from Tehran into Azerbaijan, through Tabriz to Julfa (on the Soviet frontier) with branch roads into Turkey and Northern Iraq; from Tehran to Meshed; three roads through the Elburz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan, via Yazd and Kerman to Zahidan and thence to Meshed. Zahidan is connected by road with Quetta (Pakistan). Some of these roads traverse extremely difficult mountainous country; others are desert tracks. Generally speaking, Persian roads are not asphalted but gravel-surfaced. Railways have been constructed since 1927. The *Trans-Iranian Railway*, from Bandar Shah, on the Caspian Sea, to Bandar Shahpur, on the Persian Gulf, was inaugurated in 1938; this line has a total length of 872 miles, the total cost, after eleven years' work, being approximately £30,000,000. The branch line from Tehran towards Meshed has been completed as far as Sabzevar. The extension from Tehran to Tabriz has been completed as far as Mianeh. In the southern section there are seven tunnels through the Zagros range, the longest exceeding 1½ miles. There are also railroads from Tabriz to Julfa and from Zahidan to Mirjawa and branch lines from Ahwaz to Khorramshahr and from Khorramshahr to Tanuma in Iraq (on the Shatt el Arab, opposite Basra) were opened during the war. An extension from Qum to Kashan is now in operation. The alignment of an extension from Shahrud to Meshed is complete and track laying is in progress. Work on another extension from Mianeh to Tabriz has made considerable progress.

Civil Aviation.—In May, 1946, a Department of Civil Aviation was created, subordinate to the Ministry of Roads. Progress has been made towards establishing first-class International Airports at Tehran and Abadan, with secondary airfields in accordance with ICAO standards. *Iranian Airways* (non-government-owned) formed in May, 1946, runs services to some Middle Eastern countries as well as internal services. *Persian Air Services* (independently owned) formed in late 1954, runs non-scheduled passenger and freight services to adjoining countries and also to Europe. Air France, K.L.M., S.A.S., Iraqi, M.E.A., P.A.A. and L.A.I. operate services to Tehran. Lufthansa was scheduled to begin in September, 1956. B.O.A.C. planes call weekly at Abadan, but do not visit Tehran.

TRADE

	1953-54	1954-55
Imports .. Rials	5,324,266,000	Rials 7,425,015,000
Exports .. "	3,020,111,000	" 4,606,262,000

These figures are convertible at the official rate of exchange.

	1954	1955
Imports from U.K.....	£8,199,542	£17,748,241
Exports to U.K.....	3,292,412	16,948,676

The leading imports into Persia are cotton and woollen fabrics, tea, sugar, motor vehicles, railway material, industrial machinery, chemicals and pharmaceuticals, electrical goods, hardware, china-ware and cement; the principal exports are heavy oils, petrol, carpets, gum, fruits, hides and skins, animal casings, cotton, wood staves and rice. Import quotas and exchange restrictions are in force.

The principal countries trading with Persia are the U.K., U.S.A., Germany, Japan, India and the U.S.S.R.

CAPITAL: Tehran, population (1954) 1,123,907. Other large towns are Tabriz (272,000), Isfahan (204,000), Meshed (167,000), Shiraz (130,000), Resht (120,000), Kerman (53,000), Hamadan (122,000), Yazd (60,000), Bushire (15,000), Kermanshah (106,000), Kazvin (55,000), Arak (60,000), Abadan (94,000).

FLAG: White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

Señor Don Victor Pezet.

Vice-Consul, Señor Daniel Caballero; Señor
Augusto Valdivia.

Consul-General, Glasgow (122 Wellington Street),
Señor Don Luis R. Mendez.

*There are Consulates at Cardiff, Hull, Birmingham,
Newcastle upon Tyne and Belfast.*

Area and Population.—Peru is a maritime Republic of South America, situated between 0° 00' 48" and 18° 21' 00" S. latitude and between 68° 39' 27" and 81° 20' 13" W. longitude. The area of the Republic, including 4,440 square kilometres of the Peruvian section of Lake Titicaca and 32 square kilometres of the coastal islands, is 1,249,049 square kilometres (482,270 square miles approximately). The population enumerated at the census of 1946 was 7,023,111, which included an estimate for the jungle population of 350,000. The total population on December 31, 1953, was estimated at 9,125,750. In the last six months of 1953 there were 146,664 births, 50,243 deaths and 16,816 marriages.

Physical Features.—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being *Huascaran* (22,211 feet), *Huandoy* (20,855 feet), *Awasangate* 20,235 feet), *Arquipa* (or *Misti*) volcano (18,364 feet), *Hualcan* (20,000 feet), *Chachani* (19,037 feet), *Antajusha* (18,000 feet), *Pichupichu* (17,724 feet), and *Mount Meigs* (17,583 feet).

There are three main regions, the *Costa*, west of the Andes, the *Sierra* or mountain ranges of the Andes, which include the *Punas* or mountainous wastes below the region of perpetual snow and the *Montana*, or *Selva*, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are cotton, sugar, and petroleum. It contains the capital, Lima, and the great bulk of the white population. In the mountains, where most of the Indians live, are to be found minerals in great richness and variety, and cattle, sheep, llamas and alpacas are bred there. In the mountain valleys maize, potatoes and wheat are grown. Upon the eastern slopes of the Andes are to be found very large tracts suitable for cultivation and stock raising. The main products of the jungle are timber, barbasco and leche caspi.

Government.—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quichua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1919, 1933, 1936 and in 1939), and is that of a democratic Republic. The President is elected for six years by direct vote of the people. Congress is composed of a Senate and of a Chamber of Deputies, both Houses being elected for six years. Voting is compulsory for all Peruvian men and women between the ages of 21 and 60, for married men and women between 18 and 60 and for single men and women between the ages of 18 and 21 who are legally released from parental tutelage.

Production.—Agriculture and mining are the principal industries, employing over 70 per cent. of the inhabitants. The chief crops in order of value are cotton, potatoes and other vegetables, sugar, fruit, maize, rice, wheat barley, grapes and coffee. At the end of 1952 the gainfully employed population numbered 3,158,854, of whom 1,974,283 were absorbed in agricultural and pastoral activities. About 4,241,000 acres were under cultivation at the end of 1953 and steps are being taken to increase this area, which was probably larger in Inca times,

by more intensive irrigation. Minerals produced in 1954 were valued at soles 3,609,659.185 and included lead, zinc, copper, iron ore, petroleum, silver, gold, tungsten, bismuth, antimony and vanadium (of which Peru is the largest producer in the world with an output in 1954 of 736,243 pounds V metal content). The islands off the Pacific coast provided guano amounting to 288,173 metric tons in 1954.

Communications.—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the *Andean Highway* from the Pacific port of Callao, via Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo Maria, to Pucallpa, the river port on the Ucayali, one of the largest tributaries of the Amazon and accessible all the year round to vessels of 3,000 tons, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boqueron del Padre Abad*, a pass rediscovered on July 22, 1937, in the backbone of the Blue Cordillera.

The first railway was opened in 1850 and of the 2,344 miles of railways now operating, Government lines account for 586 miles, the Peruvian Corporation 1,067 miles and private enterprises about 691 miles. There is also steam navigation on the eastern rivers such as the Ucayali (see Andean Highway, above) and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and a number of international services call at Lima.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 30,000 of all ranks; the Navy includes 4 cruisers built at Barrow, 4 destroyers and 4 submarines, 3 frigates equipped with radar, a corvette and 6 submarine-chasers. There are military aerodromes at Talara, Chiclayo and Las Palmas (near Lima), an air transport squadron at Lima and a seaplane base at Iquitos. The air force is equipped with P.47's, Catalinas, D.C. 3's, Beavers, A.T.6's, F.86's, T.33's, Hunters and Canberras.

Education.—Elementary education is compulsory and free for both sexes between the ages of 6 and 14. In 1956 there were 1,127,321 pupils undergoing primary education and 92,098 attending secondary schools. There were 10,880 state primary schools with 24,912 teachers and 108 state secondary schools with 2,901 teachers, providing 5 year courses from 12 to 17. In addition there were 1,683 private schools providing primary and secondary education with 8,277 teachers and 317 schools conducted by religious orders. The State provides rural agricultural schools for Indians, mining schools and polytechnics in the more populated centres. The University of San Marcos at Lima, founded in 1551, had 7,875 students in 1954, and there are smaller universities at Cuzco, Arequipa and Trujillo, and a Catholic University at Lima.

Language and Literature.—Spanish is the official language of the country and notably of the original Spanish stock from which the governing and professional classes are mainly recruited, but more than half the nation is composed of Indians, whose principal languages (Quichua and Aymara) are widely spoken. Before the arrival of Pizarro, the Incas had attained a high state of culture, some traces

of which survived three centuries of Spanish rule. Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879-1882, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943. The first printed news-sheet in South America was issued at Lima in 1594 and in 1955 there were 5 main national daily papers, and 45 provincial ones with a small and purely local circulation. A chair of English was established in 1938 at the Universidad Mayor de San Marcos in Lima.

PHILIPPINE EMBASSY IN LONDON

9 Palace Green, W.8

[Western: 3646]

Ambassador in London, His Excellency Leon Ma. Guerrero (1954).

Area and Population.—The Philippines are situated between 21° 20'–4° 30' N. lat. and 116° 55'–126° 36' E. long., and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the country is 114,834 square miles, of which total 106,914 square miles are contained in the eleven largest islands, the 7,079 other islands having a combined area of 7,920 square miles.

The principal islands are:—

Name	sq. miles	Name	sq. miles
Luzon.....	40,422	Mindoro.....	3,759
Mindanao.....	36,538	Leyte.....	2,786
Samar.....	5,050	Cebu.....	1,793
Negros.....	4,906	Bohol.....	1,492
Palawan.....	4,550	Masbate.....	1,262
Panay.....	4,446		

Other groups in the Republic are the Sulu Islands (Capital, Jolo), Babuyan and Batanes; the Catanduanes; and Culion Islands.

The population of the Philippines at the 1953 census was 21,039,200.

The inhabitants, known as Filipinos, are basically all of Malay stock, with a considerable admixture of Spanish and Chinese blood in many localities, and over 90 per cent. of them are Christians, predominantly Roman Catholics. Most of the remainder are Mohammedan Moros in the south, and Pagans, mainly in the north. There is a Chinese minority estimated at 350,000, and other much smaller foreign communities, notably Spanish and American.

Government.—The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan who was slain by the natives of Mactan, a small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 1764 it was restored to Spain. In the nineteenth

century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. After the Spanish fleet had been destroyed in Manila Bay (May 1, 1898), Manila was captured by American troops with the help of Filipinos, on Aug. 13, 1898, and the islands were ceded to the United States by the Treaty of Paris of Dec. 10, 1898. However, the Filipinos, under Aguinaldo, rose up in arms on Feb. 4, 1899, against the U.S. Government, maintaining a desultory rebellion until it was quelled in 1902. Following this, the Philippine Commission was established, consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised a large measure of executive and legislative authority.

A measure of local independence was granted under the Jones Act of August 29, 1916. On March 24, 1934, the Tydings-McDuffie Law, gave the Philippines a "Commonwealth" Status. The Republic of the Philippines came into existence on July 4, 1946. The Constitution provides for a President elected for a term of four years, and a bi-cameral Congress, consisting of a Senate composed of 24 senators and a House of Representatives of not more than 120 members. No person may serve as President for more than eight consecutive years. The term of office of Senators is six years and of Representatives four years.

Language and Literature.—The official languages are English, Spanish and the National language (of Malay origin) Tagalog. About one-third of the people read or understand English. The literacy rate is nearly 60 per cent. There is a National library in the capital with branches in other urban centres, and a flourishing English press. Education accounts for nearly one-third of local expenditure in the national budget. Secondary and higher education is extensive. There are 15 universities recognized by the Government, including the Dominican University of Santo Tomas (founded in 1611), the first in the Far East and 25 years older than Harvard; the State-supported University of the Philippines at Manila (1908) and two Women's Universities, also at Manila. At Dumaguete there is Silliman University (Presbyterian).

Roads and Railways.—Communications suffered serious damage during the War of 1941–45 owing to the lack of proper maintenance during the Japanese occupation and destruction by bombardment. The highway system of approximately 17,000 miles of roads and streets is undergoing rehabilitation and extension. Before the war the railways, which were largely Government owned, operated approximately 845 miles of track of which some 625 miles were in operation in 1956. Rolling stock losses were also heavy, but have been largely made up, and the Manila railway is being converted to diesel traction.

Shipping.—The ports of entry are Manila, Cebu, Iloilo, Zamboanga, Davao, Jolo, Legaspi, Aparri, José Panganiban, San Fernando La Union and Tacloban. There are nearly 2,000 vessels of various types, totalling over 130,000 tons, engaged in coastwise and river traffic.

Civil Aviation.—Air transport plays an important role in inter-island travel and in communications overseas.

FINANCE

1956–57

Estimated Receipts..... P1,345,000,000

Estimated Expenditure..... 1,347,600,000

Exports to U.K. . .	1,713,784	1,919,744

The Philippines is a predominantly agricultural country, the chief products being rice (in which it is almost self-supporting), coconuts, maize, sugarcane, abaca (manilla hemp), fruits, tobacco and lumber.

The principal Philippine exports in both natural and manufactured states are coconuts, sugar, abaca, base metals, lumber, pineapples, embroideries and tobacco.

Towns.—Capital, Ψ Manila, in the island of Luzon; population (1948), including the adjoining areas of Quezon City and Rizal City, 1,180,611. The next largest cities are Ψ Cebu (167,503), Davao (111,263), Basilan (110,297), Ψ Iloilo (110,122), Ψ Zamboanga (103,317) and Bacolod (101,432).

Cultural Attachée, Mme. Z. Zawidska.

Consulate-General in London, 19 Weymouth Street, W.1.

Area and Population.—At the Census of Dec. 3, 1950, the population was 24,977,000 (estimated Jan. 1, 1956, 27,500,000), in a Census area of 121,000 sq. miles. Some changes in the frontiers of Poland have taken place, as foreshadowed at the Tehran Conference (Nov. 28-Dec. 1, 1943). In compensation for territories occupied by U.S.S.R. east of the Curzon Line, about 69,500 sq. miles, Poland received 40,400 sq. miles of Eastern Germany. The southern boundary is not affected, except that part formerly dividing Poland from Ruthenia (Czechoslovakia); the northern boundary is the Baltic Sea, from west of Königsberg (former capital of East Prussia) to west of Stettin in Pomerania; the western boundary is formed by the Rivers Oder and Neisse.

Government.—The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share and the Tsar assumed the title of King of Poland. Prussia acquired Poznań and Polish Pomerania, Austria acquired Galicia and the small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrians absorbed the Cracow Republic, Poland as an independent state ceasing to exist until the end of the War of 1914-18, when she became independent once again, after 150 years of foreign rule.

In March, 1939, Great Britain entered into a treaty with Poland (France had done so in 1921) guaranteeing Polish territory against aggression, and on Hitler's invasion France and England implemented their guarantee. On Sept. 17, 1939, Russian forces invaded Eastern Poland and on Sept. 21, 1939, Poland was declared by Germany and Russia to have ceased to exist and a line of demarcation was established between the German and Russian armies. This line passed along the River Pissa up to its confluence with the River Narew, then along this river, the Bug, the Vistula and the San. Shortly afterwards the demarcation line was moved further east. In 1939 the area of the Polish Republic was 150,572 sq. miles with a population of about 35,000,000 of whom 30 per cent. were National minorities (including 3,000,000 Jews). The predominant religion was Roman Catholic. Official reports show a rate of 29.1 per 1,000 live births and 10.4 per 1,000 deaths in 1954. The infant mortality rate was 83 per 1,000.

In 1947, in accordance with the newly adopted Constitution, a general election was held, but the *Sejm* thus chosen was not regarded by Great Britain and the United States as representative of the free and unfettered choice of the Polish people owing to intimidation and other irregularities. In December, 1948, the Polish Workers' Party and Polish Socialist Party fused in the new United Workers' Party (Communist). This party now closely controls every branch of State activity.

In January, 1952, a draft for a new Polish Constitution was published and thrown open to public discussion. The draft, which is modelled upon the Soviet Constitution of 1936, changes the title of the country to the Polish People's Republic (*Polska Rzeczpospolita Ludowa*). It makes no provision for the Presidency of the Republic. Private ownership of land is recognized in the draft and freedom of religion is supported. Church and State are to be separate. The draft was adopted on July 22, 1952. Elections to the *Sejm* were held in the following October, and the new Government took office in December 1952. Despite the guarantee of religious freedom in the Constitution, a campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, Cardinal Wyszyński.

Education.—Elementary education is compulsory and free. In 1949 there were over 3,000,000 pupils in elementary schools, and about 200,000 students in secondary, professional and trade colleges and schools. In addition to the Universities of Warsaw, Cracow, Poznań and Lodz there are 27 other seats of higher study.

Language and Literature.—Polish is a western Slavonic tongue (see U.S.S.R.), the Latin alphabet being in use, as in Czechoslovakia. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846-1916), Nobel Prize-winner for Literature in 1905, Bolesław Prus (1847-1912), and Stanisław Reymont (1868-1925), Nobel Prize-winner in 1924. In 1930 there were 70 daily newspapers published in Poland 21 of them at Warsaw.

Production and Industry.—On January 3, 1946, a decree was issued to provide for the nationalisation of mines, petroleum resources, water, gas and electricity services, banks, textile factories and large

retail stores. At present over 99 per cent. of Polish industry is stated to be "socialized", but nearly 80 per cent. of agricultural land is privately farmed.

Consulate-General, 103 Sloane St., S.W.1.

Area and Population.—Continental Portugal occupies the western part of the Iberian Peninsula, bounded on north and east by Spain, and on south and west by the Atlantic ocean; it contains an area of 34,500 square miles, with an estimated population (including the Azores and Madeira) of 8,654,436 (1953). It lies between 36° 58'–42° 9' 12" N. lat. and 6° 11' 48"–9° 29' 45" W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. The Azores and Madeira Islands in North Atlantic are politically an integral part of the Republic.

In 1954 there were 197,536 births, 95,088 deaths and 69,361 marriages.

Government.—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove King Manoel II, and the Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government. Under the Constitution of 1933 the President is elected for seven years by direct vote of the electors. The Prime Minister is appointed by the President, who also appoints the other Ministers on the recommendation of the Prime Minister. The Government is responsible only to the President. There is a single Chamber Legislature (*Assembleia Nacional*) of 120 members elected by direct vote of the electors. There is also a "Corporate Chamber" consisting of representatives of local authorities and industrial, commercial, cultural and religious interests, to which all bills introduced into the Chamber must be submitted for its opinion. The Legislature is in session for three months in the year. In the recess the Government legislates by decrees or decree-laws, of which the latter only must be confirmed by the legislature. Both men and women enjoy the franchise; but there are certain educational or tax-payment qualifications.

Production.—The chief agricultural products of Portugal are cork, wheat, maize, rye, rice, oats, barley, potatoes, beans, chickpeas, onions, olives, oranges, lemons, figs, almonds, resinous products, timber and wine (including the rich red "port" shipped from Oporto). Sardine fisheries are important.

There are extensive forests of pine, oak, cork, eucalyptus and chestnut, covering about 20 per cent. of the total area of the country, and lumbering is the second largest industry.

The principal mineral products are wolfram, lead, tin, antimony, pyrites, iron ore, coal, manganese, kaolin and slate. The principal manufactures are textiles, pottery and chemical products (fertilizers, etc.), paper and glassware.

The Six-Year Development Plan (1953–58) provides *inter alia* for extensive hydro-electric development (particularly of the Rivers Zézere, Cavado and Douro), irrigation and resettlement, afforestation,

the creation of a steel and tinplate industry, railway development and harbour work.

Defence.—Military service is compulsory for all men who are physically fit, less than 25 per cent. being exempted each year. The peace strength of the army is: officers 2,821 (active list), and about 2,000 (reserve); other ranks—permanent cadre of 34,000 with a yearly class of 31,000. A considerable amount of modern equipment has been received from the U.S.A. The navy consists of 860 officers and 6,375 ratings, manning a total of over 40 destroyers, sloops, submarines, mine-sweepers, patrol vessels and other small craft. All the larger ships are of pre-war or wartime construction, though some are being modernized. Four new ocean and 8 new coastal minesweepers were received from the U.S.A. during 1954–55, and a further 4 coastal minesweepers and 8 patrol vessels have recently been completed. The establishment of the Air Force is 500 officers and 1,984 men with 332 aircraft of all types.

Language and Literature.—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil. Portuguese language and literature reached the culminating point of their development in the *Lusadas* (dealing with the voyage of Vasco da Gama) and other works of Camões (Camões), born in 1524, died in 1580. Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is in a flourishing condition and there are more than twenty daily newspapers, of which 9 are published in Lisbon.

Education is free and compulsory for three years from the age of 7. In 1952 a series of new measures was decreed to ensure school attendance and to reduce illiteracy, which was 30 per cent. at the time of the 1950 Census. Secondary education is mainly conducted in State lycées, but there are also private schools. There are also military, naval, technical and other special schools. There are Universities at Coimbra (founded in 1290), Lisbon (1212) and Oporto (1212).

Communications.—On Jan. 1, 1955 there were 2,236 miles of railway open for traffic, of which 475 miles were narrow gauge. During 1955 work began on the initial stage of electrification of the Lisbon–Sintra (25 km.) and Lisbon–Entroncamento (125 km.) lines. The mercantile marine consisted (1954) of 270 vessels over 100 tons, with a total tonnage of 530,563. In 1954, 29,418,866 gross tons of shipping entered ports in Continental Portugal and adjacent islands, including 6,442,851 gross tons under the British flag.

Civil Aviation is controlled by the Ministry of Communications. There is an international airport at Portela, about 5 miles from Lisbon. There are 2 civil air lines, an inter-island service and services in Portuguese Africa. British European Airways operate weekly two-way London–Lisbon services. Aquila Airways operate Southampton–Lisbon–Madeira once weekly. There are altogether 19 airlines operating a total of about 300 services a month through Lisbon airport.

FINANCE

1956

Revenue (Budget).....	Escudos 7,679,500,000
Expenditure (do.).....	7,671,100,000

There are British Institutes at Oporto (Rua de Breyner, 79) and Coimbra (Rua Alexandre Herculano, 34).

BRITISH CHAMBER OF COMMERCE IN PORTUGAL, 4 Rua Victor Cordon, Lisbon (Branches at 6 Rua dos Clerigos, Oporto, and 134 Rua 5 de Junho, Funchal, Madeira).

Lisbon, distance 1,110 miles; transit, 50 hours; by air, 4 hours

MADEIRA AND THE AZORES

Madeira and The Azores are administratively parts of Metropolitan Portugal.

The *Madeiras* are a group of islands in the Atlantic Ocean about 520 miles west of Lisbon, and consist of Madeira, Porto Santo and 3 uninhabited islands (Desertas). The total area is 314 square miles, with a population of 269,769. Ψ Funchal in Madeira, the largest island (270 square miles), is the capital, with a population of 37,035; Machico (4,734).

The *Azores* are a group of 9 islands (Flores, Corvo, Terceira, Sao Jorge, Pico, Fayal, Graciosa, Sao Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 318,558. Ψ Angra, in Terceira, the capital of the group, has a population of 10,206. Ψ Ponta Delgada (22,448), where U.S. oil companies have installed tanks for refuelling shipping, and Ψ Horta (8,564).

PORTUGUESE OVERSEAS PROVINCES

CAPE VERDE ISLANDS, off the west coast of Africa, consist of two groups of islands, Windward (Santo Antao, Sao Vicente, Santa Luzia, Sao Nicolao, Bona Vista and Sal, the last-named having a South Atlantic air base, opened in 1949) and Leeward (Malo, Sao Thiago, Fogo and Brava) with a total area of 1,516 square miles and a population (Census of 1950) of 148,331. Estimated revenue and expenditure (1955) Escudos 62,300,000; imports (1954) Escudos 427,550,000; exports Escudos 426,486,000; shipping entries (1954) 9,068,011 gross tons. Capital, Ψ Praia (6,000). Vessels take coal and oil at Ψ Mendello, Sao Vicente (pop. 20,000).

SAO THOMÉ AND PRÍNCIPE ISLANDS, in the Gulf of Guinea (area 372 square miles, population (1950), 60,159). Estimated (1955) revenue and expenditure, Escudos 85,800,000; imports (1954) Escudos 125,250,000; exports, Escudos 248,300,000; shipping entries (1953) 948,012 gross tons. Capital, Ψ Sao Thomé (3,187). The fort of St. John Baptist on the Slave Coast is a dependency of the Province of Sao Thomé.

ANGOLA has an area of 488,000 sq. miles, pop. 4,145,266, with present capital Ψ St. Paul de Luanda (pop. 40,000), and capital designate Nova Lisboa, and includes also Kabinda and Portuguese Zaire (N. of Congo). Angola was restored to Portugal by the Netherlands in 1648. Estimated revenue and expenditure (1956)* Angolares 1,856,929,000; imports (1954), Angolares 2,753,884,000; exports, Angolares 2,957,436,000. Shipping entries (1954) 9,054,775 gross tons.

PORTUGUESE GUINEA, area 14,000 sq. miles, pop. (1950) 510,777 (capital Ψ Bissau, population 6,000) estimated revenue and expenditure (1955) Escudos 134,400,000; imports (1951) Escudos 162,106,000; exports, Escudos 143,635,000; shipping entries (1953), 186,783 gross tons.

A transcontinental railway from Benguela (Lobito Bay) in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Bulawayo and eastwards to Beira, is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

PORTUGUESE EAST AFRICA, OR MOZAMBIQUE, Lourenço Marques, Inhambane, Quilimane, Tete, Mozambique, Cape Delgado and Nyasa, together with the territory of Manica and Sofala, has a total area of 297,657 square miles, with a population (1950) of 5,732,317. Capital Ψ Lourenço Marques

* Angolar (of 100 Centavos or 20 Macutas) = Escudo. 1.

(48,000). Estimated revenue and expenditure (1955) Escudos 2,479,100,000; imports (1954), Escudos 2,449,844,000; exports, Escudos 1,581,241,000; shipping entries (1954), 18,610,556 gross tons.

ΨMACAU, in China, on the Canton River, has an area of 5 square miles and a population (1950) of 187,772. Estimated revenue and expenditure (1955), Escudos 115,200,000.

PORTUGUESE INDIA. Portuguese Possessions in India cover about 1,500 sq. miles and consist of the colony of Goa with the islands of Anjediva, Sao Jorge and Morcegos on the Arabian (Malabar) sea coast; *Damon* (Damao) with the territories of Dedra and Nagar-avelly on the Gujerat coast at the entrance to the Gulf of Cambay, together with the tiny island of Diu with coastal tracts of Gogola and Simbor. (Dedra and Nagar-avelly came under the *de facto* control of the Indian Government in July, 1954). The total area of these territories is 1,540 sq. miles, with a population in 1950 of 637,591. Estimated revenue and expenditure (1955) Escudos 225,400,000; imports (1951) Escudos 526,625,000; exports (1951) Escudos 157,791,000.

PORTUGUESE TIMOR (the eastern portion of the island), in the Malay Archipelago, has an area of 7,329 square miles, with a population (1950) of 442,378. Estimated revenue and expenditure (1955) Escudos 67,700,000; imports (1954), Escudos 63,187,000; exports, Escudos 39,008,000; shipping entries (1954), 158,328 gross tons. Capital, Ψ Dilly, pop. 7,000.

ROUMANIAN LEGATION IN LONDON

4 Palace Green, W.8

[Western: 9666]

Envoy Extraordinary and Minister Plenipotentiary, His Excellency Nicolae Corcinschi (1956).

Area and Population.—Roumania is a republic of South-Eastern Europe, formerly the classical *Dacia* and *Scythia Pontica*, having its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* and the addition thereto of a strip of Southern *Bessarabia* under the *Treaty of Paris* (April, 1856). The Isle of Serpents (*Insula Serpilor*) in the Black Sea, ceded by Turkey in 1878, carries a lighthouse maintained by the Danube Commission; area about 50 acres, with 8 inhabitants. The area in October, 1945, was estimated at 91,600 sq. miles, with a population (Census, 1956) of 17,489,794.

Government.—The principalities remained separate entities under Turkish suzerainty until 1859, when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown was vested. By the *Treaty of Berlin* (July 13, 1878) the Principality was recognized as an independent State, and part of the *Dobruja* (which had been occupied by the Roumanians) was incorporated. On March 27, 1881, it was recognized as a Kingdom.

The outcome of the War of 1914-18 added *Bessarabia*, the *Bukovina*, *Transylvania*, the *Banat* and *Crisana-Mamurash*, these additions of territory being confirmed in the *Treaty of St. Germain*, 1919, and the *Treaty of Petit Trianon*, 1920.

On June 27, 1940, in compliance with an ultimatum from U.S.S.R., *Bessarabia* and Northern *Bukovina* were ceded to the Soviet Government, the area affected being about 20,000 sq. miles, with a population of about 4,000,000.

In August, 1940, Roumania ceded to Bulgaria the portion of Southern *Dobruja* (about 3,000 sq. miles) taken from Bulgaria in 1919.

During 1947 the historical parties, the National Peasant Party and the National Liberal Party, were liquidated and the trials and condemnations of their leaders took place. On Dec. 30, 1947, King Michael was forced to abdicate and the establishment of the Roumanian Peoples' Republic was proclaimed. On February 23, 1948, the Social Democrats were swallowed up by the Communist Party when the two fused to form the Roumanian Workers' Party, since when the Social Democrat element has been steadily liquidated. On March 28, elections were held for the Grand National Assembly. The Front of People's Democracy, composed and dominated by the Roumanian Workers' Party, with its puppets the Ploughmen's Front, the National Popular Party and the Popular Hungarian Union, allocated itself 405 out of 414 seats; the new Constitution was passed and the Præsidium and Council of Ministers appointed. Thereafter the progress of the new People's Democracy towards socialism was hastened by the nationalization law of June 11, which brought under State control all industrial enterprises, mining, banking, transport and insurance. In October the United

Church was forcibly suppressed. At the turn of the year the dictatorship of the proletariat was officially established. The landowners were dispossessed, disfranchised and exiled on March 2, 1949. In 1950 the creation of collective farms was intensified. The liquidation of the middle classes continued, and on April 20 most buildings owned by former members of the "bourgeoisie" were nationalized without compensation.

The currency reform of January, 1952, effectively wiped out the savings of the peasants. In May, 1952, several ministers were attacked for opposing the currency reform, following a deviationist policy of economic opportunism, and sabotaging the economic development of Roumania. They were replaced by other ministers, and the changes were made the occasion for a tightening of the Workers' Party organization and the elimination of the remaining Social Democrats from the Government and Workers' Party.

A new Constitution, modelled on the Soviet Constitution of 1936, was adopted unanimously on September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for a new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the Front of People's Democracy. Further elections on similar lines were held in March, 1956.

Agriculture.—The soil of Wallachia and Moldavia is among the richest in Europe, producing wheat, maize, millet, oats, barley, rye, beans, peas and other vegetables. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, and the intense winter cold and summer heat, and fierce summer drought sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important. The total arable land under cultivation in 1955 was about 9,000,000 hectares.

Natural Resources and Industry.—Petroleum is the backbone of Roumanian industry and of the country's general economy. Production in 1936 (the peak pre-war year) amounted to 8,700,000 tons. In the immediate post-war period, production declined to less than half this figure, but it is now claimed that, with the discovery of new oil-fields, production has recovered and reached a new peak of over 10,500,000 tons in 1955. The country is also rich in other minerals, and produces in limited quantities coal, lignite, iron, gold, silver, mica and uranium. At the end of the first Five-Year Plan, 1951-55, the Government claimed to have exceeded their intention of increasing industrial production by 244 per cent. compared with 1950. A new Five-Year Plan was begun at the beginning of 1956 and it is planned to increase annual production by 60 per cent. compared with 1955 by the end of 1960. Production of crude oil is planned to reach over 13,000,000 tons per annum by 1960. No absolute production figures and practically no other statistical economic information is now published.

Language and Literature.—Roumanian is a romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. A spelling reform, which tended to stress the Slav aspects of the language, came into effect in 1954. The folk-songs and folklore, composed by the people themselves, and transmitted orally through many centuries (and

collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the *Editura de Stat*, which comes under the jurisdiction of the Council of Ministers. In 1948 there were 40 daily newspapers, of which 17 were published in Bucharest. The dominating religion is that of the Roumanian Orthodox Church.

Education is free and nominally compulsory with 2,400,000 in attendance, including over 400,000 at secondary schools and 80,000 in higher education. There are four Universities, at Bucharest, Jassy, Cluj and Timisoara. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are four polytechnics at Bucharest, Timisoara, Craiova and Jassy, two commercial academies at Bucharest and Brasov, and one agricultural college at Bucharest.

Communications.—In 1939 there were about 7,000 miles of railway open for traffic, of which about 1,000 miles were in Bessarabia and Northern Bukovina, now ceded to the Soviet Union. The mercantile marine, as a result of war losses, seizure and reparations, has been reduced to a moderate-sized sea-going steamers and a number of coastal and river craft. The principal ports are Constantza (on the Black Sea), Giurgiu, Braila, and Turnu-Severin (on the Danube), and Sulina (on the Danube Estuary). Work on a canal linking the Danube and the Black Sea just north of Constantza was abandoned in 1953 and no more was heard of the project to build a canal linking Bucharest with Danube Estuary.

FINANCE		1955
Estimated revenue.....	Lei	45,430,600
Estimated expenditure.....		39,196,700
Debt (March 31, 1947):—		
Internal.....		79,734,196,285
External.....		45,226,229,184

Up-to-date figures of the Public Debt are not available. No foreign loans (other than short-term commercial loans) are known to have been contracted since March, 1947. The internal debt was virtually wiped out by stabilization in August, 1947; there has been no internal loan issue since that date.

The Roumanian *Leu* (of 100 *Bani*) was revalued for the third time since the war on Feb. 1, 1954, foreign exchange rates being fixed at $\text{£}1 = 16.80 \text{ lei}$ and $1 \text{ U.S. \$} = 6.00 \text{ lei}$.

TRADE		1947
Imports.....	U.S.	\$61,300,000
Exports.....		34,300,000

No later figures have been published. Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; exports consist principally of maize, wheat, barley, oats, petroleum, timber and cattle. Trade with U.K., and particularly exports to Roumania, increased considerably after the War, but has been relatively small recently. In 1955 the value of U.K. exports was $\text{£}1,119,614$; that of Roumanian exports to U.K. $\text{£}3,490,516$. By far the greater part of Roumania's foreign trade is now with the Soviet Union and the other countries of Eastern Europe. Roumania is a member of the Soviet-sponsored "Council for Mutual Economic Assistance."

CAPITAL, Bucharest, on the Dimbovitza, population (1956) 1,236,905. Other towns are Arad (106,457), Braila (102,491), Sibiu (90,478), Satu Mare (52,099), Bacau (47,593), Resita (41,241).

FLAG: Three vertical bands, blue, yellow, red, with the emblem of the Republic (mountains, fir trees, and an oil derrick, with a rising sun in the

background, the whole surrounded by ears of wheat, at the top a five-cornered star, and at the bottom a ribbon with the letters "R.P.R." in the centre band.

24 Strada Jules Michelet, Bucharest 3

British Minister, His Excellency Alan Alves Dudley, C.M.G. (1956).

1st Secretary, E. G. Willan.

Military Attaché, Colonel J. Mars.

Air Attaché, Group Captain J. S. Kennedy, D.F.C. and *Secretary*, G. B. Chalmers.

2nd Secretary and Vice-Consul, D. S. Cross.

and Secretary, (Commercial), P. L. Morgan.

and Secretary and Legation Medical Officer, Dr. D. Macdonald.

SAARLAND

(Republic of Saarland)

CABINET

(Dec. 1955)

Prime Minister, Dr. Hubert Ney (CDU).

Justice, Culture and Education, Egon Reinert (CDU).

Economic Affairs, Transport, Agriculture and Food, Dr. Norbert Brinkmann (CDU).

Interior, Public Works and Reconstruction, Fritz Schuster (DPS).

State Commissioner for Reconstruction, Erich Schwertner (DPS).

Labour and Welfare, Kurt Conrad (SPD).

Finance and Forests, Dr. Adolf Blind (Non-Party).

Situated on the North-Eastern frontier of France, Saarland has an area of approximately 990 square miles (2,568 sq. km.) and a population (estimated 1956) of 998,185. Coal mining and steel production are the principal industries. By the Treaty of Versailles the Saar was placed for 15 years under control of the League of Nations and at the end of that period the territory reverted to Germany, following a plebiscite. Saarland was occupied by United States forces in March, 1945, and from 1945 to 1947 was incorporated in the French Zone of Occupation. Since 1947 it has been an autonomous state, in economic union with France. An agreement on the future political status of the Saar (so-called European Statute), signed by Germany and France on October 23, 1954, was rejected by the Saar population in a referendum on October 23, 1955. Of the valid ballots 67.7 per cent. were cast against, and 32.3 per cent. in favour of the Statute. Negotiations between France, the Saar Territory and Germany continued in 1956 and the expected conclusions were that the Saar would be placed under the jurisdiction of the basic law of the Federal Republic of Germany on Jan. 1, 1957; from the same date the economic and customs union with France would continue for three years, the Saar Territory to be integrated into the economy of the Federal Republic from Jan. 1, 1960.

Government.—Saarland is governed by an elected legislative assembly (*Landtag*) of 50 members. Following the general election of Dec. 18, 1955, seats were apportioned to the various parties as follows: Christian Democrats (C.D.U.), 14; Free Democrats (D.P.S.), 13; German Social Democrats (S.P.D.), 9; Christian People's Party (C.V.D.), 12; Communists (K.P.), 2.

Saar Mines.—The entire economy of Saarland is based on the rich coal deposits within the Saar territory. France's claim to the eventual ownership of the Saar mines was dropped following the Franco-Saar agreement of 1950. A new convention on the mutual exploitation of the Saar

mines for a duration of 50 years was signed in 1953 and a new organization, the *Saarbergwerke*, replaced the former *Régie des Mines* created by French law on Nov. 15, 1947. Under the new convention, Saar labour law became applicable in the mines.

CAPITAL: Saarbrücken, population (121,950). Other principal towns are Neunkirchen (44,514), Völklingen (41,157), Saarlouis (33,645) and St. Ingbert (27,059).

FLAG: Black, red and gold (1956).

SALVADOR

(República de El Salvador)

President, Lt.-Colonel José Lemus, took office Sept. 1956.

LEGATION IN LONDON

6 Regent Gardens, S.W.7

[Fremantle: 2455]

Minister in London, Colonel Don José Arturo Castellanos.

Secretary, Señor Don Miguel A. Serrano.

Consul-General in London, Señor Don Miguel A. Serrano.

Area and Population.—The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with a general breadth of about 50 miles, and contains an estimated area of 8,058 square miles, with a population estimated (1955) at a little more than 2,000,000. El Salvador is therefore one of the most densely populated countries of the new world. It is divided into 14 Departments.

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano (7,700 ft.) and the San Vicente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot and unhealthy, but towards the interior the altitude tempers the severity of the heat and much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 6, 1952, when the towns of Jucuapa and Chinameca were destroyed.

The principal river is the Río Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano. The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity, and (on account of its visibility from the ocean) is known as "The Lighthouse of the Pacific."

Government.—Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. In 1839 the Republic broke away from the federation of Central American States. The Constitutional and Governmental system of the Republic was changed as a result of the *coup d'état* on December 14, 1948, when the previous president, General Salvador Castaneda Castro, was deposed and the Council of Revolutionary Government took over. The Council decreed that all earlier constitutions were null and void and that the country had entered into a pre-Constitutional era. It then adopted certain parts of the Constitution of 1886, amended as it considered necessary.

Subsequently the Council appointed a Commission to re-write the Constitution. General elections for the Legislative Assembly were held on May 13, 1956.

Production and Industry.—The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as maize, sesame, indigo, rice, balsam, etc. Cotton-growing is on a large scale. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and sugar bags.

Education.—A high degree of illiteracy still prevails. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age. In recent Budgets, however, a high percentage of the national revenue has been devoted to education and great efforts are being made to eliminate the existing shortage of schools and teachers.

Language and Literature.—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There are 5 daily newspapers published at the capital, and 3 in the provinces.

Communications.—A British railway (the Salvador Railway Co.), nearly 100 miles in length, connects Acajutla with the capital and with the important coffee centre of Santa Ana. The International Railways of Central America have a line from the port of La Unión (on the Gulf of Fonseca) to the capital and another one in the opposite direction which taps the richest coffee growing region in the country and proceeds to Zacapa (in Guatemala) thereby affording continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The re-draining and re-paving of most of the capital has been completed, as has also the macadamizing or paving of several hundred miles of rural roads, many of which are now passable all the year round. There is a good motor road between the port of La Libertad and the capital (23 miles), while motor transportation is possible throughout the year between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. The highway is now completed through the country. Pan-American Airways and TACA connect El Salvador with the U.S., Mexico and Central American countries and KLM with Europe.

There are post and telegraph offices throughout the country, and there are now 18 broadcasting stations.

Hon. Commercial Attaché, S. M. Stadler, O.B.E.

There is a Consular Office at La Libertad. San Salvador is 5,700 miles from London.

SAN MARINO

(Republica di San Marino)

Regents, Two "Capitani Reggenti".

CONSULATE GENERAL IN LONDON

Victoria House, Southampton Row, W.C.1
(Holborn: 9861)

Consul General, G. T. MacEwan.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century. The Republic always resisted the Papal claims and its integrity was respected by Italy, with which country it concluded (June 28, 1897) a treaty of *amicizia e buon vicinato*; a new treaty on similar lines was signed on April 29, 1953. The Republic is governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. A Council of Twelve forms a Supreme Court of Justice. The area is 38 square miles, the population 14,000. There is an army of 180. The city of San Marino, on the slope of Monte Titano, has three castles, a fine church and Government palace, a theatre and a museum. The principal industries are wine, cereals, cheese, olive oil, cattle and ceramics, in addition to the utilization and export of worked stone from Monte Titano and production of white and hydrated lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on Oct. 26, 1899.

The revenue and expenditure (1952) balanced at 600,000,000 lire; there is no debt. The capital, San Marino, has a population of 2,000.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

Area and Population.—A National State in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.-9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenths of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 square miles, with an estimated population (Dec., 1955) of 29,089,142. Provisional returns for 1955 gave 502,106 births, 268,996 deaths and 235,839 marriages. Infantile mortality was estimated at 45-85 per 1,000 births.

Physical Features.—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho.

Government.—Phoenician traders visited the peninsula more than a thousand years before the Christian era, but they were traders rather than settlers, although Cadiz has preserved its identity and claims to be "the oldest city in the world." The Roman occupation of Spain was completed after the close of the Second Punic War (201 B.C.) and Hispania was divided into two provinces. After the decline of the Roman Empire the Italian elements, which had partly displaced the Celts and Iberians, were in turn disturbed by settlers of Germanic origin. After the union of Aragon and Castile in the 15th century Spain was ruled by sovereigns of the Aragon, Habsburg and Bourbon lines (with the intervention of a Republic 1873-74), Alfonso XIII. succeeding at birth in 1886. On April 14, 1931, following the results of the Municipal Elections, which showed anti-monarchical feeling to be extremely high in all the chief towns of Spain, King Alfonso XIII. left the country, and the Queen and other members of the Royal Family on the following day. A Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. Each Province had an Assembly (*Diputación Provincial*), and, with the approval of the *Cortes*, Provinces might combine to form an Autonomous Region within the Republic.

On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands, from which office he was dismissed by the Azaña Government. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*) while those of Communist views supported the Azaña (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the Popular Front Governments in Madrid and Barcelona surrendering to the *Nationalists* (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo (Leader) of the Empire and Chief of the State*. In the Civil War of 1936-39 over 1,000,000 lives were lost.

On July 1, 1942, General Franco announced the reconstitution of the *Cortes de España*, which was composed (May, 1955) of 515 members: *ex officio members*—16 ministers, 101 National Councillors of Falange, the President of the Council of State, the President of the Supreme Court of Justice, the President of the Supreme Court of Military Justice, 12 rectors of universities, 3 presidents of Royal Academies, and 52 mayors of the provincial capitals including Ceuta and Melilla. *Elected Members*—159 representatives of national syndicates, 101 representatives of municipalities, 4 representatives of Royal Academies, and 15 representatives of professions. *Nominated Members*—50 persons of high ecclesiastical, military, administrative or social rank.

On April 1, 1947, a draft law was submitted to the *Cortes* by which Spain was again to become a monarchy, but for the present without a King. A Council of the Realm was, however, to assist General Franco, and to select a successor after his

death or incapacity. On July 6, 1947, a referendum asking approval of this law was announced (July 27) to have received 14,745,163 affirmative votes out of a recorded total of 15,219,563. Under this law a Regency Council was to be set up in the event of the death or incapacitation of the Head of the State.

Defence.—**Army.**—Spain is divided into 9 Military Regions. Seven of these regions have a Corps headquarters with 2 Divisions (with the exception of the 8th region, which has one Division). The 9th region has no Corps headquarters, and only one Division. There are independent commands in the Balearics and Canaries. There are also one Armoured and one Cavalry Division. The Spanish Army in Morocco is being reorganized as a consequence of Moroccan independence.

The Navy consists of 5 cruisers, 18 destroyers, 8 frigates, 2 corvettes, 6 mine-layers, 2 gunboats, 16 minesweepers and 8 submarines, with many auxiliary craft.

The Air Force is divided into 5 Air Regions and 3 Overseas Commands. The original 16 Fighter, Bomber and Mixed Groups are now being reorganized on the lines of a modified version of the American Wingsystem. An Air Defence Command was set up in April, 1956.

Education.—Primary education is free, but compulsory attendance cannot be enforced because of the inadequate number of schools. Official figures of illiteracy in 1950 give a total number of illiterates, excluding children under 10, of 3,983,800, or 14.24 per cent. of the population (men, 9.86 per cent.; women, 18.30 per cent.). There are 11 Universities in continental Spain and 1 at La Laguna in the Canary Islands. The University of Salamanca was founded in 1230, Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Saragossa (1474), Santiago (1501), Seville (1502), Granada (1526), Madrid, Murcia (1915).

Language and Literature.—Castilian is the language of more than two-thirds of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipuzcoa and Alava. Catalan is a dialect in Provençal Spain, and Galician, spoken in the north-western provinces, is allied to Portuguese. The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra (1547-1616), Lope Felix de Vega Carpio (1562-1635) and Pedro Calderón de la Barca (1600-1681). The Nobel Prize for Literature has twice been awarded to Spanish authors—J. Echegaray (1904) and J. Benavente (1922). In 1949 there were 118 daily newspapers in the country, 8 being published at Madrid, 7 at Barcelona, 4 at Seville, 3 at Bilbao and 3 at San Sebastian.

FINANCE		1955
Revenue.....	Pesetas	30,610,000,000
Expenditure.....		29,483,000,000
Public Debt (Dec. 1955), excluding bond issues by semi-statal entities.		78,995,156,400

The official rate for the *peseta* (of 100 *céntimos*) is 30.66 = £1 sterling, but this is largely a nominal quotation, actual rates for imports and exports varying according to the type of goods involved. For other financial transactions and for tourists, the rate applied is that ruling on the "free" market.

Production and Industry.—The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges,

lemons, almonds, pomegranates, apricots and grapes. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The 1954-55 orange crop was over 1,200,000 tons, of which the greater part was exported, chiefly to Germany, the United Kingdom and France. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. Exports of agricultural produce represent about 60 per cent. of Spain's foreign currency earnings.

The livestock in 1950 included about 3,100,000 cattle, 642,000 horses, 732,000 asses, 1,089,000 mules, 16,344,000 sheep, 4,135,000 goats and 2,688,000 swine.

Spain's mineral resources of coal, iron, tungsten, copper, lead and other ores are variously exploited. Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1955 the coal mines produced 14,500,000 tons of coal. The production of Spanish and Rif iron ore amounted to 4,750,000 tons and pyrites to 2,050,000 tons. The iron and steel industries produced 970,000 tons of pig iron and 1,980,000 tons of steel. Production of electric power was 12,200,000,000 kwh.

The fishing industry, mainly sardines, tunny and cod, is of importance.

The principal manufactures are textile goods of all kinds, boots and shoes and other leather goods, ceramics, sewing machines, bicycles, chemicals and light engineering products.

Communications.—In 1953 there were 13,089 kilometres of broad gauge and 3,880 of narrow gauge of railway open. The sea-going mercantile marine in 1950 consisted of 1,392 vessels of 1,198,253 gross tons; in 1954, 11,840 ocean-going vessels entered Spanish ports. Civil aviation is under the control of the Minister of Air; there are several inland and international services in operation.

	TRADE	
	1954	1955
	*Gold Pesetas	*Gold Pesetas
Imports.....	1,880,028,000	1,893,180,000
Exports.....	1,421,611,000	1,364,958,000
Imports from U.K.....	£20,480,812	£26,109,389
Exports to U.K.....	28,804,889	32,176,590

* Gold pesetas 8.571 = £1.

The principal imports are cotton, jute, cereals, dried pulses, coffee, tobacco, cellulose, timber, nitrates, dyes, machinery, motor cars, petroleum products, coal, wool, agricultural tractors and machinery. The principal exports are iron and wolfram ores, cork, hides, perfume essences, salt, fish, vegetables, citrus fruits, wines, potash, olive oil, mercury, sheepskins, lead, pyrites, tinned fruit, bananas and tomatoes.

CAPITAL, Madrid. Population (estimated, Dec. 31, 1953), 1,699,775. Other large cities are Ψ Barcelona (1,321,878), Valencia (533,634), Ψ Seville (397,889), Ψ Malaga (285,438), Zaragoza (277,482), Granada (232,054), Ψ Santander (109,031), Santa Cruz de Tenerife (108,120).

BRITISH COUNCIL

Representative, A. J. Montague, O.B.E., Calle de Almagro 5, Madrid.

There are British Institutes at Madrid, Barcelona, Seville and Valencia.

BRITISH CHAMBER OF COMMERCE OF SPAIN, Alcalá 45, D (Segundo), Madrid; Paseo de Gracia II (Segundo), Barcelona.

Madrid, 1,150 miles; transit, 45 to 50 hours.

The BALEARIC ISLES are an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Iviza and Formentera), and seven smaller (Aire, Aucanada, Botafoc, Cabrera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 square miles, with a population of 433,444. The archipelago forms a province of Spain, the capital being Ψ Palma in Majorca, pop. 138,071; Ψ Mahon (Minorca), pop. 20,000.

THE CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 696,982. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote, Fuerteventura and the islets of Alegenanza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at Ψ Las Palmas (pop. 194,815, 150,010) in Gran Canaria, where U.S. oil companies have installed tanks for re-fuelling shipping; and *Santa Cruz de Tenerife* (Tenerife, La Palma, Gomera and Hierro), with seat of administration at Ψ Santa Cruz in Tenerife, pop. 106,798.

ISLA DE LOS FAISANES or ILE DE LA CONFÉRENCE is a Franco-Spanish condominium, under the Treaty of Bayonne Dec. 2, 1856, and March 27, 1901. It lies at the mouth of the Bidasoa in La Higuera bay. It is uninhabited.

Ψ CEUTA is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with a population of 67,790.

Ψ MELILLA is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492. The population is 94,319. Ceuta and Melilla are parts of Metropolitan Spain. There are British Consulates at Ceuta and Melilla.

Spanish Colonies

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population estimated in 1935 at 951,000.

SPANISH GUINEA, consisting of the islands of Fernando Póo and Annobon, the Corisco Islands and Río Muni (mainland). *Fernando Póo* lies in the Bight of Biafra in 3° 12' N. lat. and 8° 48' E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at 34,200. The capital of Spanish Guinea is Ψ Santa Isabel (pop. 9,000) on the island of Fernando Póo. The total area, mainland and islands, is about 10,000 sq. miles, with an estimated population of 204,495, of whom about 4,124 are whites.

Annobon Island (Anno Bom), in the Gulf of Guinea, in 1° 24' S. lat. and 5° 3E. long.; population 1,410.

Corisco Islands, consisting of Corisco, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

Río Muni is a coastal settlement between Cameroons and French Congo (1° N.—2° 10' N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Ψ Bata (the principal town) on the coast.

WESTERN SAHARA—Spanish possessions in the Western Sahara extend from N. of Cape Blanco to S. of Cape Ifni, exclusive of Wadi Draa (Treaty with France, Nov. 27, 1912) but including the Ifni enclave. The Colony includes Río de Oro, La Agüera and Ifni, and lies approximately between 21° 20'–26° N. lat., extending eastwards to about 13° W. long. Total area about 100,000 sq. miles (including part of the waterless Sahara, with a sparse population of wandering Moslem Arabs), total population about 32,000. Capital, Ψ Villa Cisneros, pop. about 250.

SPANISH MOROCCO.—In addition to Ceuta and Melilla, Spain exercised until 1956 a protectorate over a part of Northern Morocco. Moroccan independence was proclaimed after negotiations with France and Spain in 1956 (see "Morocco"). Remaining Spanish settlements on the Moroccan seaboard are:—

Alhucemas, the bay of that name, includes six islands; population 366.

Peñon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 450.

The Chaffarinas (or *Zaffarines*) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 610.

SUDAN

(Republic of the Sudan)

Council of State, Sayed Abdel Fattah el Maghrabi; Sayed Ahmed Mohammed Yasin; Sayed Dardiri Mohammed Osman; Sayed Sincio Iro; Sayed Ahmed Mohammed Salih; assumed office Jan. 2, 1956.

CABINET

(July 7, 1956)

Prime Minister, Sayed Abdullah Khalil.

Deputy Prime Minister and Minister of Agriculture and Education, Sayed Mirghani Hamza.

 3 Cleveland Row, W.1.

[Trafalgar: 8080]

Ambassador Extraordinary and Plenipotentiary, Sayed Awad Satti (1956).
Counsellor, Sayed Abdel Karim Marghani.
Cultural Attaché, Sayed Ahmed el Mardi Gobara.
Press Attaché, Sayed Hassan Mohammed el Amin.
3rd Secretary, Sayed Mohammed Osman Shendi.

Area and Population.—The Sudan extends from the southern boundary of Egypt, 2° N. lat., to the northern boundary of Uganda, 3° 36' N. lat., and reaches from French Equatorial Africa about 21° 49' E. (at 12° 45' N.) to the north-west boundary of Eritrea in 38° 35' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 950 miles.

The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Ethiopia; on the south lie Kenya Colony, the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa and Libya.

The Nile enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Atbara confluence to the Mediterranean the river has a course of close on 1,716 miles, and from its sources to the confluence its length may be reckoned at 1,810 miles, giving a total waterway of 3,526 miles. Between Khartoum and Wadi Halfa occur five of the six Cataracts.

The estimated area is about 976,750 sq. miles, with a population of 10,066,676, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 8,000 Europeans. A Census of Population was in progress in 1956. The Arabs and Nubians are all Moslems. The Negroes are generally pagans, but some have been converted to Christianity.

Government.—By virtue of the Condominium Agreement of 1899 between H.M. Government and the Egyptian Government, and Article 11 of the Anglo-Egyptian Treaty of 1936, the Sudan was administered by a Governor-General on the joint behalf of Great Britain and of Egypt.

On February 12, 1953, an Anglo-Egyptian Agreement guaranteed to the Sudanese the right to determine their own future and reserved the sovereignty of the Sudan until the day of self-determination for the Sudanese. The first Sudanese General Election was held at the end of 1953.

The Sudan House of Representatives on Dec. 19, 1955, voted unanimously a declaration that the Sudan was a fully independent sovereign state, and on Jan. 1, 1956, the Republic was proclaimed and was recognised by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. Sudan has an all-elected House of Representatives with 97 seats; and a Senate of

30 elected members and 20 members nominated by the Council of State.

Education.—Arabic has been adopted as the national language, and the Government is taking an increasing part in education in the southern provinces, which has hitherto been largely in the hands of various Christian Missions. The University College of Khartoum (formerly Gordon Memorial College) was raised to university status on July 24, 1956. In the North there are 6 boys' secondary schools with 1,773 pupils; 32 intermediate schools with 5,001 pupils; and 324 elementary schools with 53,618 pupils. At Bahkt er Ruda in the Blue Nile Province, is the Institute of Education, where about 300 schoolmasters are in training. For girls there are a secondary school in Omdurman with 128 pupils, 6 intermediate schools with 738 pupils and 154 elementary schools with 22,065 pupils. There are 3 small teacher training colleges with a total of 225 woman students. In the North there are 140 non-government schools of varying grades with about 14,000 boys and 3,000 girls in attendance. Upwards of 516 sub-grade schools (state-aided) and some 119 "Khalwas" (indigenous Koranic schools—also state-aided) provide a varying standard of education for nearly 50,000 pupils.

Eight technical intermediate schools provide students for the nearly completed Technical Institute in Khartoum. In the southern provinces there are now one Government secondary school with 187 boys, 3 Mission and 5 Government intermediate schools, with 750 boys; and 57 boys' and 24 girls' elementary schools, with a total attendance of 6,370 boys and 2,030 girls.

Production.—The principal grain crop is *dura* (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food and export crops. Egyptian and American-type cottons are grown, the total value of the crop in 1952-53 being £E27,000,000. The Sudan Gezira Scheme, irrigated from the Sennar Dam on the Blue Nile, provides most of the high-quality long staple cotton.

Livestock are the mainstay of the nomadic Arab tribes of the plains and the negro tribes of the river and swamp country in the south.

Communications.—The railway system (3 ft. 6 in. gauge) has a route length of 2,138 miles (including 41 miles of a new extension south of Sennar), linking Khartoum with Wadi Halfa, Port Sudan, Wad Medani Sennar, El Obeld, Kassala and Gedaref. Regular rail and the Nile Steamer Services connect with the Egyptian State Railways to the North, and with the East African Railways and Steamers System to the South. Port Sudan is a well-equipped modern seaport. Sudan Airways run regular services from Khartoum to many parts of the Sudan.

FINANCE

	1953-54*
Revenue.....	£E31,000,000
Expenditure.....	27,000,000

* Estimated.

£E = Egyptian Pound of 100 Piastres.

Exchange Rate 97.50 Piastres = £1 sterling.

TRADE

	1954	1955
Total imports	£E48,491,703	£E48,803,738
Exports	40,457,978	51,373,902
Imports from U.K. . .	£15,721,165	£13,509,742
Exports to U.K.	17,082,655	14,874,466

The principal export is cotton, the value of which, together with cotton-seed, amounted in

1955 to £E33,380,812. The chief imports are cotton and silk piece goods, iron and steel ware, machinery, tea, wheat flour, coffee, bags and sacks, petroleum products, motor vehicles, and tobacco.

CAPITAL, KHARTOUM. The town contains a large mosque for Moslems, an Anglican Cathedral, and the University College, with extensive Government buildings. Population, 82,673. Omdurman has a population of 125,000.

FLAG: Tricolour, blue, yellow and green stripes.

BRITISH EMBASSY

Khartoum

Ambassador Extraordinary and Minister Plenipotentiary, His Excellency Sir Edwin Arthur Chapman-Andrews, K.C.M.G., O.B.E. (1956).

THE SUEZ CANAL

The Suez Canal.—The *Compagnie Universelle du Canal Maritime de Suez* (1 Rue d'Astorg, Paris VIII) is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1956, £28,982,544). Since 1924 each 500 franc share has been divided into two 250 franc shares.

The Suez Canal was opened in 1869. The total length of the canal is 101 miles, with a minimum width of 60 metres (196 ft. 10 in.). Vessels drawing up to 10.67 metres (35 feet) are allowed, under certain conditions, to use the canal. The average time for the transit through the canal is 11 hours 17 minutes (1955). By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 directors, of whom 9 are British (three representing H.M. Government and six the shipowning interest).

British Commercial Directors, Sir T. Harrison Hughes, Bt. (Vice-President of the Company); Sir Harold Bibby, D.S.O.; Sir William Currie, G.B.E.; Sir Hubert Heath Eaves; The Lord Rotherwick; The Lord Hankey, P.C., G.C.B., G.C.M.G., G.C.V.O.

Representing H.B.M. Govt., R. S. Isaacson, C.M.G., (Resident Director); Right Hon. Sir Alexander Cadogan, O.M., G.C.M.G., K.C.B.; and Sir Francis Verner Wylie, G.C.I.E., K.C.S.I.

On July 26, 1956, President Nasser announced that the Egyptian Government had nationalized the Suez Canal Company and that shareholders would be compensated in accordance with the last closing prices on the Paris Bourse. All Suez Canal Company funds in Egypt were frozen from that date. A board of 12 Egyptians was set up to administer the Canal under the nationalization law and it was announced that all officials of the company together with all employers and workers would be prohibited from leaving their duties for any reason, without the permission of the new authority. A conference of delegates of 22 nations primarily interested in the future of the Canal was held in London from August 16-23, 1956. A plan for international control of the Suez Canal was drawn up and secured the approval of 18 of the states represented at the conference. (See also Events of the Year.)

The following table shows the number and tonnage of vessels which have passed through the Suez Canal in the 13-year period 1943-1955, with the percentage of British vessels:—

Year	No. of vessels	Net Tons	British Tonnage
			%
1943	2,262	11,273,802	59.5
1944	3,320	18,124,952	57.1
1945	4,206	25,064,966	63.4
1946	5,057	32,731,631	62.6
1947	5,972	36,576,581	47.2
1948	8,686	55,081,056	37.6
1949	10,420	68,861,548	36.1
1950	11,751	81,795,523	32.5
1951	11,694	80,356,338	33.5
1952	12,168	86,137,037	33.3
1953	12,731	92,905,439	33.7
1954	13,215	102,493,851	32.1
1955	14,666	115,756,398	28.3

The transit receipts in 1870 were 4,345,758 fr. (gold), in 1938, 1,625,612,100 fr. (paper), and in 1955, 32,371,728,846 fr. (paper).

The rate of transit dues from July 15, 1954 until further notice, is 34 piastres per ton for laden vessels, and 15.5 piastres per ton for vessels in ballast.

The net dividends for the year 1955 amounted on the ordinary 250 fr. (gold) shares to 7,246 francs, 28 centimes and on the Actions de Jouissance to 6,307 francs, 14 centimes.

The 14,666 vessels included in the total for 1955 were grouped under the following categories:—

	No.	Net Tonnage
Merchant vessels (laden)...	8,905	64,325,185
Mail steamers.....	1,283	10,699,014
Warships and transport....	271	1,813,635
Merchant vessels in ballast..	4,207	38,918,564
	14,666	115,756,398

The tonnage of the merchandise carried was 25,775,000 tons in 1913; 17,047,000 tons in 1920; 28,779,000 tons in 1938, and 107,508,000 tons in 1955. Details of the nationality of the vessels passing through the Canal in 1955 are:—

Flag	No. of Vessels	Net tons
British.....	4,358	32,789,874
Norwegian.....	1,835	15,594,949
Liberian.....	1,096	14,030,172

SWEDEN

(Sverige)

King of Sweden, of the Goths and the Wend, Gustaf VI., Adolf, K.G., elder son of the late King Gustaf V, born Nov. 11, 1882; married (1) June 15, 1905, H.R.H. the late Princess Margaret of Connaught (died May 1, 1920), (2) Nov. 3, 1923, Lady Louise Mountbatten, Princess of Battenberg, born July 13, 1889; succeeded Oct. 29, 1950.*

Heir Apparent, Carl Gustaf, Duke of Jämtland, grandson of the King, born April 30, 1946.

Children of the King (by 1st marriage), (1) The late Prince Gustaf Adolf, born April 22, 1906, married Oct. 10, 1932, Princess Sibylle of Saxe-Coburg-Gotha, died Jan. 26, 1947, leaving issue:—Prince Carl Gustaf (Heir Apparent); Princess Margaretha, born Oct. 31, 1934; Princess Birgitta, born Jan. 19, 1937; Princess Desirée, born June 2, 1938; Princess Christina, born Aug. 3, 1943; (2) Princess Ingrid, born March 28, 1910, married May 24, 1935, Frederik, King of Denmark; (3) Prince Bertil, Duke of Halland, G.C.B., born Feb. 28, 1912.

Brother of the King, Prince Wilhelm, Duke of Södermanland, born June 17, 1884, married May 3, 1908, the Grand Duchess Maria Pavlovna of Russia; marriage dissolved March 17, 1914.

CABINET

(Formed July 31, 1945)

Prime Minister, Tage Erlander.

7:00-10:00

Indén.

Social Affairs, Sigurd Lindholm.

Civil Affairs, John Ericsson.

Communications, Sven Andersson.

Finance, Gunnar Sträng.

Education and Ecclesiastical Affairs, Ivar Persson.

Agriculture, Samuel Norup.

Commerce, Gunnar Larsson.

Interior, Gunnar Hedlund.

Ministers without Portfolio, Ingvar Lindell; Hjalmar Nilsson; Allan Nordenstam; Mrs. U. Lindström.

SWEDISH EMBASSY IN LONDON

29 Portland Place, W.1

(Langham: 2080)

Ambassador Extraordinary and Plenipotentiary, His Excellency Gunnar Häggelöf, G.C.V.O.

Counsellors, M. Pripp (Minister Plenipotentiary); S. Lindh.

1st Secretary, B. Odevall.

and Secretary, G. Luthman, M.V.O.

Attachés, R. Malmberg; L. Eckerberg.

Military Attaché, Brig. T. Hedqvist, C.V.O.

Naval Attaché, Commodore G. Tham, C.V.O.

Assistant Naval Attaché, Lt.-Cmdr. S. Håkanson.

Air Attaché, Lt.-Col. G. Tegner.

Assistant Air Attaché, Capt. A. Jufors.

Agricultural Attaché, U. Enegren.

Counsellor and Press Attaché, V. Hammarling, C.V.O.

Assistant Press Attaché, E. Schulze.

Cultural Attaché, P. Brandberg.

Chaplain, Rev. S. Evander.

Consulate-General, 14, Trinity Square, E.C.3 (Royal: 1901).

Consul-General, C. A. M. Hallenborg, K.C.V.O.

Vice-Consuls, C. G. Béve; C. B. C. Hartzell.

Area and Population.—Sweden occupies the eastern half of the Scandinavian peninsula in N.W. Europe and comprises 25 governments, "Län,"

with an area of 173,436 square miles, and a population, Jan. 1, 1955, of 7,234,666. Of the 53,200 (approx.) foreigners with permission to reside in Sweden, about 12,000 are Baltic refugees and 21,000 Germans. In 1954 there were 105,684 births (14.6 per 1,000 inhabitants), 69,078 deaths (9.6 per 1,000) and 52,875 marriages (7.3 per 1,000). In 1954 the infantile mortality rate was 18.3 per 1,000.

Government.—Under the Constitution of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte, Prince of Ponte Corvo, a Marshal of France, who was invited to accept the title of Crown Prince, with succession to the throne. The Marshal landed at Helsingborg on Oct. 20, 1810, and succeeded Charles XIII, in 1818. There is a Diet (*Riksdag*) of two Chambers, *Första Kammaren* of 150 members, elected for 4 years; and *Andra Kammaren* of 230 members, elected for 4 years. The Council of Ministers (*Statsråd*) is responsible to the Riksdag.

Production and Industry.—About 25 per cent. of the working population is devoted to agriculture, forestry and fisheries, about 300,000 being owners and 60,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining, industrial agricultural and forest; the southern, agricultural and industrial. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, wheat, rye, barley, potatoes, roots, oiliferous plants and grasses. Dairy produce, however, accounts for over half the value of Swedish agricultural production. Sweden contains the great lakes of Vänern, Vättern, Mälaren and Hjälmaren. The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of pine, spruce and birch; these are of great importance, supplying timber, pitch, fuel and tar, in addition to sulphite, sulphate and mechanical wood pulp for the paper-making and rayon industries. The mineral resources are extremely rich; iron ore of excellent quality; lead, zinc, sulphur, manganese, arsenic, gold, granite and marble. There are also considerable deposits of low grade uranium ore. There is a railroad opening up the rich iron-ore districts of Lapland and mineral trains run from Gällivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic; coal is being worked in Scania (Skåne).

In 1950 there were 17,016 industrial establishments (including mines and quarries) employing 662,994 operatives, and 144,401 in administrative and executive posts. The fishing industry landed catches valued at Kr.121,620,000 in 1953.

Communications.—Railroads totalling 10,368 miles in length (of which 9,937 are the property of the State) were open on June 1, 1954; and there were 4,937 km. of telegraph wires and 246,198 km. of superimposed telegraph circuits, 121 control stations, and 3,713 other telegraph stations. There were at the same time 4,126,618 km. of telephone wires and 1,435,000 km. of superimposed telephone circuits. The Mercantile Marine (Jan. 1956), consisted of a total of 1,794 ships of 2,811,958 gross tons. Civil aviation is under the control of the Ministry of Communications, under whose supervision all matters concerning civil aviation are handled by the Department of Civil Aviation. Regular domestic air traffic is maintained by the Swedish Airlines (ABA). Regular European and intercontinental air traffic is maintained within the framework of the Scandinavian Airlines System in Copenhagen by the Swedish Airlines in collaboration with the Danish and Norwegian Airlines.

Defence.—Service in the Defence Forces is universal and compulsory, between 35,000 and 40,000

* This is the official title of the King of Sweden.

being trained annually; strength of the Army during the war of 1939-45 was about 500,000, equipped on modern lines and principally mechanized. The Navy consists of 3 cruisers, 14 destroyers, 13 frigates, 28 motor torpedo boats, 24 submarines and a large number of minor craft and auxiliaries. The naval stations are Stockholm, Karlskrona and Göteborg. The Air Force consists of 20 wings, chiefly fighters.

Religion.—The State religion is Lutheran Protestant, to which over 95 per cent. of the people adhere.

Language and Literature.—Swedish is one of the Teutonic languages spoken by the people of Scandinavia and is closely allied to Icelandic, Danish and Norse. Swedish national literature may be dated from the foundation of the University of Uppsala in 1477 and reached its golden age under Gustavus III. (1771-1792), who founded the Swedish Academy in 1786. Among modern Swedish authors who have achieved world-wide reputations are August Strindberg (1849-1912), dramatist and novelist; Selma Lagerlöf (1858-1940), who was awarded the Nobel Prize for Literature in 1909 on account of her pre-eminence as a novelist; Verner von Heidenstam (1859-1940), poet and Nobel Prize-winner (1916); Erik A. Karlfeldt (1864-1931), Nobel Prize-winner in 1931 after his death, and Par Lagerkvist, Nobel Prize-winner, 1951. In 1955 there were 200 daily newspapers in the country, 12 being published at Stockholm, 6 at Göteborg and 4 at Malmö.

Education.—(i.) *Primary*: Compulsory and free, illiteracy rare. Maintained by the State and by local taxation. Attendance good. (ii.) *Secondary*: Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics, commerce and navigation. (iv.) *Universities*: State Universities at Uppsala (founded 1477) and Lund (founded 1668) and private but grant-aided Universities in Stockholm and Göteborg.

BRITISH EMBASSY

(Residence, Laboratoriegatan 8; Chancery, Strandvägen 8a, Stockholm.)

British Ambassador, His Excellency Hon. Sir Robert Maurice Ales Hantkey, K.C.M.G., K.C.V.O. (1954).

Counsellor, J. N. O. Curle.

1st Secretary (Information and Press), A. G. Michelsen, C.B.E.

1st Secretary (British Council Representative, Cultural Attaché), Dr. A. Craig-Bennett.

and Secretary, J. R. Rich.

Counsellor (Commercial), R. Reid-Adam, C.B.E.

1st Secretary (Commercial), B. A. Flack.

Naval Attaché, Cmdr. J. A. H. Hamer, O.B.E., D.S.C., R.N.

Assistant Naval Attaché, Cmdr. R. D. L. Clarke.

Military Attaché, Lt-Col. D. de C. Smiley, M.V.O., O.B.E., M.C.

Assistant Military Attaché, Major H. Docherty.

Air Attaché, Group Capt. R. S. Ryan, C.B.E.

Assistant Air Attaché, Squadron-Ldr. J. H. Ramsden.

Agricultural Attaché, R. Ede (Resident in Copenhagen).

Labour Attaché, A. G. Wallis, D.F.C.

Consul, D. R. Roper.

Vice-Consul, R. F. G. Taylor.

Archivist, Miss K. M. Gardiner.

Chaplain, Rev. C. E. Rycart.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Göteborg, Helsingborg, Luleå, Malmö, Norrköping, Stockholm and Sundsvall.

British-Swedish Chamber of Commerce in Sweden: Hovslagargatan 5B, Stockholm.

CAPITAL.—Stockholm, 1,132 miles; transit, 2 days.

SWITZERLAND

(Schweizerische Eidgenossenschaft—Confédération Suisse—Confederazione Svizzera.)

GOVERNMENT

*President (1956) and Justice and Police, Dr. Markus Feldmann.

Vice-President (1956) and Finance, Dr. Hans Streuli.

Minister of Foreign Affairs, M. Max Petitpierre.

Military Affairs, M. Paul Chaudet.

Public Economy, Dr. Thomas Holenstein.

Interior, Dr. Philipp Etter.

Posts, Telegraphs and Railways, M. Giuseppe Lepori.

SWISS EMBASSY IN LONDON

(28 Montagu Place, Bryanston Square, W.1)

[Paddington: 0701]

Ambassador in London, His Excellency M. Armin Dœniker (1955).

Counsellor, Jean-Jacques de Tribolet.

Military and Air Attaché, Major Werner Koch.

Counsellor for Economic Affairs, René Faessler.

Counsellor for Press and Cultural Affairs, Ernst Bircher.

1st Secretaries, Pierre-Henri Thévenaz; Alberto

Albertini; Marcel Luy; Etienne Vallotton.

Asst. Military and Air Attaché, Major Alfred Weber.

* The President is elected in December and remains in office from Jan. 1 to Dec. 31; he is generally succeeded by the Vice-President.

Labour Attaché, Félix Ansermoz.

Consular Section, 1 Montagu Place, W.1.

Consul and Head of Chancery, Jakob Huber.

There is a Swiss Consulate in Manchester.

Area and Population.—The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'–47° 48' N. lat. and 5° 58'–10° 3' E. long. It is composed of 22 Cantons, 3 subdivisions, making 25 in all, of very dissimilar size, united under a Constitution dated May 29, 1848, and comprises a total area of 15,950 square miles, with an estimated population (Dec. 31, 1954) of 4,927,000. In 1954 there were 83,741 live births, 49,113 deaths and 38,247 marriages. The infant mortality rate was 15 per 1,000 live births. In 1950, out of a total of 4,700,000, 56 per cent. of the population was Protestant, 41 per cent. Roman Catholic and 0.4 per cent. Jewish.

Physical Features.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent., and the Jura mountains 12 per cent., of the country. The Alps are a crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is partly in France and Italy, and Monte Rosa (15,217 feet) is partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Finsteraarhorn (14,026), Aletschhorn (13,711), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803), Breithorn (13,685), and Matterhorn (14,780 feet) in the Pennine Alps.

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zürich, Lucerne, Geneva, Constance, Thun, Zug, Lugano, Walensee and Brienz.

Production and Industry.—Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasturage. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and other metal-lurgical industries, clothing, watchmaking, wood-working, foodstuffs, chemicals, cotton, silk and rayon, embroidery and footwear.

Government.—The legislative power is vested in a Parliament consisting of two Chambers, a National Council (*Nationalrat*) of 196 members, and a Council of States (*Ständerat*) of 46 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is a tradition that Italian and French-speaking areas should between

them be represented on the Federal Council by at least two members.

Defence.—Army. Elite (ages 20 to 36), 16 yrs.; initial trng., 118 days. Subsequently 8 training periods of 21 days; then Landwehr (36 to 48) and Landsturm (48 to 60). Air Force. Ground personnel: as Army. Flying personnel: age 20 to 36. Initial training 1 year. 6 weeks with squadron each year and completion of 70 hours' flying. After 36 revert to ground duties with Air Force or Army.

Communications.—In 1954 there were about 3,600 miles of railway (including tramways, rack railways, etc.) in operation. In 1955 there were 34,892 miles of telegraph and telephone lines, 794,899 telephone subscribers and 3,850 post offices. There were 1,233,075 licensed radio receivers and 10,507 licensed television receivers. At September 30, 1955, the total length of first-class roads was 10,585 miles, the number of motor vehicles being 554,000 (271,000 private cars, 216,000 motor cycles and 57,000 commercial vehicles). A merchant navy, established in 1940, consisted in 1955 of 25 vessels of 86,571 gross tons.

In addition, there were 363 vessels with a total tonnage of 267,532 engaged in Rhine shipping. In 1955 goods handled in Rhine traffic at Basle amounted to 4,587,420 tons; 120 lake vessels transported 8,064,000 passengers and 312,218 tons of freight in 1954. In 1955 Swissair flew 19,104,000 kilometres and carried 630,719 passengers.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy practically unknown. (i.) *Primary:* Free and compulsory. School age varies, generally 7 to 14. (ii.) *Secondary:* Age 12–15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities:* Basle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical University of Zürich and commercial University of St. Gall.

Language and Literature.—There are three official languages: French, German and Italian. In addition Romansch is recognized as a national, but not an official language. German is the dominating language in 19 of the 25 cantons; French in Fribourg, Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansch in parts of Grison. Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845–1924) and Hermann Hesse (1877–) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1947.

FINANCE 1955

SYRIAN EMBASSY IN LONDON

19 Kensington Palace Gardens, W.8

[Bayswater: 5101]

Ambassador, His Excellency Dr. Najeeb Al-Armanzi (1956).

Counsellor, Dr. Adib Daoudy.

Military Attaché, Col. Abdul Rahman Mardam Bey.

3rd Secretaries, Dr. Yahia Kassab; Kadri Nayal. Attachés, R. Raslan; S. Hamwi; T. Sefedli.

Area and Population.—The republic of Syria is in the Levant, covering a portion of the former

Ottoman Empire, with an estimated area of 70,800 sq. miles and a population (1954) of 3,655,904. Arabic speaking and mainly Moslems. Syria includes the districts of Damascus, Aleppo, Homs, Hama, Latakiah, Deir-az-zor, Hassetché, Soueida (Jebel Druze) and Deraa. It is bounded on the north by Turkey, on the east by Iraq, on the south by Jordan and Israel, and on the west by the Lebanon and thence northwards by the Mediterranean to the Turkish frontier. The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch (Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

Archaeology, etc.—Syria is rich in historical remains. Damascus (*Dimishq ash-Sham*) is the most ancient city in the world, having an existence as a city for over 4,000 years. It is situated on the river Abana (now known as Barada), in an oasis at the eastern foot of the Anti-Lebanon, and at the edge of the wide sandy desert which stretches to the Euphrates. The city contains the Omayyad Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix, 11), while to the North-East is the Roman outpost of Dmeir and further east is Palmyra.

On the Mediterranean coast at Amrit are ruins of the Phoenician town of Marath, where the tell has been found and is being excavated and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knight Templars in the XII-XIII century is being restored as a museum.

Hittite cities, dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Terabius and Kadesh and also on the Orontes at Atchra, near Antioch.

Government.—Syria, which had been under French mandate since the 1914-18 war, became an independent Republic during the 1939-45 war. The first independently elected Parliament met on August 17, 1943, but foreign troops were in part occupation until April, 1946, when their withdrawal marked the complete independence of the Republic, which is a member of the United Nations and of the Arab League.

Production and Industry.—Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebeli district of Latakia; skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil and copper and brass utensils are locally produced. Mineral wealth is considerable but not well developed. The principal source of revenue is derived from the taxation of customs and duties and the pipeline from the oilfields of Saudi-Arabia to Sidon in Lebanon (Tapline).

Language and Literature.—Arabic is the principal language (see Arabia), but a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are 25 daily newspapers and 30 periodicals in Arabic published in Damascus and 27 daily newspapers and 25 periodicals in the provinces.

Education.—Education in Syria is under State control and, although many of the schools are privately owned, they all follow a common system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. The Syrian University, founded in 1924, has faculties of law, medicine, engineering, science,

arts and a Higher Teachers' Training College. Approximately 10 per cent. of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

Communications.—A narrow-gauge railway runs from Beirut in the Lebanon to Damascus, connecting at Rayak (Lebanon) with the standard-gauge line which runs from Tripoli (in the Lebanon) through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotehek. From Damascus the Hejaz railway runs southwards to Jordan. All the principal towns in the country are connected by roads of varying quality. The trans-desert route from Damascus to Bagdad is covered by the Nairn Bus Service in fourteen hours. A small internal air service operates between Damascus and Aleppo, and between Aleppo and Qamichliyé, and Aleppo, Lattakia and Damascus.

FINANCE

The budget for 1956 was drafted to balance at £*Syr.* 324,054,000.

Currency.—The monetary unit is the Syrian paper pound (£*Syr.*). In February 1955, the Syrian gold pound was returned to circulation at an official rate of £*Syr.* 26.75. The official rates of exchange are £*Syr.* 6.13 = £1 sterling, buying, and £*Syr.* 6.19 = £1 sterling, selling. The free market rate is used for all ordinary commercial transactions. In May, 1956, it was approximately £*Syr.* 9.8 = £1 sterling. See also p. 84.

TRADE

Principal Imports.—Gold, textiles, petroleum products, vehicles, agricultural equipment, machinery of all kinds and electrical material, base metals and wares thereof, chemicals and pharmaceuticals, wood and its manufactures, live animals and animal products, vegetable products, rubber products.

Principal Exports.—Textile materials and manufactures (including raw cotton and wool), cereals and vegetable products, live animals and animal products, raw hides and skins, prepared foods, gold.

The value of Syria's foreign trade in 1955, at the free rate of exchange, was:—

Imports.....	£ <i>Syr.</i> 676,887,000
Exports.....	430,528,000
Imports from U.K.....	£7,570,386
Exports to U.K.....	4,918,148

CHIEF TOWNS.—Damascus (population 372,708) is the capital of Syria, other important towns being Aleppo (population 380,919), Homs (261,904) and Hama (155,671), and the principal port of the Syrian Republic is Lattakia (105,363). The principal town of Jebel Druze is Soueida (Black), built in mid-19th century by refugees from Lebanon from stones of the ruined Nabatean city of Souda and of blocks of local black basalt.

SYRIAN FLAG: Green over white, over black horizontal bands, with three red stars on central white band.

BRITISH EMBASSY

(Damascus)

British Ambassador, His Excellency Sir Alfred John Gardener, K.C.M.G., C.B.E. (1953).

1st Secretary, R. McC. Andrew.

2nd Secretary, J. A. Forward.

3rd Secretary, P. McKearney.

Military and Air Attaché, Lt.-Col. W. Collins-Charlton.

and Secretary (Information), O. H. Myers.

BRITISH CONSULAR OFFICES

Consul and Commercial Secretary, Damascus, W. P. Cranston.

Consul (Aleppo), H. N. Pullar.

BRITISH COUNCIL

Representative, W. H. Earle, University Street, Damascus. There is a British Council Centre in Aleppo.

THAILAND

(Siam)

King, His Majesty Bhumibol Adulyadej, born 1927;

married his consort, King's Mother, in 1946; married Princess

Sirikit, daughter of King Rama VIII, in 1950; May 5,

1950; son and

heir born, July 28, 1952; second daughter born,

April 2, 1955.

Prime Minister and Minister of the Interior, Field Marshal Pibul Songgram.

Foreign Minister, H.R.H. Prince Naradhip Bongsprabandh (formerly known as Prince Wan).

ROYAL THAI EMBASSY IN LONDON

21-23 Ashburn Place, S.W.7

[Frobisher: 1963]

Ambassador in London, H.S.H. Prince Wongsamvatra Devakula (1953).

Area and Population.—The Kingdom of Thailand, or Muang Thai, formerly known as Siam, has an area of 198,247 sq. miles with a population (estimated 1953) of 19,528,000. Thailand is in South-Eastern Asia. It has a common boundary with the Federation of Malaya in the south, and is bounded on the west and north-west by the Union of Burma and in the north-east and east by the Kingdoms of Laos and Cambodia, which were formerly part of the French Colony of Indo-China. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is only separated from the Thai northern border by a narrow stretch of Burmese and Lao territory. The country slopes southwards from the north-west and from the great mountains of Tibet. The principal rivers are the Salween (which forms a boundary with Burma for 200 miles), the Menam Chao Phya with its tributary the Meping (which are Thai throughout) and the Mekong and its tributaries, which water the eastern plateau.

Government.—Thailand is a sovereign independent State. The Constitution of 1952 provides that the King shall exercise legislative power by, and with the advice and consent of, the Assembly of the People's Representatives, executive power through a Council of Ministers and judicial power through Courts established by law. He is advised by a Privy Council appointed by him. The Assembly consists of 246 members, half of whom have been nominated by the King, the other half being elected by a system of proportional representation. The Constitution provides for the progressive replacement of nominated by elected members, which should be complete by 1962.

Language, Religion, and Education.—Thai is a monosyllabic, tonal language, a branch of the Indo-Chinese linguistic family. The principal religion is Buddhism, its followers numbering over 16 millions in 1953, with 627,435 Moslems and some 70,000 Christians. Primary education is compulsory and free and secondary education in Government Schools is free. There are over 21,000 schools of all kinds, attended by over 3,000,000 children. There are 5 Universities and 31 Training Colleges and 245 Vocational Schools (all types).

In 1940 Thailand adopted the Gregorian Calendar, the Buddhist year 2484 beginning on Jan. 1, 1941 (in place of April 1).

Production and Industry.—The chief products of the country are rice, rubber, tin and teak. There are few manufacturing industries.

Forests are extensive and several British companies hold concessions for the exploitation of teak and other hardwoods. Local industries are relatively under-developed. They include the production of salt, cement, iron and steel, sugar, tobacco and cigarettes, leather, glass bottles, soap, paper, gunny bags, cotton and silk cloth, matches and fishmeal. There are cottage industries producing pottery and cotton and silk cloth. The local niello-ware (en-graved silver with interstices filled with black metallic compound) is very popular with visitors. Livestock in 1954 included 5,272,730 cattle, 55,861.144 buffaloes, 13,226 elephants, 134,319 horses, 3,041,456 pigs, 60,280,048 chickens and ducks.

In addition to tin and wolfram, the only minerals produced in important quantities are iron, lead, antimony, lignite and salt. In 1954 the output of tin ore was 13,795 metric tons; wolfram ore, 103 tons; iron ore, 2,756 tons; lead, 11,662 tons and antimony 140 tons. During the whole of 1955, 15,680 metric tons of tin and about 250,000 metric tons of salt were produced. About half the output of tin ore comes from U.K. and Australian-owned mines.

Communications.—About 2,100 miles of State-owned railways were open for traffic in 1956. Railways from Bangkok run to Ubol Raj Thani (357 miles N.E.), Chienamai (411 miles N.), Aran Pradet (159 miles E.) and Padang Besar (615 miles S.); there are branch lines to Swankalok, Kantang, Kanchanaburi, Nakorn Sritthamaraj, Songkhla, Suezai Golok and via Udon Thani on the Mekong opposite the Laotian capital of Vientiane, totalling about 490 miles. The Burma railway, built with allied prisoner-of-war labour by the Japanese during the war, has been purchased from its starting point at Ban Pong to the Burmese border by the Thai Government and is now part of the Royal State Railways. It is open to general traffic as far as Kanchanaburi (33 miles). There is through railway connection between Ban Pong and Penang and Singapore. In 1953 about 3,750 miles of State highways were open to traffic. The total length of major roads to be completed is approximately 3,500 miles and the length of provincial roads to be built is 5,500 miles. Bangkok is an international airport of importance, and services connect it with Europe, America, India, Pakistan, South-East Asia and Japan. There are internal air services to Bangkok, Nakorn Sawan, Phitsanuloke, Phree, Lampang, Chiangmai, Mae Hongson, Chiangrai, Mae Sarieng, Khun Yuam, Pai, Tak, Mae Sod, Korat, Ubol, Udon, Loey, Phuket, Songkhla. There are about 14,474 miles of telegraph lines. The harbour at Bangkok can now take vessels of 10,000 tons.

	FINANCE	1955	1956
		Millions of Baht	
<i>Budget Estimates</i>			
Total Revenue	4,180	4,752	
Total Expenditure	5,416	5,912	
Deficit	1,236	1,160	

Thailand obtained a 3 per cent. loan from India in Sept., 1946, of 50,000,000 rupees (£3,750,000), which was completely paid back early in 1949. Thailand received in 1953 an International Bank loan of the equivalent of U.S.\$25,400,000 for irrigation, railway development and the development of the port of Bangkok, and in 1955 a further loan of U.S.\$12,000,000 for rehabilitation and development of the State Railways.

The value of non-military aid given to Thailand by the International Cooperation Administration of the United States between 1951 and June, 1956 amounted to U.S.\$104,300,000. In addition a military aid programme is being administered by the United States Department of

Defence. During the fiscal year ended June 30, 1956 a total assistance of U.S.\$31,300,000 was allocated to Thailand by the I.C.A. \$29,500,000 is to be used to help the nation expand and improve its economy and \$18,000,000 to provide specialized training in professional and technical fields for Thai nationals. The Export Import Bank has loaned \$1,000,000 for the purchase of cargo vessels.

The official rates of exchange for the *Tical* or *Baht* (of 100 Satangs) since September, 1949, have been 35 *Ticals*=£1 and 12.5 *Ticals*=U.S. \$1.

There is, however, now only a small reserve of foreign exchange obtained from earlier export premia which the bank of Thailand will only make available at this official rate to finance certain government purchases. All imports have otherwise to be paid for at the open market rate of exchange which in July 1956 was fluctuating around Baht 58 = £1.

	TRADE	1955
	Millions of Baht	£
Total imports	7,415	123,500,000
Total exports	7,164	119,400,000
Imports from U.K.	830	12,214,948
Exports to U.K.	171	2,524,272

In 1939-40 rice constituted 53 per cent., tin ore 14 per cent., rubber 14 per cent. and teak 5 per cent. of the value of exports. Rice accounted in 1955 for about 44 per cent. of the value of all Thailand's exports, rubber accounted for 25 per cent., tin 6 per cent. and teak 3 per cent. The other exports, totalling 22 per cent., consisted mainly of the following: salted fish, live cattle, maize, tapioca, salt, sticklac, hides, wolfram, chillies, fresh fruit, beans, yang wood and other timber, seedlac, ground nuts, castor seeds, silverware and ramie. Chief imports are textiles, metal manufactures, machinery, vehicles and transport equipment, chemicals and petroleum products.

CAPITAL. ΨBangkok (with Dhonburi), pop. 1947—1,178,881; in the delta of the Menam Chao Phya. Other centres are Chiangmai, Nakorn Sawan and Korat, but no other town approaches Bangkok in size or importance.

FLAG: Five horizontal bands red, white, dark blue, white red (the blue band twice the width of the others).

Mohammed Masmoudi.

TUNISIAN EMBASSY IN LONDON

Ambassador.—M. Taïeb Salem was nominated as Tunisian Ambassador to the United Kingdom on June 25, 1956, and it was expected that a Tunisian Embassy would be opened in London before the end of the year.

Area and Population.—Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with a total area of 45,000 sq. miles. A census held in connection with the preparation of electoral registers showed (Feb., 1956) a total population of 3,800,000 of whom 3,430,000 were Tunisians.

Government.—A French Protectorate from 1881 to 1956, Tunis became an independent sovereign state with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form a Tunisian Army. Tunisia remains in the franc zone and in customs-union with France. Following a first general election held on March 25, 1956, a Constituent Assembly met for the first time on April 8. The United Kingdom formally recognized Tunisia as an independent and sovereign state on May 10, 1956. Negotiations on the interdependence of Tunisia and France continued during 1956.

French Ambassador in Tunisia, M. Roger Seydoux.
Tunisian High Commissioner in Paris, M. Hassan Belkhodja.

Important changes in the system of local government were decreed on June 16, 1956. The country was divided into 24 regions each ruled by a Governor assisted by a Secretary-General.

Production and Trade.—The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The chief exports are cereals, olive oil, phosphates, iron-ore, lead and derivatives, wines, etc., dates, etc.; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. In 1955 the imports were valued at 63,276,000,000 Fr. and the exports at 37,309,367,000 Fr. Imports from U.K. in 1955, £961,724; Exports to U.K., £6,452,367.

CAPITAL, ΨTunis, connected by canal with La Goulette on the coast, had a population (Municipal Council area) of 680,000 at the Census of 1956. The ruins of ancient Carthage lie a few miles from the city. Other towns of importance are ΨSfax (65,635), ΨSousse (48,172), Kairouan (33,968).

Area and Population.—The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 11th century. The Seljuks were succeeded, early in the 14th century, by the Ottoman dynasty, which remained in power until the War of 1914-18.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea

to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, part of Russia, the Ukraine, the Crimea, the Balkan States and the whole of Arabia. The Black Sea, the Mediterranean, the Red Sea and the Aegean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

Turkey now extends from Adrianople to Transcaucasia and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq. The sixth general census of population was held in October 1955. The results of the last four counts are:—

Year	Population
Oct. 20, 1935.....	16,158,018
Oct. 20, 1940.....	17,820,950
Oct. 21, 1945.....	18,700,174
Oct. 22, 1950.....	20,936,524

The preliminary results of the 1955 Census gave the total population as 24,109,641.

Turkey in Europe (9,256 sq. miles, population 1,626,229 in 1950) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Edirne (Adrianople), and is separated from Asia by the Bosphorus at Istanbul and by the *Dardanelles* (Hellespont)—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (285,246 sq. miles, population 19,308,409 in 1950), comprises the whole of Asia Minor or *Anatolia* ("Land of the Rising Sun" or Orient), and extends from the Aegean Sea to the western boundaries of Georgia, Soviet Armenia and Persia, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. The former Turkish Sanjak of Alexandretta (latterly known as the Republic of Hatay), was ceded by France on July 23, 1939, having formed part of Mandated Syria since 1922.

Government.—For two centuries before the War of 1914–18, disintegration had reduced the power and extent of the Turkish Empire, and after that War its boundaries were still further restricted, Iraq, Syria and Arabia passing into other hands, Sultan Mehmed VI., the last of the Osmanli rulers, fled from Constantinople to Malta on Nov. 30, 1922, and the Sultanate was abolished by the National Assembly. On Oct. 29, 1923,* the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (later known as Kemal Atatürk) President. The Grand National Assembly (*Büyük Millet Meclisi* or *Kamulay*) is a single-chamber legislature of 541 members, elected for four years by universal adult suffrage, and delegates its executive power to ministers acting in its name and responsible to it for their actions. In May, 1954 the Democrat Party was returned to power with a considerably increased majority. It now holds some 450 seats out of 541. Turkey is divided for administrative purposes into 66 *vilayet*, with sub-divisions into *kaza* and *nahiye*. Vilayet have each a governor (*vali*) and elective council.

Religion and Education.—The majority of the inhabitants are Moslems. There are numerous Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a considerable number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic.

Education is compulsory, free, and secular. There are elementary, secondary and vocational schools.

In 1955 there were over 17,800 primary schools, with about 1,877,000 pupils. There are two universities at Istanbul (one being a Technical University), one at Ankara and one at Izmir. A fifth university is being built in Eastern Turkey. The expenditure allocated to education in the 1956 budget was £T384,780,144.

Language and Literature.—Osmanli or Ottoman Turkish is one of the Turanian languages spoken from Macedonia to Siberia. Until 1926 this language was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the percentage of Turks who can read and write is rising steadily. Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to a small class) and led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. The leading Turkish newspapers are centred in Ankara and Istanbul, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek and English and numerous magazines and weeklies on various subjects.

Production and Industry.—Although it is estimated that 16 per cent. of the country is entirely unproductive and only 16 per cent. fully arable, agriculture provides a livelihood for 75 per cent. of the population and the economy is based extensively on the export of agricultural products. Agriculture is still largely primitive, but is being modernized at an accelerated pace. The principal crops are cereals, cotton, tobacco, sultanas and figs, pulses, oilseeds, valonea, hazel-nuts, opium, sugar beet, and many varieties of fruit. With the important exception of wheat, which is grown mostly on the arid Central Anatolian Plateau, the bulk of these is grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred at Izmir (Smyrna), where substantial quantities of cotton are also grown. The main cotton area is the Cukurova Plain around Adana. In 1954 it was estimated that there were more than 55,000,000 head of livestock. Animal by-products include wool, hides and skins, and mohair. The forests, which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threaten to destroy the existing forests within the next 25 years.

Turkey's second most important industry is based on her considerable mineral wealth, which is however as yet largely unexploited. The most important developments are in coal, lignite, iron ore and chrome mining and fair quantities of copper, manganese, lead and sulphur are also produced together with other minerals in only small quantities. Working through the State-owned Eti (mining) and Sumer (industry) Banks, great strides have been made during recent years in industrializing the country. Developments include the erection of an iron and steel works at Karabük and other factories and plants for the production of textiles, paper, pulp, cement, artificial silk, sugar, leather goods, glassware,

* TURKISH NATIONAL HOLIDAY.—Oct. 29 is observed throughout the Republic as a National Holiday.

heavy chemicals, artificial fertilizers, canned goods, wines and spirits, vegetable oils, soap and refined sulphur. Legislation has been passed to encourage the investment of foreign capital in Turkey and to permit the exploitation of Turkey's petroleum resources by foreign companies.

COMMUNICATIONS

Railways.—The complete network became the property of the State Railways Administration in 1948. The total length in operation is about 7,700 km. Construction, started in 1937 and at present in progress, includes the line to the Persian border (Elazığ-Kotur) the Iraq frontier line (Diyarbakır-Cizre), the conversion of the Erzurum-Sarikamis line from narrow gauge to normal, and various branch lines in the Gaziantep and Zonguldak areas. The total length of these additions is to be 1,776 km., of which about 350 km. have been completed at a cost of over £125,000,000. A 15-year plan for the addition of a further 2,310 km. of railway at a cost of £180,000,000, which was produced in 1947, has now been shelved—possibly because of the prior claims of the 9-year programme for the construction and improvement of roads and highways. Efforts are however being made to increase rolling stock and locomotives. During 1955 the railways carried 57,000,000 passengers, 11,000,000 tons of freight and 2,000,000 head of livestock.

Roads.—In September, 1948, a 9-year road construction programme was started, involving the construction, reconstruction, improvement and maintenance of a national highway system totalling 24,300 kilometres of all-weather standard roads. The work is being greatly facilitated by the mechanized road building equipment supplied by the American Mission for Aid to Turkey. From 1950-54, 15,108 kilometres of roads were built at a cost of £539,000,000 and at the beginning of 1954 there were approximately 22,000 kilometres of all-weather standard roads.

Posts.—In 1952 there were 46,109 km. of telegraph lines, 2,097 post and telegraph offices, and 70,320 telephones.

Shipping.—The strength of the Turkish Merchant Navy at the beginning of 1956 was 1,510 vessels totalling about 752,000 tons, of which just under half is owned by the State Shipping Administration.

Civil Aviation.—The State Airlines operate all internal services and have services to Athens, Beirut, Cairo and Nicosia, while most of the leading foreign airlines, including British European Airways, operate services to Istanbul and Ankara. The State Airlines fleet is composed of Dakotas and D.H. Herons. The airports at Istanbul, Ankara and Adana have been improved to P.I.C.A.O. (Class B) standard and a sum of £145,000,000 is being spent on ten other new airfields in Turkey. In addition, nine military airfields, costing £160,000,000, will be constructed by N.A.T.O.

FINANCE 1956-57

Revenue (Budget)..... £13,344,000,000
Expenditure (Budget)..... 3,324,000,000

Expenditure includes £1955,000,000 for capital investment.

Debt (Dec. 31, 1955):—

Internal funded..... £1822,449,004
Internal floating..... 282,486,596
External funded..... 565,007,495
External floating..... 86,450,932

The Public Debt of the former Ottoman Empire was apportioned amongst the various Successor States, including Turkey, according to the provisions of the Treaty of Lausanne of 1923. The

same Treaty provided that the Debtor States were to pay the annuities incumbent upon them by reason of such apportionment to the Ottoman Debt Council.

Since that date, several of the Successor States have settled their shares in various ways and Turkey has acquitted herself of her obligation by the purchase of the existing Turkish Bonds, 1933. This terminates the relations of Turkey with the Debt Council, which body, however, retains all its rights and attributions *vis-à-vis* those States which have not yet settled their shares. The Ottoman Debt Council's Offices are in Paris.

The Turkish Lira, or *LT*. (of 100 *Kurus*, each of 40 *Paras*) has a nominal value of 2s. 7d. (see also p. 84).

	TRADE	
	1954	1955
Total imports	£11,339,400,000	£11,393,384,000
Total exports	937,800,000	877,370,000
Imports from		
U.K.	£11,901,769	£13,744,725
Exports to U.K.	7,218,630	8,820,311

The imports include iron and steel, machinery and spares, petroleum products, cotton textiles, wool and woollen yarns, agricultural machinery, locomotives, motor vehicles and pharmaceuticals: the exports include tobacco, cotton, dried fruit, livestock, chrome oils, opium and valonia.

The principal imports from United Kingdom are iron and steel goods, machinery, tractors, motor lorries and chemicals; the principal exports to United Kingdom are tobacco, mohair, nuts, figs and raisins.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles E.S.E. of Istanbul, with a population (1955 census) of 552,369. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum* (Marmor) *Ancyranum*, inscribed with a record of the reign of Augustus Caesar. A new city has been laid out on modern lines, with parks, statues and avenues. **ISTANBUL** (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire in A.D. 364; population (1955) 1,246,233. Istanbul contains the celebrated Mosque of St. Sophia, since 1934 a museum of Byzantine and Turkish art. Other cities are *İzmir* (Smyrna) 431,560; *Adana* 242,716; *Bursa* (Brusa) 218,252; *Eskişehir* 88,459; *Gaziantep* 72,743; *Konya* 215,742; *Kayseri* (Caesarea) 65,489 and *Erzurum* 54,360.

FLAG: Red, with white crescent and star.

EMBASSY IN LONDON

48 Lennox Gardens, S.W.1

[Kensington: 8835]

Ambassador in London, His Excellency Señor Dr. Don José Antonio Quadros (1954).

Minister-Counsellor, Señor Don Marcos Brondi.

Counsellor, Señor Don Gustavo Magariños.

1st Secretary, Señor Don L. H. Kiose-Pozzo.

2nd Secretary, Señor Don M. Eduardo Capurro.

Secretary, Señor Don Guy P. Nery.

Consul-General, Señor Don S. Rivas Costa.

Consul, Señor Don C. A. Ghiringhelli.

Area and Population.—The smallest Republic in South America on the east coast of the Rio de la Plata, situate in lat. 30°–35° S. and long. 53° 25'–57° 42' W with an area of 72,180 square miles, and an estimated population of 3,000,000, almost entirely white and predominantly of Spanish and Italian descent. Most Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

Physical Features. The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchula del Haedo, which cross the Brazilian boundary and extend southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north-east to south-west into the *Rio Uruguay*. The boundary river *Uruguay* is

navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Queguay, and the Cebolati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merin. The climate is reasonably healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by icy winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts.

Government.—Uruguay—or the *Banda Oriental*, as this territory lying on the eastern bank of the Uruguay River was then called—resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726–1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

A new Constitution was approved and brought into force on March 1, 1952, whereby the executive power is discharged by a National Council of State composed of nine members, elected every four years and assisted by nine ministers. The next elections for the Council of State are due in 1958. The members of the National Council of State are eligible for re-election after four years have elapsed since the date on which their mandate ceased. The Legislature consists of a Chamber of 99 deputies and of a Senate of 30 members, elected for four years by all adult male and female citizens who can read and write.

The Republic is divided into 19 Departments, each with a Chief of Police and a Mayor. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

Production and Industry.—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasture, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The 1951 livestock census showed figures of 8,154,109 cattle, 23,408,642 sheep, 667,251 horses, 258,980 hogs, 5,568,451 poultry and 511,547 milch cows. In addition to the meat packing industry, textiles and wine and beer are of importance. The development of local industry has been rapid and since the Second World War has become greatly augmented. The most noticeable expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leather-curing, beet-sugar, edible oils and the refining of petroleum and petroleum products. There are no mineral deposits of importance.

Communications.—There are about 5,000 miles of national highways, and about 7,508 miles of telegraph, with 48,375 miles of telephones.

In 1955 there were about 1,828 miles of standard gauge railway in use in Uruguay. The Central Uruguayan Railway, a national Corporation, was formed to administer the railway systems pur-

chased by the Government from four British companies in 1948.

Civil aviation is developing rapidly. An internal air line, PLUNA, which is now owned by the State, runs a passenger and freight service three times a week to the principal capitals of the interior, and has recently extended its services to Southern Brazil, Paraguay and Bolivia. International passenger and freight services are maintained by American, South American and European airlines. The airport of Carrasco lies 12 miles outside Montevideo.

Education and Social Services.—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, with about 200,000 pupils in 1,600 state schools and technical and trade schools, and evening courses for adult education. In 1950 there were 26,650 pupils in secondary schools, including 9,700 in the 11 State liceos of the capital. The University at Montevideo (founded in 1849) had, in 1950, 8,540 students enrolled in its ten faculties.

Language and Literature.—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. Over one-third of the nation lives in the capital and all the main daily newspapers are published there.

FINANCE

The Budget Estimate for the period 1956–1959 was under consideration in 1956.

	1952
Revenue (Budget Estimate)....	Pesos 428,600,000
Expenditure (Budget Estimate)....	458,600,000
Internal Debt (Dec. 31, 1955).....	1,112,235,332
External Debt (Dec. 31, 1955).....	100,479,648

The monetary unit is the *peso*, which by law is nominally 0.585 grammes fine gold, or the equivalent of US\$1.519. The circulating medium is, however, the paper peso, at present linked with the U.S. dollar and the £ sterling at multiple rates giving the peso an average value of around 35. There is a free financial market for dealings in dollars and other currencies. The rate for the £ in June 1956 was about pesos 12.09 (buying) and for the U.S. dollar pesos 4.35 (buying).

TRADE

(Figures in U.S. Dollars)

	1954	1955
Total imports.....	\$274,451,000	\$225,958,127
Total exports.....	248,958,000	181,673,747
Imports from U.K.....	£13,402,544	£7,709,837
Exports to U.K.....	17,307,816	10,811,152

The exports are principally animal and agricultural products, and include frozen and canned meat, wool, hides, wheat, hair, tallow, poultry, sunflower-seed oil and linseed oil; the imports are principally machinery, motor vehicles, fuels and lubricants, raw materials, construction materials, timber, foodstuffs and beverages. Textile imports are declining with the growth of local industry. The principal imports from the U.K. are machinery, motor vehicles, hardware, yarns and chemicals.

CAPITAL, Montevideo. Pop. (Dec. 1954), 900,000. Other centres are Ψ Salto (60,000), Ψ Paysandu (60,000), Ψ Mercedes (23,000), Ψ Colonia (12,000), Ψ Fray Bentos (10,000), and Ψ Maldonado (7,000).

FLAG: Four blue and five white horizontal stripes (surcharged with rising sun on a white ground in the top corner, next flagstaff).

Time of transit from London to Montevideo, by air, 36 hours.

Trade Representative, V. A. Kamenskij.

AREA AND POPULATION

The U.S.S.R. is now composed of 15 Union-Republics (see below). Before the outbreak of the war of 1939-45 the U.S.S.R. consisted of 11 Republics—the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaidjan, Georgian, Turkmenian, Uzbek, Tadzhik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called *Western Ukraine* and *Western Belorussia*, subsequently incorporated into the Ukrainian and Belorussian Republics respectively.

In March, 1940, some territories ceded by Finland under the 1940 Treaty were joined to the Karelian Autonomous Soviet Socialist Republic to form a Karelo-Finnish S.S.R. which became the 14th constituent Republic of the U.S.S.R., while other, including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of *Bessarabia* ceded by Roumania in June was joined to the Moldavian A.S.S.R. to form a Moldavian S.S.R. as the 13th Soviet Republic, while a smaller part of *Bessarabia* including the Danube estuary port of Izmail and *Northern Bukovina*, also ceded by Roumania, became part of the Ukraine. The new Soviet-Roumanian frontier was confirmed by the 1947 Peace Treaty with Roumania.

In August, 1940, the three independent Baltic States, *Estonia*, *Latvia* and *Lithuania*, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16th Republics respectively. In June, 1945, *Ruthenia* was ceded by Czechoslovakia and became part of the Ukrainian S.S.R. under the name of *Transcarpathia*. After the defeat of Germany, a part of *East Prussia* with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R., while the port and district of *Memel* (Klaipeda) was incorporated into the Lithuanian S.S.R. By the 1947 Peace Treaty with Finland,

the district of *Petsamo* (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of *Sakhalin* and the whole of the *Kurile Islands* were incorporated into the last-named Republic in 1945, after the defeat of Japan. In October, 1944, *Tannu-Tuva*, until the war of 1939-45 a nominally independent state lying to the N.W. of Mongolia, became the autonomous province of *Tuva* within the R.S.F.S.R.

In July, 1956, the Karelo-Finnish Republic reverted to the status of an Autonomous (Karelian) Republic within the R.S.F.S.R.

No census has been taken since 1939, but in the spring of 1956 the total population of the U.S.S.R. was officially stated to number 200,200,000—an indication of severe manpower losses suffered by the nation during and after the war, both through direct casualties and through the fall of the birth-rate. The total manpower deficit is estimated at well over 30,000,000.

Area (1946) and estimated population (1955) of the constituent Republics of the U.S.S.R.:

Republic	Sq. miles	Population*
I. R.S.F.S.R. (Moscow).....	6,617,830	113,200,000
II. Ukraine (Kiev)....	234,000	40,600,000
III. Belorussia (Minsk) ..	80,500	8,000,000
IV. Uzbekistan (Tashkent).....	157,250	7,300,000
V. Kazakhstan (Alma-Ata)....	1,067,400	8,500,000
VI. Georgia (Tbilisi) ..	30,000	4,000,000
VII. Azerbaidjan (Baku).....	33,200	3,400,000

Others.....	5,705,600	3.33

* Excluding the population of the Far North.

CONSTITUTION

Under the 1936 ("Stalin") Constitution, the *Union of Soviet Socialist Republics* is "a socialist state of workers and peasants" (§ 1) in which "all power belongs to the working people as represented by the Soviets (Councils) or Working People's Deputies" (§ 3), while its economy is based on "the socialist ownership of the instruments and means of production" (§ 4). "The land, its mineral wealth, water, forests, mills, factories, mines, rail, water and air transport, banks, communications, large state-organized agricultural enterprises (state farms, machine and tractor stations and the like), as well as municipal enterprises and the bulk of dwelling-houses in the cities and industrial localities, are state property" (§ 6), while "the joint enterprises of collective farms and co-operative organizations... constitute the common, socialist property of the collective farms and co-operative organizations" (§ 7). "The law [also] permits the small private economy of individual peasants and handicraftsmen based on their own labour and precluding the exploitation of the labour of others" (§ 9). "The personal property right of citizens in their incomes and savings from work, in their dwelling-houses and subsidiary home enterprises, in household articles... as well as the right of citizens to inherit personal property, is protected by law" (§ 10). The whole economic life, however, is subordinated to the state economic plan (§ 11).

The U.S.S.R. is a federal state, "formed on the basis of a voluntary union of equal Soviet Socialist Republics" (§ 13); every Republic has "the right to secede from the U.S.S.R." (§ 17).

"The highest organ of state power in the U.S.S.R. is the Supreme Soviet of the U.S.S.R." (§ 30) which exercises exclusively the legislative power (§ 32). It consists of two Chambers, the *Soviet of the Union* (elected on the basis of one deputy for every 300,000 of the population) and the *Soviet of Nationalities* (elected at the ratio of 25 deputies from each Union Republic, 11 from each Autonomous Republic, 5 from each Autonomous Province and 1 from each National Territory). (§§ 33-35). The *Supreme Soviet* which, as a rule, meets twice a year for about 1 week, delegates most of its power to its *Presidium* which acts as a kind of collective President of the U.S.S.R. between the sessions.

"The highest executive and administrative organ of state power is the Council of Ministers of the U.S.S.R." (§ 64). It is appointed by the *Supreme Soviet* (§ 70) and is accountable to it, or, in the intervals between the sessions, to its *Presidium* (§ 65).

The *Supreme Court* of the U.S.S.R. and the *Special Courts* of the U.S.S.R. are elected by the *Supreme Soviet* for a term of five years (§ 104). Similarly, the *Prosecutor-General*, who exercises "supreme supervisory power to ensure the strict observance of law" (§ 113), is appointed by the *Supreme Soviet* for a term of seven years.

Citizens of the U.S.S.R. have the right to work, to rest and leisure, to maintenance in old age and sickness and disability relief and to education (§§ 118-121). "Women are accorded equal rights with men" (§ 122). Citizens are accorded equal rights irrespective of their nationality or race (§ 123). The citizens are also guaranteed freedom of speech, of the press, of assembly and of

street processions and demonstrations, "in conformity with the interests of the working people and in order to strengthen the socialist system" (§ 125).

Section 126 of the Constitution is remarkable for containing the only reference to the real master of the country, the Communist Party. It says that the citizens of the U.S.S.R. "are guaranteed the right to unite in public organizations, trade-unions, co-operative societies, youth organizations, sport and defence organizations, cultural, technical and scientific societies," and that "the most active and politically conscious citizens in the ranks of the working class and other sections of the working people unite in the Communist Party of the Soviet-Union, which is the vanguard of the working people in their struggle to strengthen and develop the socialist system and is the leading core of all organizations of the working people, both public and state."

Local Government.—The State power in regions, provinces, autonomous provinces, territories, districts, towns and rural localities is vested in the *Soviets of Working People's Deputies* (§94), elected by the working people of the respective administrative units for a term of two years (§95). The executive and administrative organ of a Soviet is its Executive Committee elected by it (§99). The Union Republics and the Autonomous Republics have Supreme Soviets and Councils of Ministers of their own (§§ 57-63 and 79-88), although their jurisdiction is severely circumscribed in favour of the central Government. Since February, 1944, the Union Republics have had the right to enter into direct relations with foreign states and to conclude agreements and exchange diplomatic and consular representatives with them (§ 18A). So far, however, the only important activity of this kind has been the individual membership of the Ukraine and of Belorussia in the United Nations Organization. Similarly, the 1944 law allowing each Union Republic to possess its own Republican military formations (§ 18B) seems to have remained a paper provision.

The Union Republics possess Ministries of their own for internal affairs, certain branches of heavy and light industry, agriculture, public health, trade, finance and the like. However, the work of these Ministries is co-ordinated by respective federal Ministries. The Union Republics possess exclusive jurisdiction over such matters as motor transport, housing, social security, municipal affairs, local industry, education and, since 1956, inland water transport and justice. The general trend lately has been toward progressive administrative decentralization, particularly in industrial matters.

Religion.—Section 124 of the Constitution lays down that "in order to ensure to citizens freedom of conscience, the church in the U.S.S.R. is separated from the state, and the school from the church," and that "freedom of religious worship and freedom of anti-religious propaganda is recognized for all citizens." Churches have remained open in virtue of contracts concluded between the congregations and the local authorities. The clergy live on voluntary donations from their parishioners. A new *modus vivendi* between the Government and the religious communities was created during the War of 1939-1945. Two administrative bodies, the Council for the Affairs of the Russian Orthodox Church and the Council for the Affairs of Religious Cults, were set up in October, 1943 to provide liaison between the Council of Ministers and the religious bodies. In September, 1943, Stalin agreed to the election of the Patriarch of Moscow and All Russia, a post which had been vacant since the death of Patriarch

Tikhon in 1925. Patriarch Sergius, elected by the Council of the Russian Church in 1943, died in May, 1944, and was succeeded in February, 1945, by the present holder of the See, Patriarch Alexius. A number of seminaries for training of priests and several big monasteries have been reopened. Several religious periodicals are now published in the U.S.S.R., but religious propaganda is still banned.

Education.—Under the Constitution, citizens of the U.S.S.R. have the right to education. Since 1956 the entire educational course, including higher education at universities, technical colleges, etc., has been free.

The state controls all educational institutions, theatres, cinemas, museums, libraries and picture galleries, as well as the press and the radio. The main centre of research and learning is the Academy of Sciences of the U.S.S.R., which is in effect a vast and efficient government-controlled pool of scientists.

Chronological System.—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June 15, 1930, the Soviet Government advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

LANGUAGE AND LITERATURE

Language and Literature.—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbish (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682-1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799-1837) and Mikhail Lermontov (1814-1841). Realistic fiction is associated with the names of Nikolai Gogol (1809-1852), Ivan Turgenev (1818-1883), Fedor Dostoyevsky (1821-1881) and Leo Tolstoy (1828-1910), and later with Anton Tchekhov (1860-1904), Maxim Gorky (1868-1936), and Ivan Bunin (1870-1954). Great names in music include Glinka (1804-1857), Mussorgsky (1839-1881), Rimsky-Korsakov (1844-1908), Rubinstein (1829-1894), Tchaikowsky (1840-1893), Rakhmaninov (1873-1949), Scriabin (1872-1915), Prokofiev (1891-1953) and Stravinsky (b. 1882).

FINANCE

On March 1, 1950, the Soviet Government revalued the Rouble (of 100 Kopecks), with the result that nominally £1 now equals R.11.20. This revaluation has not affected the Soviet Union's trade with countries outside her sphere of influence, which continues to be calculated on the basis of dollars.

In 1939 the exchange rate in London was 23.58 to 24.87 roubles = £1. The real purchasing power of the rouble is approximately 6d. (See also p. 84.)

DEFENCE

Defence.—No returns concerning the services have been made for many years. The Soviet Army is the

world's largest conscript army; probably it has 3,200,000 men now under arms. Since the war it has conscripted over 1,200,000 men a year. Conscripts do two years' colour service followed by about eight years in the reserve. There are about 30,000 tanks. The *Air Force*, which forms part of the Army, has made immense progress since the war. There has been a steady replacement of piston-engined planes by jets.

The *Soviet Navy* is believed to consist of 4 battle-ships, 2 aircraft carriers, 13 cruisers, and large numbers of destroyers, torpedo boats and submarines. There are now about 400-600 submarines compared with 300 in 1951. About half are of the ocean-going type.

Minister of Defence, Marshal G. K. Zhukov. Senior Vice-Minister, Marshal A. M. Vasilievsky. Chief of General Staff, Marshal V. D. Sokolovsky.

On May 14, 1955, a Treaty of Friendship, Co-operation and Mutual Assistance was signed in Warsaw between the Soviet Union and its European satellites (Albania, Bulgaria, Eastern Germany, Hungary, Poland, Roumania and Czechoslovakia). A unified military command was set up in Moscow, and the Soviet Vice-Minister of Defence Marshal I. S. Konev appointed Commander-in-Chief of the United Armed Forces.

PRODUCTION AND INDUSTRY

One of the most remarkable aspects of Soviet economy has been the transformation of what was primarily an agricultural country into one of the foremost industrial nations of the world in the course of the six successive Five Year Plans. Nevertheless agriculture and stock raising are still the principal occupations and employ about 60 per cent. of the population. The area under crops increased from 292,121,000 acres in 1913 to 459,250,000 in 1955. At the same time, there was a relative decrease of the proportion under grain and an increase of the proportion under industrial crops such as sugar beet, flax, cotton, etc., as well as of that under vegetables and fodder crops. The yield of the chief crops has been steadily rising owing to more rational and scientific methods of farming. The gross grain harvest of 1955 was stated at 9,800,000,000 *poods* (about 157,000,000 tons). Land under crops east of the Volga and the Caspian has greatly increased. In 1937, U.S.S.R. grew 31.1 per cent. of the world wheat, 24.7 per cent. of oats, 10.3 per cent. of cotton and 26.5 per cent. of sugar beet. The *live stock* in 1955 included 67,100,000 cattle, including 29,200,000 cows, 142,600,000 sheep and goats and 52,200,000 pigs.

In 1955 there were 87,500 collective farms (*kolkhozy*) with an average number of 229 individual farmsteads and an average holding of 5,000 acres per *kolkhoz*, 5,134 state farms (*sovkhozy*) with an average holding of 13,500 acres per *sovkhoz*, and about 9,000 Machine-and-Tractor Stations (*M.T.S.*). In the course of 1954 and 1955 about 82,500,000 acres of virgin and fallow soil were ploughed up in Siberia, Kazakhstan and other Eastern and South-Eastern areas.

Forests cover nearly 40 per cent. of the whole area of the Union and form a considerable source of wealth.

TRADE WITH U.K.

Imports from U.K., 1955.....£22,904,001
Exports to U.K., 1955.....£62,777,417

COMMUNICATIONS

Railways.—Length of railways in use:

Year	Miles	Year	Miles
1913.....	44,551	1950.....	72,637
1928.....	47,772	1955.....	74,998
1940.....	65,926		

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have a good system of north-south and east-west lines, but the eastern part (the Volga lands), traversed as it is by trunk lines between Europe and Asia which enter Siberia via Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Construction of new railways is subordinated to the needs of the Five Year Plans. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible a large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the *Trans-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektnaya, etc.), which are of great importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. Lines envisaged under the new Five Year Plan include the Stalinsk-Magnitogorsk trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a second Trans-Siberian line is under construction; it will follow a more northerly alignment than the existing Trans-Siberian and will terminate in the Pacific port of Sovetskaya Gavan.

Sea Ports and Inland Waterways.—The most important ports (Odessa, Nikolayev, Batum, Taganrog, Rostov, Kerch, Sebastopol and Novorossiysk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, ice-bound during winter. Several new ports have been built along the Arctic Sea route (between Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are ice-bound in winter (from 2½ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carries about 60 million tons of freight per year. They are supplemented by a system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the *White Sea-Baltic Stalin Canal*, and the *Moscow-Volga Canal*. The new 63-miles long *Volga-Don Canal*, linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea of Azov in the South, was completed in May, 1952.

Posts and Telegraphs.—In 1955 the post offices handled about 3,778,000,000 letters and post-cards and 203,000,000 telegrams.

CAPITAL OF U.S.S.R., MOSCOW (see below). For other cities see following articles.

FLAG OF THE U.S.S.R.—Red, with star above hammer and sickle.

NATIONAL DAY OF U.S.S.R.—November 7 (Commemorating the Bolshevik coup d'état of 1917).

BRITISH EMBASSY

(Sofiskaya Naberezhnaya 14, Moscow)

British Ambassador, His Excellency Sir William Goodenough Hayter, K.C.M.G. (1953) £4,500.
Minister, C. C. Parrott, C.M.G., O.B.E.

1st Secretaries, R. M. K. Slater (*Head of Chancery*); P. V. W. R. H. O'Regan; J. A. Dobbs, O.B.E. (*Head of Russian Secretariat*).

2nd Secretaries, A. Holdcroft, M.B.E.; D. F. Burden (*Vice Consul*); Miss D. M. S. Park.

3rd Secretaries, J. C. C. Bennett; N. B. A. Scott; P. M. Maxey; D. A. C. Peck; R. S. Ford; Miss I. A. Carpenter; H. J. Spence; C. G. F. James, M.B.E.

1st Secretary and Embassy Medical Officer, T. V. Humphreys.

Chaplain, Rev. C. H. Jones.

Naval Attaché, Capt. A. P. Northey, D.S.C. R.N.

Assistant Naval Attaché, Lt.-Cdr. M. K. McGuire, R.N.; Lt.-Cdr. P. E. Rous-Moore, R.N.

Military Attaché, Brig. J. V. Davidson-Houston, M.B.E.

Assistant Military Attaché, Maj. R. A. Smith; Maj. A. M. Hall.

Air Attaché, Air Commdre. A. R. D. MacDonnell, D.F.C.

Assistant Air Attaché, S/Ldr. J. J. P. Deverill; F/Lt. P. H. T. Lewis, M.B.E.

There are no British Consulates in the U.S.S.R., apart from the Consular Section attached to the Embassy.

I.—R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)

Chairman of the Presidium of the Supreme Soviet, M. P. Tarasov.

Chairman of the Council of Ministers, M. A. Yasnov.

The R.S.F.S.R. has no Communist Party Central Committee of its own, but in February, 1956, a Bureau of the Central Committee of the CPSU for the R.S.F.S.R. was set up, with N. S. Khrushchev as its Chairman.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and the major northern half of its Asiatic part and makes up 77 per cent. of the total territory of the U.S.S.R. with 64 per cent. of the total population. It consists of 13 Autonomous Republics (the Bashkir, Buryat-Mongolian, Chuvash, Daghestan, Kabardin, Karelian, Komi, Mari, Mordovian, North-Osetian, Tartar, Udmurt and Yakut A.S.S.R.'s); 6 regions (Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces and 4 national territories; 53 provinces (Amur, Archangel, Arzamas, Astrakhan, Balashev, Belgorod, Bryansk, Chelyabinsk, Chita, Chkalov, Gorky, Grozny, Irkutsk, Ivanovo, Kalinin, Kaliningrad, Kaluga, Kamchatka, Kamensk, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Molotov, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Penza, Pskov, Rostov, Ryazan, Saratov, Sakhalin, Smolensk, Stalingrad, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Veldkie-Luki, Vladimir, Vologda, Voronezh and Yaroslavl), which in their turn include 6 national territories; and 1 autonomous province (Tuva).

Physical Features.—The R.S.F.S.R. may be conveniently divided into three areas, a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific, consisting of a number of tablelands and ridges, and a southern mountainous part. Climatically, the R.S.F.S.R. lies in all zones, except the tropics, and may be divided into the following belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.

The Republic has a very long coast-line, including the longest Arctic coast-line in the world

(about 17,000 miles). The most important rivers in the European Part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Don and the Kuban, and in the Asiatic part, the Ob with the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk "Seas."

Minerals.—The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus and in the area between the Volga and the Ural (the so-called "Second Baku"). The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is mined, in addition to the Urals, near Kerch in the Crimea, near Kursk, Tula, Lipetsk, Khoper, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

Production and Industry.—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North stag breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. In the eastern part of this zone, between the Volga and the Urals, cereiculture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Crimea, Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown in Southern Crimea and on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution, with two new industrial areas being developed in the Urals and in the Kuznetsk basin, although Moscow and Leningrad are still the two largest industrial centres in the country. All industries are represented in the R.S.F.S.R., including iron and steel and engineering. Industrial centres include Magnitogorsk, Chelyabinsk, Stalinsk, Tula, Komsomolsk, Molotov, Ufa, Irkutsk, Kuibyshev, Krasnoyarsk, Nizhny-Tagil, Novosibirsk, Omsk, Stalingrad, Gorky, Saratov, Grozny, Rostov and Taganrog.

CAPITAL, Moscow. Population (estimated 1956), 4,839,000. Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and, later, in the 15th century, the capital of the whole of Russia (Muscovy). In

1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital. Ψ Leningrad (before the First World War "St. Petersburg" and from 1914-1921 "Petrograd") has a population (estimated, 1956) of 3,176,000.

Other cities with populations exceeding 500,000 (1956) are:—

Gorky (Nizhny-Novgorod)	876,000
Kuibyshev (Samara)	760,000
Novosibirsk (Novonikolayevsk)	731,000
Sverdlovsk (Yekaterinburg)	707,000
Chelyabinsk	612,000
Kazan	565,000
Ψ Rostov-on-Don	552,000
Molotov (Perm)	538,000
Stalingrad (Tsaritsyn)	525,000
Saratov	505,000

About three-quarters of the population are Russians.

Ψ Seaport.

II.—THE UKRAINE

Chairman of the Presidium of the Supreme Soviet, D. S. Korotchenko.

Chairman of the Council of Ministers, N. T. Kalchenko.

Minister of Foreign Affairs, L. F. Palamarchuk.

First Secretary of the Party Central Committee, A. I. Kirichenko.

This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 26 provinces—Cherkassy, Chernigov, Chernovtsy, Crimea, Dnepropetrovsk, Drogo-bych, Khmelnytsky, Kharkov, Kherson, Kiev, Kirovograd, Lvov, Nikolayev, Odessa, Poltava, Rovno, Stalino, Stanislav, Sumy, Ternopol, Transcarpathia, Vinnitsa, Volhynia, Voroshilovgrad, Zaporozhye and Zhitomir. (The Crimean Province was transferred from the R.S.F.S.R. to the Ukraine on February 19, 1954.)

Physical Features.—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the south-west) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

Production and Industry.—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet regime. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine is also leading in grain-growing and stock-raising. In 1937, the Ukraine provided more than 54 per cent. of the total Soviet coal, 61 per cent. of iron, 17 per cent. of metal goods, 64 per cent. of sugar, 22 per cent. of wheat.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog, of manganese in Nikopol, and of quicksilver in Nikitovka.

CAPITAL (since 1934). Kiev, the oldest city in Russia, founded in the 7th century A.D., was the capital of the Russian State from 865-1240. Population (estimated, 1956), 991,000. Other towns with population (1956) exceeding 500,000 are:—

Kiarkov	877,000
Stalino (Yuzovka)	625,000
Ψ Odessa	607,000
Dnepropetrovsk (Yelizavetgrad)	576,000

III.—BELORUSSIA.

(White Russia)

Chairman of the Presidium of the Supreme Soviet, V. L. Kozlov.

Chairman of the Council of Ministers, N. E. Avkhimovich.

Minister of Foreign Affairs, K. V. Kiselev.

First Secretary of the Party Central Committee, K. T. Mazurov

The Belorussian S.S.R., lying in the western part of the European half of the U.S.S.R., was formed early in 1919. It now consists of seven provinces (Brest, Gomel, Grodno, Minsk, Mogilev, Molodechno and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dnieper, of the Niemen and of the Western Dvina.

CAPITAL, Minsk. Population (1956), 412,000.

In 1939, Belorussians made up four-fifths of the population, with Russians and Jews coming next, but territorial and demographic changes since then must have greatly altered this proportion.

IV.—UZBEKISTAN

Chairman of the Presidium of the Supreme Soviet, Sh. R. Rashidov.

Chairman of the Council of Ministers, S. K. Kamalov.

First Secretary of the Party Central Committee, N. A. Mukhitdinov.

The Uzbek S.S.R., economically the most important, of the Central-Asiatic Republics, was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of 9 provinces (Andizhan, Boshara, Ferghana, Kashka-Darya, Khorezm, Namangan, Samarkand, Surkhan-Darya and Tashkent). It lies between the high Tien-Shan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include oil (in the Ferghana valley and in Khaidag), coal (recently discovered at Angren) and sulphur (Shorsu).

There is a major agricultural machinery plant at Tashkent and a chemical combine at Chirchik. Uzbekistan is the main cotton-growing area of the U.S.S.R., producing more than 60 per cent. of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

CAPITAL Tashkent. Population (1956), 760,000. Samarkand (165,000) contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulug-bek, Tamerlane's astronomer-grandson, and a 15th-century observatory recently restored.

V.—KAZAKHSTAN.

Chairman of the Presidium of Supreme Soviet, Zh. A. Tashenov.

Chairman of the Council of Ministers, D. A. Kunayev.

First Secretary of the Party Central Committee, I. D. Yakovlev.

The Kazakh S.S.R., the second-largest Union Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tien-shan in the east, and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted a Union Republic in 1936. It consists of 16 provinces (Akmolinsk, Aktyubinsk, Alma-Ata, Djambul, East-Kazakhstan, Guryev, Karaganda, Kustanay, Kokchetav, Kzyl-Ord., North-Kazakhstan, Pavlodar, Semipalatinsk, South-Kazakhstan, Taldy-Kurgan and West-Kazakhstan).

Kazakhstan is a country of arid steppes and semi-deserts, flat in the west, hilly in the east and mountainous in the south-east (Southern Altai and Tien-shan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan contains rich deposits of non-ferrous metals: copper in Kounrad, Djezkazgan and Boshchekul, other metals in the Altai, in the Kara-Tau Mountains, and elsewhere. It also contains an important coal-producing area (Karaganda) ranking third in the U.S.S.R. and an oil-bearing area (near Emba). Major centres of metal industry exist now in the Altai Mountains, in Chimkent, North of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and south-western parts of the Republic. Grain is grown in the North and north-east and cotton in the south and south-east. In 1954 an ambitious programme of development of "virgin" lands in the steppes was launched by the Government to increase grain production. During 1954 and 1955 some 45,000,000 acres have been ploughed up.

The Kazakhs make up about three-fifths of the population, the Russians, about one-fifth. There are also many Ukrainian settlers, mainly in the north and some Uzbeks in the south.

CAPITAL, Alma-Ata (formerly Verny). Population (1956) 330,000. Karaganda has an estimated population of 350,000.

VI.—GEORGIA

Chairman of the Presidium of the Supreme Soviet, M. D. Chubinidze.

Chairman of the Council of Ministers, G. D. Djavakishvili.

First Secretary of the Party Central Committee, V. P. Mzhavanadze.

The Georgian S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and Adjara) and the South-Osetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the north and the Smaller Caucasus in the south. A relatively low-lying land between these two ridges is divided into two parts by the Sura Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with a more continental and dry climate. The Black Sea shore and the Rion lowlands are sub-tropical in their climatic character. The most important mineral deposits are manganese (Chiatura), coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is leading as regards production of manganese in the U.S.S.R. There are also many oil refineries. Viticulture and tobacco-growing are the two main agricultural industries.

The Black Sea coast harbours many famous holiday resorts. Georgians make up about three-fifths of the population, the remainder being composed of Armenians, Russians, Azerbaijani and Ossetians.

CAPITAL, Tbilisi (Tiflis). Population (1956), 625,000.

VII. AZERBAIDJAN

Chairman of the Presidium of the Supreme Soviet, M. A. Ibragimov.

Chairman of the Council of Ministers, S. G. Yaragimov.

First Secretary of the Party Central Committee, I. D. Mustafaev.

The Azerbaijan S.S.R. occupies the eastern part of Transcaucasia, on the shores of the Caspian Sea, and borders on Persia. It was formed in 1920. Between 1922-1936 it formed part of the Transcaucasian Federation. In 1936 it became a Union Republic. It contains the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the spur of the Laysa Ridge. Its central part is a depression irrigated by the Kura and by the middle reaches of its tributary Arayag. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaijan has a continental climate. The land requires artificial irrigation. The Republic is very rich in minerals, particularly in oil. The Baku oilfields form the largest oil-producing area in the U.S.S.R., with three-quarters of the total output. A large power station on the Kura (Mingechaur) has been completed in 1954. Azerbaijan is also important as a cotton growing area. The Azerbaijani make up three-fifths of the population of the Republic, Armenians, about 12 per cent., and Russians, about 10 per cent.

CAPITAL, Baku. Population (1956), 901,000.

VIII.—LITHUANIA

Chairman of the Presidium of the Supreme Soviet, J. I. Paleckis.

Chairman of the Council of Ministers, M. J. Sumauskas.

First Secretary of the Party Central Committee, A. J. Snieckus.

Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 1941, until the autumn of 1944. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 19 per cent. of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its incorporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce. A radical agrarian reform was carried out between August, 1940, and June, 1941, and resumed after 1944. The collectivization of the peasantry continues in stages.

In 1923, the Lithuanians made up 84.2 per cent. of the population, Jews, 7.6, Poles, 3.2, and Russians, 2.5 of the population. The majority of Jews were exterminated by the Germans, and large numbers of Lithuanians and Poles deported by the Soviets.

CAPITAL, Vilnius (Vilna, restored to Lithuania by U.S.S.R. after invasion and collapse of Poland in

1939, and recaptured by Soviet forces in July, 1944). Population (1956), 200,000. Kaunas (Kovno) has an estimated population of 195,000.

IX.—MOLDAVIA

Chairman of the Presidium of the Supreme Soviet, I. S. Koditsa.

Chairman of the Council of Ministers, G. Y. Rud
First Secretary of the Party Central Committee, Z. T. Serdyuk.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Roumania with the Pruth forming the frontier. In 1918, Roumania seized the Russian Province of Bessarabia. In 1924 a Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Roumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Roumanians between 1941-1944.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills, and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viniculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. A radical agrarian reform has been carried out under the Soviet regime. Moldavians make up 65 per cent. of the population, with Ukrainians, Russians and Jews next. In the south there are colonies of Bulgarians.

CAPITAL, Kishinev (Chisinau). Population (1956) 190,000.

X.—LATVIA

Chairman of the Presidium of the Supreme Soviet, K. M. Ozolins.

Chairman of the Council of Ministers, V. T. Lasis.
First Secretary of the Party Central Committee, J. E. Kalnberzins.

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940. Between 1941 and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent. of the total territory.

In 1940, Latvians made up three-quarters of the population, with Russians and Jews coming next. Most of the Jews were exterminated by the Germans, and many Latvians deported by the Soviets.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Liebau) are important sea-ports.

As in other newly-acquired Republics in agrarian reform was carried out in Latvia in 1940-41 and again after 1944.

CAPITAL, Riga. Population (1956) 565,000.

XI.—KIRGHIZIA

Chairman of the Presidium of the Supreme Soviet, T. Kulatov.

Chairman of the Council of Ministers, A. Stryerkulov.
First Secretary of the Party Central Committee, I. R. Razzakov.

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, a Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936, a Union Republic. It consists now of five provinces (Djalal-Abad, Frunze, Issyk-Kul, Osh and Tien-Shan). The Kirghiz Republic is a mountainous country, the major part being covered by the ridge of the Central Tien-Shan, while mountains of the Pamiro-Alai system occupy its southern part. There are a number of spacious mountain valleys, the Alai, Susamyr, the Issyk-kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Ferghana Valley where agriculture prospers. Industry is insignificant, but some mining is done. A number of railways have been built under the Five Year Plans. About two-thirds of the population are Kirghiz, followed by Russians and Ukrainians in the north and Uzbeks in Eastern Ferghana.

CAPITAL, Frunze (formerly Pishpek). Population (1956), 190,000.

XII.—TADJIKISTAN

Chairman of the Presidium of the Supreme Soviet, M. Rakhmatov.

Chairman of the Council of Ministers, N. Dodkhudoyev.

First Secretary of the Party Central Committee, T. Ulzhabayev.

The Tadjik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It consists of the Gorno-Badakhshan Autonomous Province and of four Provinces (Garm, Kulyab, Kurgan-Tepe and Leninabad).

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., the Stalin Peak (24,500 feet), in the centre the high ridges of the Pamir-Alai system. Plains are formed by wide stretches of the Syrdarya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. About 60 per cent. of the population are Tadjiks, about 24 per cent., Uzbeks, the rest, Russians and Kirghiz.

CAPITAL, Stalinabad (formerly Dyushanbe). Population (1956), 191,000.

XIII.—ARMENIA

Chairman of the Presidium of the Supreme Council, Sh. M. Arushanyan.

Chairman of the Council of Ministers, A. E. Kochinyan.
First Secretary of the Party Central Committee, S. A. Tovmasyan.

The Armenian S.S.R. occupies the south-western part of Transcaucasia; it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is

continental, dry and cold, but the Aras valley has a long, hot and dry summer. Irrigation is essential for agriculture. At the junction of the former Turkish, Persian and Russian boundaries is *Mount Ararat* (17,160 ft.), the traditional resting place of "Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A.D. 300. and since the 5th century there has been a national language and literature. More than four-fifths of the population are Armenians.

CAPITAL, Erevan. Population (1956), 385,000.

XIV.—TURKMENISTAN

Chairman of the Presidium of the Supreme Council, A. Sariev.

Chairman of the Council of Ministers, B. Ovezov.
First Secretary of the Party Central Committee, S. Babayev.

Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya and borders in the south on Iran and Afghanistan. It was formed in 1924 and consists of five Provinces (Ashkhabad, Chardjou, Krasnovodsk, Mary and Tashauz). The country is a low-lying plain, fringed by hills in the south. Ninety per cent. of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The principal industries are agriculture and stock-raising, cotton, wool, astrakhan furs, carpets and horses being the principal products. Minerals include oil and sulphur. Most of the land under plough is artificially irrigated. Silk industry is of an old standing. There are also some fisheries in the Caspian.

Turkmens, nomadic in the past, make up 70 per cent. of the population, with Russians coming second, and Uzbeks, third.

CAPITAL Ashkhabad (formerly Askhabad, Poltoratsk). Population (1956) 142,000.

XV.—ESTONIA

Chairman of the Presidium of the Supreme Council, A. M. Jakobson.

Chairman of the Council of Ministers, A. A. Mürišep.
First Secretary of the Party Central Committee, I. G. Käbin.

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dago and Ösel, form part of Estonian territory. Between 1941-44, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, wood-working, etc. Mining of shale is being greatly extended under the Five Year Plan to supply Leningrad with gas.

The population consists of Estonians and Russians.

CAPITAL, ΨTallinn (formerly Reval). Population (1956), 257,000.

VENEZUELA

(La Republica de Venezuela)

President, Brigadier-General Marcos Pérez Jiménez,
took office April 19, 1953.

EMBASSY IN LONDON

3, Hans Crescent, S.W.1
[Knightsbridge: 4206]

Ambassador in London, Señor Don Manuel Dagnino (1956).

Counselloer, Dr. Bernardo Marturet.

1st Secretary, Señor Nelson Hernández.

3rd Secretary, Dr. Carlos Briceño-Vásquez.

Naval Attaché, Commander Miguel José Rodríguez-Olivares.

Air Attaché, Major Oscar Clavo.

Cultural Attaché, Señora Miriam Blanco-Fombona de Hood.

There are Consulates-General at London and Liverpool and Consulates at Cardiff and Birmingham.

Area and Population.—The most northerly Republic of South America, situated approximately between 1° 40' S. lat. and 12° 26' N. lat. and 59° 52' - 73° 15' W. long. It consists of one Federal District, 20 states and 2 territories. The best authorities calculate the actual present area to be approximately 352,051 square miles. The population on Dec. 31, 1955 was 5,861,354.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being Margarita, which is politically associated with Tortuga, Cubagua and Coche to form the State of Nueva Esparta. Margarita has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela the small island of Potos (170 acres) about 3 miles from the mainland.

Physical Features.—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincote and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yapurana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly llanos, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the Orinoco, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east.

A Franco-Venezuelan Expedition, led by Major Frank Risquez, claims to have discovered the source of the Orinoco, on Nov. 27, 1951, at 63° 15' W.

long., 2° 18' N. lat., and about 1,200 metres above sea-level.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles farther up-stream. Dredging operations completed at the beginning of 1954 opened the Orinoco to ocean-going ships, of up to 24 ft. draft, as far as Puerto Ordaz (about 150 miles up-stream). Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are *Zulia* (200 square miles), south-west of Maracaibo, and *Valencia* (216 square miles), about 1,400 feet above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October the dry, cooler season from November to March.

Government.—Venezuela was visited by Columbus in 1498, and in 1499 by Alonso de Ojeda and Amerigo Vesputici, the former naming the Gulf of Maracaibo *Venezuela*, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Caracas, who defeated the Spanish forces in the battles of Los Taguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47. Venezuela formed part of the Federal Republic of Colombia from 1822–30, since which time it has been independent.

In 1948, power was assumed by a Military Council of which Col. Carlos Delgado Chalbaud was President. Congress was dissolved and the Supreme Court replaced. On Nov. 13, 1950, Col. Delgado Chalbaud was assassinated. A Council (Junta) of Government was formed on Nov. 27, under the Presidency of Dr. German Suarez Flamerich. On Nov. 30, 1952, polling took place to elect a new Constituent Assembly, which published a new Constitution on Nov. 30, 1952, and chose a Senate and Chamber of Deputies.

Production and Industry.—The produce of Venezuelan forest and fields includes the following: (a) Tropical forest region: orchids, wild rubber, timber, mangrove bark, balata gum and tonka beans. (b) Agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, ground-nuts, potatoes, tomatoes, other vegetables, sisal, tobacco. There is an extensive beef and dairy farming industry, and although the country does

not produce all the grain and other food products it requires, it has now practically achieved self-sufficiency in meat and sugar. Food and drink imports in 1955 were valued at the equivalent of £46,800,000. An autonomous Government department, the *Corporación Venezolana de Fomento*, is endeavouring, by loans, investment and other means, to foster agricultural development.

The principal industry is that of *Petroleum*. The production of the oilfields is shown below (in barrels of 42 gallons):—

Year	Barrels	Year	Barrels
1940.....	185,600,000	1948.....	490,000,000
1941.....	223,800,000	1949.....	482,300,000
1942.....	147,000,000	1950.....	546,730,000
1943.....	177,600,000	1951.....	622,187,000
1944.....	257,000,000	1952.....	658,427,000
1945.....	323,400,000	1953.....	644,221,000
1946.....	388,500,000	1954.....	691,181,000
1947.....	438,000,000	1955.....	785,237,000

Before the war of 1939–45 over 80 per cent. of the crude oil was exported to Netherlands' West Indies refineries. In 1942 small refineries were established in Venezuela, capable of handling about 200,000 barrels daily. The large Shell plant at Punta Cardon went into production in February, 1949, and the Creole refinery at Amuay a year later. Other refineries are being operated at Caripito, San Lorenzo, Puerto La Cruz, Tucupit6 and El Chaure, and about 23 per cent. of the total output of crude oil was refined in Venezuela in 1954. The Venezuelan Government, under existing agreements, receives over 50 per cent. of the profits from oil. The recent developments of rich deposits of iron ore in South Venezuela will exert a considerable influence on the Venezuelan economy in the future. Production, which began in 1950, has increased from about 200,000 metric tons in that year to nearly 8,439,451 metric tons in 1955.

Other industries include gold, diamonds and asbestos; cotton, wool and rayon weaving; manufacture of paper, cement, beer, tyres, cigarettes, soap, animal feeding concentrates, non-alcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly, preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, biscuits and other foods; fishing and fish-canning; pearl fishing. New industries planned include a steelworks, petrochemicals (fertiliser, explosives, chlorine, etc.), and the manufacture of paper from bagasse.

Language and Literature.—Spanish is the language of the country. Some Venezuelan literature is of international repute. In 1955 there were 8 daily newspapers in Caracas, 4 in Maracaibo and 15 in other towns; about 300 periodicals throughout the country.

Education (Primary) is free and compulsory from the age of 7 years. There were (1954–55), 7,014 primary schools, with 623,083 pupils and 197 secondary schools, with 36,277 pupils. There are Universities at Caracas, Merida and Maracaibo.

FINANCE		1955–56
Revenue.....	Bolivares	2,670,000,000
Expenditure.....		2,670,000,000
Internal Debt (Dec. 31, 1955)		30,748,481

The budget for 1955–56 totalled Bs. 2,550,000,000, but actual revenue and expenditure considerably exceeded that amount. The 1956–57 budget has been set at Bs. 2,670,000,000, but will again in all probability be exceeded. Much of the long-term public works and development programme is financed from the Special Reserve Fund, which is fed from surplus revenue and transfers from the ordinary Treasury Reserve.

The market exchange rate of the *Bolivar*, of 100 *Centimos*, at present fluctuates between Bs.9.32=£1 (buying) and Bs.9.40=£1 (selling). There are special buying rates for petroleum, coffee and cocoa. (See also p. 84.)

Communications.—There are about 6,500 miles of all-weather roads. During 1953 a toll-road was constructed between Caracas and Maiquetia and La Guaira (the country's chief airport and seaport). The State has now acquired all but a very few of the numerous railway lines, whose total length is only some 760 miles. A substantial railway reorganization plan has been drawn up which will involve the abandonment of four systems with differing gauges and the construction of new lines of standard gauge. Work has already begun on one of these lines (Puerto Cabello-Barquisimeto). Several British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them state-owned) which between them have a comprehensive network of internal lines and also connect Caracas with New York, Miami, Bermuda, Havana, Lima, Bogotá, the West Indies, Lisbon, Madrid and Rome. The Venezuelan state-owned merchant fleet controls a total tonnage of about 250,000. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radio-telegraph and radio-telephone services are state-owned. There are one government-controlled and 53 commercial broadcasting stations. The latter draw their income from commercial broadcasting. There are 4 television stations in operation in Caracas, and one in Maracaibo.

TRADE

	1954	1955
Imports	Bs. 2,745,803.59	Bs. 2,959,633.695
Exports	5,660,989.648	6,186,171.489

The principal imports are machinery, textiles, foodstuffs, steel and iron and chemicals. The principal exports are petroleum (over 94 per cent. of the total in 1953), coffee, gold, and cocoa. Iron ore will shortly be a significant export; the first shipments were made in 1950, and exports rose to 5,298,839 metric tons, at an estimated value of Bs. 117,151,076 in 1954.

	1954	1955
Imports from U.K. . .	£25,380,466	£23,065,637
Exports to U.K. . . .	18,051,521	32,112,904

CAPITAL, Caracas (3,000 ft.). Population, June 1, 1955, 1,000,000; other principal towns are Maracaibo (287,000), Barquisimeto (148,000), Valencia (114,000), Maracay (86,000), San Cristóbal (71,000), Cumaná (71,000) and Ciudad Bolívar (39,000).

FLAG: Three horizontal bands, yellow, blue, red (with seven white stars on blue band).

Area and Population.—Yugoslavia is a Federation comprising the People's Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia. Serbia includes the autonomous province of the Vojvodina and the autonomous region of Kosovo and Metohija. In July, 1946, Pelagosa and adjacent islands with all territory east of the line known as the *French Line* in Istria (including Pola and Fiume) were ceded by Italy to Yugoslavia. By an agreement concluded in London on Oct. 5, 1954, between Yugoslavia, Italy, the United Kingdom and the United States, Zone B of the Trieste Territory was formally transferred to Yugoslavia by whom it had been administered since 1945. Zone B, an area of 200 square miles with a population of 73,500, included the towns of Kopar (Capodistria), Piran (Pirano) and Novi Grad (Cittanuova). The area has now been divided between the Republics of

Slovenia and Croatia. The area of Yugoslavia in 1946 was estimated at 249,226 square kilometres (96,205 square miles) and the population in 1953 at 16,927,275 (8,211,000 males and 8,716,000 females). As a result of the war there was a decrease of nearly 2,000,000 in the population of Yugoslavia, and this loss has only recently been made up.

Montenegro (Crna-Gora) was united to Serbia by a decision of the Montenegrin Parliament in November, 1918, when King Nicholas was deposed.

Government.—Stretching from Central Europe to the Balkans, different parts have been subjected to different historical, religious, cultural and geographical influences. Serbia came early under the Orthodox Church and then passed 500 fallow years of subjection to the Turkish Empire. In Bosnia, an outpost of the Turkish Empire, large numbers of the population were forcibly converted to Islam. Croatia and Slovenia, on the other hand, came under the Roman Catholic Church, and in later years were subjected to the civilizing influence of the Austro-Hungarian Empire. Such factors have, despite community of race, hampered the process of fusion into a united nation. In Jan. 1929, King Alexander abrogated the Constitution and instituted an absolute monarchy for two years, when it was superseded by a modified constitution, which endured through the greater part of the war of 1939-45. The Partisan Movement under the leadership of Marshal Josip Broz, commonly known as Marshal Tito, emerged from the turmoil of the war years as the most potent force in the country and the modified constitution was superseded by the 1944, by the Ivan Subasíc) and National Liberation Committee, recognizing a provisional parliament. On March 7, 1945, the agreement was confirmed by the Royal Yugoslav government in London, and a provisional government was set up in Belgrade.

On Nov. 29, 1945, the Constituent Assembly of Yugoslavia, at a joint session of the Skupština and the House of Nationalities, proclaimed Yugoslavia a Republic. In January, 1953, a new Constitution became effective, under which two houses (the Federal Council and Council of Producers) were established. Elections to these houses were held in November 1953.

Defence.—The Army, Navy and Air Force on a peace footing consist of 370,000 officers and men, the war strength being about 1,250,000.

Religion and Education.—The Orthodox, Roman Catholic, Protestant, Islamic and Judaic faiths are recognized by the State. According to the 1948 Census, 49.53 per cent. of the population is Orthodox, 36.7 per cent. Catholic, 1.14 per cent. Protestant and other Christian denominations, 12.52 per cent. Islamic and 0.04 per cent. Jews. The Church is separated from the State. All religious instruction in schools has been forbidden since January 1952. Priests are allowed to teach in churches. Eight years elementary education is compulsory and all education is free. In 1954 there were 140,044 elementary schools with 360,040 teachers and 1,401,608 pupils, 590 secondary schools with 9,745 teachers, 242,049 pupils and 79 training colleges for teachers with 20,762 students. There are five universities, Belgrade, Zagreb, Ljubljana, Sarajevo and Skopje, including 84 faculties with 57,000 students, 11 art academies with 1,200 students and 159 elementary and secondary art schools with 17,000 pupils.

Language and Literature.—The languages of the country are Serbo-Croat, Slovenian and Macedonian, all South Slav tongues. Serbo-Croat pre-

dominates and is the language of the Federal Government. In Serbia and Macedonia the Cyrillic script is used and in the rest of the country the Latin; the Hungarian, Roumanian and Albanian are also used in certain districts. The desire for the political union of the South Slavs led to a cultural unity and a revival of Slav literature. There are 3 Serbian daily newspapers in Belgrade, 3 Slovene dailies in Ljubljana (Laibach), 3 Croat dailies in Zagreb, and daily papers at Skopje, Sarajevo, Novi Sad, Rijeka and Split.

Production and Industry.—The principal occupation is agriculture. Over 66 per cent. of the population is so engaged. The main crops are wheat and maize, of which the yield in 1955 was 2,430,000 and 3,900,000 tons respectively. The forest areas produced some 7,240,000 cubic metres of timber in 1955 and are capable of considerable development. According to Yugoslav official estimates the livestock population in 1955 was approximately as follows: Horses 1,240,000; cattle 5,300,000; sheep 12,000,000; pigs, 4,800,000; poultry, 24,900,000. The Government has been pursuing a policy of industrial expansion and a small amount of capital equipment is now being exported. Minerals are a great source of wealth, particularly in the central regions. Production in 1955 included the following ('000 tons): Hard coal, 1,137; brown coal, 7,628; lignite, 6,388; copper, 53; lead, 76; iron ore, 1,398; aluminium, 11.5; zinc, 14 and mercury 0.5 tons. Antimony ore, pyrites ore and manganese ore are also produced.

FINANCE

1954

Dinars

Revenue.....	180,200,000,000
Expenditure.....	203,000,000,000

The Yugoslav Dinar (of 100 Paras) has a nominal value of 1.4 farthings, the exchange rate being 840D = £1 (see also p. 84).

Communications.—In 1954 there were approximately 7,250 miles of normal and narrow gauge railway. There are also 20,714 miles of telephone lines and 21,560 miles of telegraph lines. Yugoslavia has a long seaboard on the Adriatic coast. The principal Yugoslav ports are Rijeka, Sibenik, Split, Zadar, Dubrovnik and Kotor (Cattaro). The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes; the port of Belgrade was the second busiest on the Danube. There are many international air services operated by Yugoslavia and foreign civil aviation.

TRADE

1954

1955

Imports from U.K.	£7,319,236	£9,268,916
Exports to U.K.	7,497,611	7,511,721

The principal exports are timber, ores, cattle, pigs, poultry, skins, fruit, medicinal herbs and etheric oils. The imports are chiefly textile raw materials, machinery and manufactured goods.

The chief imports from U.K. are machinery, tractors and textile yarns.

CAPITAL, Belgrade (Beograd = White City), population (1954) 479,000. Other towns are Zagreb (or Agram) (354,000), Ljubljana or Laibach (143,000), Sarajevo (139,000), Subotica (117,000), Skopje (126,000), Rijeka (Fiume with Susak) (77,000), Split (77,000), Maribor (81,000) and Novi Sad (84,000).

NATIONAL FLAG: Blue, white, red with a five-pointed red star superimposed.

NATIONAL DAY: Founding of Yugoslav Federal Republic (November 29).

BRITISH EMBASSY

Prvog Maja 46, Belgrade

British Ambassador Extraordinary and Plenipotentiary,
His Excellency Sir Frank Kenyon Roberts,
K.C.M.G., (1954).

Counsellor, P. T. Hayman, M.B.E.

Naval Attaché, Capt. D. R. H. Ferguson, R.N.

Military Attaché, Col. M. E. Bransby-Williams.

Asst. Military Attaché, Maj. W. J. Cottle, D.S.O., T.D.

Air Attaché, Group Capt. C. Fothergill,

1st Secretaries, A. A. S. Stark (*Head of Chancery*),
K. R. C. Pridham; D. L. L. Stewart (*Information*).

2nd Secretaries, E. A. Thorpe (*Consular*); H. C. Birdies, M.B.E.

3rd Secretaries, Viscount Norwich; J. J. Beale (*Consular and Commercial*); P. W. Coldham (*Information*).

ECONOMIC MISSION

Counsellor, W. S. Laver.

2nd Secretary, I. J. M. Sutherland.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Belgrade, Zagreb, and (summer months only) Split.

BRITISH COUNCIL

Representative, V. E. Blomfield, Prvog Maja 34, Belgrade. There is also a centre in Zagreb.

NORTH ATLANTIC TREATY ORGANIZATION

Temporary Headquarters: Palais de Chaillot, Paris

Secretary-General and Vice-Chairman of the North Atlantic Council, The Lord Ismay (U.K.)

The North Atlantic Treaty was signed on April 4, 1949, by the Foreign Ministers of twelve nations. The twelve are Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the United Kingdom and United States. Greece and Turkey acceded to the Treaty in 1952 and the Federal Republic of Germany upon the coming into force of the Paris Agreements in 1955.

The original machinery set up to carry out the provisions of the Treaty has undergone considerable modification during the passage of the North Atlantic Treaty Organization from the planning to the implementing stage. Since April, 1952, the North Atlantic Council, the principal body of the Treaty Organization, has been in continuous session in Paris. Member Governments are represented by permanent representatives, who head national delegations of advisers and experts. Ministerial meetings of the Council will continue to be held periodically. Heads of Governments may attend meetings of the Council in person. Otherwise, at ministerial meetings, Governments are represented by their Minister for Foreign Affairs, and/or by other ministers, according to the nature of the agenda. The chairmanship of the Council rotates annually in the English alphabetical order.

The Council is now directly responsible for the tasks previously performed by the former Council Deputies, Defence Production Board and Financial and Economic Board. Specialised functions, such as those assigned to the Planning Board for Ocean Shipping, to the Petroleum Planning Committee, and to other subsidiary bodies, are directed by the Council.

The Secretary-General is appointed by and is responsible to the Council. He has direct access to all NATO agencies and to member Governments, and is responsible for organizing the work of the International Secretariat.

The Secretary-General is supported by one Deputy Secretary-General, Baron Adolph Bentinck (*Netherlands*), and by three Assistant Secretaries-General, who are: Signor Aubrey Casardi (*Italy*), for Political Affairs; M. Didier Gregh (*France*), for Economic Affairs; Mr. J. Murray Mitchell (*U.S.A.*), for Defence Production.

The military structure of NATO is headed by the Military Committee (Chiefs of Staff of the member countries), under which the Standing Group is in continuous session in Washington. The Standing Group is composed of one representative each of France, the U.K. and the U.S.A.—currently General J. E. Valluy (*France*), Admiral Sir Michael Denny (U.K.), and Lieut.-Gen. Leon W. Johnson (U.S.A.). It is responsible for higher strategic direction throughout the North Atlantic Treaty area, and works with the Military Representatives Committee.

Of the five original Regional Planning Groups, one remains: the Canadian-U.S.A. Regional Planning Group, with headquarters in Washington. The functions of three of the remainder have been taken over by SHAPE (Supreme Headquarters Allied Powers in Europe, under General Gruenther, U.S.A.) and its regional commands. The fourth has been absorbed in the Atlantic Command (SACLANT) under Admiral Jerauld Wright (U.S.A.). The Allied Commander-in-Chief, Channel, is Admiral of the Fleet Sir George Creasy (U.K.).

PRINCIPAL LAND AREAS OF THE WORLD BELOW SEA LEVEL

(With approx. greatest depth in feet below Mean Sea Level.)

Europe: Netherlands coastal areas (15).

Asia: Jordan Valley, Dead Sea (1200).*

China: Sinkiang, Turfan Basin (980).

U.S.S.R.—Persia: Caspian Sea (85).*

Arabia: Trucial Oman-Qatar (70).

Africa: Libyan Desert Depressions:—

Qattara (440), Faiyum (150).

Wadi Rayan (140), Sittira (110).

Arab: (80), Wadi Natrun (75).

Melba: (60), Siwa (55), Bahrain (50).

Eritrea: Salt Plains depression (385).

Algeria-Tunisia: Shott Melghir and El

Gharsa (90).*

America: Death Valley (275), Salton Sea (245).

Australia: Lake Eyre (40).

* Water surface.

THE HIGHEST BUILDINGS

PASSPORT REGULATIONS

Applications for Foreign Office passports must be made on the forms obtainable at any of the Passport Offices (addresses given below) or at any Local Office of the Ministry of Labour and National Service.

London.—Clive House, Petty France, S.W.1. (Hours: 10-4, Saturdays 10-1.) Tel., Abbey: 8010.

Liverpool.—India Buildings, Water Street, Liverpool 2. (Hours: 9.30-4, Saturdays 9.30-1.) Tel., Central: 9411.

Glasgow.—1 Princes Square, 48 Buchanan Street, Glasgow, C.1. (Hours, 9.30-4, Saturdays 9.30-1.) Tel., Central: 0260.

Ministry of Labour Local Offices.—(Hours, 9-5, Saturdays 9-1.)

The Passport Offices are also open for cases of special emergency only, between 4 p.m. and 6 p.m. (Saturdays 1-4) and in *London* on Sundays and Public Holidays between 10 a.m. and noon.

To facilitate the issue of passports applicants are recommended to make personal application to any one of the above mentioned offices. If it is not possible to make personal application at one of the Passport Offices or Ministry of Labour Local Offices, completed forms of applications should be sent to one of the three Passport Offices, with photographs, supporting documents and the fee of £1. Remittances sent with postal applications should be in the form of a Postal Order which should be crossed and made payable to the Passport Office. Cheques, notes or postage stamps should not be sent in payment.

Foreign Office Passports are granted:—

- (i) To citizens of the United Kingdom and Colonies.
- (ii) To British subjects without citizenship.
- (iii) To British Protected Persons.

Passports are available for *five years* in the first instance, unless otherwise stated. They may be renewed from time to time for further consecutive periods of one to five years from the date of expiry, provided the total period of validity of ten years from the original date of issue is not exceeded. They are not available *beyond ten years from the original date of issue*. Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the *holder's wife* is not available for the wife's use when she is travelling alone. A wife's particulars may only be added at the time of issue of a passport.

Children who have reached the age of sixteen years require separate Passports. When they apply for a Passport the written consent of father or other legal guardian is necessary.

The application must be recommended in Section 9 by a Member of Parliament, Justice of the Peace, Minister of Religion, Medical or Legal Practitioner, Bank Officer, established Civil Servant, Public Official, Police Officer or any person of similar standing personally acquainted with the applicant. The applicant's birth certi-

ficate and other evidence in support of the statements made in the application must be produced.

In the case of children under the age of 16 requiring a separate passport, an application should be made by the child's father or other legal guardian on form (B) obtainable from a Passport Office or any local office of the Ministry of Labour and National Service.

Unless they are also citizens of the United Kingdom and Colonies, citizens of Commonwealth countries should normally apply to their High Commissioner in London, and citizens of the Irish Republic resident in the United Kingdom should apply to the Irish Embassy.

If the applicant for a Passport be a British subject by naturalization or registration, the Certificate of Naturalization or registration must be produced with the application.

British Passports are only available for travel to the countries named thereon, but may be endorsed for additional countries. The possession of a Passport so endorsed does not, however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries, or from the necessity of obtaining a *visa* where required.

Passports endorsed as valid for the British Commonwealth are also available for travelling to territory under British protection or mandate, not, however, including the Aden Protectorate, for which a special endorsement is required.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Commonwealth outside the United Kingdom of Great Britain and N. Ireland, to the nearest local Passport issuing authority.

Persons resident in *Northern Ireland* should apply in person to the Foreign Office Passport Agency, 1 May Street, Belfast, or by post to the Branch Passport Office, Liverpool; citizens of the United Kingdom and Colonies resident in the Irish Republic should make application to the Visa Section, British Embassy, 30 Merrion Square, Dublin.

A British passport is not valid for travel to, or through, any territory for which a military, Control Commission or other special permit is required, unless such a permit has first been obtained.

RENEWAL OF PASSPORTS

Applications for the renewal of Foreign Office passports must be made on Form D, obtainable at any of the Passport offices (see above) or at any local office of the Ministry of Labour and National Service.

PHOTOGRAPHS

Duplicate unmounted photographs of applicant (and his wife, if to be included in the Passport) must be sent. These photographs should be printed on *thin* paper and must not be glazed on the reverse side. They should measure not more than 2½ in. by 2 in. or less than 2 in. by 1½ in., and should be taken full face without a hat.

WHEAT HARVEST MONTHS OF THE WORLD

January.—New Zealand, Chile.

February.—India, Upper Egypt.

March.—India, Upper Egypt.

April.—India, Lower Egypt, Syria, Asia Minor, Persia.

May.—China, Japan, Central Asia, Algeria, Morocco.

June.—U.S.A. (Southern States), Italy, Spain, South France, Turkey.

July.—U.S.A. (Middle States), South Russia, Roumania, Bulgaria, Austria, Hungary, Germany, France.

August.—U.S.A. (Northern States), Canada, Central Russia, Poland, England and Wales.

September.—North Russia, Scotland.

October.—Sweden, Norway.

November.—South Africa, Argentina (Santa Fe).

December.—Australia, Argentina, Ethiopia.

WORLD COMMODITIES

The following table shows world production and main producers of some of the most important foods and raw materials, together with their domestic consumption in the U.S.A. and the U.S.S.R. In the case of rubber, natural production and consumption only are shown. In the case of synthetic rubber amounted to 1,085,000 tons in 1955 compared with 716,000 tons in 1954; pre-war production was almost negligible. The United States produces 90 per cent. of the world's synthetic rubber and is also the largest consumer, using nearly 895,000 tons in 1955 out of its total rubber consumption of 1,530,000 tons.

THE NOBEL PRIZES

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. They are awarded to those who have contributed most to the common good in the domains of (a) Physics; (b) Chemistry; (c) Medicine or Physiology; (d) Literature; (e) Peace. The first awards were made in 1901 on the fifth anniversary of Nobel's death. The awarding authorities are the Swedish Academy of Science—(a) Physics; (b) Chemistry; the Stockholm Faculty of Medicine—(c) Medicine or Physiology; the Swedish Academy of Literature—(d) Literature; a committee of five persons elected by the Norwegian Storting—(e) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation ("Nobelstiftelsen Styrelse"), Stockholm. The Board consists of four members and two deputy members appointed by the awarding authorities; the Swedish Government appoints a chairman and a vice-chairman.

The nationality of prizewinners is indicated as follows: (a) Great Britain; (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) Russia; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentine; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Ireland; (aa) South Africa; (bb) Iceland. The distribution by nationalities is shown below the table opposite.

A list of prizewinners for the years 1901-1953 appears in Whitaker's Almanack, 1953.

Year	(a) PHYSICS	(b) CHEMISTRY	(c) MEDICINE OR PHYSIOLOGY	(d) LITERATURE	(e) PEACE
1924	K. M. G. Siegbahn	No award	W. S. D. D. (h)	W. Reymont (n)	No award

1953					
1954					
1955	W. E. Lamb (b) P. Kusch (b)				

The awards have been distributed as follows:—PHYSICS:—*Gr. Britain*, 15; *U.S.A.*, 14; *Germany*, 12; *France*, 7; *Netherlands*, 5; *Austria*, 3; *Sweden*, 2; *Italy*, 2; *India*, 1; *Denmark*, 1; *Japan*, 1; *Republic of Ireland*, 1. CHEMISTRY:—*Germany*, 20; *U.S.A.*, 11; *Gr. Britain*, 9; *France*, 6; *Sweden*, 4; *Switzerland*, 3; *Netherlands*, 2; *Hungary*, 1; *Austria*, 1; *Finland*, 1. MEDICINE OR PHYSIOLOGY:—*U.S.A.*, 17; *Gr. Britain*, 10; *Germany*, 8; *France*, 7; *Sweden*, 4; *Switzerland*, 3; *Denmark*, 3; *Poland*, 2; *Spain*, 2; *Switzerland*, 2; *Belgium*, 1; *India*, 1; *Russia*, 1; *Finland*, 1; *Chile*, 1; *Irish Free State*, 1; *Iceland*, 1. PEACE:—*U.S.A.*, 12; *France*, 8; *Gr. Britain*, 6; *Germany*, 3; *Sweden*, 3; *Switzerland*, 3; *Belgium*, 2; *Norway*, 2; *Austria*, 2; *Italy*, 1; *Argentina*, 1; *Denmark*, 1; *Netherlands*, 1.

PUBLIC HOLIDAYS

BANK HOLIDAYS IN ENGLAND, WALES, NORTHERN IRELAND AND THE CHANNEL ISLANDS ARE:—Easter Monday, Whit Monday, first Monday in August and first week-day after Christmas (Boxing Day).

Banks are also closed on Good Friday and Christmas Day.

The Stock Exchange is closed on Bank Holidays, Good Friday and Christmas Day; and on Saturdays throughout the year.

Custom House and Docks, as Banks: with the Queen's Birthday (when decreed).

Excise and Stamp Offices, as Banks: with Whit Tuesday and Coronation Day, if and when decreed.

Law Offices.—Good Friday, Easter Monday and Tuesday, Whit Monday, Christmas Day, and first week-day after Christmas.

BANK HOLIDAYS IN SCOTLAND ARE:—New Year's Day, first Monday in May and first Monday in August.

Banks in Scotland are also closed on Good Friday and Christmas Day. There are also Spring and Autumn holidays in most Scottish cities and towns.

SCOTLAND has special Term (Quarter) Days:—Candlemas, Feb. 2; Whit Sunday, May 15 (Fixed date); Lammas, Aug. 1; and Martinmas, Nov. 11; the Removal Terms are May 28 and Nov. 28.

SCIENCE, DISCOVERY AND INVENTION IN 1956

BRITISH ASSOCIATION.—The British Association for the Advancement of Science held its 118th annual meeting at Sheffield on August 29–September 5, under the presidency of Sir Raymond Priestley, M.C.

As the President was a member of the Shackleton and Scott Antarctic expeditions his address on "Twentieth Century Man against Antarctica" claimed special attention and was highly relevant also to the International Geophysical Year, which starts in July 1957, for the systematic exploration of the physical phenomena of the South Polar continent.

Now that atomic power is immediately ahead, he said, strategic threat of a monopoly of Antarctica by any one Power should by itself suffice to keep the interest of nations alive. The strategic value of Antarctica, should world atomic war break out, with the likelihood of the destruction of the Suez and Panama canals, would stem from the fact that all inter-continental seaborne traffic, and much coastal traffic, must proceed *via* the Cape of Good Hope and Cape Horn. From that cause alone concern with Antarctica, as a possible air or submarine base, was bound to be a preoccupation of any great Power and more an affair of government than of individual adventurers or scientific societies. The International Geophysical Year was intended to cover the whole earth, the systematic exploration of the physical phenomena in Antarctica being a most striking part of the plan, the cost of which had been assessed at £100,000,000. Forty-five nations had pledged themselves to play their part. In and around Antarctica there would be over 40 stations, of which three would be at the geographic pole, the geo-magnetic pole, and the "Pole of Inaccessibility"—the spot on the inland ice most remote from an attainable base. Automation was an essential element in the I.G.Y. plan. Perhaps it was at its most dramatic in the "Grasshopper," a recording device weighing 200 lb. which could be dropped from an aircraft at any spot. It automatically opens, rights itself on its six legs in insect fashion, and goes into action. It gathers weather information, transcribes it automatically into International Morse Code, and transmits it by radio at 17 words a minute. It works for 60 days, recording and transmitting surface wind speed and direction, temperature, barometric pressure, and humidity. Valuable mineral deposits must be there in Antarctica. "Once the ore is located the whole enterprise could go underground. Tunnel or adit entry might be followed by the construction of underground engine rooms, hoisting gear, and mineral dressing plants. Floating power stations that could be withdrawn during the closed season might be a useful expedient in the initial stages."

It had been suggested that the Antarctic might become a vermin-free store for periodical food surpluses, since widespread crop failures might spell disaster to a world whose population seemed destined to increase. Why not atomic-powered settlements on the Antarctic mainland? The harnessing of the Antarctic gales was another possible source of power. But everything would depend upon the discovery of a worthwhile economic objective, and that was not at the moment in sight. "The chances are that for the remainder of this century Antarctica will remain the scene of investigations in pure rather than applied science—but man may yet find a way to overcome the latent heat of ice and add a seventh habitable continent to the six he already has in thrall."

The President took occasion to refer in his address to the Amundsen–Scott race to the South Pole. The British lost the race, he said, and were beaten at the post because we did not fully understand the value of dogs as transport animals.

Other factors contributed to the tragedy, but the stark fact was that with sledging rations completely devoid of vitamin C, the margin of safety of any man-hauling party to the South Pole from any base on the rim of the continent was too small. Scott committed errors of organization. He should not have changed his parties from two units of four men to one of three and one of five, and so endanger the party going home, who had, without measuring or weighing apparatus, to take exactly three-quarters of the food from dozens of weekly bags. He handicapped his own party psychologically by crowding them in a tent meant for four men and disorganizing a very carefully thought-out routine. He made a bad mistake in taking with him three officers and one long-service seaman. Petty Officer Evans was in a thought-tight compartment by himself, and was naturally the first to break.

The weather was unkind, and of all the years of which a meteorological record had been kept, 1912 was the stormiest on record, and the winter of that year set in unusually early. Nevertheless, he believed scurvy was the deciding factor.

The Presidents of the Sections and the subject of their addresses were as follows:—A. Mathematics and Physics, Sir George P. Thomson, F.R.S., "Physics and Technology"; B. Chemistry, Sir Charles Goodeve, F.R.S., "Steelmaking since Bessemer"; C. Geology, Dr. T. Robertson, "Geological formation in maps"; D. Zoology, Dr. W. H. Thorpe, F.R.S., "Animal Behaviour"; E. Geography, Prof. A. Austin Miller, "The use and misuse of climatic resources"; F. Economics, Prof. Gilbert Walker, "Prices as an instrument of transport policy"; G. Engineering, Mr. A. C. Hartley, "Oil and Industry"; H. Anthropology and Archaeology, Dr. A. E. Maurant, "Blood groups and human evaluation"; I. Physiology, Prof. D. Whitteridge, F.R.S., "The machinery of posture"; J. Psychology, Prof. J. Dreyer, "Psychology and the Humanists"; K. Botany, Dr. H. Godwin, F.R.S., "Quaternary history and the British Flora"; L. Education, Sir Christopher Cox, "The impact of British education on the indigenous peoples of overseas territories"; M. Agriculture, Mr. G. V. Jacks, "The influence of man on soil fertility"; X. Assembly of Corresponding Societies, Dr. F. J. North, "Local societies in the community of to-day".

Two evening discourses were delivered: Prof. F. G. Young, F.R.S., "The growth of biochemistry"; and Prof. Sydney Chapman, F.R.S., "The International Geophysical Year".

Two public lectures were given, in accordance with the aim of the British Association to present science to the public: Sir Raymond Priestley, "Antarctic adventure"; and Sir John Cockcroft, F.R.S., "Future development of atomic energy".

A session was also devoted to the research work done by students. Kenneth Hughes, aged 16, recently of Chesterfield Tupton House School, discussed the habits of three different species of finch he had kept under observation, changes of the habit, changing of colour, aggressive behaviour (over food), courtship, rearing of the young, and how a bird learned its song, were all described. Miss B. Anne Bunting, aged 19, of Thorne Grammar School, gave the result of her

studies of the history and habits of the large American cockroach.

Professor P. M. S. Blackett, F.R.S., Professor of Physics at the Imperial College of Science and Technology, London, since 1953, was elected President for 1957, when the annual meeting will be held in Dublin. The meeting in 1958 will be held in Glasgow.

AGE MAY BE CONTROLLED.—Dr. A. Cornfort, of the Department of Zoology, University College, in a lecture on old age, said that there was a striking tendency for the age of human puberty to advance by as much as five years within a century, and the question was whether improved nutrition was shortening childhood and the life span by that amount. In girls the age of puberty had come down by five years, and the heights of Army recruits indicated that while boys might not be reaching a greater final height than in the past, over the last century they had been reaching their maximum height five years earlier. Puberty in boys had also advanced.

The rate of development in most mammals could be altered during the period before puberty, but no way was known of altering the rate of development after puberty. Senescence, or aging was a deteriorative process and control of human age was certainly not a fundamental impossibility. Senescence was not simply a result of the passage of time. The clock which determines the progress of age changes could be stopped and restarted, or, more important to us, it could be slowed.

Nothing was known at present capable of producing more than a limited reversal of a very few senile changes in human beings, but there was a serious possibility of prolonging life by slowing down development.

ASTRONOMICAL CLOCK IN YORK MINSTER.—A memorial to airmen who fell while operating from bases in Northumberland and Yorkshire during the Second World War may now be seen in York Minster. The memorial contains an astronomical clock designed by Dr. R. d'E. Atkinson and made in the workshops of the Royal Observatory. On the west is a Zodiacal dial showing the apparent motions of the sun. The times of rising and setting are accurate to within one minute. The rays

motion, the sun is shown to move a circle of the elliptic, and it thus rises to the appropriate elevation at any time of the year. Solar time may be read from this dial and Greenwich mean time from a dial below. Another side of the memorial carries an astral dial, which shows the apparent motion of the northern circumpolar stars. Sidereal time may be read from this dial; and it is also shown on dials on the Zodiacal side converted into degrees. The clock also depicts events appropriate to the latitude and longitude of York, and is intended to give a picture of the heavens as seen by a navigator in an aircraft over the city.

ATOMIC CLOCK AND EARTH ROTATION.—The National Physical Laboratory's atomic clock was on public view at the annual open day. The device is so accurate that it does not lose or gain more than a hundredth of a second a year. Some physicists now say that this instrument keeps time better than do the stars, and that it ought to be used as a standard of time. The "pendulum" in the atomic clock is essentially a radar beam, which "beats" roughly a thousand million times a second and is kept constant by continual comparison with one of the frequencies with which the electrons in caesium atoms vibrate. In the

clock the caesium atoms appear as a thin stream shot off from a sample of solid caesium in an electric oven, and under these conditions there is no reason why their frequency of vibration should alter from one moment to another. This clock and others have been able to show that the rotation of the earth is far from regular.

ATOMIC ENEMY OF PESTS.—The possibilities of atomic pest-control were outlined by Mr. A. H. Strickland, of the Harpenden plant pathology department, at the British Association. There were two means of pest reduction. They could be killed outright by chemicals—a speedy and easy method—or natural enemies, or their capacity for increase could be reduced. Insecticides were at best only palliatives. Their indiscriminate use might result in the segregation of strains of insects resistant to them, or outbreaks of new pests previously held in check by natural enemies. Altering the environment so that the actual rate could be reduced was a permanent weapon in the battle. Experiments had shown that the sheep-tick could be controlled by minor changes in flock management, coupled with a reseeding of old moorland pastures, and the rate of wheat bulb fly increase could be reduced by rotational and cultural practices. Another possibility could be seen in the eradication of the screw-worm in the Dutch West Indies and in the United States, where male flies sterilised with gamma radiation had been used. This was difficult and costly. Twice as many sterile male flies had to be released as there were normal males in the area. In Curaçao, about 170 square miles in area, 16,000,000 fly pupae were treated with gamma-rays and released to ensure that half this number of sterile males entered the endemic breeding areas. The sterile males mated with normal females, who then laid sterile eggs. It was claimed that this treatment had eliminated the screw-worm in Curaçao.

ATOMS SEEN FOR THE FIRST TIME.—Photographs of a piece of tungsten in which individual atoms may be seen have been obtained at the State University of Pennsylvania by Professor E. W. Müller by means of an instrument which he calls a field ion microscope. It can produce images of a narrow class of objects with magnifications up to 2,750,000, and can show up fine details no greater in diameter than a hundred millionth of a centimetre. This microscope is similar in shape to a television tube, with a fluorescent screen at the flat end. The tungsten object photographed was in the form of a fine needle, the tip of which was less than one-thousandth of an inch in diameter. This was mounted in the neck of the tube, which was filled with helium gas. The technique of taking photographs of the tungsten tip consists of applying a high electrical voltage—much more than a million volts—between the needle and the screen, and of recording what appears on the screen by means of the camera. Dr. Müller's scientific feat follows hard on the heels of a British advance at the research laboratories of the Tube Investments Ltd., near Cambridge, where Dr. J. W. Menter, using an electron microscope, has taken direct pictures, at a magnification of 1,500,000, showing the lattice planes of two crystals, in which there are spacings, or imperfections, between planes of the order of one ten-millionth of a centimetre.

BABYLONIA: NEW LIGHT.—The existence of a contemporary written reference to the capture of Jerusalem by Nebuchadnezzar and the beginning of the Babylonian captivity was made known by Mr. D. J. Wiseman, of the Department of Western Asiatic Antiquities in the British Museum. The

reference is contained in one of four clay tablets, now in the British Museum, belonging to the class of documents called "The Babylonian Chronicle." They are inscribed in the Neo-Babylonian cuneiform script and are considered to be a unique and reliable source of knowledge for the history of Babylonia. These texts give a year by year account of the main political and religious events from 626-594 B.C., with a break of only six years. The part of the chronicle now deciphered records that Nebuchadrezzar, King of Babylon, "in his seventh year mustered his troops and marched into the land of the Hatti [Syria and Palestine], besieged the city of Judah, and on the second day of the month of Adar [i.e., March 15-16, 597 B.C.] captured the city and took the king prisoner. He appointed there a king of his own choice and, having exacted a heavy tribute, sent it, with the prisoners, to Babylon." This is a clear reference to the capture of Jehoiachin of Judah, the seizure of the treasures of the temple at Jerusalem, and to Mattaniah, renamed Zedekiah, who was placed on the throne of Judah as the Babylonian nominee. The chronicle also provides an exact date, which had hitherto been lacking, in both Jewish and Babylonian history. Earlier entries in the chronicle give an account of the Babylonian wars against Egypt and of the Battle of Carchemish (605 B.C.), at which Nebuchadrezzar, acting for his father, King Nabopolassar, routed the Egyptian forces. The chronicle gives the exact dates of the death of King Nabopolassar in Babylon and the accession of Nebuchadrezzar, who was then with the army in Syria. Only 23 days elapsed between the two events. Allowing a week for the news of the death of the King to reach Syria from Babylon, and another week for Nebuchadrezzar to make many political and military decisions, this leaves about a week for his return journey. He must have covered about 500 miles, mostly across the desert, and at the height of summer—no mean feat.

BEAKED WHALES.—The British Museum (Natural History), South Kensington, has been presented by the Malacca Museums Board with the skull of an extremely rare species of whale, *Mesoplodon stejnegeri*. This is one of the beaked whales, and is known only from a few specimens which have been found stranded. This beaked whale is not difficult to identify. It has only one pair of teeth, which are enormously enlarged and are visible, sticking straight upwards, half-way along the lower jaw. The newly acquired skull is about 2 ft. long. All previous specimens were reported from the western coast of America and the only other museum specimen is the skeleton of one 18 ft. long, now in the United States National Museum, Washington. The finding of the present specimen, which was stranded in Malaya, suggests that the species may have a wide range.

BENJAMIN FRANKLIN'S PURSE.—In connection with the 250th anniversary of the birth of Benjamin Franklin (1706-90), the Department of Mineralogy of the British Museum (Natural History) exhibited the asbestos purse sold by Franklin to Sir Hans Sloane in 1725. On his arrival in England Franklin worked as a compositor and augmented his income by the sale of some curiosities he had brought from America. One of these, the asbestos purse, is referred to by Franklin in his autobiography, and also in a letter to Sir Hans Sloane, now preserved in the British Museum. The purse is considered to represent perhaps the earliest specimen of asbestos from North America to reach Great Britain.

BILHARZIA.—Bilharzia, a disease which affected the Pharaohs, as we know from the eggs of the

parasite which are found in the mummified tissues of these monarchs, infests African waters to this day, to the debility of many people. Tests are being made in Southern Rhodesia of a chemical which, by killing the water snails in whose bodies the parasite dwells before it sends out its larvae to attack human beings, may help to break the cycle of the disease. The cure of bilharzia in human beings is slow, and there is no guarantee against a fresh invasion of parasites. The best method is to kill all the non-human carriers, so that the parasite loses one of the vital posting-stages in its career. Chemicals which kill the host snails must not affect the fertility of the soil. Small stagnant pools may be easily rid of snails, but it is much harder to cope with large expanses of water, especially if the water is flowing sluggishly through river deltas or through thousands of irrigation channels.

BIRD CONGRESS IN LENINGRAD.—The first Russian ornithological congress was held in Leningrad, and was attended by nearly 400 scientists from all parts of the Soviet Union and delegates from Britain, Germany, Denmark, Finland, Iceland, Poland, Hungary and Czechoslovakia. Mr. Guy Mountfort represented the British Ornithologists' Union and the British Trust for Ornithology, and gave an address, and Mr. James Fisher represented the Royal Society for the Protection of Birds and the Wildfowl Trust. The films shown by the British delegates and the exhibition of current British ornithological publications created great interest. Russian delegates were surprised to learn that the B.B.C. had broadcast 195 radio and television programmes about birds during 1955. Papers read at the congress showed that the annual output of zoologist graduates from the Leningrad branch of the Academy of Sciences alone exceeds that of Oxford and Cambridge combined. Since the war 16 teams of young zoologists have been sent on expeditions ranging from the Arctic to the tropics, and intensive work is in progress in biochemistry, embryology, and morphocology. Only in the study of migration and bird song and in photography is there a lag behind western standards. The important decision was taken that the advanced Russian programme of faunistic investigation should be combined with that of other countries in the production of a distribution census embracing the entire palaearctic region. The proposal was made by Professor E. Stresemann, of Germany, and was immediately approved. Between sessions the delegates examined the 150,000 bird skins in the Zoological Museum, where the rarest treasures of all, the only known specimens of the extinct *Kittlitzia corvina*, were handled.

BIRDS OF PARADISE HATCHED.—Mr. Sten Bergman, a Swedish explorer and ornithologist, has induced a hen Bird of Paradise to lay eggs and hatch a pair of young in his private aviary near Stockholm. As the young are the first to have been hatched in cold palaearctic Europe, the event has aroused the interest of zookeepers in several countries. Ornithologists at London Zoo have tried to mate these beautiful creatures on several occasions but without success. The young seem to be particularly sensitive to captive conditions and do not live long. The Swedish specimen, a King Bird of Paradise, comes from New Guinea. There are about seventy different species in the whole family; they are all related to the crows, but in the brilliance of their plumage the adult males are rivalled only by humming birds. The group is confined to New Guinea, the Molucca and Aru islands, and the east coast of Australia.

BLINDNESS: MEDICAL DRIVE.—The Medical Research Council has sponsored an intensive drive against trachoma. The disease, which chiefly affects infants in the first few months of life, consists of inflammation of the conjunctiva cornea—the covering and the “window” of the eye—and is the commonest cause of blindness. It is caused by a virus that can be identified by the changes it produces in tissues on which it grows. Fundamental studies of it are hampered by the fact that it does not readily survive transport from the countries where trachoma is prevalent to the laboratories where it can be investigated. Trachoma is widespread among the Arabs in the refugee camps in Jordan, so British doctors are going there to study the disease on the spot. Dr. Charles Smith, a virologist, and Dr. M. J. Gilkes, a clinician and a bacteriologist, both from the Institute of Ophthalmology, will work on research at new laboratories attached to the Ophthalmic Hospital of the Order of St. John in Jerusalem. There they will apply newly developed tissue culture methods in an attempt to isolate the virus. A second group of scientists, led by another virologist, Dr. Leslie Collier, will conduct parallel research at the Lister Institute of Preventive Medicine in Chelsea, in an attempt to isolate and grow the trachoma virus. When this has been done it is probable that a vaccine against the disease will be developed. Dr. Collier will also inspect and report on the trachoma work being done at various laboratories in the Middle East. Another of his tasks will be to find the best way for transporting material containing the virus back to the Lister Institute. Packing it in ice or the freeze-drying technique developed at the Institute may provide the answer to this problem.

BRITISH FLORA AND THE ICE AGE.—The theory that most of the British flora arrived in the country after the recession of the last Ice Age and before the North Sea became filled with water was put forward by Dr. H. Godwin, F.R.S., in his presidential address to the Botany Section of the British Association. His argument was based on the results of techniques applied to the recent geological past—the use of radio-active carbon for determining age, and the study of fossilized pollen grains. According to the radio-carbon work, the temperature of Britain became temperate 10,000 years ago. For 5,000 years before that there had been two relatively mild cold periods, which succeeded the more severe conditions of the Full Glacial period (between 15,000 and 25,000 years ago). The North Sea was dry 10,000 years ago, and became filled to its present level by the melting of glacial ice in other parts of the world, about 5,000 years ago. While it was dry, plants migrated into the country from the south and east, where the glacial recession occurred earlier. Pollen grains recovered from peats and bogs have shown that in the Late Glacial period (10,000 to 15,000 years ago) birch forest prevailed during the warmer periods, to be replaced at colder times by dwarf shrubs like arctic willow and dwarf birch. After this, dense birch forest returned. This was displaced by oak forest as the climate became warmer and until Neolithic man cut down trees or until his animals prevented them growing. At the close of the last glaciation, three processes were initiated: (1) melting and retreat of the ice-sheets, and the exposure of fresh country to colonization; (2) restoration of the ocean-level by return of water from the ice-sheets; and (3) northward migration of flora and fauna driven south by the oncoming cold. It was of the greatest importance to the biogeographer to know the progress of those three processes in relation to one another, and their absolute timing.

In particular, they needed to know for the British Isles the date at which the North Sea was last available as a dry-land route to Britain.

BUBBLE ON THE SUN.—Motion pictures of the outburst of flaming gas from the sun on February 10—in violence equalling a simultaneous explosion of 100 million H-bombs—was shown to the American Astronomical Society by the scientists who made the photographs at the United States Sacramento Peak Observatory in New Mexico. The pictures were taken at the rate of four a minute with a telescopic instrument, the coronagraph, which has a disc that masks the sun's face except for its edges. They showed a bubble of gas on the eastern side of the sun, expanding at the rate of 60 miles a second. It grew steadily more brilliant for 5 to 10 minutes and then suddenly a top-knot of it accelerated to 700 miles a second. About 20,000 miles in diameter, it shot out into space 200,000 miles before becoming too faint to see, setting a record for speed among all such flares yet observed. Dr. Menzel, Director of the Harvard Observatory, said that the force that produced this sudden acceleration was more than 1,000 times the pull of the earth's gravity. Most of the 1,000 million tons of gas expelled was hydrogen. It was ultra-violet light energy from the flare which played havoc with radio transmission by affecting the ionosphere, which bounces radio waves back to earth.

BUSTARDS IN THE ZOO.—The London Zoo has acquired from Spain a pair of great bustards, which have attracted attention by their owl-like hoots and whistles. They are about the size of guinea fowls, with mottled brown backs and small feet. Ornithologists place them between the cranes and the stone-curlews. There are about twenty-three species in the Old World; they are mostly omnivorous, eating lizards and mice with as much apparent satisfaction as the green shoots and tomatoes they eat in the Zoo. Their flesh is considered to be exceptionally tasty. Once these bustards were common in Britain, but they needed great open spaces for their continued existence and now they are almost extinct in North-west Europe. Some of them exist in Poland, the Balkans, and in the steppes, where they are hunted on horseback. Elsewhere, the bustard family is in decline; the great Indian species is hardly ever seen; the Australian birds are to be found only in the Northern Territories; and few regions are safe for them nowadays. The last British specimens bred in Yorkshire about 1836 and vagrants have been seen at intervals since in the Orkneys and Shetlands.

CAMELS IN TUSCANY.—A plan was made to revive the herd of camels which for generations flourished on the royal estate of San Rossore, which is bounded on the south by the river Arno and on the west by the sea. Two young dromedaries, purchased for £2,200, have been established in the quarters previously occupied by generations of their species. The origin of the herd dates back 300 years, when they were introduced from Tunis, and on one occasion 300 arrived at the port of Leghorn. The camels prospered and multiplied, so that in 1789 the herd numbered 196, but before the last world war the number was only 60. Under the German occupation of San Rossore in 1943 the camels were pursued into the woods, slaughtered, roasted and eaten.

CAMERA INSIDE ATOMIC PILE.—A further development in the use of television for the inspection of hot regions in a nuclear reactor was exhibited

at Cambridge. The camera, believed to be the first of its kind in the world, is small enough to be lowered into the heart of a reactor through the narrow "fuel" loading channels that form a lattice work in the surrounding graphite. Altogether, the camera and its associated equipment which is mounted on a trolley, weighs half a ton. Pye Limited, after demonstrating industrial television to the Atomic Energy Authority, were given a contract to design a special camera for use inside an atomic pile at Calder Hall in Cumberland. The camera is housed in a thin stainless steel casing 30 in. long and $3\frac{1}{2}$ in. in diameter. Near the lens are four small bulbs giving the apparatus its own source of illumination. A sideways view of an atomic reactor can be gained by a system of mirrors. As the equipment is to be used when the atomic reactor is dangerous, it is worked by remote control. The camera can be lowered into a reactor by means of a cable, contained in a rubber hose 75 ft. long. Mr. W. L. Cruikshank, the mechanical engineer in charge of production, states that the camera has a system of cooling as the temperatures of a reactor reaches as high as 200 deg. Centigrade. Carbon dioxide can be pumped through the rubber housing of the cable to the camera, keeping it at a temperature of 50 deg. Centigrade.

CHAFFINCHES TAUGHT TO SING.—In a discussion on animal behaviour at the British Association, Dr. W. H. Thorpe, F.R.S., described a number of experiments in bird-song which the Cambridge University Zoology department had carried out. In some species—the corn bunting, the reed bunting, and some warblers—the characteristic full song was entirely inborn; with the chaffinch, the linnet, and the yellow bunting, the basic pattern of the song was innate, but much of the pitch and rhythm had to be learned. Young chaffinches were taken from their nests and caged in a room where they cannot hear other birds sing. Apparently, individual birds all sing something of about the right length, but this song is not divided into three distinct phases, as is the song of wild chaffinches. If two untrained chaffinches are put into the same room, they learn some more of the proper song from each other. This happens when they begin singing in earnest at about nine months. The real learning period comes in a short period of about six weeks when the bird is eleven months old. It is then that it first has to sing on a territory of its own in competition with other and perhaps more experienced birds. It learns the finer points of chaffinch song by listening to its elders, though it is not known how chaffinches always learn from other chaffinches and not from robins.

CONTINENTS ON THE MOVE.—Professor P. M. S. Blackett, F.R.S., next year's President, opened a discussion on rock magnetism at the British Association. Undoubtedly, he said, there had been large movements of the continents relative to the poles. England had moved a long way northward in the last 150 million years from a position near the Equator. North America had moved similarly. It looked as if the land masses of the northern hemisphere had moved collectively some 40° relative to the poles, although with smaller relative motions of the parts. The gap between Europe and America seemed to have widened by over 1,000 miles. India and South Africa had moved great distances from somewhere nearer the South Pole several hundred million years ago. And India must have moved markedly compared with Europe. This indicated a relative continental drift as well as a movement of the crust as a whole—often called polar wandering. All these results had come in the

past three years; in another six years or so, "we really should know quite a lot about how and when the continents have moved."

COST OF THE BRITISH CLIMATE.—In a discussion about the weather Professor Gordon Manley, of Bedford College, London, said at the British Association meeting that every year about a third of the coal used in this country went in lighting, cooking and heating. As imports of coal amounted to 10,000,000 tons a year, a severe season not only caused personal inconvenience, but also directly affected balance of payments problems. People blamed dramatic incidents like snow for increased consumption of fuel, but what mattered was a consistently cold spring. The demand for heating in the long, cool season of 1950-51 had been greater than in the famous winter of 1947. Some research into fluctuations of climate was necessary. Statistics during the "heating season," from September to May, were available for the last 250 years. The mildest season was 1821-22, and it was approached by 1948-49. The worst times came in 1739-40, 1813-14, and 1878-79, and they provided a warning of what might happen again. There had been nothing in this century as bad as the weather in the 1880's. In recent years there had been a tendency towards warmer springs and autumns, but there were some slight signs that a decline had set in. More reliable weather forecasts, it may be added, particularly in the 36 and 48 hours time range, may be possible as a result of experiments by the Meteorological Office with an electronic computer at Manchester University. America and Sweden have adopted the system, and report that they achieve the maximum improvement over conventional methods when making forecasts for 36 or 48 hours ahead.

THE COYPU IN BRITAIN.—Major Anthony Buxton, in a letter to *The Times* on the increasing number of the coypu, the large rat introduced from South America, says it is about to become a far worse menace than the grey squirrel. Coypus will soon infest every slow flowing river in the country. They make large burrows in banks. Their holes are at about water level and they are therefore a menace in country like that of the Norfolk Broads, where main rivers and water channels are about the level of the surrounding land. Coypus, burrows may cause a serious leak. He has caught 11 coypus at one time out of one burrow, three out of another, and several single ones out of other holes. Since a coypu likes moving about with its back arched, the burrows have the shape of the interior of a cathedral, and sometimes extend for 15 ft. underground. They are good diggers and prefer to burrow in stiff clay, probably because the roof is less likely to collapse in clay soil than in peat. When feeding on growing beet, a favourite food, they eat only the portion of root above ground and pass on to the next one. Their other favourite foods are young reed shoots, the roots of lesser bulrush and of water dock, candle rush, the produce of cottage gardens, and, in hard frost, short grass growing on dyke banks. Their teeth are like those of a beaver, but their bite is not usually deep, because their mouths are so small. They can be safely tailed, but the end, not the base, of the tail should be grasped. They can remain completely submerged at the bottom of a dyke for at least half an hour.

CRUCIFIXION: EARLY CARVING.—One of the earliest stone carvings in the British Isles, known as the Calf of Man Crucifixion, was bought by the National Art Collections Fund for £750 and presented to the Manx Museum. The Crucifixion

came to light in 1773, when the ruins of a Celtic chapel were being demolished on the Calf of Man, and it has been preserved until now in the finder's family. The carving is executed in shallow relief on a slab of the local slate rock, probably less than three feet high. The carved panel, which may have served as a reredos, displays a "Celtic" interpretation of the Crucifixion, in which Christ appears alive and fully robed, in a manner found in the art of the eastern Mediterranean at least as early as the sixth century. As a theme in Early Christian art of the British Isles, says Mr. Megan, the director of the Manx Museum, the Crucifixion makes one of its first appearances on a page of the illuminated manuscript known as the "Durham Gospels," the work of one of the Irish monasteries of Northumbria during the late seventh century. The treatment of the Crucifixion in the "Durham Gospels," with its accompanying pairs of figures, cherubim above, spear- and sponge-bearer below, set the pattern for the oldest Irish, and Manx, representations of the Crucifixion, whether in bronze, manuscript or stone. The first completely "Celtic" copy is perhaps the bronze plaque from Athlone, now in the National Museum of Ireland, in which the central figure of the robed Christ is reduced to a symbolic figure-pattern in the "Irish Vernacular Style." The Calf of Man Crucifixion is evidently, says Mr. Megan, a direct copy in stone of just such a bronze plaque of Irish workmanship of the eighth century, and is probably the earliest of the "Celtic" representations of the Crucifixion in stone. The patterns of Christ's robe imitate panels of Irish bronze-ornamentation, and the circular feature on the breast is not a brooch, but derives from the scroll-surrounded jewel-mount of a bronze rivet-head.

"DEW LINE" ACROSS CANADA.—In the far north of Canada, inside the Arctic Circle, a chain of radar stations stretches across miles of barren ice and frozen seas. This is the "Dew Line," the first word standing for "distant early warning" against aerial attack across the Polar regions. Only sixteen months after the decision to build the line, dozens of radar sites were established across 3,000 miles of bleak country. In three months aircraft were heading north. They landed on the tundra, and the construction of landing strips on frozen lakes began. Larger aircraft landed carrying equipment; then freight aircraft parachuted twenty-ton bulldozers. Nineteen aircraft crashed and twenty men were killed. Many of the aircraft went down on the desolate lands where winds get up to 100 miles an hour and temperatures drop to fifty and sixty below zero. Then war-time-size convoys moved into the partially charted waters of the North-West Passage, and penetrated almost to the ice-locked waters where Sir John Franklin perished with his entire expedition. A body of 4,000 men set to work on construction camps and eventually the "Dew Line" was established. From a civilian point of view this radar line will have an important bearing on the development of northern Canada, one of the richest mineral territories in the world.

DNA.—At the Royal Society a large model of a molecule which is one of the key substances of life—*deoxyribonucleic acid*, or DNA for short—was exhibited. Found in the nucleus of all living cells, DNA may transmit hereditary characteristics from generation to generation. Scientists have recently succeeded in elucidating the structure of this complicated assemblage of atoms, which are arranged in two intertwined spiral chains. Each chain consists of phosphate groups on the outside linked on to sugars. Attached to the sugars inside

is a series of "bases"—chemical groups which are in turn linked to each other across the axis of the molecule to form a double helix. The varying sequence of these bases along the molecule may provide a kind of "code" making possible the transfer of hereditary characteristics from one generation to the next. A single molecule of DNA is very long, and probably consists of at least a thousand turns of the helix. Each turn is about three hundred millionths of a centimetre long.

EARTH RADIUS SMALLER.—The circumference of the earth is not as great as it was supposed to be. Scientists of the United States Army map service state that new studies indicate that the earth's circumference is less by half a mile. The equatorial radius of the earth—the distance from its centre to the equator—is 6,975,336 yards, or 140 yards less than the figure accepted since 1909. Mr. Bernard Chovitz, a map service mathematician, has stated the new computation, applied to the circumference of the earth at the equator, would make the world 24,902 miles around at its widest point. The new estimate was based on continuous measurements of arcs, ranging from Alaska to Chile in the western hemisphere, and from Finland to South Africa in the eastern hemisphere. Each arc is equal in length to one-third of the earth's circumference. The new findings will help in tracking the satellites that the United States had planned to launch in 1957.

EASTER ISLAND STATUES.—Hr. Thor Heyerdahl, the Norwegian scientist of the *Kon Tiki* voyage, led an archaeological expedition on Easter Island, in the South Pacific, and there transported one of the giant mystery statues and erected it without mechanical aids in what he believes to have been the original manner. A team of 180 Easter Islanders dragged the statue from its quarry to its selected site, where it was raised by levering up one side an inch or so, blocking the space thus made with rocks, then levering the other side similarly. When the base of the statue reached the height of the plinth the levering and wedging process was applied only to the upper portion of the statue, which was thus raised gradually to a position from which it could be hauled vertical by ropes. With 12 islanders Hr. Heyerdahl raised the 30-ton statue to the vertical in 18 days by this ancient method. He considers the statue to be plainly Polynesian, though the expedition unearthed one which, instead of having the traditional Polynesian posture of hands folded across the stomach, was kneeling with hands on thighs.

EEL WORM PERIL TO POTATOES.—The use of fungi to trap and destroy eel worms was described at the British Association by Dr. C. L. Duddington and Mr. A. J. Juniper of the Regent Street Polytechnic, where their experiments were made. The fungi, which are called "predacious fungi", can trap eel worms, which may be half a millimetre long, in several different ways. Most commonly there is a trap consisting of short branches of the fabric of the fungus which join up to form a sort of mousetrap. These branches are adhesive, and the eel worms are caught in them as they wander about in soil. In other fungi the sticky trap is forsaken for a snare in which the eel worm's body is caught in a ring of the structure of the fungus and held there either by becoming jammed or by constriction of the ring. When held, the eel worm is killed and digested. In England promising experiments have been made to control the eelworms which attack potatoes, peas, and cereals. It has been estimated that the potato root eel worm destroys about £2,000,000 worth of potatoes a year in Britain alone.

EGYPT: QUEEN HER-NIT'S TOMB.—Professor Walter Emery, Edwards Professor of Egyptology in the University of London, while digging in the sands of the Saqqara plateau 20 miles south of Cairo, found the tomb of Queen Her-Nit, a ruler of the First Thinite dynasty, who reigned on the banks of the Nile 3,000 years before the birth of Christ. His discovery has brought to light the earliest example of monumental architecture in Egypt and proves that Saqqara was the burial place of the first dynasty Pharaohs and that their funerary structures at Abydos are only cenotaphs. The tomb of Queen Her-Nit, 100 feet long and 40 feet wide, consists of a mastaba—a flat-topped rectangular superstructure of mud brick—which was originally 22 feet high and with a crenellated exterior originally painted with mat-work designs. A wall surrounds the whole installation of the tomb, which Professor Emery believes to be the prototype of the pyramid complex of the third and fourth dynasties. After four months' digging he discovered a descending passage below the mastaba, leading into a burial chamber, containing the remains of a cedar wood sarcophagus. The interior of the mastaba was divided into a series of magazines, in which was placed extra funerary equipment for the use of the deceased. Hundreds of broken stone vessels and pieces of pottery in schist, diorite and alabaster were recovered, along with a small necklace of gold and cornelian stones. Even more important, clay jar sealings and stone vessels bore the name of Queen Her-Nit, and a chalice-shaped vessel of schist and pink limestone believed to be her own drinking vessel.

ELECTRONIC WATCHES.—At the Lip watch factory in Besancon, France, an electronic watch containing a 2-cell battery yielding electric energy has been perfected. Each cell is about the size of a bean, weighs 1.6 grams and yields one volt. There is a sub-miniature motor whose coil comprising 10,000 turns, transforms the electrical power into mechanical. The power of the motor is 1.5 hundred-millionth horse power. It is stated that 10,000,000 electronic watches could be run on the power necessary for a 100-candlepower lamp. The electronic watch does not tick. Its pulsations, at the rate of three per second, are different from the tick-tock of an escapement watch. The electronic watch, which is slightly lighter than the ordinary watch, is less sensitive to changes in atmospheric pressure.

ERNIE.—Ernie is the name given to the "electronic random number indicator equipment", the machine which will be used in the draws of the premium savings bonds scheme. Ernie's task is to pick out numbers at random. This is what any spinning wheel with numbers 0 to 9 around its rim can be made to do. The wheel is given a push and it is a question of luck as to where it stops. When electricity is passed through a glass tube with a rare gas in it—like one of the tubes used for neon signs—the particles of gas are electrically charged. They rush about at random. There is a metal plate in the tube, and each time one of the particles hits this it passes its electricity to the plate and an electric impulse runs through a wire connected to the plate. This gives the electronic spinning wheel a push. The pushes come quite at random, driving the electronic spinning wheel round. No one can influence the number of particles that would hit the plate. The wheel stops at a number and this is the first figure of the winning number. At the same time other electronic spinning wheels will produce the other 8 or 9 figures in the number. The result

will be a number which is produced entirely by chance. No one can influence the result.

ESKIMO ORIGIN AND CULTURE.—Archaeological discoveries in Canada have increased our knowledge of the Eskimos. Little was known previously about these Dorset people, who spread eastwards from Alaska and whose descendants were thought to have disappeared about 1,000 years ago. Now dwellings built by Dorset people which appear to be only several hundred years old have been found on Walrus Island, in the north of the Hudson Bay, by a scientific expedition organized by the National Museum of Canada, the Smithsonian Institute, and the American Philosophical Society. The expedition, led by Mr. Henry B. Collins, was excavating one of the earliest-known Dorset settlements on Southampton Island and the more recent dwellings were found by chance. The houses are roofless and the walls are built from massive granite blocks and boulders piled round deep excavations in the frozen soil. They have one, two or three rooms, the last arranged in a clover-leaf design. The finds on the two islands clear up one of the great puzzles of the Arctic. They show that the Dorset culture persisted until recently and was probably the dominant culture of the central Arctic for more than 1,000 years. The Dorset people, says Mr. Collins, were clearly Eskimos and hunters of aquatic mammals such as the seal, and not Indians. This is shown by the weapons and implements found at the two sites, those from Southampton Island being prototypes of the later Walrus Island tools. The Dorset people did not disappear but mingled with the Thule people whose culture swamped their own. Some culture traits of the Dorset people—as well as their blood—undoubtedly persist among the Eskimos to-day.

FALKLAND ISLES GEOLOGY.—A contract has been made between the Colonial Office and the University of Birmingham, as a result of which the geological work of the Falkland Isles Dependencies Scientific Bureau, the director of which is Sir Raymond Priestley, will for three years be done in the Department of Geology at Birmingham. The object of the scheme is the production of a basic geological map and evaluation of the stratigraphy and economic resources of the Dependencies. At Birmingham the facilities of apparatus, comparison material and library will be available to holders of fellowships, some of whom will deal with existing petrological and palaeontological collections, while others who have been engaged in field work will be able to work out their results. Dr. R. J. Adie, Senior Research Fellow in the Department of Geology, will co-ordinate the work.

FISH CLOTHED LIKE MICE.—A new order of fishes called the Miripinnati or "wonder-fins" was described to the Zoological Society by Dr. N. B. Marshall, of the Natural History Museum, who had been investigating them in association with Dr. E. Bertelsen, of the Marine Laboratories in Copenhagen. The most remarkable was a little creature, an inch and a half in length, with bat-like pelvic fins and a skin as hairy as that of a mouse. It had been caught off the Azores. Under the microscope the hairs on the skin were seen to be of a concertina-like structure, each bearing a number of glandular cells that might exude a noxious substance in the living animal, said Dr. Marshall. He had also noticed that the upper and lower lobes of its tail had the unusual quality of overlapping. Another family of wonder-fins, including one caught by the British ship *Discovery*, were not hairy, but their larval stages were charac-

terized by long tail-streamers about three times the length of the fish. The whole group fed on copepods or plankton: one was completely stuffed with the organisms, and it may be that the fins and tails of the wonder-fins act like parachutes as they rise and fall with the shoals of food on which they feed.

FOSSELS OF THE FUTURE.—Mr. Lee Talbot, the American ecologist, who was sent by the International Union for the Protection of Nature on a mission to the Near and Far East, reported on his study of the rarer animals there. The vigilance of naturalists, supported by Government action, he says, has probably saved some dwindling species from extinction, but other animals, in the Near East, in particular, are rapidly qualifying for the description of "fossils of to-morrow." The Syrian wild ass, which was probably domesticated 4,500 years ago by the Sumerians before the introduction of the horse, showed no evidence of its survival. Extinction threatens the white antelope of the Arabian desert, the oryx, the animal which probably gave rise to the myth of the unicorn. It was once a considerable feat for an Arab hunter to kill an oryx, but to-day motor-vehicles and modern guns make it easy prey, and incessant hunting has reduced the numbers of oryx to fewer than a hundred. There has been wide-scale killing of the Arabian gazelle to feed workers on the oil pipeline in Southern Arabia, and these animals are now rarely seen in areas where they once existed in herds of a thousand head. Farther east, Mr. Talbot found that the Asiatic lion is being effectively preserved in its last haunt, the Gir forest in North-west India. There are about 200 lions there, an increase of about a quarter in the last five years. Strong measures are being taken in India, Burma, and Indonesia, to preserve the scattered survivors of the three species of Asian rhinoceros, which are now protected in all three countries after having been hunted almost to extinction for the supposed medicinal value of their horns, feet, and other trophies. Only a few dozen Javan rhinoceroses survive, but Indian one-horned rhinoceroses still number several hundreds. Poachers, however, attracted by the high prices they fetch, are still hunting them.

GAS DIRECT FROM PIT.—Mr. K. T. Spencer, chief scientist of the Ministry of Fuel and Power, discussed before the Coal Industry Society experiments into the gasification of coal in the pit by setting it on fire and extracting the gas. In one experiment, he said, coal had been converted into electricity by this means. Economic estimates had been made, and the indications were that gas could be produced at the site at about twopence halfpenny a therm. As power station coal costs at the power station nearly a penny a therm more than that, it was not a bad result. Gas obtained by this method could be converted into electricity certainly no more expensively, and possibly rather more cheaply, than by converting the poor quality coal which the Electricity Authority received.

GEOLOGY IN THE WORLD TO-DAY.—Dr. Charles F. Davidson, Professor of Geology in the University of St. Andrews, in his inaugural address said that owing to the growth of populations and increasing industrialization the mineral resources of the world were being steadily depleted, and the sparsity of geological practitioners had been a great impediment to the development of the British Commonwealth. Geological research, by deep borings, supplemented by the modern techniques of geophysics, had disclosed coalbeds beneath the chalk of Kent which contained 2,000

million tons of coal and were giving an annual output of over 1½ million tons. Considerable coal had been found in borings for oil in Lincolnshire, and workable reserves of 400 million tons discovered by boring through the Triassic rocks of South Staffordshire and Warwickshire. The National Coal Board had proved the existence of 200–300 million tons, 2,000–3,000 feet deep, in their underwater drilling on the Firth of Forth. We still have 40,000 million tons of proven mineable coal in the British coalfields, enough to last us at our present rate of consumption for the next 200 years; and probably the gross resources available for extraction cannot be less than 100,000 million tons. In 1942, only two mines were known as sources of uranium; to-day the potential resources of mining fields under development were not less than a million tons of metal available at £5 per lb. Geological research in the Blind River district to the north of Lake Huron in Canada had revealed uranium ore which would ultimately be of the value of £1,000 million. Geologists would successfully meet the challenge of the depleted mineral resources of the world. British universities were producing about 100 honours graduates in geology every year; America was producing six times as many relative to the population. Trade no longer followed the flag; it was a natural consequence of the discovery of ore deposits and oilfields.

GIANT SNAILS OVER HALF THE WORLD.—The giant African Snail known as *Achatina Fulica*, has spread over half the world, from East Africa and Madagascar, in spite of desperate attempts in many countries to eradicate it (see WHITAKER'S ALMANACK, 1950). The last stage of its long journey was in California, where a counter-offensive was taken by the Pacific Science Board. Prof. C. M. Yonge reports that the central Pacific was searched for an isolated and uninhabited island suited for an experiment on control. The island of Agiguan in the Marianas appeared ideal for this purpose. At that time, in 1950, it was impossible to walk anywhere on the lower slopes of the island without almost at every step crushing a Giant Snail. It was among such dense populations of their prey that numbers of the predatory carnivorous snails were introduced. Two years later, when the island was revisited, these snails had spread over an area of ten acres and increased to perhaps 25,000. By January, 1954, within this same area almost the only trace of Giant Snails was their empty shells. Higher on the island they were still present, but everywhere attacked by enemy snails, assisted by rats and birds and by coconut crabs and hermit crabs, while they had assisted their own destruction by eating almost all suitable vegetation. Over a period of 150 years and by so many agencies, the Giant Snail has journeyed half way round the world.

GIANT TOAD IN DISFAVOUR.—The ugly giant toad, which was imported more than 20 years ago to check the ravages of the sugar cane beetle is now in disfavour in parts of Queensland. The toad, grey to dark brown and six inches long, has no teeth, or sucker discs on his toes, as frogs have, and he cannot climb, but he can jump two feet. If he survives natural enemies in the egg and tadpole stage, and reaches maturity, he will have enjoyed a balanced diet estimated at 51 per cent. of insects injurious to agriculture, 42 per cent. neutral and 7 per cent. beneficial. Sugar-growing experts say that he has done the work expected of him in keeping in check the cane grub that becomes a beetle. The complaint against him is that he does not differentiate in his diet between insects injurious

to agriculture and those beneficial to man and beast. It has even been said that he poisons dogs and eats chickens.

GLASS MELTED BY ELECTRICITY.—A British process for melting glass electrically and probably by automatic control, was revealed at a meeting of the Society of Glass Technologists at Stourbridge. Ever since it was discovered that at a certain temperature the electrical resistance of glass declines sufficiently to allow current to pass through it, it has been theoretically possible to melt glass by developing heat inside it instead of applying heat to the surface. An all-electric furnace has been developed by the British Heat-Resisting Glass Company, of Bilston. It was evolved by Mr. A. Gell and Mr. D. G. Hann, and the furnace has been operating successfully in secrecy for five years. With this furnace Britain, it is claimed, is the first country to produce an effective and practical alternative to fuel-fired furnaces, although experiments have been carried out for years by Scandinavian countries, Germany, France, Switzerland, the United States, and Russia. The furnace, cube-shaped, generates heat in the melting glass by electrodes on two of the facing walls. As glass is withdrawn from the base of the melting chamber so melting glass is liquefied from the underside of the "batch" crust. The greatest advantage of the process lies in its high thermal efficiency. Conventional furnaces lose anything up to 90 per cent. of the heat; the new furnace, it is claimed, loses only about 40 per cent. to 50 per cent.

GRASS ROT: HOW AND WHY.—The fact that grass rots when it is wet is brought about by microscopic moulds and fungi, said Dr. J. Webster, of Sheffield University, at the British Association. Clumps of cocksfoot grass around Sheffield have been kept under observation. At different periods stems from them have been collected and examined under the microscope for the presence of fungi, or rather of their fruit bodies, and it has been possible to show that certain types of mould creep up the stems of the grass as these grow; others remain low down in the thick cocksfoot tussock. The fungi are capable of causing the cellulose in the grass stems to ferment and so to rot. An examination of the water content of the stems at different heights above the roots and at different seasons, for stems which were standing normally and for those which were cut and laid on the ground, has shown that the fungus grows at the expense of the grass more quickly when the water content is high. It has to be more than 15 per cent., or the fermenting activity of the micro-organism is inhibited altogether.

GREENWICH OBSERVATORY MOVES ON.—The Royal Observatory is being gradually removed from Greenwich to Herstmonceux, and plans by the Greenwich Maritime Museum are to use the old buildings as a show place illustrating the history of astronomy. Two rooms in Flamsteed House, so called after the first Astronomer Royal, are open to the public. By chance the present Astronomer Royal found and purchased a grandfather clock which belonged to Sir Isaac Newton and was mentioned by him in his diary. The face is divided into hundredths of an hour instead of sixtieths. When questioned about the removal of the Observatory the Parliamentary Secretary to the Admiralty said that the necessary work at Herstmonceux had proved far more extensive than was originally contemplated and there had been technical difficulties connected with the domes. In addition the fact that the castle is an ancient monument had slowed down the work. Of

the four stages of the work, the first two were completed, the third was due to finish in 1956, and the fourth in 1957. The telescopes of the solar group were in place and the installation of those in the equatorial group should begin after the end of 1956 when the domes were completed. Only one telescope will be new: a Schmidt telescope for photography of large areas of the sky. The other five will be transferred from Greenwich. The largest of the six domes will contain a new 98-in. reflector telescope provided by the Government to celebrate the tercentenary of the birth of Sir Isaac Newton, the inventor of the reflecting telescope. This will be the largest telescope in this country.

HAIRLESS DOGS FROM MEXICO.—The Zoo has received a pair of Mexican hairless dogs, or Xoloisquintli, from Colonel Harmar, of the British Embassy in Mexico City. These animals, believed to be representatives of the god Xolotl, were known in the wild form before the Spanish invasion of Mexico, and clay models have been found in ancient tombs. Until recently the breed was threatened with extinction. They resemble the sturdily built whipper, and their bodies are hairless, save for a slight fuzz on the top of the head and on the tail and some short hair between the toes. As the temperature is about 104° F. the soft smooth skin feels hot to the touch, and a characteristic of the breed is that it perspires through the skin, and not through the tongue as other dogs do. After a few weeks at the Zoo one of the dogs produced a pair of puppies. In some remote rural parts of Mexico it is believed that the Xoloisquintli is capable of averting or curing the common cold, asthma and malaria.

HEREDITY DISCOVERY.—Dr. V. M. Ingram, of the Medical Research Council's unit at Cambridge, described to the British Association how he had recently shown for the first time that a mutation in a single gene, the unit of heredity, can modify chemical structure in a substance in the body for which that gene is responsible. The gene is that of sickle-cell anaemia, common mainly among Negroes. When inherited from only one parent it provides some degree of protection against malaria, presumably because the blood cells of those so affected afford less oxygen to malaria parasites. When inherited from both parents it causes severe anaemia, and few so affected survive to maturity. Dr. Ingram explained that there is a chemical difference between haemoglobin of normal individuals and those with sickle-cell anaemia, people with the intermediate condition having probably a mixture of haemoglobins. He has shown this by breaking down the complete protein, which is haemoglobin, into 30 fragments and separating these as spots on a sheet of filter paper. Twenty-nine of the spots fell in the same positions in both cases. The thirtieth spot fell in different positions, according to whether the haemoglobin was from a normal individual or one with sickle-cell anaemia. The fragment of the protein molecule which this spot represented is therefore chemically distinct in the two cases. It is suggested that it is probably a chain which may contain some 20 or so amino-acids, the components of which proteins are built up.

HOUSE-FLY THREATENED.—The United Nations World Health Organization launched a campaign against disease-carrying insects, in which it included the house-fly, mosquito, tsetse fly, lice and flea. The mosquito is responsible for spreading malaria, yellow fever and other diseases. The house-fly spreads cholera,

typhoid fever, tuberculosis, poliomyelitis, dysentery and infant diarrhoea, which can be fatal, and trachoma, which causes blindness. In nearly all parts of the world it has developed resistance to residual insecticides, but sanitation has never been known to fail in achieving fly control. It is the one thing to which flies will never develop resistance. Insecticides should be used only to supplement individual sanitary measures and not to replace them. The house-fly is described as "the murderer at your table." It feeds on an enormous variety of substances which are left about. It eats food-stuffs, particularly sweet substances and milk, vegetable and animal matter in decomposition, and it has been established experimentally that it can pick up poliomyelitis virus, eliminated in human excrement. Modern methods of "tagging" insects with radioactive isotopes, which enables them to be followed with detection devices, may solve this problem of disease transmission. Germs picked up by insects may also be "tagged" so that subsequent disposal of them may be observed. The tagging system has shown that most house-flies have a range of two kilometres (just over one mile) or less, but a maximum range of 32 kilometres (about 20 miles) has been recorded.

INSECTS ON HIMALAYAN ICE.—In 1954 and 1955 expeditions to study the insects of the Himalayas were made into the north-west area of glaciers and ice-falls, no part of which is below 10,000 ft. They were led by Professor M. S. Mani and among the team of eight was Dr. A. P. Kapur, of the Zoological Survey of India. Over 5,000 insect specimens were collected. Professor Mani stated in *The Times* that on the snowy wastes, at altitudes rarely reached by human beings, there habitually live a remarkable variety of insects. Dry barren rock that gets heated in the summer sun to an uncomfortable degree, damp moss-covered rock, snow fields, glaciers, torrential streams, glacial puddles, caves, cracks and crevices have their insect inhabitants. Certain types occur almost exclusively on the Himalayas. Subtropical or even tropical forms occur as high as 10,000 ft. In contrast to the polar forms, the Himalayan insects are heavily pigmented, undoubtedly as a protection against glare and ultra-violet radiations. The adult period is exceedingly short. Quite a number of the insects were found hibernating under stones covered by several feet of snow. On a glacier at 14,000 ft. was a hibernating mass of ladybird beetles. With the melting of the snow as the short summer advances, the noon-day sky, with the air four degrees below zero, becomes filled with gigantic swarms of mayflies, stoneflies, caddisflies, butterflies, gnats, and other forms, which mate, lay eggs, and perish before evening. Only a few high-altitude insects thrive on lichen, moss, or algal slime. The bulk of the food supply is "air-lifted" from the plains of India. Spores, pollen grains, tiny insects like aphids, gnats, and even butterflies and moths are carried over vast stretches of the country by upper air currents to be thrown up on snow fields or glaciers. Swarms of butterflies and noctuid moths are blown up on snow fields from about 13,000 ft. to more than 16,000 ft. An unexpected snow storm nearly annihilated a huge flight of butterflies migrating from Tibet, scattering a vast desert of snow at about 16,000 ft. with the dead. Hordes of earwigs, beetles, flies, and Himalayan birds were attracted to the feast. A wide range of micro-climatic niches, with conditions for specific types of insects, occurs between 10,000 ft. and 20,000 ft. Attilid spiders, snow-flies, and scavenger flies were found flourishing at 20,000 ft., where no other animals are found. Insects such as snow-flies have fol-

lowed closely behind the lichen and moss and have created the necessary conditions for others. The success which the insects have had at extreme altitudes is due to their having taken advantage of the micro-climatic niches.

JUPITER SENDS OUT SIGNALS.—When the United States Department of Terrestrial Magnetism detected radio signals emanating from the planet Jupiter, investigation into this phenomenon was undertaken by Australian radio astronomers. They looked through the automatic records of radio disturbances, made by them in 1950 and 1951, which confirmed the conclusion of the Washington observers that the signals came from Jupiter and that the intervals between signals corresponded in length with the rotation period of the planet. This period, nearly 10 hours, is not a fixed quantity, because Jupiter, like the sun, rotates at different rates in its various latitudes; so that such differences apply at least to the outer layers of the planet's atmosphere, which alone are observable from the earth. The interval between the radio signals was found to correspond with the rotation period shown by clouds in and near the north and south tropical zones of Jupiter, a little way from the equatorial zone, which rotates in a period about five minutes shorter. British amateur astronomers have found that there was, in 1950 and 1951, a prominent white spot or cloud in the south tropical zone of Jupiter, and it is suggested that the radio signals were received at their greatest strength when this spot was central in longitude on the disc. The radiations are said to have the characteristics of the atmospheres seen during terrestrial thunderstorms, but in order to be seen at the enormous distance of Jupiter such storms would have to be of tremendous violence.

LIGHT IMAGES MADE BRIGHTER.—A new technique for amplifying light, which is held to have great possibilities in medical diagnosis and treatment with X-rays, in astronomy and in industrial and military applications, because of its capacity for increasing the brightness of an image by as much as 50,000 times, was demonstrated in New York. The Lumicon, as it is called by its developers, the Bendix Aviation Corporation, enabled observers to "see in the dark," and Dr. Albert Wilson, director of the Lowell Observatory in Arizona, said the new technique might make it unnecessary to build any more optical cameras like the great 200 in. telescope at Palomar Observatory. He predicted that electronic telescopes would be built instead. The amplification employs a television camera which has a sensitive image detector tube. This is linked through amplifiers to a monitor unit like that in a standard television picture tube, but where commercial television utilizes 525 lines for each picture, the special television link uses 1,024. Dr. Wilson said that the system, when used at the Lowell Observatory 18 months ago, when Mars was only 39,800,000 miles from the earth, had produced the best view of the planet they had ever had, amplifying many times the faint wavering light from it. It should be possible to use Lumicon to make the 200 in. reflecting telescope at Palomar Observatory the equivalent of a 1,200 in. optical telescope. Dr. Russell Morgan, chief radiologist at Johns Hopkins Hospital, who was one of the devisers of Lumicon, said that it had proved invaluable in many forms of treatment of disease, particularly where the trouble was deeply seated. During the demonstration in a large room where the lights were turned out, the apparatus on being focused on a seated model made it possible to see details of the model's face and clothing when the unaided eye

could see nothing; and when the demonstrator lit a match the illumination was so much increased that the image became brilliant.

MEASURING OCEAN CURRENTS.—For the first time direct and reliable measurements of the currents in the deep ocean basins have been made free from the uncertainties involved in using a conventional current meter from an anchored ship. Dr. J. C. Swallow, of the National Institute of Oceanography, has developed a technique whereby a neutrally buoyant float can be followed for several days by listening to the acoustic signals that it transmits. The density of the float, which consists principally of two 10 ft. aluminium scaffold tubes sealed at the ends, is carefully adjusted to be greater than that of water at the surface of the sea and less than that of the bottom water, so that it floats at a predetermined depth in mid-water.

MITHRÆUM EXCAVATION.—New light on the Mithræum under the Church of Santa Prisca on the Aventine has been thrown by Dr. C. C. van Essen, director of the Netherlands Institute in Rome. His discoveries are of interest to British archaeologists in connection with the recent findings of Mithræa in Walbrook and at Carrawburgh. The earliest church on the site was built in about A.D. 400. The Mithræum beneath the east end of the present church was discovered in 1935 by Professor A. Ferrua, and in 1952 further excavations were undertaken by Dr. van Essen and Dr. M. J. Vermaseren. The temple is remarkable for its size and for its structure and decoration. On either side of the main hall are wall-paintings with a procession of members of the various grades of the initiates in the Mithraic hierarchy bearing the elements of the sacred feast, bread and wine and a cock, and another procession is on the way to celebrate the sacrifice of a boar, a ram, and a bull. Lines of Mithraic hymns accompany the wall paintings. Beneath these paintings, dating from about A.D. 220, are traces of earlier ones, and the Mithræum itself appears to date from the time of Trajan. It was built into a large pre-existing house which may have been the *Domus Traiani*. Dr. van Essen advances the hypothesis that after the emperor had taken up residence in the Imperial Palace, he gave this house to be converted to the worship of Mithras. The objects found in the temple include a stucco head of Serapis resembling the marble one found at Walbrook. This belonged to a recumbent figure of Serapis-Oceanus, who presided at the rock-birth of Mithras. In the rear was a cult figure of Mithras slaying the bull. The excavators found also subsidiary rooms in which other parts of the ritual were celebrated. The report on the ritual pit at the Mithræum at Carrawburgh on the Roman Wall helped Dr. van Essen to identify in one room a similar pit in which the candidate for initiation lay awaiting his ordeal. Another relic of the practices of this religion was a cylindrical terracotta vessel inscribed "I brand you, O Saturn, O Atar, O Ops." This was made to hold the red-hot ashes into which the iron was plunged to be heated before a branding ceremony.

MITHRAIC TEMPLE: SILVER CASKET.—Professor W. F. Grimes exhibited at the Society of Antiquarians a Roman silver casket which had been discovered on the north side of the Temple of Mithras, in Walbrook. Because of the place in which it was unearthed, he said, apart from the buried statuary and at a higher level, the casket was first thought to be of the eighteenth century. Since then it had been cleaned and polished and its real date had been decided. About 3½ in. to 4 in. in height and 3 in. in diameter, the casket has

a silver strainer inside it which suggests that it was filled with liquid, perhaps the blood of an animal, and used in ritual by worshippers. The sides are ornamented with scenes of huntsmen in pursuit of animals and of men in combat. Those engaged on research on the temple, he said, found that eight floors had been constructed during the centuries of its existence. At some period the stone columns were removed and in its later stages the temple had only an inadequate roof of birch timber which could not have properly spanned its stone walls. Birch and alder trees grew by the banks of the Walbrook, then about 40 ft. below the present street level. He presented a picture of the temple in its later years standing on desolate waste ground in the heart of the city. Gradually it fell into decay, but during that time worshippers managed to maintain it in spite of the coming of Christianity. The temple lasted for four centuries, and was built either at the end of the second century or the beginning of the third.

MONGOLIAN WILD HORSE.—A Przewalskii, a rare Mongolian wild horse, was born at Whipsnade Zoo. The young parents of the foal were obtained from Prague in 1954 in exchange for animals valued at £3,600. The natural home of the animals is in the Altai Mountains region of Mongolia, where a Russian traveller was the first to obtain specimens of the pure-bred wild horse which still exist. The horse is of small stature, standing about twelve hands at the shoulder. The root of the tail is short-haired, and the mane short and upright, without forelock. The body colour is yellow dun, the mane and tail black, as well as the lower part of the legs, and there is a dark stripe down the back. The muzzle in pure-bred specimens is white. A decided character is shown by the great size and length of the row of cheek-teeth, it being one-third larger than the same row of teeth in a Dartmoor pony of the same stature.

MOULD THAT PREVENTS CORROSION.—In recent years research work has gone steadily ahead into means of combating rust, the most formidable form of wastage in steel. The annual report of the Department of Industrial and Scientific Research states that this work has now entered a new phase. The identification of a microscopic mould called *actinomycetes* as the substance responsible for preserving ancient metals long interred in the ground may lead to the isolation of chemical materials which will supersede the palliative forms of protection now in use. The mould grows freely on tannins and also flourishes in peaty soils. It has been estimated that the cost of rust to Britain is £200 millions every year. It is suggested that one of the first applications of the new methods of rust prevention will be in regard to underground metal pipes which have been known to corrode through within a year, and there have been cases where twenty miles of pipeline has had to be replaced after only ten years. As more structural steelwork is used in British building, the cost of air corrosion increases. Much of this steel is erected in industrial areas where sulphur vapours from burning coal or oil in the air eat into the metal. Tests of rusting rates of mild steel show that corrosion is one hundred times faster in Sheffield than in Khrطوم and four times faster in industrial Birmingham than in agricultural Godalming. Mild steel in Derby rusts at the rate of nearly seven-thousandths of an inch a year and in Sheffield at the rate of nearly six-thousandths.

MOUNTAIN BUILDING UNDER THE SEA.—A scientific cruise by H.M.S. *Telemachus* (Lt.-Cmdr.

J. E. Moore, R.N.) under joint Australian-American auspices, has made a distinct contribution to our knowledge of how mountains are formed. During the cruise, which lasted from June 1 to August 1, *Telemachus* crossed the Tasman Sea from Sydney to New Zealand, then zig-zagged across the Tonga-Kermadec trench between the Tasman Sea and the Pacific Ocean, and returned to Sydney. About 130 gravity measurements were made from the submerged submarine at depths of from 50 ft. to 200 ft., where disturbances from surface waves are sufficiently reduced to allow of precise scientific measurements. The Tonga-Kermadec trench, which extends from Samoa to New Zealand—about 1,200 nautical miles—lies at a depth of 10,000 ft. and its sides are a further 15,000 ft. to 20,000 ft. deep, making the distance from the surface of the ocean to the bottom of the trench 25,000 ft. to 30,000 ft.—one of the deepest ocean floors in the world. The *Telemachus* observations will be used to determine the types of rocks and their thicknesses in this ocean region, and the information will be pooled with other gravity observations for a more precise determination of the shape of the earth, which has been a long-sought goal of scientists. The Tonga-Kermadec trench is believed to be an initial stage in the development of a new mountain range. Gravity measurements by the *Telemachus* will furnish new details of this mountain-building process.

MURAL FOUND IN THE TOWER OF LONDON.—A remarkable portrayal of the Archangel Michael weighing good and bad souls in a balance is part of a mural, painted 600 years ago, recently discovered in the Byward Tower of the Tower of London. This 14th century version of the Last Judgment was found under a thick coat of limewash and black oil paint when an old fireplace was being examined by an artist of the Ministry of Works. The mural, which is believed to have been a representation of Christ in majesty, consists of four figures. The central figure of Christ was lost when a fireplace was built into the wall during the sixteenth century. The figures, which retain in parts their original brilliant colours, are about three feet high depicted with outspread wings of a brilliant pink colour. On the one side of the missing central figure is Michael. In one pan of his balance is a green devil. On the same side is a figure of the Virgin painted in Byzantine style in a blue veil and mantle over a carmine robe. Her hands, with long delicately shaped fingers, are clasped before her. On the other side of the fireplace is a female figure with a halo, robed in blue with a carmine and yellow mantle; and a painting of John the Baptist, which has suffered considerably. A vermilion book bearing the *Agnus Dei* is to be seen in the saint's hand. The four figures are looking inwards towards the missing central figure.

NATIONAL LIBRARY OF SCIENCE.—The Chancellor of the Exchequer announced in the House of Commons that, in view of the report of the Scientific Advisory Council, he proposed to provide for the establishment of a national reference library of science and a lending library. The sum of £2,500 would be available during the current year for the purchase and binding of scientific periodicals as a beginning to the lending library. A sum of £10,350 had been included in the Estimates for the purchase of books and periodicals for the Patent Office library. This library would eventually form the basis for the reference library.

POLYTETRAFLUORETHYLENE.—If polytetrafluorethylene does all that is claimed for it skiers may be able to increase their speed to a considerable extent.

This material has a very low coefficient of friction and is used for dry, self-lubricating bearings and for non-sticky coverings for rollers handling sticky materials. When applied to the running surfaces of skis in place of the conventional waxes polytetrafluorethylene results in less friction and therefore increases speeds. The possibilities of the material were first realised by Dr. F. P. Bowden, of the Department of Physical Chemistry, Cambridge University, in the course of researches on friction. In one of his tests a weighted plasticised ski travelled down a gentle 700-feet slope in 42 seconds compared with 61 seconds for a waxed ski. It is expected that the new skis will give a definite advantage in the longer, slower, downhill races. Skis run easily on snow because the frictional heat of their passage melts the surface of the snow and the resulting film of water between the snow and the ski acts as a lubricant. Heating increases and friction decreases with speed, so that on a steep slope the advantage of polytetrafluorethylene is not so marked. But on the longer downhill races with their gentler slopes the plastic's remarkable frictional properties will come into their own.

PREHISTORIC REPTILES FOUND.—Remains of two prehistoric reptiles have been found at Shipston-on-Stour, near Stratford-on-Avon. One of them has been identified as an ophthalmosaurus, a marine fish-lizard, with an elongated snout and enormous eyes. The second is apparently a vertebral section of a large dinosaur, or so it is thought at the museum in Birmingham. It has been suggested that the beast fell off a crag and broke its neck, but the geology of the region does not support this explanation. The midland area, where these two reptiles were found, was covered by an extensive sea in the Jurassic period of over a hundred million years ago. At first, the waters were transparent and the surrounding land surfaces yielded relatively little sediment. But afterwards the mud-laden waters of the sea spread over the area of the old basins, destroying the clear-water coral faunas. The deposits of the sea form the Oxford clay, and persist across the country from Dorset to Yorkshire. It is suggested that the remains of the lizard unearthed at Shipston-on-Stour were swept down in a river flowing from, perhaps, the highlands of the Welsh border. And there they remained, fossilized, for over a hundred million years.

RADIATION EFFECTS ON MAN.—The report of the Medical Research Council on the hazards to man of nuclear and allied radiation covers the whole ground from present sources of penetrating radiation to the effects of war using nuclear weapons. X-rays used in medical diagnosis are a bigger source of exposure to man-made radiations than either nuclear tests or atomic energy, and present practices should be reviewed. Only a comparatively small increase in the frequency of test explosions would be needed to cause injury to individuals through the increased amount of radioactive isotope, strontium-90. The amount of radio-active strontium in human bone should continue to be watched, and an increase of anything much more than tenfold above the present level should demand "immediate reconsideration". Other sources of radiation which contribute very small amounts cannot be disregarded. The practice of examining the feet by X-rays when fitting shoes is of dubious value and, in view of the possibilities of multiple exposures to children, may even be dangerous. Radiation from watches and clocks with luminous dials is small, but real. The main hazard is to workers in the luminizing industry. Circumstances require the use of instru-

ments with self-luminous dials. For the majority, however, there is no such necessity and the risk could be minimized if the amount of radioactive material in these instruments were reduced to the lowest possible level. Television sets give rise to small amounts of X-rays, but radiation from this source is not either a personal or a significant genetic hazard. Nevertheless the possibility of radiation should be borne in mind when considering the design and operation of such instruments. In sets used by the public most of the radiation is normally absorbed in the apparatus itself and is insignificant at the usual viewing distances.

RADIO SIGNALS FROM VENUS.—Several strong radio signals from the planet Venus were detected by a radio telescope at the radio observatory of Ohio State University during May 1956, when the planet was approaching the earth at a speed of 500,000 miles a day. The director of the observatory, Dr. John Kraus, said that it was the first time the planet had been heard from. The signals were observed on each occasion for a period of several hours. They consisted of crackling sounds similar to radio static from thunderstorms, and the signals, it was suggested, might indicate similar storms on Venus.

RAIN TO ORDER.—The committee on weather control appointed by President Eisenhower reported that the results of experiments in the United States indicate that rainfall can be increased by up to 17 per cent. by modern cloud-seeding techniques, and that it may be possible also to control hailstorms and, eventually, even to "inhibit" lightning and "modify" tornadoes. In what is described as "the first scientific appraisal of man-made rain," the committee describes how the release into the atmosphere of silver iodide smoke from ground generators produces results which can be very important to the weather economy of the nation. It has been shown that a 1 per cent. increase in rainfall during the growing season would pay for cloud seeding, and in five out of six cloud-seeding operations in Pacific coast states an increase in rainfall of from 9 to 17 per cent. had been obtained. Personal testimony from committee members who had been present at one of these experiments indicated almost absolute suppression of hail, and this bore out the result of other studies in Switzerland. Twelve minutes after "cloud-seeding" with 37 two-inch naval rockets containing sea salt at Tabora, Tanganyika, there were repeated downfalls of rain. Through the partial failure of seasonal rains the reservoir at Kazima Dam, on which Tabora is dependent for its water, was dangerously low, and it was decided to try out the cloud-seeding technique evolved by the East African Meteorological Department in conjunction with the Admiralty and the Ministry of Supply. The Colonial Secretary stated that under suitable conditions cloud-seeding does produce rain. At the conclusion of the experiments the level of the reservoir was 2½ inches above the level at the beginning of the experiments, despite a daily consumption of 250,000 gallons and a high loss through evaporation.

RARE WILD ANIMALS.—A list of 26 mammals now threatened with extinction was presented to the International Union for the Protection of Nature at their assembly in Edinburgh. The list is as follows:—Tasmanian wolf; Asiatic lion (India); Persian wild ass; Indian one-horned rhinoceros; Javan one-horned rhinoceros; Samatran rhinoceros; Mindoro tamarau (Philippine Islands); Arabian oryx; Przewalskii wild horse (Mongolia); Bactrian camel (Mongolia); Wisent or European

bison; Cretan wild goat; Addo bush elephant (South Africa); Angolan giraffe (Portuguese Angola); Giant sable antelope (Portuguese Angola); Mountain zebra (South Africa); Nubian wild ass (North Africa); South American chinchilla; Chinchilla, all species; Solenodon (Caribbean area); Black-footed ferret (North America); Florida key deer (United States); Caribbean monk seal; Guadalupe fur seal (Mexico); Hawaiian monk seal; Suleiman markhor. (See WHITAKER'S ALMANACK, 1956, p. 990). Mr. H. J. Coolidge, of the Survival Service of the Union, stated that during his recent visit to Cambodia, he was greatly disturbed at what is happening there to wild animals, especially to several species of wild cattle, since Cambodia achieved independence and the strict enforcement of the French game laws ceased. The species were the gaur (the largest of the wild cattle), the bantian (a smaller kind), the water buffalo, and the kouprey, a rare species, a relic of former ages, of which only 500 survived two or three years ago. His information was that in the last two years probably half the game animals in Cambodia have been destroyed.

ROMAN FORT OLDER THAN LONDON WALL.—A Roman fort older than the Roman wall round London has been excavated in the Cripplegate area by Professor W. F. Grimes, after six years' investigation. The plan of the fort is roughly square and covers 11 acres, lying between London Wall on the north and Grisham Street on the south. It was built in the first century A.D., and when the City wall was built, about A.D. 200, the fort was incorporated in it. This accounts for the unusual course of the London Wall in this area, a peculiarity which has long been a puzzle. The excavations reported in 1950, by which Professor Grimes proved the existence of the fort, were made chiefly at the south-west corner. He returned to the fort to make the most of the few weeks remaining before its site—a bombed area—was filled in to allow the new road from Aldersgate to Moorgate to be made. The excavation of what he considered the probable situation of the west entrance to the fort has proved successful; it has brought to light the foundations of the northern guard-tower or turret of the west gate. The remains of the corresponding south guard-tower are presumably under Falcon Street, which runs from west to east across part of the site.

● **SALMON HATCHED ARTIFICIALLY.**—The supply of salmon in the Baltic has been the subject of research by Sweden's Migratory Fish Committee. Although naturally bred fish stand a better chance of survival, experiments with artificially propagated salmon justify the artificial repopulation of rivers where dam building has meant death to the original stock of salmon. Ten years ago it became apparent that the continuous harnessing of Sweden's many waterfalls was threatening the replenishment of salmon stock in the Baltic. This was due not only to the obstacles placed in the way of the fish trying to reach their natural spawning grounds but also to the conditions in the rivers being so changed that no places suitable for the growing or young salmon would be left. The Committee tagged the seawards migrating salmon and collected data about the places of final catch, the rate of growth, and other factors pertinent to salmon fishing. To improve the methods for salmon conservation, a rearing station and laboratory with possibilities for expansion was built in the Indal River at Hölle, near Sundsvall. The artificially hatched salmon are kept in their containers for two or three years until they reach a size of about six inches. They are then released into the lower parts of the river

or on the coast. Most of the tagged fish have been caught in the sea, and about eighty tagged fish were caught in returning to their native river. Out of these, only two missed their "home" river, going about thirty miles farther north. Salmon put back directly on the coast seem to find their way home amazingly well. According to calculations, a return of at least 5 per cent. of the released salmon would be necessary to make artificial propagation a paying proposition.

SATURN'S RINGS.—Dr. G. P. Kuiper, who has carried out an examination of Saturn with the 200-in. telescope at Palomar, has advanced a new theory as to the great gap in the appearance of the rings of that planet. It has been established that Saturn's rings consist of vast numbers of small particles, revolving round the planet in orbits confined closely to the plane of its equator. The particles are probably composed of frozen gases. The unequal brightness of the various parts of the system is due to the concentration of the particles, which are most closely packed and brightest in the middle, much less so in the outer, and least of all in the innermost ring. There is a clearly marked division, between the middle and outer rings about 2,000 miles wide, which appears as a narrow black line. It is by no means free from particles, as can be seen when the rings are presented almost edgewise to our view. Dr. Kuiper is of opinion that what has been seen with smaller instruments is partly an illusion, and that the great gap is the only true division in the ring.

SEA DEPTHS SECRETS.—In his Joule memorial lecture at Manchester, Sir Edward Bullard outlined some of the plans which are in the scientific mind for the exploration of the depths of the sea. Research teams at Cambridge and at two American universities have done much since the war to find out what collects on the bottom of deep oceans. By sending down long, weighted pipes they have recovered sections of the deposits there. By dredging they have been able to study the nature of large areas of ocean bed. By using echo-sounding apparatus of the "Asdic" type they can map the contours of the ocean bottom. It has been possible to tell how quickly the deposits on the sea bottom accumulate by measuring the radio-activity in different parts of the cores brought to the surface. The sea contains a little radio-active ionium (formed by the radio-active decay of uranium) in the deposits which disappears by radio-active decay, half of it every 83,000 years. The amount of ionium in a part of a core is therefore a guide to the age of that part. These measurements have suggested that the bottom of the Pacific accumulates one centimetre of deposit every 100,000 years. The sea bottom is believed to be a good place to look for evidence of the Ice Ages. When sea animals grow their shells of calcium carbonate from minerals in the sea, the exact proportion of the different isotopes of oxygen (not radio-active) which they incorporate varies slightly with the temperature. These varying proportions can be measured, and the temperature of the sea when the animals were alive can therefore be deduced. Their age can be told from their depth below the surface of the core in which they are found. Analysis has shown that there have been between two and six Ice Ages in the last million years. Sir Edward Bullard is of opinion that it would be profitable to dredge the ocean bottom in a search for meteorites. Meteorites with a large content of iron are easily found on land, but those of stone often escape notice. Since the relative numbers of the two are important, a search should be made in the sea or even in the Antarctic ice.

SEARCHLIGHTS SEEN 300 MILES AWAY.—Four great searchlights, of such power that their beams may be seen from the air as far away as Boston and Baltimore, and 300 miles out over the Atlantic, have been mounted on the ninetieth storey of the Empire State Building, New York, to serve nightly as beacons of welcome to visitors from far and near. One of these beams aims straight up; the others are directed outward at an angle five degrees above the horizontal. Altogether the searchlights generate nearly 2,000 million candle-power. Moving counter-clockwise at the rate of one revolution a minute, each in turn serves as the vertical beam while its forerunner returns to the horizontal position. These beacons indicate the great change that has come in this era of aircraft, and emphasize the fact that more visitors arrive in the United States by air than by sea. The welcome which the Statue of Liberty has given to visitors for 70 years has lost some of its significance. The searchlights on the Empire State Building, creating "the brightest continuous source of man-made light in the world," cost \$250,000 each, and weigh a ton each. Each is four feet in diameter and contains a 2,500 watt short-arc mercury bulb, and a highly polished reflector. Because temperatures in the lights reach 1,500 degrees Fahrenheit the bulbs are made of quartz instead of glass.

SEAWEED IN SCOTLAND.—The Institute of Seaweed in its latest report stated that the seaweed harvest of the shores of Scotland is worth £1,000,000 a year. For a long time it was used as manure, and it still is on the crofts in the Outer Isles. One of the first industrial uses of seaweed was in the manufacture of iodine. Great masses of the weed were gathered and burnt, and from the resultant kelp iodine was obtained. The trade flourished until it was discovered that iodine could be obtained more cheaply from the nitrates of Peru and Chile. Then came the discovery just after the Second World War that seaweed could be made the base of many products from cosmetics to custard powder and ice-cream. Seaweed has thus again brought a measure of prosperity to Scotland. To-day, on the sandy shore of the western coast of South Uist, the seaweed is raked into heaps to be collected by cart for transport to the factory on the south-west of the island. Here the seaweed is stacked, dried, milled and then sent to the mainland for further treatment. The search for seaweed has taken gatherers to every accessible point on the shores of the islands and Scottish mainland, and there have been inquiries on the possibility of acquiring supplies from Ireland. The trouble is that the weed is being used more quickly than it grows. It takes three years for a decent growth to accumulate.

SQUIDS' INK MAY BE A DECOY.—Mr. D. N. F. Hall, of the Fisheries Research Station at Singapore, has challenged the current belief that squids take evasive action when danger threatens by squirting out a cloud of ink and darting off behind it. After studying squirting squids he has come to the conclusion that the cephalopods are really producing inky ghosts of themselves, just as field commanders sometimes erect dummy tanks and guns to draw the fire of the enemy. The ejected ink hangs, suspended in the water, a discrete mass. Apparently the squid senses danger, retreats to a good tactical position, and then starts to change colour, as they are able to do. Mr. Hall chased one squid 3 in. long round its tub and made a grab at it when he got within reach of what seemed to be the small dark creature. But he found he had tried to grasp a darkening cloud of ink of almost

precisely the same size and colour as the squid, which had, in its light-coloured disguise, got round to the opposite side of the tub. It seems, therefore, that the ink of the squid functions primarily as a decoy, masking the rapid change of the animal to a lighter escape colour.

STAR READING DATES THE UNIVERSE.—According to scientists at the Lick, Mount Wilson and Palomar observatories, the universe is 5,400,000,000 years old. For seven years the problem has been receiving attention, but it is admitted that the figure may have to be altered as more accurate instruments and new techniques are used. The latest figure comes from Dr. N. U. Mayall, of Lick observatory, Dr. A. R. Sandage, of Mount Wilson, and Dr. M. L. Humason, of Palomar. They have analysed the light from 300 galaxies of stars and 26 clusters of galaxies. The most distant cluster they watched was the hydra cluster which was so far away that it could not be seen even with a 200 in. telescope. It was found by photographic plates. Astronomical calculation of the universe's age is based on the theory that long ago something happened to start all matter in space flying outwards from a common centre. Light from the farthest galaxies shows that this speeding into space still continues. The farther into space the galaxies are observed, the faster they are going away from the centre. The most recently observed cluster of galaxies was reported by Dr. Ira Bowen, director of the Palomar observatory, who said that it was located at a distance of about 6,000,000,000,000,000,000 miles—the distance covered by light moving at 186,000 miles per second in 1,000,000,000 years. The United States National Geographic Society has expressed the opinion that in recent years astronomical and geological estimates of the age of the earth and the universe have been coming closer into agreement.

STEELMAKING: CYCLOSTEEL PROCESS.—A new steelmaking process was described by Sir Charles Goodeve, Director, British Iron and Steel Research Association, at the British Association. The process was known under the name of "Cyclosteel". It was best suited for an ore in a finely divided state. The ore was to be preheated, probably in a fluidized bed to a temperature just below where it became sticky, and then injected into a very hot reducing gas, produced by pulverized coal or atomized oil with only sufficient air and oxygen partly to burn it. It was almost certainly necessary to use oxygen to maintain the necessary high temperature and low oxygen potential at one and the same time. It was known that two reactions, ore plus carbon monoxide going to iron plus slag and carbon dioxide, and coal plus oxygen and carbon dioxide going to carbon monoxide, were fast with finely divided particles, and only a short time in the reaction zone seemed to be necessary. The separation of the gas from the precipitated products would take place by gravity and cyclonic action, and a settling chamber finally separated the iron from the slag. A method of making steel from powdered ore and coal avoided the sinker plant and the coke ovens and widened the range of usable fuels. It was unlikely to replace the blast furnace for many years.

STONEHENGE: GROUP DISCOVERIES.—The site of a circular staked enclosure has been discovered on one of the barrows of the Stonehenge group by Mr. Paul Ashbee, a specialist on English barrows, who led a team of students and university undergraduates in the autumn. The discovery was completed with the finding of a second skeleton in the barrow—that of a small child of the early Bronze Age. The circle, two miles from Stonehenge and a mile from Woodhenge at New Barn, near

Amesbury, has been defined by Mr. Ashbee with black stakes. It is about 25 ft. in diameter. Across its perimeter lay the flexed skeleton of a Bronze Age man which had been partly dismembered before burial and was buried along one of the axes of the enclosure. The circle is considered to have been a mortuary enclosure, and the bowl barrow, which has been excavated to the bottom of the subterranean 5 ft. deep ditch surrounding it, has as its primary burial the larger of the skeletons. The discovery follows the find of a cremation burial complete with burial urn, amber and faience beads, bronze awl, and a boar's tusk in the neighbouring disc barrow. Mr. Ashbee regards it as probably the finest example of this type of burial discovered since the excavations of Sir Richard Colt Hoare more than 100 years ago.

STUMP-TAILED LIZARD.—A new arrival at the London Zoo was a stump-tailed or two-headed lizard (*trachysaurus rugosus*) from Australia. It is the sole representative of one of the most remarkable genera in the sub-order to which it belongs. With a short pyramidal depressed head of great width, a short neck, and a long, thick and flattened body, the lizard is clothed with an armour of rough, thick, brown scales. In length it measures about 14 inches. The thickened tail gives it the appearance of having a head at each end, but in fact the tail is a reserve food store. In the captive state the stump-tailed lizard is slow and lethargic in its movements, creeping about with the abdomen pressed to the ground. Its chief food consists of worms and insects, with occasional fruit and vegetables, and it can endure long fasts.

SUBMARINE ESCAPE AID.—Mr. George Ward Parliamentary Secretary to the Admiralty, announced that a method has been developed by which men trapped in a sunken submarine can escape in rapid succession in immersion suits by floating to the surface through canvas trunks, which extend down into the submarine from escape hatches. A system for providing purified air to the men before they escape is built into the submarine. Trials had shown that this method gives the best chance of escape from depths down to about 200 ft., and it has been decided to fit all submarines with this system.

TASTE CELLS.—Professor Y. Zotterman, of the Department of Physiology and Pharmacology, Stockholm University, described to the British Association a course of research which promises to throw more light on the sensory basis of taste. In contrast with the former idea that taste cells on the tongue were of four kinds, corresponding with four classes of taste (sweet, sour, bitter and salt), he said that most cells give only a general sensation of taste, and that superimposed on this are signals from smaller numbers of more or less specific taste cells. The isolation of nerve signals from single taste cells (less than half as large as cells which respond to touch) is difficult and delicate research. The only specific kind of taste cell from which nerve cells have been isolated is a kind that responds to water. The most recent findings are that the cat, dog and pig all have taste cells of this kind, but that the rat has not. The rabbit has similar cells, which give only a delayed response.

TELEPHONE CABLE ACROSS ATLANTIC.—The first transatlantic line telephone service was inaugurated in London by the Postmaster-General on September 25, and came into public use. The cables, which were laid by H.M. Telegraph Ship *Monarch*, from Oban, Scotland, to Clarenville, Newfoundland, follow the contours of the Atlantic sea bed down to depths of 2,500 fathoms and have been

designed to withstand water pressures up to $\frac{1}{2}$ tons to the square inch. Throughout their lengths the cables are fitted with repeaters or amplifiers at intervals of 37 miles to re-establish the voice intensity as distance increases. The greater part of the 4,000 miles of cable was manufactured by a British company and the repeaters were made in the United States. The project, which cost \$40,000,000, was carried out by the British Post Office, the American Telephone and Telegraph Company and the Canadian Overseas Telecommunications Corporation in co-operation.

TEMPLE DISCOVERED AT AMMAN.—The Director of Antiquities in Jordan, Mr. G. W. L. Harding, has found what he considers to be conclusive proof that the lands to the east of the River Jordan were inhabited at the time that the Israelites led by Moses passed through them during their exodus from Egypt in the late Bronze Age, about the thirteenth century B.C. While he was waiting at the airport at Amman, one of the workmen presented to him four pieces of bronze, which, when fitted together, he identified as a Khepish sword, a ceremonial sword used in Egypt at the time of the Pharaohs of the late Bronze Age. Exploration on the site where the sword had been found revealed the floor and lower part of the walls of a small temple, made of local undressed stone and covering an area of about fifty feet square. The temple had four small rooms and an open courtyard on the south side; and that it was a temple is presumed from the layer of burnings found there, with many animal and bird bones from sacrifices. In the museum at Amman are other objects found in the temple, scarabs and alabaster vases imported from Egypt, beads, gold leaf, costume pins, ivory toilet accessories, and little cylinder seals used to roll an imprint on clay documents to seal them. There is much fine late Bronze Age pottery imported from Cyprus or even from Greece. The late Bronze Age objects from Egypt and Greece at Amman establishes the approximate date of the temple. Mr. Harding says the people who worshipped at the temple were probably Ammonites, one of the many groups in the great Semitic family and, since this is the first late Bronze Age discovery in East Jordan, it fills a gap in the archaeological history of the country.

TITANIUM: NEW PROCESS.—Sir Roy Dobson, of the Hawker Siddeley group, announced that a major step forward in processing titanium for jet engines had been taken. Canadian Steel Improvement had developed the process of forging titanium which results, it is said, in a substantial reduction in cost. "We can forge finished jet turbine blades," Sir Roy said, "as cheaply as rough forgings." The process itself was said to be secret, but the essential point of it was that it protected the metal during forging and heat treatment, and dealt with its chemical affinity for hydrogen and oxygen. Titanium is of importance in aviation because it is only slightly heavier than aluminium and has a strength comparable to alloy steel. Its power of retaining its strength when heated is of the utmost importance to turbine technology and to the construction of supersonic aircraft. Other special uses where titanium shows a large saving in weight over other materials are fireproof bulkheads and armour plating for military aircraft. Australia is believed to have the largest deposits in the world of titanium.

TONOMETER TO AID THE DEAF.—An ingenious apparatus, designed by Father Arthur Jones, a lecturer on African music at London University, has the promise of considerable value in teaching

the deaf to speak. The instrument, designed by Father Jones, makes a visible record of voice tones, originally as an aid to linguists studying Chinese and African languages. Most of the African languages are "tonal"; that is, the sense of many words depends largely on alterations in tone values. The new instrument, it is claimed, enables a speaker to "see" the tones of his own voice. As the deaf cannot hear what they say, only the more gifted deaf pupils can learn to master tonal values. The new apparatus, as described in *Nature*, comprises three units—a microphone, an amplifier and the tonometer. The tonometer consists of a wooden soundboard on which are mounted 66 metal reeds tuned to cover all the tones in a man's voice. A wider range of reeds will be needed to cover the scope of women's voices. When a tone enters the microphone vibration is caused in the soundboard which is imparted to the reed bank, but only that particular reed which has the same frequency as the original sound vibrates visibly. So when a person talks into the microphone he can see in the tonometer waves of movement in the reed bank which correspond with the rise and fall of his own voice. A scale is mounted in front of the reeds, giving the name of each semi-tone and by means of pointers attached to it he can mark the position of the tones made by himself and his teacher. Teachers of the deaf, it is claimed, have, therefore, a new way whereby they can show by their own speech how the voice should rise and fall. Deaf pupils have then only to practise until they produce the same effects on the instrument.

TOWER OF LONDON STILL MOVING.—According to the National Physical Laboratory, which has resumed its watch on the Tower of London, the displacement has amounted to less than an inch in thirty-five years (See WHITAKER'S ALMANACK, 1957). Calculations show that the 40 ft. thick quay wall is gradually shifting obliquely downward, away from the river. Measurements were begun in 1919, and after a temporary halt they have been re-started, more to develop the technique than because of any real fear for the Tower. The movement is caused by the shifting blue clay on which the Tower is built.

UNDERGROUND MAP OF WALES.—Plans for compiling an underground map of North Wales have been prepared by the Geological Departments of Birmingham and Liverpool Universities, and two experiments have been made on the sea beds near St. Tudwal's Islands, four miles south-east of the fishing village of Abersoch. The object of the first experiment was to determine whether the rocks on the mainland of the Cardigan coast were different from those under the sea. A number of gelignite charges were exploded electrically from a naval boat. Seismographs 20 sea miles apart were used to record the vibrations. The second experiment was to examine the sediment on the floor of Cardigan Bay, as a preliminary for a large-scale study of the Irish Sea by the Geological Department of Liverpool University. The long-term object is to determine the causes of the silting up of harbour entrances and river estuaries as well as to assist in finding out means for preventing coastal erosion. The prospect of the explosions caused great concern among the fishermen of Abersoch, Mochras and Barmouth who feared that their livelihood from the lobster beds would be interfered with. A cutter was sent out to a mile north of Puffin Island and lobsters in pots were lowered to the seabed at distances varying from 25 yards to 300 yards from the boat, and a 20 lb. gelignite charge in 50 ft. of water 10 ft. above the sea bed was exploded. When the pots were

recovered at low water all the lobsters were in good health, so the fishermen's fears were set at rest.

VERULAMIUM POCKET OF WORMS.—A pocket of earthworms, subsisting on buried remains of vegetation, was found during the excavations near the Verulamium Museum, St. Albans. They were 18 in number, and were discovered in wet clay among layers of blackened organic material between 8 ft. and 15 ft. below ground and submitted to the examination of Dr. Ronald M. Dobson, of the Rothamsted Experimental Station. Here they were identified as *Eophila oculata* (Hoff), a species fairly widely distributed in Britain and Europe. The type does not occur in agricultural soil, but inhabits mud at the bottom of ponds, rivers and ditches and the wet soil of their banks. It has been dredged from the bottom of a lake at a depth of over 100 ft. The worms were found in the remains of a ditch that was filled in during the first century A.D. and then sealed over by the floors of successive buildings erected between the first and fourth centuries A.D. These floors formed a compact layer 8 ft. to 15 ft. thick, which had not been disturbed since Roman times. The upper parts of the ditch, at the place where the worms were found, contained soil mixed with a large quantity of partially decomposed blackened vegetation, among which holly leaves, bracken, and grass were recognizable. Many decomposed insect parts were also found, including pupal cases of flies. These discoveries, Dr. Dobson said, coupled with the presence of a mineral which is only laid down by nature in conditions deficient in oxygen, suggests that the ditch has been waterlogged and almost free from air since it was filled in. The first worms had clearly not been introduced accidentally during the digging. The nearest likely source of this type of worm is the River Ver, 250 yards away. It is unlikely that they invaded the ditch by penetrating the compacted layers above it, but they might have migrated along it horizontally if it connected with the river. The full extent of the ditch is not known, but it does not connect with the river, as the exposed portion turns away from the river and lies 10 ft. above it. There remains the possibility that the worms entered the ditch before it was filled in and have bred there ever since.

WATER SHORTAGE IN BRITAIN.—With many reservoirs half empty as a result of the drought in summer and autumn *Nature* undertook a survey of the water problem in Great Britain. The total amount of water supplied by water undertakings in England and Wales is estimated to be 1,750,000,000 gallons a day, an average of 40 gallons per head of the population. In 15 years time the supply needed will be twice the amount consumed in 1938. Water requirements are increasing faster than the growth of population, owing to improved sanitation and hygiene, and the shift from urban to rural areas. Increasing demands are being made by industry. The refining of one barrel of crude oil requires 18 barrels of water; the production of a ton of steel needs 65,000 gallons of water; a ton of sulphite paper needs 64,000 gallons; the processing of a gallon of alcohol 100 gallons; while 80 gallons are needed for each kWh. produced at thermal generating and atomic power stations. Many industrial establishments discharge acids, oils and chemicals to pollute the streams, and cooling water

returned to streams at high temperature complicates the supply. The total water supply in Great Britain is held to be adequate, but more water, it is suggested, might be impounded in reservoirs, and the artificial recharge of depleted underground sources be practised. In the London Basin 150,000 million gallons of the Thames flow might be preserved in this way. There seems strong grounds, says *Nature* for an overall national water policy.

WINDOW OF THE HEAVENS.—A new "window of the heavens," a radio telescope was dedicated at Harvard University, Massachusetts. It is expected to reveal details of the great spirals of the Milky Way and of lightless clouds of hydrogen said to contain 50 to 100 times as much material as the sun—clouds so big that it would take light 25 years to pass from one end of them to the other. The bowl-shaped antenna or "ear" of the telescope, which has a diameter of 60 ft., is mounted on a 50 ft. tower. It can be focused on any part of the sky, and weighs four tons. The instrument is the largest in the United States, but there is a larger one, 75 ft. high, in Holland, and both these will be dwarfed by the 250 ft. high instrument now being constructed at Jodrell Bank in England.

WIND TUNNEL TO COST £1,500,000.—The 25,000 h.p. motor which operates a new trans-sonic wind tunnel at the Bedford establishment of the Aircraft Research Association was set in motion on May 3. Although the principal aircraft firms had their own wind tunnels it was realized that more powerful equipment would be required to yield the data for high-speed aircraft. The main obstacle was expense. The Society of British Aircraft Constructors therefore evolved a scheme for a jointly owned wind tunnel and the Aircraft Research Association was formed to operate it. The financial contributions of the participating companies are related to the use they will make of the tunnels; thus a company contributing one-tenth of the initial and running costs has acquired a similar proportion of usage. The total cost will be £1,500,000. The new trans-sonic tunnel has a working section 9 ft. wide by 8 ft. high, through which a weight flow of 1½ tons of air a second can be blown by two 20-bladed fans, each of 21 ft. diameter. The main motor can maintain a power of 25,000 h.p. for two hours and of 20,000 h.p. continuously. A plant to cool the air in the tunnel can manage a flow of 600,000 gallons of water an hour. The tunnel has a range of 0.6 to 1.3 times the speed of sound, approximately 460 to 990 m.p.h. at sea level.

WINTERING DUCKS AND GESE.—The Wildfowl Trust stated that it was difficult to provide enough feeding grounds for wintering ducks and geese in Britain. In North America similar difficulties had been solved by buying tracts of farmland and turning them back into marshes, a policy aimed not only at the conservation of wildfowl but also at reversing the over-enthusiastic land drainage which had led to the creation of "dust-bowls". It might be feasible in Great Britain, since several kinds of duck will congregate and find good feeding on shallow fresh-water floods over grassland, for areas of grassland to be artificially flooded in rotation for short periods during the winter. To established grasslands with a marginal quality sward this would cause no deterioration.

NATIONAL AND LOCAL NATURE RESERVES

A list of 47 national nature reserves declared by the Nature Conservancy (see p. 411) up to September 30, 1956, and of 5 local nature reserves declared by county councils. Permits are required for access to the Reserves marked * and for access to some parts of the Reserves marked †. Applications for permits and for authority to undertake research or to collect specimens in any National Nature Reserve should be addressed to the Regional Officer of the Nature Conservancy, whose address appears on p. 411.

Berkshire

Cothill* (4 acres).—The fen has long been noted for the richness of its flora and fauna. It occupies a basin, on the edge of the Jurassic (Corallian) Calcareous Grit, which is the meeting point of several streams carrying highly calcareous water; the outflow is at Sandford Brook. It seems probable that much of the valley was flooded in mediaeval times; two ponds can still be found in the Ruskin Reserve. These show the succession from open water through various swamp associations to woodland of alder, birch, ash and other trees, the development of vegetation being accompanied by progressive acidification of the surface peat.

Cheshire

Wyburnbury Moss* (8 acres, 3½ miles south of Crewe).—This Moss is an unusually large example of "Schwingmoor," a type of bog not before described in Britain. It has been formed in a steep sided kettle-hole in sandy, glacial material. At the centre of the bog there is only a thin crust of sphagnum peat 6-10 feet deep floating on water, but at the margin deposits of both sphagnum and fen peat have accumulated to form a solid organic layer over the glacial sand. Surface vegetation shows a surprising variety for such a small area.

Devonshire

Yarner Wood* (354 acres).—Contains a good variety of woodland associations which provide excellent opportunities for experimental studies.

Azmouth-Lyme Regis Undercliffs† (794 acres, between Seaton and Lyme Regis).—Primarily of geological interest and a classical example of a form of landslipping.

Dorset

Arne* (9 acres, 2½ miles east of Wareham).—One of the two known places in the country which show the natural transition from dry woodland to salt marsh.

Hartland Moor (178 acres, 1½ miles south-east of Wareham).—The central interest of this area is that its vegetation is in parts dominated by the rare Dorset Heath (*Erica ciliaris*) which outside the district is found in only a few places in South Devon and Cornwall. A number of other rare bog plants are found on the Reserve and there are very interesting local variations in the flora which are probably related to the differences in the drainage water.

Morden Bog (168 acres, near Wareham).—A unique variant of Southern heathland, carrying a rich flora and fauna. It shares many characteristics with the heaths of Purbeck and the New Forest, including some of the rarities, e.g. a Grasshopper *Chorthippus vagans* and an Ant *Formica picea*, which nests in sphagnum bog. Two of the insects—a digging, predatory Wasp *Pompilus rufus* and an Ant *Formica pratensis*—are not known to occur elsewhere in Britain.

Essex

Hales Wood* (20 acres, 2½ miles north-east of Saffron Walden).—This is one of the best known examples in the country of oak-ash woodland on chalky boulder-clay where the true oxlip (*Primula elatior*) has replaced the primrose in the herb layer. This small Reserve covers only a sample area and was declared under a lease from the Forestry Commission, who hold the remainder of the Wood.

Hampshire

Old Winchester Hill (140 acres, 2½ miles south of West Meon between Petersfield and Winchester).—Most of the Reserve is rough chalk grassland, but there are patches of well grown yew and other chalk-loving trees. On the southern slopes there is a good growth of juniper.

Hertfordshire

Tring Reservoir† (49 acres, the banks only, of Wilstone, Marsworth, Little Tring and Startopend Reservoirs in Hertfordshire and Buckinghamshire, 1 mile north of Tring).—The Reservoirs are sites of classic importance for the observation of breeding and migratory birds. The marshy ground also provides a habitat for certain plants which are rare in this part of the country; such as the Round-fruited Rush (*Juncus compressus*), the Orange Fox-tail (*Alopecurus aequalis*) and the Broad-leaved Ragwort (*Senecio juncatilis*).

Huntingdonshire

Monks' Wood† (387 acres, some 5 miles north-east of Huntingdon).—This ash-oak woodland is a typical example of the woodlands on the Oxford clay of this neighbourhood, and supports rare plants and insects.

Woodwalton Fen* (514 acres, 10 miles south-east of Peterborough, 4 miles south-west of Ramsay).—Administered since 1919 by the Society for the Promotion of Nature Reserves, this Reserve has now been taken over by the Nature Conservancy. It has a very rich flora and fauna.

Holme Fen* (640 acres).—This Reserve adjoins the site of one of the last fenland meres, Whittlesey Mere, which was drained in 1851. It supports a relict raised-bog flora with uncommon plants and insects, fenland edge vegetation, reed-beds, woodland and roughs.

Kent

Swanscombe Skull Site (Geological Reserve) (5 acres, 4 miles east of Dartford).—This site is internationally famous for the discovery in 1935-36 of parts of a human skull thought to be closely ancestral to modern man and the earliest known in Europe.

Ham Street Woods* (239 acres, some 6 miles south of Ashford).—The Nature Conservancy acquired this area in 1954-53 chiefly to maintain the characteristic fauna and flora of the coppice-with-standards type of woodland, which is a typical but decreasing feature of this region.

Blean Woods* (76 acres).—The woods include sessile oak with hazel and hornbeam, coppice, chestnut and birch, and contain a variety of unusual plants. The importance and value of the Reserve is greatly increased by the presence of a species of butterfly, the Heath Fritillary, which occurs here and practically nowhere else in the country, though its food plant (a semi-parasitic species) is well distributed elsewhere.

Lancashire

North Fen (5 acres, 4 miles east of Coniston).—The central interest of North Fen is that it shows a vegetational succession characteristic of the climatic conditions found in north-western England, of open water rich in mineral salts to fen, carr and bog. It is mainly woodland, and is only just beginning to show signs of sphagnum bog development in contrast to the nearby Blelham Bog Reserve where there is very little left of the original

woodland. The Reserve lies in the Lake District National Park, and is established under a lease from the National Trust.

Blelham Bog (5 acres in North Lancashire, $\frac{3}{4}$ miles south of Ambleside).—Leased from the National Trust. This Reserve is a rare example of the development of sphagnum bog from wet willow woodland. The vegetation is mainly Sphagnum—Molinia—Myrica Bog and many of the bog mosses characteristic of this type of transitional environment.

Roudsea Wood* (287 acres, about 10 miles west of Grange-over-Sands).—The main part of the wood consists of two parallel ridges, one of limestone and one of slate. The limestone ridge is crowned by a yew wood and has interesting mixtures of oak and ash on its flanks with a luxuriant ground flora. The slate ridge is a typical Lake District slate oak wood, and between the ridges there is a small tarn and around it an abundance of fen plants and fen insects.

Norfolk

Scot Head (1,821 acres, 3 miles north of Burnham Market on the coast).—The land is leased from the National Trust and the Norfolk Naturalists' Trust and the Reserve is managed with the advice of a committee which includes representatives of both these bodies. It is famous for its bird life, but is probably of more outstanding interest for the study of coastal evolution and of sedimentation, as well as of colonization by sea-shore and salt-marsh plants.

Winterton Dunes (259 acres, 8 miles north of Yarmouth).—Extensively developed dunes, expanding into varied formation up to 600 yards wide. At Winterton there is an exceptionally wide range of heath, bog and dune habitats. The flora of the wet slacks or depressions above Winterton village is of special interest. These formations support a wet heath type of vegetation which is entirely different from the flora found in the slacks of the calcareous west coast dunes. Zoologically the area is of special interest because of the change from bog to heath, and then dune, in a very short distance.

Oxfordshire

Wychwood* (647 acres, about 7 miles west of Woodstock).—The remnant of a once extensive Royal Forest, the reserve carries mixed woodland, chiefly of oak standards and high scrub dominated by hawthorn with some hazel coppice, but also with beech, ash and field-maple of exceptional size, on a wide range of soils derived from limestone clays, marls, sands and siliceous drifts.

Soke of Peterborough

Castor Hanglands† (218 acres, $\frac{4}{5}$ miles north-west of Peterborough).—Heath and woodland on Oolitic Limestone and calcareous clays, with a wide range of plant life.

Somerset

Bridgwater Bay† (6,000 acres, 12 miles south of Weston-Super-Mare).—The Somerset River Board, the owners of this Reserve, have entered into a Nature Reserve Agreement with the Nature Conservancy under which this area is protected, and wildfowl and waders can feed and roost undisturbed. Research is being initiated here into the growth of *Spartina townsendii* and other shore vegetation.

Suffolk

Cavenham Heath (132 acres).—The Nature Conservancy acquired this area chiefly to preserve a section of the uncultivated Breckland Heath, which has now so largely been afforested.

Orfordness-Havergate† (514 acres in East Suffolk, $\frac{1}{2}$ miles south of Orford).—The Royal Society for the Protection of Birds bought Havergate Island in 1948 and will continue to own and manage it

under a Nature Reserve Agreement. It has become famous in post-war years as the site to which the Avocet has returned. Orfordness shingle spit, which is also included in the Reserve, is of great interest not only for birds, but also for the study of coastal evolution.

Westleton Heath (117 acres in Suffolk two miles south of Dunwich).—The heath is well-known for its birds including the Stonechat, Woodlark, Red-backed Shrike, Stone curlew, Lesser Redpoll and Nightjar. It also has great importance as one of the few good surviving examples of the characteristic and formerly extensive East Suffolk heathlands, most of which have recently been reclaimed for agriculture or afforestation or have been absorbed by the needs of defence. The dry sandy and shingly soil is of low fertility and is underlaid by the Westleton Beds, sands and gravel of mid-Glacial (Pleistocene Age) laid down under marine conditions.

Sussex

Kingley Vale (230 acres).—The Nature Conservancy acquired this to preserve the famed natural yew woods; within a small area are displayed all stages of yew wood development.

Lullington Heath (155 acres, $\frac{3}{4}$ miles north-west of Seaford).—This is one of the largest areas of unploughed chalk heath remaining on the South Downs. The botanical interest of the Reserve lies in the fact that shallow-rooted plants which need acid soil, such as Ling and Bell Heather, are mingled with deep-rooted plants such as Salad Burnet and Dropwort which need limy soil.

Westmorland

Moor House† (10,000 acres, bounded on the north and east by the uppermost reaches of the Tees).—The Nature Conservancy's Field Station here forms the centre for research on bog growth, peat erosion, the effects of grazing and burning, and the re-establishment of the high-altitude woodlands which grew on the drier soils before sheep-grazing began.

Wiltshire

Fyfield Down (612 acres, 3 miles west of Marlborough).—An area of high chalk downland rich in sarsen stones. The Sarsens are large blocks of sandstone apparently derived from a bed of sand which covered the site in Eocene times. They produce an effect of great botanical interest, being accompanied by pockets of acid soils, on which grow acid-loving plants such as Sheep's Sorrel—this is in contrast to the ordinary lime-loving plants of downland.

Worcestershire

Wren's Nest (51 acres).—A classic geological exposure of Upper Silurian rocks. The Wenlock Limestone has yielded a fossil fauna of probably well over 300 species, all in a state of perfection such as no other locality in Britain exhibits. This includes the trilobites, shells, corals, sea-lilies and other marine life of some 330 million years ago.

WALES

Anglesey

Newborough Warren and Ynys Llanddwyn† (1,256 acres, 6 miles west of Caernarvon).—Newborough Warren is one of the largest, and biologically richest, expanses of dunes in Western Britain. The island—Ynys Llanddwyn—has a varied flora and many rare birds visit it during migration.

Caernarvonshire

Cwm Idwal (984 acres, 6 miles west of Capel Curig).—Leased from the National Trust, this was the first Reserve to be declared in Wales and within a National Park. The wide variety of volcanic rocks carry an interesting flora dating from immediately after, or even perhaps before, the latest Ice Age.

Cardiganshire

Coed Rheidol (19 acres, 10 miles east of Aberystwyth).—Interesting examples of moist, mossy Sessile Oak woodlands with a rich associated flora and fauna. Although the woodlands are near the road they are so steep that their access is extremely difficult. They occupy a ravine of considerable depth and high humidity. This is one of the only places which give a guide to what woodlands and plants were once like all over Wales.

*Cors Tregaron** (1,524 acres, 12 miles south-east of Aberystwyth).—Lord Lisburne and his tenants have entered into a Nature Reserve Agreement with the Conservancy. Cors Tregaron is the best actively growing raised bog in England and Wales and is one of the largest areas of peat moss in Wales. The Reserve also contains rare plants and interesting birds and insects.

Merionethshire

Cader Idris (969 acres, about 4 miles south-west of Dolgelley).—Idris Ltd., the owners of the area, have entered into a Nature Reserve Agreement with the Nature Conservancy. The Reserve is of great interest geologically for its variety of Ordovician volcanic lavas with intrusive igneous rocks interbedded with fossiliferous mudstones and slates. These, with the altitudinal and physiological variations, make for a wide range of habitats and plant communities. It is one of the most southerly areas in Britain where plants characteristic of the arctic-alpine flora are found.

SCOTLAND

Fifeshire

Isle of May (140 acres, at the mouth of the Firth of Forth about 5 miles S.E. of Anstruther, Fife).—No fewer than 218 full species of birds have been recorded in this Reserve. In 1947 a Bird Observatory and Field Station was set up under the management of a Joint Committee. The Reserve is established under a Nature Reserve Agreement with the owners, the Commissioners of Northern Lighthouses.

*Morton Lochs** (47 acres, on Tentsmuir in north-west Fife).—These artificial lochs lie directly on a main migration route of wildfowl and waders.

Tentsmuir Point (92 acres, near to the Morton Lochs Reserve).—It is an outstanding area for the study of coastal accretion and plant colonization, and steps are being taken to measure these quantitatively.

Inverness-shire

Cairngorms (39,689 acres in Inverness-shire and Aberdeenshire).—Most of this Reserve is not owned by the Conservancy, but is established under Nature Reserve Agreements. It is the largest National Nature Reserve in Great Britain and one of the largest in Europe. The flora includes the native Scots pine and birchwoods, moorland vegetation and the arctic-alpine plants of the corries, screes and exposed summits; the fauna is rich in varied species.

Kirkcudbright

Silverflowe (472 acres, in Kirkcudbright some 12 miles N.N.W. of New Galloway).—A unique species of seven raised bogs, undrained and virtually undisturbed by human interference. The Reserve is established under a lease from the Forestry Commission.

Ross-shire

Beinn Eighe (10,450 acres, 45 miles from Inverness and 24 from Kyle of Lochalsh).—This was the first National Nature Reserve to be declared in Britain, and was acquired primarily for the preservation and study of the fairly large remnant of Caledonian pinewood.

Rassall Ashwood (202 acres, near the head of Loch Kishorn, Wester Ross).—One of the very few natural or semi-natural ashwoods found in Scotland and the most northerly in Great Britain. The floor of the wood, which is growing on limestone pavement, is remarkable; it has a peculiar hummocky surface. The Reserve is established under a Nature Reserve Agreement with the owner, Mr. A. C. Greg.

Rona and Sula Sgeir (320 acres, some 47 miles North-West off Cape Wrath).—Notable as the home of the Atlantic Grey Seal, rarest of the world's 25 species. The Reserve is believed to hold about half the world's population of this seal. Leach's Fork-tailed Petrel has one of its few breeding places on the Eastern side of the Atlantic. Established under a Nature Reserve Agreement with the owner, the Barvas Estate.

Shetland

Hermaness (1,071 acres in the north-west of the island of Unst, Shetland).—An important breeding station of the Great Skua, a bird with a very restricted distribution in the northern hemisphere, but also breeding in the Antarctic. In addition to Great Skuas, Arctic Skuas, Red-Throated Divers, Eider Duck and Arctic Tern breed on the peninsula. The sea cliffs hold an expanding gannetry and also colonies of Guillemots, Razorbills, Kittiwakes, Puffins, Storm Petrels and other birds. Muckle Flugga and the Outstack are included in the Reserve.

Noss (774 acres).—Noss, with its great cliffs, is one of the most spectacular islands in Europe, and consists mainly of rough moorland. On the cliffs there are many nesting Gannets, Guillemots, Shags, Kittiwakes, Puffins, Greater Black-backed Gulls and Herring Gulls. On the moorland, colonies of Great and Arctic Skuas occur. The Eider Duck is another of the breeding species. Geologically, Noss exhibits striking erosion in sandstone and phyllites of the Old Red Sandstone Age.

LOCAL NATURE RESERVES

Five local Nature Reserves have been declared by County Councils. *Aberlady Bay* (1,439 acres, in East Lothian, Scotland), a wintering place for waders and wildfowl; *Castle Eden Dunes* (517 acres in Durham); *Drigg Dunes and Gully* (583 acres near Ravenglass in Cumberland), an important gully and ternery on an area of sand-dunes; *Farndale* (2,500 acres in Yorkshire), declared in 1955 to protect the wild daffodils which grow on either side of the River Dove in Farndale; *Gibraltar Point* (300 acres, in Lincolnshire), a sanctuary for migrant and wintering birds.

Humber Wildfowl Refuge.—Extending to some 20 square miles of tidal flats and water, its chief purpose is to protect the main Humber roosting area of the Pink-footed Goose. All shooting and access, other than navigation, is prohibited.

LITERATURE OF THE YEAR

In 1955 British publishers issued a total of 19,962 titles, of which 5,770 were reprints or new editions. The 1955 total was the highest ever recorded in the British book trade history, being greater by 774 titles than the 1954 total, which was itself a record. The increase was more than accounted for by new books, since reprints and new editions in 1955 were 76 fewer than in 1954.

Almost all categories of book reflected the general increase, the most striking exception being fiction; in 1955 the total figure (4,204) for this classification was not merely 502 less than in the previous year but even more considerably less than in the year preceding the war when the total production of new titles was smaller. This decline in the output of fiction was considered by *The Bookseller*, which compiles the statistics of book production, to be "probably a consequence of the jackpot-or-nothing economics which appear to govern the publishing of fiction today." While successful novels nowadays frequently attain sales that were undreamed of before the war, it has become increasingly difficult for the ordinary novel on which no spotlight has been directed to make or pay its way. The only other category in which there was a noticeable decline was in children's books; the 1955 total of 1,966 titles, fewer by 200 than the 1954 figure, reversed a trend that had been steadily developing during recent years (the 1954 figure had been higher by 376 titles than the previous year's). The categories which showed the greatest increases were Trade, Education, Technical Handbooks (here the 1955 total was approximately four times as large as it was before the war), Engineering and Art and Architecture.

The record output of new titles in 1955 was not viewed with any great enthusiasm, the general opinion being that the greatest impediment to book publishing prosperity lies in the production of more new books than the reading public can assimilate. Accordingly, in literary circles, there was relief at the end of September 1956 when it was found that the total output for the first nine months of 1956 was 13,930 titles, 722 less than in the corresponding period of 1955.

During 1956 the total sales of books by British publishers amounted to £49,439,087, an increase by more than £3m. over the previous year's figure. Of the 1955 total, export sales accounted for £18,156,084, or 36.8 per cent. (These figures represent publishers' receipts and not sales at retail prices.)

ITEMS OF INTEREST

COPYRIGHT.—In October, 1955, the Government introduced into the House of Lords a new Copyright Bill, designed to become the text of the Copyright Act, 1955. This was a successor to the Copyright and Television Exhibiting Right Bill, which failed to get through Parliament before the General Election in May, 1955. It was a far more comprehensive measure, intended to replace the Copyright Act of 1911 and to cover developments in photography, recording and broadcasting since the 1911 Act was passed.

Among the changes which the Bill proposed should be made to the 1911 Copyright Act was the repeal of the provisions providing for limited copyright protection during the second half of the 50 years following the death of an author. Copyright subsisting in a work "shall continue to subsist until the end of the period of 50 years from the end of the calendar year in which the author died and shall then expire"; and the "existing provisions whereby, during the last 25 years of the copyright life of a work, that work can be pub-

lished as of right on payment of a statutory royalty, and where the Judicial Committee of the Privy Council have power to order the issue of licences to permit republication or performance of a published work of a deceased author, are to be repealed and not re-enacted." This provision is necessary to enable this country to ratify the Brussels Copyright Convention (the revised convention drawn up for Berne Union members). The Bill also facilitates, subject to certain safeguards, the copying of certain copyright material by libraries, and the copying and publication of ancient unpublished manuscripts in public archives. The limitation of these privileges to libraries not conducted for profit led members of Parliament to appeal to the Government to extend the concessions to other libraries such as the technical libraries of important firms. Lord Mancroft stated that the Government had had to reconcile the interests of scholars with those of the authors of works. The introduction of microfilms, photostat procedure and other developments had, he said, put an entirely new aspect on the matter. "Every time one of these processes is used it is an erosion upon the rights of the author." The Government was not prepared to make further concessions to libraries.

The introduction of a measure far more complicated than the interim Copyright and Television Exhibiting Right Bill has, of course, delayed this country's ratification of the Brussels Copyright Convention and also of the Unesco Universal Copyright Convention, for which amendment of the law is necessary. This has also—to the regret of many concerned—delayed Great Britain's enjoyment of the protection given by the United States to her fellow-members of the latter convention.

OBSCENITY IN BOOKS.—A fresh attempt was made to get through Parliament the Obscene Publications Bill drafted by a committee sponsored by the Society of Authors. This, with some amendments, was the Bill introduced by Mr. Roy Jenkins during the previous Parliament. One of its main objects is to make relevant the *intent* of whoever publishes an obscenity; and it requires the prosecution to show that the accused intended to corrupt or was reckless as to whether the sale or publication of the work in question would have a corrupting effect. The revised Bill was introduced by Mr. Hugh Fraser, and the second reading took place on November 25th, 1955. It was "talked out" by the Government spokesman, Sir Hugh Lucas-Tooth, on the grounds that the subject matter of the Bill was as important as any that could be raised in a Private Member's Bill, and was certainly as controversial. In May, 1956, Sir Alan Herbert, who had been chairman of the committee which drafted the Bill, with Mr. Roy Jenkins, M.P., led a deputation to the Home Secretary. Major Lloyd George told the deputation that he could hold out no hope of Government legislation if the Bill failed to make further progress. Public opinion seemed to him to be fluid on this matter, and to embody in a Bill tests of obscenity was not free from difficulty.

POSTAGE ON BOOKS.—New postal rates introduced by the Government in November, 1955, had the effect of virtually doubling the postage on any book weighing less than a pound, and of much more than doubling it on books over that weight. It was a serious blow to the book trade, already contending against increased costs in every other direction. Particular sufferers were the book clubs, which distribute not less than seven million books a year, mainly by post. A letter calling attention to "the tragic results that may arise from the peculiar proposal that books shall no longer be allowed

favourable rates of postal transmission" was addressed to *The Times* by a distinguished group of signatories, including Mr. John Masefield, Sir Norman Birkett, Sir Henry Dale, Mr. Walter de la Mare, Mr. T. S. Eliot, Sir Richard Livingstone, Sir Stanley Unwin, Sir Harold Nicolson, Dr. G. M. Trevelyan, Dr. Ralph Vaughan Williams. Begging the Postmaster-General to reconsider his decision, they wrote: "Should this change be permitted, Great Britain will stand alone among the civilised countries of the world as having completed an entirely retrograde step." The Librarian of the London Library, pointing out that in 1920 the country subscribers to the Library paid almost exactly £1,000 in postal charges on books, said that it had taken 35 years for that sum to be doubled. The new proposals of the Postmaster-General would double it again overnight. Numerous other correspondents of *The Times* testified to the hardships imposed on scholars and libraries. The Postmaster-General received deputations from the Publishers and Booksellers Associations, and from the National Book League and other cultural and scientific bodies. The Postmaster-General, however, stated that, after considering carefully and sympathetically all the points which had been raised, he had come to the conclusion that in view of the fact that the service would still not quite pay its way, and against a background of rising costs, he would not be justified in modifying in any way the proposed increases. The increases accordingly came into effect on January 1st, 1956.

SCOTTISH NATIONAL LIBRARY.—Her Majesty the Queen opened the National Library of Scotland on George IV Bridge, Edinburgh, on July 4th, 1956. She recalled that she had during the previous summer declared open the completed building of the youngest national library in Britain, the National Library of Wales at Aberystwyth. She was now performing the same ceremony in the oldest of the national libraries, founded nearly 80 years before that of the British Museum itself. The National Library of Scotland, under that name, was only 30 years old, but as the Advocates' Library it dated back to the end of the 17th century. The new building on George IV Bridge was completed in December, 1955, when the Ministry of Works handed it over to the Library's board of trustees. The building, first planned in 1926, remained a skeleton throughout the war, and the main construction work was not put in hand till 1951. The total cost was estimated to be about £600,000 and it is considered that the shelf space provided will be sufficient for the Library's needs during the rest of the 20th century.

INTERNATIONAL P.E.N. CONGRESS.—The English P.E.N. were hosts to the International P.E.N. Congress, which was held in London in July, 1956. There had been no congress in England since 1941. The inaugural address was given by Mr. R. A. Butler, Lord Privy Seal and President of the Royal Society of Literature. The general theme of the discussions was: "The author and the public; problems of communication." The congress was attended by over 750 writers, including 250 from this country.

INTERNATIONAL PUBLISHERS' ASSOCIATION.—The 14th Congress of the International Publishers' Association was held in Florence in June, 1956. Some 30 British publishers attended. The opening address was given by Dr. Luther H. Evans, Director-General of U.N.E.S.C.O.

FRANKFURT BOOK FAIR.—At the Frankfurt Book Fair, held in September, 1956, about 50,000 books,

including 14,000 new publications, were shown by over 1,000 publishers from more than 20 countries. The award of the Peace Prize of the German book trade took place in the Paulskirche in the presence of the President of the Bundesrepublik. It was given this year to Reinhold Schneider. The formidable task of selecting 50 British books for inclusion in the "Beautiful Books" section of the exhibition was undertaken by Sir Basil Blackwell at the request of the Publishers' Association.

LITERARY PRIZES.—The Nobel Prize for Literature for 1955 was awarded to the Icelandic author, Halldor Laxness. Announcing the award, the Royal Swedish Academy said that it went to Mr. Laxness for "his descriptive epics which have renewed the great Icelandic art of narration."

The James Tait Black Memorial Prize for fiction was awarded to I. Compton-Burnett for her novel, *Mother and Son*. The prize for the best biography was awarded to R. W. Ketton-Cremer for his *Thomas Gray*.

The W. H. Heinemann Foundation for Literature prizes for 1955 were awarded to R. S. Thomas for his *Song at the Year's Turning*, to Vincent Cronin for his *The Wise Man from the West*, and to R. W. Ketton-Cremer for his *Thomas Gray*.

The Queen's Gold Medal for Poetry was awarded to Edmund Blunden.

The Somerset Maugham Award for 1956, for the most promising work by a British writer under 35, was given to Elizabeth Jennings for her book of poetry, *A Way of Looking*. This prize consists of £400 to enable the winner to travel abroad for three months.

The William Foyle Poetry Prize of £250, which is awarded annually to the author of what is considered to be the best volume of verse published in the United Kingdom, was given to Laurie Lee for his *My Many Coated Man*.

The Sunday Times Book Prize, consisting of £1,000 and a commemorative gold medal, was awarded to Richard Church for the first volume of his autobiography, *Over the Bridge*.

The Carnegie Medal, awarded by the Library Association for an outstanding book for children published during 1955, was given to Eleanor Farjeon for her *The Little Bookroom*, illustrated by Edward Ardizzone.

The John Llewellyn Rhys Prize was awarded to John Wiles for his novel, *The Moon to Play With*.

The Arts Council, on the recommendation of its Poetry Panel, awarded prizes of 100 guineas each to the Rev. R. S. Thomas for *Song at the Year's Turning*; to J. P. Fletcher for *Tally 300*; and to Wilfred Watson for *Friday's Child*. The first award was made for the best book of original verse published by a living poet during the period July 1st 1953 to June 30th, 1956; the second and third awards were for the best first books of original verse published by living poets during the same period. The Arts Council's Scottish prize for poetry was awarded to Robert McLellan for his unpublished poem, *Sweet Largie Bay*.

During the year a prize of £500 for books was established by Mr. Charles Forte, managing director of Forte & Co. Ltd., the present owners of the Café Royal. This Café Royal Book Prize is to be administered by a committee set up jointly by the National Book League and the Café Royal, and is to go to books from different fields each year. This year books on London entertainment were considered, and the prize went to Laurence Irving for his *Henry Irving*; in addition two prizes of £100 went to Mary Clarke for *The Sadler's Wells Ballet* and to M. Willson Disher for his *Melodrama*.

Arthur Guinness Son & Co., the famous brewers, announced that they would award annually prizes of £300, £200 and £100 for the three best poems, in English, published in print for the first time during the year following July 1st, 1956.

The *Evening Standard* announced the establishment of a £5,000 Book Prize, "to be awarded from time to time to any work of outstanding merit combined with high interest and appeal to the general reader."

The President of the Cheltenham Literary Festival, Sir George Dowty, offered a travelling scholarship of £350 to enable a young writer under 35 to travel to Canada and to report to the Festival on "Canada from the writer's point of view." The administration is being carried out by the National Book League, the International P.E.N. Club and the Cheltenham Literary Festival Society. The 1956 winner was Charles Whiting.

1,000TH "EVERYMAN".—The publication of the 1,000th volume in the world-famous Everyman's Library series of classics took place on March 29th, exactly 50 years after the originator of the series, J. M. Dent, launched the first volumes. The work chosen for the 1,000th volume was Aristotle's *Metaphysics*. The publishers felt that the work must be one whose claim to permanence was indisputable, and the *Metaphysics* had not hitherto been included in the series because of its intrinsic textual difficulties. There was wholehearted recognition from all quarters of the outstanding achievement of the series, the total sales of which amounted to 42 million volumes.

SHAW CENTENARY.—The centenary of the birth of George Bernard Shaw was celebrated on July 26th, 1956. The event was marked by both literary and dramatic activity, and the celebrations included a Bernard Shaw Centenary Luncheon held by the Society of Authors, at which the speakers were Lord Attlee, Mr. St. John Ervine, whose biography of Shaw was published on that day, Dame Sybil Thorndike and Mr. Elmer Rice, the American dramatist. Tributes which came from all over the world testified to Shaw's widespread influence.

HONOURS.—A knighthood was conferred on Mr. Basil Blackwell, the famous Oxford bookseller, in the Birthday Honours list. In the New Year's Honours List, 1956, Mr. Arthur Waley became a Companion of Honour for services to the study of Chinese literature, and authors who received the C.B.E. were Mr. L. P. Hartley, Sir Osbert Sitwell, Miss Agatha Christie and Miss C. V. Wedgwood.

BOOKS PUBLISHED

Among the books published between October, 1955, and October, 1956, were the following:

COPYRIGHT

The Government Department dealing with literary and artistic Copyright is the *Industrial Property Department, Board of Trade*, 25 Southampton Bldgs., London, W.C.2.

The law of copyright is contained in the Copyright Act, 1911, under which copyright subsists automatically, without registration, in every original literary, dramatic, musical and artistic work. Libraries entitled to receive free copies of books published in the United Kingdom, are the British Museum, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

Voluntary Registration at Stationers' Hall.—Compulsory registration at Stationers' Hall terminated on Dec. 31, 1923, but in the following year the Stationers' Company established a new Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 6s. for a Book, or a Fine Art; certified copies 6s. in either case. The fee for a search is 7s. Such entries are of value in proving the existence of a work on a given date in the case of infringement.

Address, The Registrar, Stationers' Hall, E.C.4.

DRAMATIC SUMMARY, 1955-1956

Sept. 13. *Satellite In The Sky*, British (Donald Wolfit, Kieron Moore, Bryan Forbes, Jimmy Hanley and Louis Maxwell).

WIRELESS DEVELOPMENTS AND BROADCASTING DURING THE YEAR

THE 14-DAY RULE

On Nov. 30, 1955, a debate took place in the House of Commons on the rule prohibiting broadcast discussions on political issues during the fortnight before the subject in question was to be debated in Parliament. The Postmaster-General moved that it was in the interests of Parliament and the nation to preserve the principle of some limitation to the anticipation of Parliamentary debates and proposed the appointment of a select committee to consider whether any changes were desirable in the methods of applying the principle. An amendment by a Labour member which sought to omit the approval of the principle was defeated on a free vote by 271-126, and the Government's motion carried. The select committee was duly set up and consisted of seven Conservative, five Labour and one Liberal members, with Sir Lionel Heald, ex-Attorney-General, in the Chair. Its report, which

was unanimous, was issued on June 22. It recommended that the restriction on discussion of all matters to be debated should be limited to seven days, that the Postmaster-General should have discretion to relax the rule in individual cases, and that a small panel of members should be set up to advise him in connection with applications for relaxation.

SCHOOLS TELEVISION

The B.B.C. announced on Nov. 23 that it would inaugurate an experimental service of school television in the autumn of 1957. It would consist in the first instance of two or three transmissions a week for secondary schools, and initially it would be probably concerned with current affairs and science. It was intended to make a fair and thorough trial of the possibilities and value of television for schools and the B.B.C. hoped to obtain

enough evidence to establish whether the service should become permanent. It had been ascertained that the Minister of Education was in favour of the experiment and that local education authorities were prepared to equip as many schools as were necessary. Miss Enid Love, Assistant Head of School Broadcasting, Sound, was appointed Assistant Head of School Broadcasting, Television.

COLOUR TELEVISION

At the request of the Television Advisory Committee, which had been asked by the Postmaster-General to carry out investigations into the whole field of television, the B.B.C. began in Oct. 1955 a series of experimental transmissions in colour from the Alexandra Palace Studios. The transmissions were mainly of "stills", demonstration colour films and simple studio shots. On April 3, 1956, pictures were transmitted from the experimental transmitter at a special demonstration. This was arranged for members of a study group of the Radio Consultative Committee of the International Telecommunications Union (C.C.I.R.). The delegates, representing 25 nations, visited a number of countries to see the systems of colour television in use or planned. Thirteen experimental colour television receivers produced by eight British manufacturers were on view at the demonstration. It was emphasised however that many problems remained to be solved before a public colour television service would be possible.

SIZE OF AUDIENCES

The B.B.C. estimated in November that the television public during the July-September quarter, 1955, was about 13,000,000, as compared with approximately 10,000,000 twelve months earlier. The average evening audience was about 4,200,000 as against 3,600,000. The Post Office announced that the five millionth television licence had been issued during October. Licences for sound only in force at Oct. 31 totalled 9,130,223, including 286,755 for sets in cars. Rival claims were made by the B.B.C. and I.T.A. about the number of people viewing their respective programmes during the first eight weeks of independent television. The B.B.C. said that about 56 per cent. of those whose sets were equipped to take both programmes chose the B.B.C., while the I.T.A. estimated its own share at 55 per cent. In May, however, after the I.T.A. Midlands transmitter had come into use, the B.B.C. computed its share at 41 per cent and the I.T.A. share at 59 per cent.

EXTENSION OF TELEVISION

On Nov. 15, the B.B.C. television station at Pontop Pike began operating on its full power of 12 kw. compared with its previous temporary power of 1 kw. It was estimated that in consequence television would become available to about 500,000 more people in north-east England. Two days later, the B.B.C.'s first television broadcast from Northern Ireland, relayed by radio links to the Kirk O'Shotts transmitter in Scotland, was successfully received. Lord Brookeborough, the Northern Ireland Prime Minister, took part in the broadcast which was made in his room at Stormont.

CESSATION OF MORNING PROGRAMMES

During December it was announced that Saturday morning I.T.A. programmes would cease at the end of the month, and Associated Rediffusion, the London weekday programme contractors, later said that there would be no weekday morning

transmissions after Jan. 9. Press statements were to the effect that morning audiences had never risen above 10 per cent. of the potential and that the average figure was 4.6 per cent. It was further stated that the Midland programme contractors did not intend to make morning transmissions when independent television started in the Midlands.

I.T.A. RELIGIOUS PROGRAMMES

A joint statement by the I.T.A. and Associated Television Ltd. on Jan. 2, said that from Jan. 8 there would be regular religious programmes or services every Sunday at 7 p.m. on I.T.A., Channel 9, the first four programmes being discussions under the title "About Religion". The Central Religious Advisory Committee had agreed that the I.T.A., and the B.B.C., if it so desired, should be free to use this period on Sunday evenings for the purpose. The I.T.A. further said that it had appointed a panel of three consultants, one each from the Church of England, the Roman Catholic Church and the Free Churches.

I.T.A. POLICY

Following upon the resignation of the editor-in-chief and the deputy editor of Independent Television News, the I.T.A. issued a statement on Jan. 17 about its news policy. It said that the inauguration of the news service was regarded as one of the outstanding successes of independent television and affirmed that there would be no change in the presentation of the news nor in broad editorial policy. The I.T.A. and the programme companies agreed that balanced programmes required at least 20 minutes of news bulletins each day. I.T.V. bulletins averaged 23 minutes a day, and there was no intention of reducing them. It was further said that audience-measurement figures did not suggest that placing the news at 10.45 p.m., instead of 10 p.m., caused a loss of audience.

On Jan. 24 the I.T.A. announced that it had decided to discontinue the practice of "spot" advertisements delivered by companies immediately before, after or during natural breaks in television programmes. It said that at present this type of advertisement was not entirely free from misunderstanding, though the Authority was prepared to review the position later. Meanwhile the programme companies would be allowed a month's grace to complete current commitments.

NEW I.T.A. STATIONS

The first independent television station outside the London area was opened on Feb. 17, when the new transmitter at Hints, near Lichfield, built in seven months at a cost of more than £250,000, went into operation. The I.T.A. estimated that in Birmingham and the surrounding districts, within a radius of 30 to 40 miles of the transmitter, there would be an audience of over a million.

The Granada network station at Manchester was inaugurated on May 3. It was covered by a transmitter at Winter Hill and was planned to provide weekday programmes for 13,000,000 people in an area extending from Lancaster in the north to Stoke-on-Trent in the south, and from Colwyn Bay in the west to Grimsby in the east.

CUTS IN CAPITAL INVESTMENT

As part of the Government's policy of economies, reduction of £1,500,000 in capital investment on broadcasting was announced. The Postmaster-General, replying to questions in the House of Commons on Feb. 22, said that this represented a

cut of about 20 per cent. in the original estimates for 1956-57 and would have the effect of slowing down extensions and improvements. Dr. Hill said that both the B.B.C. and the I.T.A. had applied for consent to provide a second television programme, but the Government had decided to postpone consideration of the question for two years. The postponement, he added, would have the advantage of allowing time for a better assessment of technical developments, including the use of colour. The I.T.A. announced in May that as a result of the Government's restrictions, plans for five new stations in the north-east, the Hampshire area, Northern Ireland, the south-west and East Anglia had been postponed.

NEW CRYSTAL PALACE STATION

On March 28, the new B.B.C. television station at the Crystal Palace came into regular operation and the former Alexandra Palace station was closed, though it continued to be used for experimental purposes. The programme of development at the Crystal Palace was planned to take place in three stages, the final aerial system on the high tower at the site being expected to be available before the end of 1957. This will carry a Band I radiator and two for Band III transmissions, one of which will be used by the I.T.A. The permanent installation, which will have an output of 200 kw., is expected to bring another 1,200,000 people within reach of the station and to provide greatly improved viewing on the south coast.

SUMMER PROGRAMMES

On April 20, the I.T.A. announced that summer afternoon programmes would be curtailed. Some of the afternoon features had not proved successful, and from April 23 all weekday programmes began at 4.45 p.m. instead of 4 p.m., while from May 6 week-end programmes started at 4 p.m., instead of 2 p.m. The B.B.C. said that they did not contemplate any change in their times of broadcasting during this period. Between June and September extra broadcasts, mainly of outside events, were arranged between 3 p.m. and 5 p.m. on weekdays.

On the same day it was stated on behalf of Associated Television, Ltd., that the company had

decided to increase its paid-up capital by £750,000 and that part of the new capital would be subscribed by the *Daily Mirror* Group.

I.T.A. SCOTTISH PLANS

The I.T.A. said on May 30 that it had accepted the application of Scottish Television, Ltd., for the appointment of Scottish programme contractors. The chairman of the Company was Mr. Roy Thomson, Chairman of Scotsman Publications, Ltd. The Scottish Station would be built at Black Hill, between Airdrie and Bathgate and would cover a population of 3,500,000. It was hoped that it would be ready to transmit programmes by August 1957—in time for the 1957 Edinburgh Festival.

B.B.C. GOVERNORS

Three changes in the composition of the board of governors of the B.B.C. were made with effect from July 1. The Earl of Balfour succeeded Mr. Thomas Johnston as national governor for Scotland, and Mrs. Cazalet-Keir and Dame Florence Hancock took the places of Lady Rhys-Williams and Dr. Barbara Wootton respectively. Mrs. Cazalet-Keir's term of office expires in 1960, and those of Lord Balfour and Dame Florence Hancock in 1961. Sir Philip Morris was appointed a governor and vice-chairman of the Corporation until June 30, 1958.

NEW V.H.F. STATIONS

The B.B.C. very high frequency sound broadcasting station at North Hessay Tor, on Dartmoor, was brought into service on Aug. 7. It was announced on Aug. 1 that the Postmaster-General had approved the Corporation's plans to build six new v.h.f. stations, at Rowridge, Isle of Wight, Kirk-o'-Shotts, Sandale, near Carlisle, Corwen, Anglesey and Rosemarkie on the Moray Firth. The first four are due for completion in 1957 and the other two in 1958. When all six are in operation, it is estimated that 96 per cent. of the population will be within range of sound radio without interference. Each station will transmit the Home, Light and Third programmes, except Corwen, which will broadcast the Welsh Home Service only.

BROADCASTING STATIONS

A select list of broadcasting stations in various Commonwealth and European countries, giving the name of the station and its administration followed by its strength in kilowatts; and (F.) wave-lengths in metres followed by frequency in kilocycles per second. Certain details of the stations in foreign countries are drawn from *Nomenclature des stations de radiodiffusion* by permission of the Director-General, International Telecommunication Union.

MUSIC AND OPERA OF 1955-56

(1955) Oct. 4. The Philharmonic Symphony Orchestra of New York played in the first of two concerts at the Festival Hall under its principal permanent conductor, Dimitri Mitropoulos. The solo part in Brahms' D Minor concerto was played by Dame Myra Hess. 12. Opening of triennial Norfolk and Norwich Festival. The first concert included part of Vaughan Williams' *Tudor Portraits* composed for the Festival over twenty years before. Mendelssohn's violin concerto played by Campoli and Constant Lambert's *Summer's Last Will and Testament*. The Hallé Orchestra took part throughout the Festival. 13. Royal Philharmonic Orchestra performed in the first of a series of Beecham concerts at the Festival Hall. Denis Vaughan conducted, Sir Thomas Beecham himself being indisposed. 14. First of two concerts given by the Philharmonia Orchestra under Herbert von Karajan, before its departure for its first tour of the U.S.A. and Canada. 16. Forty-second season of London Symphony Orchestra concerts opened at

the Festival Hall. The conductor was Hermann Scherchen. 17. New season at the Royal Opera House opened with performance of Verdi's *Otello*, under the direction of Rafael Kubelick. 19. First concert of the Royal Philharmonic Society's 144th season took place at the Festival Hall with Sir Eugene Goossens deputising for Sir Thomas Beecham as conductor. 26. New concerto for the unique combination of jazz band and symphony orchestra by Rolf Liebermann played in a B.B.C. winter symphony concert at the Festival Hall under the direction of Sir Eugene Goossens. 27. The Queen and other members of the Royal Family attended gala performance of Smetana's *The Bartered Bride* at Covent Garden in honour of the President of Portugal and Madame Craveiro Lopes. 28. The B.B.C. broadcast the first performance of Sir Eugene Goossens' oratorio, *The Apocalypse*, conducted by the composer. 29. A series of Youth Concerts, organised by Sir Robert Mayer, inaugurated at the Festival Hall. Dr

Vaughan Williams, who is President of the Youth and Music movement, conducted the Tallis Fantasia.

Nov. 9. First public performance in England of Frank Martin's oratorio *Golgotha* given at the Festival Hall by the B.B.C. Choral Society with Sir Malcolm Sargent as conductor and Gwyn Griffiths as chief soloist. **16.** Royal Philharmonic Society Concert at the Festival Hall devoted to works by Sir William Walton, conducted by the composer. Aldo Ferraresi, who was the soloist in the violin concerto, made his first appearance in England. **20.** The London Philharmonic Orchestra's concert at the Festival Hall had as the first half of its programme three works by Holst, and as the second a new symphony, the fourth, by Stanley Bate. **21.** Annual St. Cecilia concert at the Festival Hall, in the presence of Her Majesty the Queen. The London Philharmonic Orchestra under Sir Adrian Boult, the Croydon Philharmonic Society under Alan J. Kirby and trumpeters from the Royal Military School of Music took part in a programme which, except for one work by Dohnanyi, was all of music by British composers. **22.** Annual service for St. Cecilia's Day at St. Sepulchre, Holborn. Choristers from the Chapel Royal, St. Paul's and Canterbury Cathedrals and Westminster Abbey took part. A new anthem by Elizabeth Poston was commissioned for the occasion. **23.** English programme, consisting of works by Elgar, Delius, Holst and Rawsthorne in a B.B.C. concert at the Festival Hall. **27.** The Royal Philharmonic Orchestra, conducted by Sir Thomas Beecham, took part in a concert at the Festival Hall entirely devoted to the works of Grieg. **28.** Leonid Kogan, the Russian violinist, played three concertos with the London Symphony Orchestra under Basil Cameron at the Festival Hall. **29.** Yehudi Menuhin took part in the first of two International Celebrity Concerts at the Festival Hall, conducted by Sir Thomas Beecham.

Dec. 4. Belgian National Radio-Symphony Orchestra visited London and gave a concert at the Festival Hall under its conductor Franz André in aid of the Save the Children Fund. **5.** Gioconda de Vito and Yehudi Menuhin played together in a recital of duets for violins by Viotti, Spohr, Purcell and Handel at the Festival Hall. **6.** Philharmonia Orchestra gave a programme of works by Sibelius at the Festival Hall in honour of the composer's ninetieth birthday. **8.** At a further concert in honour of Sibelius, given at the Festival Hall by the Royal Philharmonic Orchestra under Sir Thomas Beecham, Sir Thomas was presented by the Finnish Ambassador and Foreign Minister with the Order of the White Rose, in recognition of his work in spreading the knowledge of Sibelius' music. **13.** A new orchestral work by Sir Arthur Bliss, *Meditations on a Theme by John Blow*, commissioned by the City of Birmingham Symphony Orchestra, was played at Birmingham under the direction of Rudolf Schwarz and broadcast in the B.B.C. Third Programme.

(1956) Jan. 6. Gala Twelfth Night performance of opera and ballet at Sadler's Wells to celebrate the 25th anniversary of the Theatre's re-opening in 1931. **15.** Liverpool Philharmonic Orchestra undertook a concert at the Festival Hall, conducted by Efreim Kurtz. The programme included Beethoven's violin concerto played by Gioconda de Vito, and Shostakovich's tenth symphony. **18.** A new work by Edmund Rubbra—*Improvisation for Violin and Orchestra*—was performed by the B.B.C. Orchestra with Sir Malcolm Sargent as conductor and Frederick Grinke as soloist in a Royal Philharmonic Society concert at the Festival Hall. **19.** New production of *The Magic Flute* at

Covent Garden to mark the bicentenary of Mozart's birth in January 1756. **23-29.** Commemoration concerts of Mozart's music at the Festival Hall by, among others, the London Symphony Orchestra under Josef Krips, the Philharmonia Orchestra under Otto Klemperer, the B.B.C. Chorus and Choral Society and the B.B.C. Symphony Orchestra in the Mass in C Minor, the London Mozart Players and the Royal Philharmonic Orchestra under Paul Hindemith.

Feb. 1. Production in the B.B.C. television service of Arthur Benjamin's opera, *Mañana*, the first opera specially written in this country for television. **5.** All-Russian programme presented by the London Philharmonic Orchestra at the Festival Hall under Anatole Rimsky-Korsakov, and Prokofiev's ballet suite, *The Stone Flower*, heard for the first time in London. **6.** Final concert of the Philharmonia Orchestra's Mozart tour of Europe under Herbert von Karajan took place at the Festival Hall. **7.** The Bach Choir performed Kodaly's *Missa Brevis* and Vaughan Williams' *Hodie* at the Festival Hall. **15.** The Royal Philharmonic Orchestra's Festival Hall concert, conducted by Efreim Kurtz, included a symphony by Ernest Bloch, performed for the first time. **16.** The Royal Choral Society gave its annual performance of Elgar's *Dream of Gerontius*. **23.** Shostakovich's violin concerto played for the first time in this country by David Oistrakh, to whom it is dedicated, with the Philharmonia Orchestra at the Festival Hall.

March 7. At a B.B.C. symphony concert at the Festival Hall conducted by Eugen Jochum, a symphony (No. 3) by the Bavarian composer Karl Amadeus Hartmann, was heard for the first time in this country. **11.** Sir John Barbiroli visited the Festival Hall with the Hallé Orchestra and performed Gerald Finzi's cello concerto, which the orchestra first played at the 1955 Cheltenham Festival. **12.** The Salzburg Opera Company began a week's visit to the Palace Theatre for the production of Mozart's first opera, *La Finta Semplice*, which the company had performed in Salzburg during the Mozart bicentenary celebrations in January. **15.** Gala concert at the Festival Hall by the London Philharmonic Orchestra and Choir under Sir Arthur Bliss, Sir Adrian Boult and George Hurst. The programme included Mendelssohn's violin concerto and Bloch's *Sacred Service*. **17.** Vienna Boys' Choir sang in the Festival Hall. **18.** Annual Passion Sunday performance of *St. Matthew Passion* by the Bach Choir at the Albert Hall, with Eric Greene, Richard Standen, Jennifer Vyvyan and Elsie Suddaby among the soloists. **21.** Last of the B.B.C. winter concerts at the Festival Hall, consisting of two cantatas—Verdi's *Te Deum* and Vaughan Williams' *Dona nobis pacem*, and a new piano concerto by Edward Rubbra, heard for the first time, with Denis Matthews as soloist. **29.** Croydon Philharmonic Choir performed Verdi's *Requiem* at the Festival Hall, conducted by Sir John Barbiroli, with Richard Lewis, Scott Joynt, Constance Shacklock and Sylvia Fisher as soloists. **30.** Good Friday. The London Choral Society sang the *St. Matthew Passion* at the Festival Hall under John Tobin.

April 8. Yehudi Menuhin appeared with the London Symphony Orchestra in a concert at the Albert Hall. **11.** National Youth Orchestra gave its customary Easter concert at the Festival Hall with Jean Martinon as conductor.

May 2. Vaughan Williams' new symphony in D minor received its first performance, being played at the Free Trade Hall, Manchester, by the Hallé Orchestra under Sir John Barbiroli. The

last concert of the Royal Philharmonic Society's season took place. The conductor was Rudolf Kempe and the concert consisted of two symphonies, Mahler's fourth and Beethoven's seventh. 7. The Vienna Philharmonic Orchestra on a visit to this country played at the Festival Hall with Rafael Kubelik as conductor, and Solomon as soloist in Brahms' second piano concerto. 8. At a second concert, the Vienna Philharmonic Orchestra played a programme of Mozart and Beethoven, conducted by André Cluytens. 9. First of two summer concerts at the Festival Hall by the B.B.C. orchestra under Pierre Monteux. 10. The Vienna Philharmonic Orchestra, continuing its tour of this country, played Beethoven's Egmont overture and third and sixth symphonies at the Albert Hall. At the Festival Hall, Sir Thomas Beecham, after his return from America, conducted the Royal Philharmonic Orchestra in a concert which included a new symphony by Leonard Salzedo. 12. The Liverpool Philharmonic Orchestra under John Pritchard appeared at the Festival Hall and included in its performance Peter Racine Fricker's *Dance Scene*, not previously heard in this country. 14. Vaughan Williams' new symphony received its first performance in London at a concert given by the Hallé Orchestra at the Festival Hall. 30. At St. James's Church, Piccadilly, the London Bach Group gave the first complete performance in this country of Monteverdi's *Vespers for the Feast of the Blessed Virgin*.

June 3 and 5. Jascha Heifetz made two appearances at the Festival Hall, playing in Mozart and Sibelius concertos with the Philharmonia Orchestra on the first occasion, and giving a recital which included music by Mozart, Beethoven, Tchaikowsky, Brahms and Sarasate in the second. 12. The Bach Choir performed the *B Minor Mass* at the Festival Hall with Peter Pears, Richard Standen, John Carol Case, Elsie Suddaby and Pamela Bowden as soloists. 14. Glyndebourne opera season, in which Mozart's bicentenary was celebrated by the presentation of his six principal operas, opened with a production of *Idomeneo*. 15. A new production of Mozart's *Die Entführung aus dem Serail* presented at Glyndebourne. 17. Opening of the Aldeburgh Festival, the programme of which included Handel's oratorio *Samson*, Gustav Holst's opera *Savitri*, Blow's *Venus and Adonis* edited by Imogen Holst for the English Opera Group, and an evening recital of Mozart's chamber-music by Benjamin Britten and the Amadeus Quartet.

July 9. Opening of Cheltenham Festival of Contemporary British Music. Daniel Jones' third symphony received its first performance at the opening concert, being performed by the London Philharmonic Orchestra under Sir Adrian Boult. Later in the week the Intimate Opera Company produced a newly abbreviated version of Arne's *opéra bouffe*, *The Cooper*, and two new operas, Antony Hopkins' *Ten O'Clock Call* and *If the Cap Fits*, Geoffrey Bush's adaptation of *Les Précieuses Ridicules*. During the second week of the Festival, a clarinet quintet by Benjamin Frankel, specially commissioned by the B.B.C., was performed. The Hallé Orchestra took part in the second week's concerts under Sir John Barbiroli, and among new works which they played were *lambics*, a short symphonic piece by Francis Burt, Peter Fricker's *Litany* for double string orchestra, two *Symphonic Variations* by Iain Hamilton and a cello concerto by Kenneth Leighton. 19. *Die Zauberflöte* produced at Glyndebourne for the first time for many years. 22. King's Lynn Festival opened. During the Festival a new choral cantata *Fen and Flood*, by Patrick Hadley, with words by Charles Cudworth was performed.

Aug. 9. The Liverpool Philharmonic Orchestra took part in the Promenade Concerts for the first time; Basil Cameron was the conductor. 13. The Promenade Concert included a performance of Walton's *Belshazzar's Feast*, conducted by Sir Malcolm Sargent, with the B.B.C. Symphony Orchestra, the B.B.C. Choral Society, the Royal Choral Society and Dennis Noble. 15. The Promenade Concert programme included a hitherto unperformed *Suite Concertante* for violin and orchestra by the Czech composer Martinu. Aug. 19-Sept. 8. EDINBURGH FESTIVAL. Her Majesty the Queen attended the opening concert of the Festival in the Usher Hall. During the first week the Royal Philharmonic Orchestra gave five concerts, conducted by Sir Thomas Beecham. On Aug. 22 they performed a new overture, *Edinburgh*, written by Sir Arthur Bliss for the Festival, in a programme which also included his violin concerto, played by Campoli. Another new work introduced by the Royal Philharmonic Orchestra was Richard Amall's tone-poem, *Landscapes and Figures*. During the second week of the Festival, the Usher Hall was occupied by the Boston Symphony Orchestra, which was celebrating its seventy-fifth anniversary by a tour of Europe under its directors, Charles Münch and Pierre Monteux. On Sept. 2 the National Youth Orchestra, conducted by Walter Susskind, appeared at the Usher Hall, and during its last week the Festival was visited by the complete company of the Vienna Hofmusikkapelle, which included among its performances two programmes devoted to Beethoven, the second, directed by Josef Krips, being the last concert of the Festival. Morning concerts at the Freemasons' Hall included solo recitals of Bach, Mozart, Schumann and Liszt, early Scottish vocal music, Bartok's string quartets and a performance of Schonberg's *Pierrot Lunaire* and Walton's *Façade*. The Hamburg State Opera visited the King's Theatre. The repertoire comprised Stravinsky's *Oedipus Rex* and *Mavra*, neither of which had previously been seen on the stage in Britain, Mozart's *Die Zauberflöte*, Cornelius' *Der Barbier von Bagdad* (little known on this country) and Richard Strauss' *Salome*.

Sept. 3-7. Three Choirs Festival at Gloucester. The opening concert included Walton's *Coronation Te Deum*, Brahms' *St. Antony Variations* and Mozart's *C Minor Mass*, with Margaret Ritchie, Joan Alexander and Wilfred Brown among the singers. Later performances included a presentation of Elgar's *Dream of Gerontius*, a programme of Bach by Meredith Davies, organist of Hereford Cathedral, with choir, soloists and the London Symphony Orchestra, and the first performance of Howard Ferguson's new cantata *Amore Languet*. Vaughan Williams' eighth symphony was also heard, and the composer himself conducted his *The Lark Ascending*, with Frederick Grinke as soloist. 13. New Sadler's Wells opera season began with production of Flotow's *Martha*. 15. Promenade Concerts ended before a record audience with the traditional final night's programme. 23. The Saxon State Orchestra of Dresden, visiting England for the first time for twenty years, gave a single concert at the Festival Hall, conducted by Lovro von Matačić, who was appearing for the first time in this country. 29. Tenth anniversary of the B.B.C. Third Programme celebrated by a special performance, broadcast from the Festival Hall, of Beethoven's *Mass in D*, played by the B.B.C. Symphony Orchestra with Otto Klemperer as conductor, and Josef Greindl, Anton Dermota, Anny Schlemm and Grace Hoffman as soloists.

ART AND OTHER EXHIBITIONS, 1955-56

THE V.C. CENTENARY

THE centenary year of the institution of the Victoria Cross provided an excellent opportunity for a commemorative exhibition, and the Inter-Services Committee which carried out the organisation arranged an exhibition which proved to be one of the most popular of recent years. It was held at Marlborough House, by gracious permission of Her Majesty the Queen, from the middle of June, and it brought together exhibits ranging in time from the uniform worn by Queen Victoria at the first parade for the presentation of Victoria Crosses down to a stone carving of the Royal Artillery badge made by Col. J. P. Carne, V.C., of the Glosters while in captivity in North Korea. Among a few early relics were the Cross belonging to the first recipient of the V.C., Lieut. (later Rear-Admiral) C. D. Lucas, who won it at Bomarsund in 1884 and the actual disguise in which Mr. T. H. Kavanagh of the Bengal Civil Service, one of the very few civilians ever to receive the Cross, penetrated the rebel defences in Lucknow during the Indian Mutiny. Also shown was a shoe belonging to Flight Lt. J. B. Nicolson, which was torn by cannon shells in the aerial fight in 1940 in which he won the V.C. In the courtyard were the tank in which Lt. C. H. Sewell won a posthumous Cross at Fremicourt in 1918, the famous gun of "I" Battery, Royal Horse Artillery, served by three members of the Battery who gained the V.C. at Nery in 1914 and an anti-tank gun manned in North Africa in 1942 by Private A. H. Wakenshaw, V.C. Many visitors to the exhibition were gratified by the additional interest of seeing for the first time the grounds and some of the rooms of Marlborough House, so long the home of Queen Mary.

THE GRENADEER GUARDS

Another commemorative exhibition of military interest was that opened at St. James's Palace on May 30 to mark the tercentenary of the founding by Charles II. of the regiment now known as the Grenadier Guards. The original design for the twelve colours ordered by the King in 1661 was on view, as was the Colour presented by the city of Brussels to commemorate the liberation of the city on September 3, 1944. Relics of the Duke of Wellington included his undress uniform boots, his uniform cap, a night-cap and shirt worn by him, and a campaign dressing-case made in Paris in 1772 and used by the Duke in the Peninsula and at Waterloo. The great Duke of Marlborough was remembered by a fine Bohemian glass goblet used by him at Malplaquet, and a silver wine bottle said to have been hung on a pack mule during his campaigns. Of interest to the artist as well as the historian were the painting by John Michael Wright, the 17th-century portrait-painter, of Colonel John Russell, Colonel of the Regiment in 1660, and the bust by Roubiliac of Field-Marshal Earl Lizotier. The portrait of Colonel Russell was hung in the "Colonel's Gallery" together with those of all the other nineteen Colonels in the Regiment's history.

SOANE'S EXHIBITION AT KENWOOD

Kenwood House and its contents deserve to be even better known to Londoners than they are, and in addition to the splendid permanent collection of pictures there, a policy has recently been adopted of staging temporary summer exhibitions of great interest. Last year the Angelica Kauffman exhibition was described and from May to September, 1956, there were shown a selection of nearly a

hundred architectural drawings by Sir John Soane or his draughtsmen. The selection was made from among the vast collection of drawings at the Soane Museum in Lincoln's Inn Fields, very few of which can be permanently exhibited. Drawings of many buildings designed by Soane himself were shown at Kenwood, including the Bank of England, the Dulwich Picture Gallery, the new Law Courts built at Westminster in 1821 and Soane's own house in Lincoln's Inn Fields, now the Museum. There were also a number of drawings of various London buildings of Soane's day, carried out to illustrate his lectures as Professor of Architecture at the Royal Academy.

MOZART BICENTENARY

The bicentenary of Mozart's birth in January called forth, as well as a number of commemorative concerts, mentioned elsewhere in the ALMANACK, a notable exhibition in the King's Library at the British Museum. The earliest acquisition shown was a gift from the composer himself, who visited the Museum in 1765 at the age of nine, composed a special motet ("God is our refuge") for the occasion and presented the manuscript to the Museum. Another outstanding exhibit was the copy of Mozart's Op. 3, *Six Sonates pour le Clavecin*, presented to Queen Charlotte, to whom the work was dedicated. In addition to manuscript compositions and original letters, there was a comprehensive display of the first or very early printed editions of all Mozart's major works, most of which came from the Paul Hirsch collection, acquired by the British Museum in 1946. The first edition, dated 1787, of the E flat major piano quartet was exhibited side by side with Mozart's manuscript sketch for it. Of special interest among the many portraits of Mozart in the exhibition was a water-colour by L. C. de Carmontelle of the composer at the piano at the age of seven, with his father and sister.

CAPTAIN COOK

On May 17 the Australian High Commissioner opened a special exhibition in two rooms of the National Maritime Museum at Greenwich in honour of Captain Cook. In addition to Cook relics in their own permanent collection, the Museum authorities were fortunate not only in the many exhibits lent from private sources, but in securing from the Admiralty much official Navy Board correspondence concerning Captain Cook and his voyages. Among the charts shown was one drawn by Cook as he sailed up the St. Lawrence with General Wolfe and a number of topographical drawings also made by the explorer himself. Miscellaneous exhibits included a piece of coconut tree from the Sandwich Islands, lent by the Royal United Services Institution, with bullet holes traditionally caused in the skirmish in which Cook lost his life.

RAEBURN BICENTENARY

Sir Henry Raeburn was born in March 1756 and the National Gallery of Scotland marked the bicentenary year of his birth by a very representative exhibition organised in conjunction with the Scottish Committee of the Arts Council. The exhibition, open from July to September, was happily timed to coincide with the Edinburgh Festival, and was visited by Her Majesty the Queen. Some fifty portraits were exhibited and they included not only a number of his best known works, such as "The Archers" and "Mrs. Colin Campbell

of Park", but some far less famous, though equally striking paintings, many from private collections. The portraits ranged from his earliest known work ("George Chalmers of Pittencreeff," painted in 1776), to his latest, the portrait of Sir James Maxwell of Pollok, left unfinished at Raeburn's death in 1823.

ACADEMY WINTER EXHIBITIONS

Two separate exhibitions occupied Burlington House last winter. The first, open from October 29 to February 19, was devoted to "Portuguese Art, 800-1800". It was the first full-scale exhibition of Portuguese art ever seen in this country, and as such introduced many English visitors to a sphere which was entirely fresh to them. Unlike many previous Academy winter exhibitions, it was not confined to painting and sculpture, and there was the widest possible selection of plate, ceramics, glass, furniture and carpets. Among the paintings, mainly religious, of fifteenth and sixteenth centuries when Portuguese painting was at its best, the work of Nuno Gonçalves, none of which had previously been seen in England, was particularly outstanding. One of his rare surviving works seen at Burlington House was a fine polyptych, "The Veneration of St. Vincent", regarded as his most important painting still extant. The applied arts in the exhibition ranged from Romanesque sculpture to fine seventeenth- and eighteenth-century furniture, much of which showed strong Eastern influence. Church plate was also a prominent feature and extended from a beautiful tenth-century silver-gilt chalice to ornate work of six hundred years later.

The second exhibition, entitled "English Taste in the Eighteenth Century", occupied seven galleries in the Royal Academy from the beginning of December. The exhibition was designed to illustrate the chief styles of the period, two rooms being devoted to Baroque and Rococo respectively, and one each to Chinoiserie, Gothic and Neo-classicism. In this exhibition the emphasis was on the furnishing of the rooms, and though suitable pictures were introduced, the exhibition created a precedent by treating them as adjuncts rather than as the main theme. Furniture by Kent, Chippendale and Adam (as well as a Moorfields carpet designed by the last-named for Syon House), pottery by Wedgwood, Soho tapestries, and busts by Roubiliac and Rysbrack were among the many splendid exhibits, and especial mention may be made of a mahogany bookcase made by Vile and Cobb for Queen Charlotte in 1762 and lent to the exhibition by Her Majesty the Queen.

BRITISH WATER-COLOURS

Continued interest in British water-colours and drawings was evidenced by a number of exhibitions during the year, including a second series of exhibits from the Gilbert Davis Collection shown at the Arts Council Galleries in October 1955. The Victoria and Albert Museum has new galleries planned for the display of a large number of its unique collection of English water-colours and drawings, and the Museum authorities hope that they may be ready by 1957. Meanwhile a selection was put on view temporarily in four rooms at the Museum in March 1956, and though the display was necessarily a small one, it contained a representative collection both of eighteenth- and early nineteenth-century water-colours, and of sketches and monochrome drawings from Place and Barlow in the seventeenth century down to Ruskin.

THE ACADEMY SUMMER EXHIBITION

This year's Royal Academy Summer Exhibition contained two portraits of the Duke of Edinburgh,

one by Anna Zinkeisen as Marshal of the Royal Air Force, and the other an informal study by Edward Halliday. Portraiture on the whole, however, was not outstanding, though Ruskin Spear's *Sir Laurence Olivier as Macbeth* attracted well-deserved attention. Purchases from the Chantry Bequest included R. O. Dunlop's landscape *Hurrah for the Spring!* and a pen and wash study by Stanley Spencer, *Joachim and the Shepherds*. Perhaps the most remarkable exhibit of all was Maurice Lambert's statue of Margot Fonteyn, made entirely of bronze and specially treated to give the silky effect of her ballet-dancer's dress. William McMillan, who carried out the memorial statue of George VI., contributed a fine bust of the late King. Sir Winston Churchill sent two paintings separated in time by thirty years, *Sir John Lavery's Studio, 1920*, and a landscape, *Marrakech, 1950*. Sir Alfred Munnings exhibited a *jeu d'esprit*, *Does the Subject Matter?*, showing a group of well-known art personalities examining a piece of modern sculpture. He was also represented by a number of more characteristic works, notably *The Whip* and *Land of My Dreams*. Finally, mention should be made of a popular work by Dame Laura Knight, *Summer in Hyde Park*.

REMBRANDT DRAWINGS AND ETCHINGS

Rembrandt was born on July 15, 1606, and in the year which marked the 350th anniversary of his birth, the Department of Prints and Drawings of the British Museum arranged an exhibition entitled "Rembrandt and his Succession" of drawings and etchings from the Museum's collection. The great majority of the exhibits were by the master himself, but the display also included examples not only by his pupils such as Jan Livens and Gerard Dou, but also by later artists who had been influenced by Rembrandt, including Goya and Turner, and continuing to the present day with Augustus John. Several hundred prints and drawings were exhibited and the works by Rembrandt included a number of self-portraits executed at various ages, a small group of drawings of animals and such great and famous etchings as "Christ before Pilate", "Christ Presented to the People" and "Christ with the Sick Around Him, Receiving Little Children", known as the "hundred guilder print", from the price which it fetched in the early eighteenth century.

NATIONAL MUSEUM OF WALES

During a programme of reorganisation much of the National Museum of Wales was closed to the public, and in January the opportunity was taken to show 70 of the best paintings from the Museum at Agnew's Gallery in Bond Street. For many years the collection of paintings at the Museum, which was founded in 1907, consisted mainly of Welsh scenes or works by Welsh artists. It was, however, transformed by the bequest to it in 1952 by the late Miss Gwendoline Davies, C.H., which not only widened the whole scope of the collection, but made it of international importance. The exhibition in London included some thirty paintings from the Gwendoline Davies Bequest, and these formed its chief attraction. Millet, Renoir, Cézanne, Manet, Monet, Daumier and Van Gogh were all represented, and there were also on view *The Virgin and St. John Adoring The Child* from the studio of Botticelli, and a replica of part of *El Repolio* from the Toledo by El Greco and his studio assistants. The Welsh side of the exhibition was not neglected; there were a number of landscapes by Richard Wilson and eight works by Augustus John, including a self-portrait and portraits of W. H. Davies and Dylan Thomas.

RETROSPECT OF SPORT 1955-56

OLYMPIC GAMES

The Modern Olympic Games were revived in 1896 and meetings have been held as follows:—

I 1896 Athens	VI 1916 Berlin**	XI 1936 Berlin
II 1900 Paris	VII 1920 Antwerp	XII 1940 Tokio, Helsinki**
III 1904 St. Louis	VIII 1924 Paris	XIII 1944 London**
IV 1908 London	IX 1928 Amsterdam	XIV 1948 London
V 1912 Stockholm	X 1932 Los Angeles	XV 1952 Helsinki
		XVI 1956 Melbourne

** The Games of 1916 were allotted to Berlin, but were not held owing to the war. The Games of 1940 were allotted first to Tokio, then in 1938 to Helsinki, but also were not held owing to the war. The Games of 1944 were awarded to London in 1939, but again were not held owing to the war. It is a rule of the Olympic Charter that the cancellation of any Meeting must not alter the numbered sequence.

The venue of each Olympic Meeting is fixed some time ahead by the International Olympic Committee, which has awarded the 1960 Games to Rome.

The 1956 Games took place in Melbourne from Thursday, November 22 to Saturday, December 8, and the programme covered the following sports—Athletics, Basketball, Boxing, Canoeing, Cycling, Fencing, Football, Gymnastics, Hockey, Modern Pentathlon, Rowing, Shooting, Swimming, Water Polo, Weight-lifting, Wrestling and Yachting. The athletics events were staged at the famous Melbourne Cricket Ground, where a special new stand was erected to hold an additional 40,000 spectators, bringing the total seating accommodation up to 120,000. Owing to the stringent rules in Australia governing the quarantine of horses, the Equestrian events were staged in Stockholm, Sweden, in July. The VII Winter Games were held in January-February at Cortina d'Ampezzo, Italy.

BRITISH ATHLETIC RECORDS

British (All-comers') Records are those made by any amateur athlete within the United Kingdom of Great Britain and Northern Ireland. British National records are those made by any British athlete, also within the United Kingdom. Where the latter differ from the former they are given with an asterisk.

Distance	Time h. m. s.	Name	Nation	Year
100 yards	9.6	E. Conwell	U.S.A.	1947
"	9.6	E. McDonald Bailey	Trinidad	1947, 1950 and 1951

Hop, step—K. S. D. Wilmschurst, 51 ft. 2½ in.†
Weight—W. B. L. Palmer, 56 ft. 4 in.†
Discus—M. Pharaoh, 174 ft. 0 in.†
Hammer—P. C. Allday, 195 ft. 7 in.†
Javelin—P. S. Cullen, 233 ft. 6 in.†

† Best ever or equals best ever by an athlete eligible to represent Great Britain in international competition.

GREAT BRITAIN v. HUNGARY

Budapest, September 29 and 30

100 metres—J. Kiss (H.), 10.5 sec.
200 metres—S. Jakabfy (H.), 21.4 sec.
400 metres—F. P. Higgins (G.B.), 47.3 sec.
800 metres—L. Szentgali (H.), 1 min. 51.9 sec.
1,500 metres—L. Rozsavolgyi (H.), 3 min. 41.0 sec.
5,000 metres—C. J. Chataway (G.B.), 13 min. 59.6 sec.
10,000 metres—K. L. Norris (G.B.) 29 min. 56.4 sec.
Steeplechase—J. I. Disley (G.B.), 8 min. 47.6 sec.
110 metres Hurdles—P. B. Hildreth (G.B.), 14.4 sec.
400 metres Hurdles—R. D. Shaw (G.B.), 51.7 sec.
High jump—J. Hagya (H.), 6 ft. 2½ in.
Pole Vault—J. Ward (G.B.), 13 ft. 0½ in.
Long jump—A. R. Cruttenden (G.B.), 24 ft. 3½ in.
Hop, Step—K. S. D. Wilmschurst (G.B.) 49 ft. 10½ in.
Weight—J. A. Savidge (G.B.), 53 ft. 9½ in.
Discus—F. Kilcs (H.), 171 ft. 5 in.
Hammer—J. Csermak (H.), 205 ft. 4½ in.
Javelin—S. Krazsnai (H.), 223 ft. 7½ in.
4 × 100 metres Relay—Hungary (Kiss, Varasdi, Csanyi, Goldovanyi), 40.6 sec.
4 × 400 metres Relay—Great Britain (Kane, Rawson, Salisbury, Higgins), 3 min. 10.9 sec.

Hungary won by 108 points to 104.

Women

100 metres—J. Paul (G.B.), 11.6 sec.
200 metres—J. Paul (G.B.), 23.7 sec.
800 metres—P. Perkins (G.B.), 2 min. 07.3 sec.
80 metres Hurdles—O. Gyarmati (H.), 11.2 sec.
High jump—T. Hopkins (G.B.), 5 ft. 7 in.
Long jump—T. Hopkins (G.B.), 20 ft. 0½ in.
Weight—S. Allday (G.B.), 45 ft. 4 in.
Discus—S. Allday (G.B.), 152 ft. 6½ in.
Javelin—E. Vigh (H.), 172 ft. 10½ in.
4 × 100 metres Relay—Great Britain (Pashley, Paul, Scrivens, Hoskin), 45.2 sec.
3 × 800 metres Relay—Great Britain (Perkins, Wooler, Leather), 6 min. 32.0 sec.

Great Britain won by 70 points to 43.

GREAT BRITAIN v. CZECHOSLOVAKIA

White City Stadium, August 4 and 6.

100 yards—J. R. C. Young (G.B.), 10.0 sec.
220 yards—V. Mandlik (C.), 21.4 sec.
440 yards—F. P. Higgins (G.B.), 48.8 sec.
880 yards—M. Rawson (G.B.), 1 min. 55.0 sec.
Mile—K. Wood (G.B.), 4 min. 03.8 sec.
3 miles—G. D. Ibbotson (G.B.), 13 min. 28.2 sec.
6 miles—F. D. Sando (G.B.), 28 min. 59.4 sec.
Steeplechase—J. I. Disley (G.B.), 8 min. 46.6 sec.
120 yards Hurdles—P. B. Hildreth (G.B.), 14.3 sec.
440 yards Hurdles—P. B. Hildreth (G.B.), 52.9 sec.
High jump—J. Lansky (C.), 6 ft. 5 in.
Pole Vault—S. Stefkovic (C.), 13 ft. 3 in.
Long jump—Z. Prochazka (C.), 24 ft. 2½ in.
Hop, Step—K. S. D. Wilmschurst (G.B.), 51 ft. 2½ in.
Weight—J. Skobla (C.), 56 ft. 4 in.
Discus—M. Pharaoh (G.B.), 198 ft. 1½ in.
Hammer—M. Maca (C.), 194 ft. 0 in.
Javelin—P. S. Cullen (G.B.), 224 ft. 9½ in.
4 × 110 yds. Relay—Great Britain (Young, Sandstrom, Breacker, Shenton), 41.6 sec.
4 × 440 yds. Relay—Great Britain (Higgins, Salisbury, Wheeler, Johnson), 3 min. 13.4 sec.

Great Britain won by 119 points to 93.

Women

100 yards—J. Paul (G.B.), 11.1 sec.
 200 yards—J. Paul (G.B.), 24.4 sec.
 880 yards—P. Perkins (G.B.), 2 min. 14.3 sec.
 80 metres Hurdles—P. Elliott (G.B.), 11.3 sec.
 High Jump—T. Hopkins (G.B.), 5 ft. 5 in.
 Long Jump—S. Hoskin (G.B.), 19 ft. 7½ in.
 Weight—J. Vorobilova (C.), 43 ft. 5½ in.
 Discus—O. Fikotova (C.), 165 ft. 4½ in.
 Javelin—D. Zátopkova (C.), 158 ft. 9½ in.
 4 × 110 yds. Relay—Czechoslovakia, 49.0 sec.
 Great Britain won by 58 points to 46.

A.A.A. CHAMPIONSHIPS

White City Stadium, July 13 and 14, 1956

100 yards—J. R. C. Young (Bishop Vesey's School), 9.9 sec.
 220 yards—B. Shenton (Poly. H.), 21.8 sec.
 440 yards—M. K. V. Wheeler (Bournemouth), 47.7 sec.
 880 yards—M. A. Rawson (Birchfield H.), 1 min. 51.3 sec.
 Mile—K. Wood (Sheffield Utd. H.) 4 min. 06.8 sec.

THE DERBY 1945-1956

For particulars of the Derby from 1780-1945 see 1921-46 editions.

The Distance of the Derby course at Epsom is $1\frac{1}{2}$ mile. Lord Egremont won Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 3; Sir J. Hawley, Teddington (1851), Beadsman (1858), Musjid (1859), and Blue Gown (1868), the 1st Duke of Westminster, Bend Or (1880), Shotover (1882), Ormonde (1885), and Flying Fox (1899). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G. B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780. From 1940 to 1945, substitute Derby was run at Newmarket. By winning his 5th Derby, The Aga Khan equalled Lord Egremont's record. He has also won 2 Oaks.

CRICKET

Cricket is played under the "Laws of Cricket" and is governed by the Committee of the Marylebone Cricket Club (1787), Lord's, N.W.1. Pres.—Rt. Hon. Sir Walter Monckton. Sec., Maj. R. Aird. Asst. Secs., J. G. Dunbar; S. C. Griffith.

County Championships.

The first County Championship was in 1873 when Gloucestershire and Nottinghamshire finished equal on points. Yorkshire have won 22 times; Surrey 14; Notts 8; Lancs 8; Middlesex 5; Kent 4; Gloucester 2; Derby 2; Warwick 2; Glamorgan 1; Notts and Lancs tied in 1879 and 1882, and Notts, Lancs and Surrey were all equal in 1889. Middlesex and Yorkshire tied in 1949 and Lancashire and Surrey tied in 1950.

CONDITIONS.—Win, 12 points; Tie, 6 pts. Points awarded for lead in 1st innings, though losing match, or in drawn game, 4 (2 each if tie in 1st innings). Where there is no play on first two days the match comes under the laws for one-day games, except that a side may not declare its 1st innings closed until it has batted for at least sixty minutes. In such one-day matches without other than 1st innings conclusion, the side leading on 1st innings shall score 8 points.

DECLARATION LAW.—Captains of teams may now declare their innings closed at any time on the first day irrespective of score. This rule—experimental—does not apply to Test Matches where declaration on the first day of a match is not allowed by the Laws of Cricket. This amends the experiment which began in 1946 of allowing a Captain to declare the innings closed on the first day of a County match after the score had reached 300.

Cricket.—Laws, etc., 1956.

Selectors for 1956: G. O. Allen (Chairman); L. E. G. Ames; C. Washbrook; W. Wooller.

Hours of Play.—Northamptonshire's proposal concerning an alteration in the hours of play during a county match was accepted as an experiment. On the second day of a match play might continue until 8.15 p.m. No extra half-hour could be allowed on this second day.

Declarations.—The experimental law allowing a declaration at any time on the first day of a match continued in 1956 and the Australians agreed to this experiment for their matches.

Appeals against the Light.—The counties agreed that for the 1956 season there might be one appeal by the batting side against the light during each session of play. No appeal against the light was allowed in England in 1954 and 1955.

New Ball Law.—The experiment of allowing a new ball after 65 overs have been bowled has now been incorporated into the notes to Law 5 of the cricket rules. A further change in the new ball law was adopted for 1956. A new ball is now available to the fielding side after 200 runs or 75 overs, whichever is the earlier.

1956. Cricket Feats

Firsts.—1,000 runs—D. J. Insole (Essex). 100 wickets—D. J. Shepherd (Glamorgan). 1,000 runs and 100 wickets—G. E. Tribe (Northants). 2,000 runs—T. W. Graveney (Glos.).

Low Scores.—Gloucestershire, 44 v. Australians; Leicestershire, 56 v. Surrey; Middlesex, 59 v. Hampshire; Somerset, 37 v. Hampshire.

Fastest Century.—A. C. Walton (Oxford University) 100 runs in 61 minutes, v. Sussex.

Bowling Feats.—J. C. Laker (Surrey and England). In the fourth Test match at Old Trafford, Laker took 9 Australian first innings wickets for 37 runs.

In Australia's second innings Laker took all 10 wickets for 53 runs. His analysis for the match was 19 wickets for 90 runs. He thus became the first bowler ever to take 19 wickets in any first class match. The previous best total for a Test match was by S. F. Barnes, who took 27 wickets for 159 runs v. South Africa in 1913. Earlier in the season Laker playing for Surrey v. Australia took all 10 wickets for 88 runs.

G. A. R. Lock (Surrey) 10 wickets for 54 runs, v. Kent. K. Smales (Nottinghamshire) 10 wickets for 66 runs, v. Gloucestershire.

County Championship Table, 1956.

County Order for 1956, 1955 in brackets	Played	Won	Lost	Drawn	No dec.	First Innings Lead in Match		Points

Leicestershire (6).....	28	3	12	9	4	1	4	56

The Nottinghamshire record includes eight points for first innings lead in drawn match restricted to last day.

The Derbyshire and Essex records include two points for the first in first innings in drawn match.

Figures in parentheses indicate positions in 1955 table.

Minor Counties Championship, 1956

Winners: Kent II.

Challenge Match.—Kent II beat Northumberland by an innings and 26 runs; Northumberland, 162 and 66; Kent II, 254.

Fielding Statistics

Catches.—Milton, 63; W. S. Surridge, 54; Wilson (J. V.), 49; Lock, 44; Oakman, 42; Richardson (D. W.), 39.

Wicket-Keeping.—Murray, stumped 14, caught 63, total 77; Taylor (B.), 15—60—75; Jordan, 7—56—63; Booth, 19—43—62; Rochford, 15—45—60; Binks, 12—46—58; Harrison, 14—44—58.

Large Attendances and Receipts.

350,534 persons were present at the Third Test between England and Australia at Melbourne in 1937, and the record for one day, 87,798 was also made during this match. Over 158,000 persons watched the England v. Australia match at Leeds in 1948—a record for this country. More money was taken at the Second Test Match between England and Australia at Lord's in 1953 than at any previous cricket match in the world. The total receipts for the five days was £57,716. The attendance was 137,925—not a record. Record receipts for any match in Australia of £38,346 for the 3rd Test Match between Australia and England at Melbourne in January, 1955.

TEST MATCHES

England v. Australia

First played, 1876. Played 173 matches. England have won 62 matches, Australia 70 matches and 41 matches have been drawn.

NOTE.—After Australia's victory at the Oval (Aug. 29, 1882), an epitaph with black-edged border "In affectionate remembrance of English Cricket. . . The body will be cremated and the ashes taken to Australia," appeared in *The Sporting Times* ("The Pink 'Un") of Sept. 2, 1882. Since that year the contest has been colloquially for *The Ashes*.

England v. Australia, 1956

First Test.—(Nottingham, June 7-12). Drawn. England 217 for 8 (dec.), and 188 for 3 (dec.); Australia 148 and 120 for 3.

Second Test.—(Lord's, June 21-26). Australia won by 185 runs. Australia 285 and 257; England 171 and 186.

Third Test.—(Leeds, July 12-17). England won by innings and 42 runs. England 325; Australia 143 and 140.

Fourth Test.—(Manchester, July 26-31). England won by innings and 170 runs. England 459; Australia 84 and 205.

Fifth Test.—(Oval, Aug. 23-28). Drawn. England 247 and 182 for 3 (dec.); Australia 202 and 27 for 5.

Channel Swimmers, 1956

(For Channel Swimmers, 1875-1955, see 1956 and earlier Editions.)

- Jacques Amyot (France)—Griz Nez-St. Margaret's Bay. 13 hr. 3 m. (July).

YACHTING

THE AMERICA'S CUP

The America's Cup, originally a British trophy, was won outright by the U.S. schooner America at Cowes, Isle of Wight on August 22, 1851, and every contest since has been won by the U.S.A. There have been 16 unsuccessful attempts to take the cup out of the United States—14 by Britain and two by Canada.

Shamrock I lost to Columbia, 1899; Shamrock II lost to Columbia, 1901; Shamrock III lost to Reliance, 1903; Shamrock IV lost to Resolute, 1920; Shamrock V lost to Enterprise, 1930; Endeavour lost to Rainbow, 1934; Endeavour II lost to Ranger, 1937. None since.

In July 1956, New York Yacht Club announced that they were taking steps to revive the America's Cup race.

YACHTING, 1956

Edinburgh Cup.—1, Aretusa (M. Pallavicino) Italy; 2, Viking (P. Dyas) Great Britain; 3, Vana (G. Gordon Smith) Great Britain.

Sir Richard Fairey Cup.—1, Ce (J. Hooper).

Dragon Gold Cup.—1, Lil (Denmark.)

Burton Trophy.—1, K. Musto.

Ocean Racing.

Newport-Bermuda Race.—1, Finisterre (Carleton Mitchell), 2 d. 16 hrs.

Torrey-Libson Sailing Race (800 miles).—1, Moyana (England) (corrected time), 126 hr. 21 m. 37 s.; 2, Christian Radich (Norway); 3, Ruyam (Turkey).

THE UNIVERSITY BOAT RACE

(Putney-Mortlake, 4m. 1f. 180 yds)

Year	Winner	m. s.	Won by
1946	Oxford	19 54	3 lengths
1947	Cambridge	23 1	10 lengths
1948	Cambridge	17 50	5 lengths (Record time)
1949	Cambridge	18 57	4 lengths
1950	Cambridge	20 15	3½ lengths
1951	Cambridge	20 50	12 lengths
	(After re-row)		
1952	Oxford	20 23	Canvas (about 10 f.)*
1953	Cambridge	19 54	8 lengths
1954	Oxford	20 23	4½ lengths
1955	Cambridge	19 10	16 lengths
1956	Cambridge	18 36	14 lengths

*This was the closest verdict ever given in the Boat Race except for the dead-heat in 1877.

Cambridge have won 56 times, Oxford 45, and there has been 1 dead-heat.

The margin of Cambridge University's win in 1955 was the second largest in boat-race history, exceeded only by Cambridge's twenty lengths' margin in 1900.

Race Disasters.

1859.—Cambridge sank, Oxford won.

1912.—Cambridge sank at 1 mile, and Oxford shortly after Hammersmith Bridge, Oxford won re-row.

1925.—Oxford sank soon after Hammersmith Bridge and Cambridge paddled home to win.

1951.—Oxford sank after half a mile. Race abandoned because of weather and rowing conditions. Cambridge won the re-row.

CANOEING, 1956

Devizes-Westminster Race (124 miles).—1, Sgt. G. R. Howe and Cpl. J. P. Clarke (Royal Marines), 28 hr. 32 m.; 2, Maj. W. A. MacPherson and Lt. R. Marriott (S.A.S. Regt., T.A.), 30 hr. 41 m.; 3, Tpr. J. Cook and Sgt. G. Twelftree (S.A.S. Regt., T.A.), 33 hr. 3 m. 20 s.

HENLEY REGATTA, 1956

Title holders as in Aug. 1956

Flyweight.—Pascual Perez (Argentine); **Bantamweight.**—Mario D'Agata (Italy); **Featherweight.**—S. Sadler (U.S.A.); **Lightweight.**—J. Brown (U.S.A.); **Welterweight.**—C. Basilio (U.S.A.); **Middleweight.**—R. Robinson (U.S.A.); **Light-Heavyweight.**—A. Moore (U.S.A.); **Heavyweight.**—Title vacant.

BRITISH CHAMPIONS

Flyweight.—D. Dower (Wales); **Bantamweight.**—P. Keenan (England); **Featherweight.**—C. Hill (Scotland); **Lightweight.**—J. Lucy (England); **Welterweight.**—P. Waterman (England); **Middleweight.**—P. McAteer (England); **Light-Heavyweight.**—R. Barton (England); **Heavyweight.**—J. Erskine (England).

BRITISH EMPIRE CHAMPIONS

Title holders in Aug. 1956

Flyweight.—D. Dower (Wales); **Bantamweight.**—P. Keenan (England); **Featherweight.**—H. Bassey (Gold Coast); **Lightweight.**—V. Towee (S. Africa); **Welterweight.**—D. Brown (Australia); **Middleweight.**—P. McAteer (England); **Light-Heavyweight.**—R.

Barton (England); Heavyweight—J. Bygraves (England).

EUROPEAN CHAMPIONS

Title holders in Aug. 1956

Flyweight—Young Martin (Spain); Bantamweight—Mario D'Agata (Italy); Featherweight—F. Galliana (Spain); Lightweight—D. Loi (Italy); Welterweight—(vacant); Middleweight—C. Humez (France); Light-Heavyweight—G. Hecht (Germany); Heavyweight—L. Johansson (Sweden).

SHOOTING—BISLEY, 86th N.R.A., 1956

Queen's Prize.—Major G. E. Twine (late R.A.), 283;

Runner-up, Lt. E. L. Warner (Canada), 282.

Kolapore Challenge Cup.—1, Mother Country,

1,330; 2, Canada, 1,200; 3, Australia, 1,100.

Universities Long Range Match.—1, Oxford University,

1,098; 2, Cambridge University, 1,000; 3, Nottingham University, 262.

Elcho Challenge Shield.—1, England, 1,700; 2,

Scotland, 1,647.

Universities.—Humphrey Cup.—1, Oxford University,

848; 2, Cambridge University, 838.

Universities.—Revolver.—1, Cambridge University,

262; 2, Oxford University, 253.

CYCLING, 1956

WORLD CHAMPIONSHIPS (Copenhagen)

Professional Road Championship (178 miles).—R.

Van Steenberghe (Belgium), 7 h. 26 m. 15 s.

Amateur Road Championship (121 miles).—F. Mahn

(Netherlands), 4 h. 47 m. 54 s.

Motor-paced Championship (62½ miles).—G. French

(Australia), 1 h. 29 m. 37-8 s.

Professional Sprint Championship.—A. Maspes

(Italy).

Professional Pursuit Championship.—G. Messina

(Italy).

National 50 Miles Road Championship.—M. Ward,

1 h. 58 m. 20 s.

National Tandem Championship.—P. Brotherton and

E. Thompson.

British 12 Hour Road Championship.—R. Booty,

265-7 miles.

Bath Road Race (100 miles).—R. Booty, 3 h. 58 m.

28 s. (Note.—R. Booty became the first cyclist

in the world to ride 100 miles in under four

hours.)

Tour de France (2,700 miles).—R. Walkowiak

(Poland), 124 h. at 22-68 m.p.h.

Warsaw-Berlin-Prague Race (1,274 miles).—S.

Krolak (Poland), 59 h. 11 m. 56 s.

Isle of Man Road Race (113½ miles).—E. Baldini

(Italy), 5 h. 5 m. 48 s.

Empire Amateur Race (1,200 miles).—R. Rivière

(France), 47 h. 56 m.

Open Grand Prix (Herne Hill).—R. Harris.

MOTOR CYCLING, 1956

Senior T.T. Isle of Man.—1, J. Surtees (M.V.

Agusta), 2 hr. 44 m. 5-8 s. (96-57 m.p.h.); 2, J.

Hartle (Norton), 2 hr. 45 m. 36-6 s. (95-69

m.p.h.); 3, I. Brett (Norton), 2 hr. 46 m. 54-2 s.

(94-96 m.p.h.).

Junior T.T. Isle of Man.—1, F. Kavanagh (Moto

Guzzi), 2 hr. 57 m. 29 s. (89-29 m.p.h.); 2, D.

Ennett (A.J.S.), 3 hr. 2 m. 7 s. (87-9 m.p.h.);

3, J. Hartle (Norton), 3 hr. 4 m. 48-6 s. (85-75

m.p.h.).

Lightweight T.T. Isle of Man (250 c.c.).—1, C.

Ubbiali (M.V. Agusta), 1 hr. 26 m. 54 s. (67-05

m.p.h.); 2, R. Colombo (M.V. Agusta), 1 hr.

29 m. 2-6 s. (65-43 m.p.h.); 3, H. Baltisberger

(N.S.U.), 1 hr. 29 m. 24-6 s. (65-17 m.p.h.).

Lightweight T.T. Isle of Man (125 c.c.).—1, C.

Ubbiali (M.V. Agusta), 1 hr. 24 m. 16-8 s.

(69-13 m.p.h.); 2, M. Cama (Montesa), 1 hr.

29 m. 19-2 s. (65-24 m.p.h.); 3, F. Gonzales

(Montesa), 1 hr. 35 m. 18-8 s. (61-13 m.p.h.).

Sidecar Event.—1, F. Hillebrand (B.M.W.), 1 hr.

23 m. 12-2 s. (70-03 m.p.h.); 2, P. V. Harris

(Norton), 1 hr. 24 m. 47-9 s. (68-71 m.p.h.);

3, W. G. Boddice (Norton), 1 hr. 26 m. 19-2 s.

(67-05 m.p.h.).

Maxx Senior Grand Prix.—1, J. Buchan (Norton),

2 hr. 29 m. 32-2 s. (90-83 m.p.h.); 2, R. A. Anderson

(Norton), 2 hr. 29 m. 35-4 s. (90-80 m.p.h.);

3, A. Holmes (Norton), 2 hr. 30 m. 49-2 s.

(90-06 m.p.h.).

Motor-Cycle Speedway.—British Match Race

Championship.—B. Church (Wembley).

Speedway Test Matches

England v. Sweden

1st Test. Wembley. Sweden beat England

59-49; 2nd Test. Wimbledon. Sweden beat

England 53-52; 3rd Test. Norwich. England

beat Sweden 66-42.

World Speedway Championship (Wembley)

1. O. Fundin (Sweden), 13 points; 2. R. Moore

(Wimbledon), 12 pts; 3. A. Forrest (Bradford).

11 pts.

MOTOR RACING, 1956

British Grand Prix (Silverstone).—1, J. M. Fangio

(Ferrari), 2 hr. 59 m. 47 s. (98-65 m.p.h.); 2, P.

Collins and Marquis de Portago (Ferrari), 3 hrs.

1 m. 16-2 s. (96-88 m.p.h.); 3, J. Behra (Maserati)

(96-25 m.p.h.).

International Trophy Race (Silverstone) (Formula 1,

180 miles).—1, S. Moss (Vanwall), 60 laps in 1 hr.

44 m. 53 s. (100-47 m.p.h.); 2, Scott-Brown

(Connaught); 3, Titterton (Connaught).

British Empire Trophy (Oulton Park).—1, S. Moss

(Cooper), 49 m. 28 s. (83-72 m.p.h.); 2, C.

Chapman (Lotus), 49 m. 38 s.; 3, R. Salvadori

(Cooper), 49 m. 42 s.

Lavant Cup (Goodwood).—1, R. Salvadori (Cooper),

87-17 m.p.h.; 2, R. Gerard (Cooper); 3, Young

(Connaught).

Richmond Formula 1 Race (Goodwood).—1, S. Moss

(Maserati), 94-35 m.p.h.; 2, R. Salvadori

(Maserati); 3, Leston (Connaught).

Goodwood Trophy.—1, C. A. S. Brooks (Aston

Martin), 88-19 m.p.h.; 2, R. Salvadori (Aston

Martin); 3, R. Flockhart (Jaguar).

Daily Herald Gold Cup Challenge Trophy (Oulton

Park).—1, R. Salvadori (Formula II Cooper-Climax)

1 hr. 19 m. 2 s. (83-84 m.p.h.); 2, C. A. S.

Brooks (Formula II Cooper-Climax) 1 hr. 19 m.

17-2 s.; 3, R. Flockhart (Loyus-Climax) 1 hr.

20 m. 31-6 s.

European Grand Prix.—1, S. Moss (Maserati), 2 hr.

23 m. 41-3 s. (129-7 m.p.h.); 2, P. Collins and

J. M. Fangio (Ferrari), 2 hr. 23 m. 47 s.

World Championship (Final Placings).—1, J. M.

Fangio, 30 pts.; 2, S. Moss, 27 pts.; 3, P. Collins,

25 pts.

Junior Maxx Grand Prix.—1, J. Buchan (Norton),

2 hr. 33 m. 25 s. (88-54 m.p.h.); 2, E. B. Crooks

(Norton), 2 hr. 35 m. 39 s. (87-09 m.p.h.);

3. R. Dowty (Norton), 2 hr. 37 m. 14.6 s. (86.39 m.p.h.).

French Grand Prix.—1, P. Collins (Ferrari), 2 hr. 34 m. 23.4 s. (122.2 m.p.h.); 2, Castellotti (Ferrari), 2 hr. 34 m. 23.7 s.; 3, Behra (Maserati), 2 hr. 35 m. 53.3 s.

Belgian Grand Prix.—1, P. Collins (Ferrari), 2 hr. 40 m. 0.3 s. (118.4 m.p.h.); 2, P. Frere (Ferrari), 2 hr. 41 m. 51.6 s.; 3, H. Schell (Vanwall).

Bari Grand Prix.—1, S. Moss (Maserati), 1 hr. 30 m. 52.4 s. (131.682 kilos.); 2, J. Behra, 1 hr. 33 m. 2.1 s.; 3, C. Perdisa, 1 hr. 33 m. 6.2 s.

Le Mans Grand Prix (24 hours race).—1, N. Sanderson and R. Flockhart (Jaguar), 2,507 miles (104.47 m.p.h.); 2, S. Moss and P. Collins (Aston Martin), 2,497 miles; 3, Gendebien and M. Trintignant (Ferrari), 2,446 miles.

German Grand Prix.—1, J. M. Fangio (Ferrari), 3 hr. 38 m. 43.7 s. (85.6 m.p.h.); 2, S. Moss (Maserati), 3 hr. 39 m. 30.1 s.; 3, J. Behra (Maserati), 3 hr. 46 m. 22 s.

Swedish Grand Prix.—1, M. Trintignant and P. Hill (Ferrari), 6 hr. 33 m. 47.1 s. (94.68 m.p.h.); 2, P. Collins and B. Von Trips (Ferrari), 6 hr. 34 m. 27.6 s.; 3, J. M. Hawthorne, D. Hamilton and Marquis de Portago (Ferrari), 6 hr. 34 m. 36.7 s.

SKATING, 1955-56

ICE SKATING, 1955-56

WORLD FIGURE SKATING CHAMPIONSHIPS (Garmisch-Partenkirchen)

Men's Figure.—1, A. H. Jenkins (U.S.A.) 1972.9 pts.; 2, R. Robertson (U.S.A.) 1962.1 pts.

Ladies' Figure.—1, Miss C. Heiss (U.S.A.) 195.19 pts.; 2, Miss T. Albright (U.S.A.) 194.74 pts.

Pairs.—K. Oppelt and Fr. S. Schwarz (Austria).

EUROPEAN CHAMPIONSHIPS (PARIS)

Men's Figure.—A. Giletti (France) 1,594.4 pts.

Ladies' Figure.—Fr. I. Wendt (Austria) 1,632 pts.

Pairs.—K. Oppelt and Fr. S. Schwarz (Austria).

Duchess of Kent Cup.—Miss A. Pryor.

British Junior Ski Championship.—R. Skepper.

Carzon Cup.—D. W. Connor (Canada).

Army Ski Championship.—2/Lt. C. R. D. Mackintosh (Scots Guards).

OXFORD AND CAMBRIDGE

The first Cricket Match between Oxford and Cambridge was on June 4, 1827, on Lord's Ground; the result was "unfinished." Annual contest started in 1838.

In Rowing, Oxford and Cambridge met in 1829 at Henley (Hambleden Lock to Henley Bridge, 2½ miles), and Oxford won easily in 14 min. 30 sec. The next match was in 1836 from Westminster to Putney, and Cambridge won in 36 min.; but for several years Henley Regatta was used for the match. The first regularly annual race on the tideway was in 1856. Dead-heat was in 1877.

Principal Events and Winners, 1955-56

- WRESTLING.—British Amateur Wrestling Association. *Sec.*, G. Mackenzie, 60 Calabria Road, N.5.

THE CINQUE PORTS

As their name implies the Cinque Ports were originally 5 in number, Hastings, New Romney, Hythe, Dover and Sandwich. They were in existence before the Norman Conquest and were the Anglo-Saxon successors to the Roman system of coast defence organized from the Wash to Spithead to resist Saxon onslaughts. William the Conqueror reconstituted them and granted peculiar jurisdiction, most of which was abolished in 1855. Only jurisdiction in Admiralty still survives.

At some time after the Conquest the "ancient towns" of Winchelsea and Rye were added with equal privileges. The other members of the Confederation, known as Limbs, are:—Lydd, Faversham, Folkestone, Deal Tenterden, Margate and Ramsgate.

The Barons of the Cinque Ports have the ancient privilege of attending the Coronation Ceremony and are allotted special places in Westminster Abbey.

Lord Warden, The Rt. Hon. Sir Winston Churchill, K.G., O.M., C.H., F.R.S., M.P.
Judge, Court of Admiralty, N. L. C. Macaskie, Q.C.
Registrar, James A. Johnson, New Bridge House, Dover.

Chief Officer, E. J. H. Catt.
Glasgow (1873), 201-203 Albion Street, Glasgow.
Chief Officer, W. McCollum.
- SALVATION ARMY, THE.—Founded by General William Booth (b. 1829, d. 1912) in July, 1865, in the East of London. After the work had spread to many English cities under the name of the Christian Mission, it took its present name in 1878 and adopted a military plan of organization, with a uniform and other distinctive features. From the early 'eighties it spread to many parts of the world, and at the death of its Founder was established in 50 countries. Since 1890, following the publication of "In Darkest England and the Way Out," written by the first General, the Salvation Army has added social work of a varied and comprehensive character to the evangelistic work with which it began, and which remains the foundation and principal feature of its activities. In December, 1955, the number of Officers, Cadets and Employees was 49,975. Local Officers, Bandsmen, Songsters and Corps Cadets (unpaid) 237,698, languages used 100, Corps and Outposts 16,831. Social Centres and Agencies 1,791, including 367 Shelters and Cheap Food Depots, 254 Industrial Homes, 81 Employment Bureaux, 5 ex-prisoners' Homes, 300 Homes for Women and Children, 18 Farms, 144 Slum Posts, 838 Day and Industrial Schools, 114 Hospitals, Clinics and Dispensaries, 9 Eventide Homes. Balance-sheets and statements of account relating to the General Funds or to the Social Funds can be obtained, post free, from 113 Queen Victoria Street, E.C.4.—*GENERAL*, Wilfred Kitching, b. 1893; elected General, May 11, 1954; assumed Command July 1, 1954.

ZOOLOGICAL SOCIETY OF SCOTLAND, ROYAL, Corstorphine Road, Edinburgh, 12.—*Sec.*, G. D. Fisher.

THE NATIONAL BUILDINGS RECORD

31 Chester Terrace, N.W.1

Chairman of Advisory Council, Sir James Mann, Hon. V.P.S.A., F.R.A.

Director and Secretary, Walter H. Godfrey, C.B.E., F.S.A., F.R.I.B.A.

The National Buildings Record is an organization established in 1941 under the direction of an Advisory Council. It is supported by an annual grant from the Treasury, and its functions are:

To maintain a library of photographs and measured drawings of English and Welsh architecture which is open to the public for

consultation and study. It is arranged topographically and contains approximately 450,000 items.

To supply copies of photographs where negatives are available. There are approximately 250,000 negatives.

To prepare and acquire additional records which are constantly being added to the library.

To maintain an index of architectural records (photographs, measured drawings, sketches, and engravings) in public and private possession.

FEDERATION OF BRITISH INDUSTRIES F.B.I.

21, Tothill Street, S.W.1.

The Federation of British Industries was founded in 1916, and in 1923 was granted a Royal Charter. In the Charter, the F.B.I. is defined as an association of manufacturers founded for the "encouragement, promotion and protection of British Industries of all kinds."

The Federation has three main functions—to formulate and express policies for British industry as a whole, to supply its individual members with information and practical assistance and to promote activities which benefit industry. It has a subsidiary company, British Overseas Fairs Ltd.

The membership consists of individual firms engaged in productive industry (excluding the nationalized industries) and trade associations. Nearly 7,500 firms are in membership and the Federation's 286 affiliated trade associations collectively represent thousands more.

President, Sir Graham Hayman

Director-General, Sir Norman Kipping.

General Secretary, D. L. Walker, C.B.E.

NATIONAL UNION OF MANUFACTURERS (N.U.M.)

6, Holborn Viaduct, E.C.1.

The National Union of Manufacturers is a national organization representing manufacturing industry. Formed in 1915, its membership (which is restricted to manufacturers) now totals 5,500 individual firms with 72 affiliated trade associations. It is regarded both by Government and by industry as the national representative of medium-sized and smaller firms in particular. It has no party-political affiliations. There are branches in London, Birmingham, Manchester, Liverpool, Nottingham, Sheffield, Leeds, Newcastle, Glasgow and Cardiff.

President, The Lord Rochdale, O.B.E., T.D.

Director, C. F. V. Williams, C.I.E.

BRITISH EMPLOYERS' CONFEDERATION

36 Smith Square, S.W.1.

The British Employers' Confederation was established in 1919. Its membership consists of the national employers' organizations in the various industries which deal with labour questions in those industries and which cover approximately 70 per cent. of the total industrial population employed by private enterprise industry in this country.

President, Sir Colin Anderson.

Director, George Pollock, Q.C.

Secretaries, F. J. C. Honey, C.B.E.; K. J. Burton.

THE COUNCIL OF INDUSTRIAL DESIGN

28 Haymarket, S.W.1.

The Council of Industrial Design, with its Scottish Committee, was set up in December, 1944, by the President of the Board of Trade, "to promote by all practical means the improvement of design in the products of British Industry." For manufacturers, the Council provides advice on the application of design policy, and recommends designers from its Record of Designers. For retailers, it provides courses for buyers and salesmen on design appreciation, and has organised exhibitions in retail stores. For the public it provides selective exhibitions of well designed goods.

The Council maintains a selective, pictorial record of well designed goods in current production known as *Design Review*, which is available for consultation at its headquarters. The Council also maintains a photograph and slide library,

press and information services, and publishes a monthly journal *Design*.

In April, 1956, the Council launched a new venture—The Design Centre for British Industries—a permanent selective exhibition of well designed goods in current production, and the first of its kind to be set up anywhere in the world. Though the exhibition is permanent, the contents change constantly and the main display is supplemented by smaller displays of topical and trade interest. The Design Centre occupies an 8,000 sq. ft. showroom at 28 Haymarket, S.W.1. There is a full information service to put trade buyers in touch with manufacturers or distributors, and the public in touch with retailers.

Chairman, W. J. Worboys, B.Sc., D.Phil.

Chairman of Scottish Committee, Sir Robert A. Maclean.

Director, Sir Gordon Russell, C.B.E., M.C., R.D.I.

Chief Officer, Scottish Committee, Alister Maynard, M.B.E., 95 Bothwell Street, Glasgow, C.2.

THE PRESS COUNCIL

In April, 1947, a Royal Commission was appointed to enquire into the control, management and ownership, etc., of the Press and news agencies and to make recommendations thereon. The Commission, in its report of June, 1949, recommended *inter alia* that a voluntary Press Council be formed.

A constitution ultimately set up provided for the establishment of such a council on July 1, 1953. The objects of the Council were stated in the constitution to be (1) to preserve the established freedom of the British Press; (2) to maintain the character of the British Press in accordance with the highest professional and commercial standards; (3) to keep under review any developments likely to restrict the supply of information of public interest and importance; (4) to promote and encourage methods of recruitment, education and training of journalists; (5) to promote a proper functional relation among all sections of the profession; (6) to promote technical and other research; (7) to study developments in the Press which may tend towards greater concentration or monopoly; (8) to publish periodical reports recording its own work and reviewing from time to time the various developments in the Press and the factors affecting them.

The membership of the Council is composed of 15 editorial representatives (3 national newspaper editors, 2 provincial newspaper editors elected by editors of newspapers in membership of the Newspaper Society, 2 provincial newspaper editors nominated by the Guild of British Newspaper Editors, 1 Scottish newspaper editor, 4 editorial representatives nominated by the National Union of Journalists and 3 editorial representatives nominated by the Institute of Journalists) and 20 managerial representatives (2 nominated by the Newspaper Proprietors Association, 4 nominated by the Newspaper Society, 1 nominated by the Scottish Daily Newspaper Society and 1 nominated by the Scottish Newspaper Proprietors Association).

Chairman, Sir Linton Andrews.

Vice Chairman, A. L. Cranfield.

Members, H. Ainsworth; D. M. Ballantyne; H. Bate; T. Blackburn; K. Brown; W. Emsley Carr; E. M. Clayton; W. T. Curtis-Willson; C. Eade; M. Edmunds; G. R. French; A. J. Gibson; C. Hammett; F. M. Johnston; J. G. Jones; G. Murray; S. McClean; J. L. Palmer; B. Pook; G. Read; J. Sherret; W. Veitch, C.B.E.; R. E. Wilson.

Secretary, Alan Pitt Robbins C.B.E., 1 Bell Yard, Fleet Street, W.C.2.

TRADES UNION CONGRESS (T.U.C.)

23-28 Great Russell Street, W.C.1.

[Museum: 4030]

The Trades Union Congress, founded in 1868, is a voluntary association of Trade Unions the primary purpose of which is to enable the representatives of unions to meet annually to consider matters of common concern to their members. The Congress has met annually since its foundation (with the exception of 1914) and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliation fees are paid. Affiliated unions (in 1955-56) totalled 186 with an aggregate membership of 8,263,741.

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with resolutions from affiliated societies on questions of policy and organization. Although 186 trade union organizations are affiliated to Congress, some of these, especially in cotton, are themselves federal bodies including in total 150 more unions. Only two British unions with large membership are not affiliated to the T.U.C.

One of the important responsibilities of the Annual Congress is to elect a General Council to keep watch on all industrial movements, legislation affecting labour and all matters touching the interest of the Trade Union Movement, with authority to promote common action on general questions, and to assist Trade Unions in the work of organization. The General Council is elected by Congress and is composed of 35 members (33 representing 18 trade groups and two representing women workers). Following is a list of these trade groups with the aggregate membership of unions in each group (the woman membership included in the total being shown separately), and with the number of representatives each group is entitled to have on the General Council:—

Trade Group (with representation)	Membership	
	Total	Women
Mining and Quarrying (3)	718,570	—
Railways (3).....	529,238	28,779
Transport (other) (3)....	1,393,985	156,895
Shipbuilding (1).....	124,836	—
Total	1,443,577	85,323
Metal Trades (2).....	205,552	8,444
Building, Woodworking and Furnishing (2)....	589,442	14,791
Printing and Paper (1)....	317,377	78,347
Cotton (2).....	158,670	112,207
Textiles (other) (1).....	103,953	44,278
Clothing (1).....	177,798	134,568
Leather and Boot and Shoe (1).....	108,308	42,605
Glass, Pottery, Food, Chemicals, etc. (2)....	471,481	200,707
Agriculture (1).....	135,000	7,500
Public Employees (1)....	250,476	78,532
Civil Service (2).....	463,960	149,635
Non-Manual (1).....	259,763	75,226
General Workers (3).....	811,665	165,899

Among the powers vested in it by consent of the Unions in Congress is the responsibility of adjusting disputes and differences between affiliated organizations; such matters being dealt with

by a Disputes Committee of the General Council which investigates matters referred to it and issues its findings thereon, which are invariably accepted by the parties to the dispute. The General Council has power also, if there appears to be justification, to institute an investigation into the conduct of any affiliated organization on the ground that its activities are detrimental to the interests of the Trade Union Movement or contrary to the declared principles and policy of the Congress; but membership of the Congress is voluntary and Unions retain full control of their own affairs, and a penalty of suspension from membership of the Congress or exclusion from membership is the only measure that can be taken to enforce Congress decisions. Through the General Council the Trade Union Movement maintains organic relations with the Government and Government Departments, and with a large number of outside bodies. The principal instrument for Government relations is the National Joint Advisory Council which functions on the Cabinet level; in this body the British Employers' Confederation and the Boards of nationalized industries are represented along with the T.U.C. for purposes of consultation and advice on matters of governmental policy and administration affecting industry. The same bodies, together with the chairmen of the eleven Regional Boards for Industry and representatives of the Federation of British Industries, serve on the National Production Advisory Council on Industry which meets under the chairmanship of the Chancellor of the Exchequer, who is accompanied by Ministers of Departments concerned with aspects of production, to advise the government on production questions. The General Council nominates members to serve on numerous other bodies, e.g. Economic Planning Board, the National Savings Committee, National Insurance Advisory Committee, British Institute of Management, Advisory Council of the Department of Scientific and Industrial Research, Consumers' Councils and numerous educational and miscellaneous bodies. Trades Councils and Federations, which are the local agents of the T.U.C., are registered annually and close contact is maintained with them through a Joint Consultative Committee. There are also a number of national advisory bodies for various groups of industries, including the engineering and shipbuilding trades, the non-manual workers, local Government employees and the nursing profession.

Chairman (1956-57), Sir Thomas Williamson, C.B.E.
General Secretary, Sir Vincent Tewson, C.B.E., M.C.
Assistant General Secretary, George Woodcock, C.B.E.

Assistant Secretary, V. Feather.

SCOTTISH TRADES UNION CONGRESS

12, Woodlands Terrace, Glasgow. C.3.

Chairman (1956-57), F. Donaghy
General Secretary, George Middleton, C.B.E.

The Scottish Trades Union Congress was established in 1897 and it is pointed out that it is in no way a competitor of the British Congress, nor does it "justify its existence on strictly nationalistic lines." Its objects are parallel to those of the T.U.C., with which it works in the closest co-operation.

In 1956 the Congress had 90 affiliated Unions and 46 Trades Councils with a membership of 765,065. The Annual Congress is held in April and a General Council of twelve members is elected.

TRADE UNIONS

A list of the 186 Trades Unions affiliated to the Trades Union Congress in 1955-56. The number of members of each Union is shown in parentheses.

- ACTORS' EQUITY ASSOCIATION, BRITISH (9,238).—**Sec., G. Sandison, 8 Harley Street, W.1.

INDUSTRIAL RESEARCH ASSOCIATIONS

A notable development in modern industry is the growth in numbers and importance of Industrial Research Associations and their increasing influence on the scientific and economic life of the country. The total expenditure of these Associations in 1955 was about £4,600,000 per annum, of which £1,400,000 was provided by the Department of Scientific and Industrial Research and the remainder by subscriptions of individual members.

The Government Scheme for Co-operative Industrial Research was launched by the Department of Scientific and Industrial Research in 1928. Its aim was to stimulate the industries of the United Kingdom to undertake co-operative research as a means of increasing their efficiency.

Research Associations formed under this scheme are registered companies, limited by guarantee of a nominal sum and working without the division of profits in the form of dividends. To assist the formation of such Associations the Board of Trade and the Department of Scientific and Industrial Research have drawn up a model Memorandum and Articles of Association, to which Research Associations under the scheme conform in all essential points.

The income of the Research Associations is derived from subscriptions from their individual members, supplemented in most cases by substantial grants from the Government, through the Department of Scientific and Industrial Research.

The Research Associations are autonomous bodies free to determine their own policy for the development of their research programmes and the use to be made of the results of their research. Membership is open to any British firm in the particular industry, subject to the approval of the Council of the Research Associations.

There are now 39 Research Associations and 8 other co-operative organizations in receipt of grants from the Department. They cover most of the principal industries of the country, as follows:—

Baking.

BRITISH BAKING INDUSTRIES RESEARCH ASSOCIATION, Baking Industries Research Station, Chorleywood, Herts.—*Dir.*, J. B. M. Coppock, Ph.D.

Boots and Shoes.

BRITISH BOOT, SHOE AND ALLIED TRADES RESEARCH ASSOCIATION, Satra House, Rockingham Rd., Kettering.—*Dir.*, H. Bradley, E.B.E.

Cast Iron.

BRITISH CAST IRON RESEARCH ASSOCIATION, Bordesley Hall, Alvechurch, Birmingham.—*Dir.*, Dr. J. G. Pearce, O.B.E.

Ceramics.

BRITISH CERAMIC RESEARCH ASSOCIATION, Queen's Road, Penkhull, Stoke-on-Trent.—*Dir.*, A. T. Green, O.B.E., D.Sc.

Coal.

BRITISH COAL UTILISATION RESEARCH ASSOCIATION, Randalls Rd., Leatherhead, Surrey.—*Dir.*, Gen., D. T. A. Towndend, C.B.E., D.Sc., Ph.D.

Coke.

BRITISH COKE RESEARCH ASSOCIATION, 74 Grosvenor Street, W.1.—*Dir.*, G. W. Lee.

Cotton.

BRITISH COTTON INDUSTRY RESEARCH ASSOCIATION, Shirley Institute, Didsbury, Manchester.—*Dir.*, D. W. Hill D.Sc., Ph.D.

Cutlery

CUTLERY RESEARCH COUNCIL, Hoyle Street, Sheffield, 3.—*Dir.*, C. N. Kingston, M.B.E.

Electrical

BRITISH ELECTRICAL AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, Thorncroft Manor, Dorking Road, Leatherhead, Surrey.

Felt.

BRITISH HAT AND ALLIED FELTMAKERS RESEARCH ASSOCIATION, Stanley House, Manchester Rd., Fairfield, Droydsden, Manchester.—*Dir.*, T. Barr, Ph.D.

Files

FILE RESEARCH COUNCIL, Hoyle Street, Sheffield, 3.—*Dir.*, C. N. Kingston, M.B.E.

Flour.

RESEARCH ASSOCIATION OF BRITISH FLOUR-MILLERS, Cereals Research Station, Old London Road, St. Albans, Herts.—*Dir.*, T. Moran, C.B.E., D.Sc., Ph.D.

Food Manufacturing.

BRITISH FOOD MANUFACTURING INDUSTRIES RESEARCH ASSOCIATION, Randalls Road, Leatherhead, Surrey.—*Dir.*, F. H. Banfield, Ph.D.

Fruit and Vegetable Canning.

FRUIT AND VEGETABLE CANNING AND QUICK FREEZING RESEARCH ASSOCIATION, Chipping Campden, Glos.—*Dir.*, F. Hirst, O.B.E.

Furniture

RESEARCH AND INFORMATION COMMITTEE OF THE FURNITURE DEVELOPMENT COUNCIL, 11 Adelphi Terrace, Robert Street, W.C.2.—*Dir.*, J. C. Pritchard, O.B.E.

Gelatine and Glue.

BRITISH GELATINE AND GLUE RESEARCH ASSOCIATION, 22 Dalmeny Avenue, Holloway, N.7.—*Dir.*, A. G. Ward.

Glass.

BRITISH GLASS INDUSTRY RESEARCH ASSOCIATION, Elmfield, Northumberland Road, Sheffield, 10.—*Dir.*, R. G. Newton, Ph.D.

Heating and Ventilating

HEATING AND VENTILATING RESEARCH COUNCIL, c/o B.C.U.R.A., Randalls Road, Leatherhead, Surrey.—*Dir.*, J. S. Hales.

Hosiery.

HOSIERY AND ALLIED TRADES RESEARCH ASSOCIATION, Thornewood House, 4 First Avenue, Sherwood Rise, Nottingham.—*Dir.*, D. Starkie, Ph.D.

Hydromechanics.

BRITISH HYDROMECHANICS RESEARCH ASSOCIATION, Eastern Industrial Estate, Harlow, Essex.—*Dir.*, L. E. Prosser.

I.C. Engines.

BRITISH INTERNAL COMBUSTION ENGINE RESEARCH ASSOCIATION, 111-112 Buckingham Avenue, Trading Estate, Slough.—*Dir.*, Eng. Rear-Adm. D. J. Hoare, C.B.

Iron and Steel.

BRITISH IRON AND STEEL RESEARCH ASSOCIATION, 11 Park Lane, W.1.—*Dir.*, Sir Charles Goodeve, O.B.E., D.Sc., F.R.S.

Jute.

BRITISH JUTE TRADE RESEARCH ASSOCIATION, Kinnoull Road, Kingsway West, Dundee, Scotland.—*Dir.*, H. Corteen.

Lace.

LACE RESEARCH ASSOCIATION, Glaisdale Drive West, Billborough, Nottingham.—*Dir.*, John C. MacCallum.

Launderers.

BRITISH LAUNDERERS' RESEARCH ASSOCIATION, Hill View Gardens, Hendon, N.W.4.—Dir., J. Leicester.

Leather.

BRITISH LEATHER MANUFACTURERS' RESEARCH ASSOCIATION, Milton Park, Egham, Surrey.—Dir. H. Phillips, D.Sc.

Lime.

CHALK LIME AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, The Hall, Church Street, Welwyn, Herts.—Dir., G. E. Bessey.

Linen.

LINEN INDUSTRY RESEARCH ASSOCIATION, Lambeg, Co. Antrim.—Dir., C. A. Derrett-Smith.

Marine Engineering.

PARSONS AND MARINE ENGINEERING TURBINE RESEARCH AND DEVELOPMENT ASSOCIATION, Farnetrad Research Station, Wallsend, Northumberland.—Dir., T. W. F. Brown, D.Sc.

Motor.

MOTOR INDUSTRY RESEARCH ASSOCIATION, Lindley, nr. Nuneaton, Warwickshire.—Dir., A. Fogg, D.Sc.

Non-Ferrous Metals.

BRITISH NON-FERROUS METALS RESEARCH ASSOCIATION, Euston Street, N.W.1.—Dir., G. L. Bailey, C.B.E.

Paint.

RESEARCH ASSOCIATION OF BRITISH PAINT, COLOUR AND VARNISH MANUFACTURERS, Waldegrave Road, Teddington, Middlesex, Dir., L. A. Jordan, C.B.E., D.Sc.

Paper.

BRITISH PAPER AND BOARD INDUSTRY RESEARCH ASSOCIATION, Welcomes Road, Kenley, Surrey.—Dir., N. R. Hood, Ph.D.

Printing and Packaging.

PRINTING, PACKAGING AND ALLIED TRADES RESEARCH ASSOCIATION, Patra House, Randalls Road, Leatherhead, Surrey.—Dir., G. L. Riddell, Ph.D.

Production Engineering.

PRODUCTION ENGINEERING RESEARCH ASSOCIATION OF GREAT BRITAIN, Staveley Lodge, Melton Mowbray, Leics.—Dir., D. F. Galloway, Ph.D.

Rayon.

BRITISH RAYON RESEARCH ASSOCIATION, Heald Green Laboratories, Wythenshawe, Manchester.—Dir., J. Wilson, M.C.

Rubber.

RESEARCH ASSOCIATION OF BRITISH RUBBER MANUFACTURERS, Shawbury, Shrewsbury, Shropshire.—Dir., J. R. Scott, Ph.D.

Scientific Instruments.

BRITISH SCIENTIFIC INSTRUMENT RESEARCH ASSOCIATION, Southill, Elmstead Woods, Chislehurst, Kent.—Dir., J. Thomson, D.Sc., Ph.D.

Shipbuilding.

BRITISH SHIPBUILDING RESEARCH ASSOCIATION, 5 Chesterfield Gardens, Curzon Street, W.1.—Dir., S. L. Smith, C.B.E., D.Sc.

Springs.

COIL SPRING FEDERATION RESEARCH ORGANISATION, 40 Grosvenor Gardens, S.W.1.—Dir., R. Genders, M.B.E., D.Met.

Steel Castings.

BRITISH STEEL CASTINGS RESEARCH ASSOCIATION, East Bank Road, Sheffield, 2.—Dir., A. H. Sully, Ph.D.

Tar.

COAL TAR RESEARCH ASSOCIATION, Oxford Road, Gomersal, nr. Leeds.—Dir., D. McNeil, Ph.D.

Timber.

RESEARCH AND DEVELOPMENT COMMITTEE OF THE TIMBER DEVELOPMENT ASSOCIATION, 21 College Hill, E.C.4.—Dir., P. O. Reece.

Welding.

BRITISH WELDING RESEARCH ASSOCIATION, 29 Park Crescent, W.1.—Dir., H. G. Taylor, D.Sc.

Whiting.

BRITISH WHITING FEDERATION RESEARCH COUNCIL, The Hall, Welwyn, Herts.—Dir., D. C. Soul (acting).

Wool.

WOOL INDUSTRIES RESEARCH ASSOCIATION, Torridon, Headingley, Leeds, 6.—Dir., A. B. D. Cassie, C.B.E., D.Sc., Ph.D.

AGRICULTURAL RESEARCH INSTITUTES AND UNITS

The following research institutes are under the direct control of the Agricultural Research Council (see p. 361):—

Field Station, Compton, near Newbury, Berks.—*Director*, W. S. Gordon, C.B.E., Ph.D., M.R.C.V.S., F.R.S.E.; Unit of Insect Physiology, Dept. of Zoology, Cambridge.—*Director*, Prof. V. B. Wigglesworth, C.B.E., M.D., F.R.S.; Institute of Animal Physiology, Babraham Hall, Babraham, Cambs.—*Director*, I. de Burgh Daly, M.D., F.R.S.; Animal Breeding Research Organisation, Glenbourne, 6 South Oswald Road, Edinburgh, 9.—*Director*, H. P. Donald, D.Sc., Ph.D., F.R.S.E.; Virus Research Unit, Molteno Institute, Cambridge.—*Director*, K. M. Smith, D.Sc., Ph.D., F.R.S.; Poultry Research Centre, King's Buildings, West Mains Road, Edinburgh, 9.—*Director*, A. W. Greenwood, C.B.E., D.Sc., Ph.D., F.R.S.E.; Potato Storage Investigation, School of Agriculture, University of Nottingham, Sutton Bonington, Loughborough, Leics.—*Officer in Charge*, A. R. Wilson, B.Sc., M.Sc., Ph.D.; Unit of Experimental Agronomy, Department of Agriculture, University of Oxford.—*Hon. Director*, Prof. G. E. Blackman; Unit of Biometrical Genetics, Department of Genetics, University of Birmingham.—*Hon. Director*, Prof. V. M. Maheshwari, D.Sc., F.R.S.; Unit of Biology, Department of Microbiology, T. Unit of Soil Physics, School of Agriculture, Nutrition (Micro-Nutrients), Long Ashton, Bristol.—*Hon. Director*, 1101. A. Wallace, C.B.E., M.C., D.Sc., F.R.S. Unit of Embryology, Univ. College of N. Wales, Bangor.—*Hon. Director*, Prof. F. W. Rogers Brambell, D.Sc., Ph.D., F.R.S.; Unit of Plant Cell Physiology, Department of Agriculture, Oxford.—*Director*, R. Brown, D.Sc., Ph.D., F.R.S.; Plant Growth Substance and Systemic Fungicide Unit, Wye College, Ashford, Kent.—*Hon. Director*, Prof. R. L. Wain, D.Sc., Ph.D.; Unit of Statistics, Marischal College, Aberdeen.—*Director*, D. J. Finney, Sc.D., F.R.S., F.R.S.E.; Unit of Reproductive Physiology and Biochemistry, Molteno Institute, Cambridge.—*Hon. Director*, T. R. R. Mann, M.D., Sc.D., Ph.D., F.R.S.*

GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other important institutes which, while retaining their own individuality, are financed wholly or in the main by grants made by the Agricultural Departments. Most of these Institutes have governing bodies of their own to which they are directly responsible and together they account for much of the agricultural research being carried out in Great Britain. The maintenance grants for Institutes in England and Wales are met from funds voted by Parliament and administered by the Agricultural Research Council; the Scottish Institutes are borne on the vote of the Department of Agriculture for Scotland and these Departments seek the advice of the Agricultural Research Council in the consideration of research programmes and estimates.

The Agricultural Research Institutes have evolved in various ways, in many instances through the sponsorship of members of the agricultural community who desired scientific knowledge in relation to the branch of the industry with which they were concerned, and to one of them, Rothamsted Experimental Station, belongs the distinction of being the oldest agricultural research institute in the world.

(a) Research affecting Plants and Soils

Soil Science and Plant Pathology

Rothamsted Experimental Station, Harpenden, Herts.—*Director*, Sir William Gammie Ogg, M.A., Ph.D., D.D., F.R.S.E.

Macaulay Institute for Soil Research, Craigiebuckler, Aberdeen.—*Director*, D. N. McArthur C.B.E., D.Sc., Ph.D., F.R.I.C., F.R.S.E.

Plant Breeding

Hop Research Centre, Wye College, Ashford, Kent.—*Officer-in-Charge*, H. S. Darling, B.Sc. Plant Breeding Institute, Maris Lane, Trumpington, Cambridge.—*Director*, G. D. H. Bell, Ph.D.

Welsh Plant Breeding Station, Plas Gogerddan, Nr. Aberystwyth.—*Director*, Prof. E. T. Jones, M.Sc.

Scottish Plant Breeding Station, Pentlandsfield, Roslin, Midlothian.—*Director*, J. W. Gregor, D.Sc., Ph.D., F.L.S.

Horticulture

John Innes Horticultural Institution, Bayfordbury, Hertford.—*Director*, K. S. Dodds, D.Sc., Ph.D.

East Malling Research Station, Nr. Maidstone, Kent.—*Director*, F. R. Tubbs, Ph.D.

Agricultural and Horticultural Research Station, Long Ashton, Bristol.—*Director*, Prof. T. Wallace, C.B.E., M.C., D.Sc., F.R.S.

Scottish Horticultural Research Institute, Mylnfield, Invergowrie, Dundee.—*Director*, T. Swarbrick, M.Sc., Ph.D.

Plant Physiology

Research Institute of Plant Physiology, Imperial College of Science and Technology, Prince Consort Road, S.W.7.—*Director*, Professor F. G. Gregory, D.Sc., F.R.S.

Vegetables

National Vegetable Research Station, Wellesbourne, Warwickshire.—*Director*, J. Philip, Ph.D., F.L.S.

Grassland

Grassland Research Institute, Hurley, nr. Maidenhead, Berks.—*Director*, William Davies, D.Sc.

Glasshouse Crops

Glasshouse Crops Research Institute, Worthing Road, Rustington, Littlehampton, Sussex.—*Director*, W. F. Bewley, C.B.E., D.Sc.

Crop Variety Testing, Seed Testing and Seed Production

National Institute of Agricultural Botany, Huntingdon Road, Cambridge.—*Director*, F. R. Horne.

(b) Research affecting Animals

Animal Diseases

Animal Diseases Research Association, Moredun Institute, Gilmerton, Edinburgh, 9.—*Director*, J. T. Stamp, D.Sc., M.R.C.V.S., F.R.S.E. Research Institute (Animal Virus Diseases), Pirbright, Surrey.—*Director*, I. A. Galloway, D.Sc., M.R.C.V.S.

Hill Farming

Hill Farming Research Organisation, 48 Palmerston Place, Edinburgh, 12.—*Director*, A. R. Wannop, O.B.E., F.R.S.E.

Dairying

National Institute for Research in Dairying, Shinfield, Reading, RG2 9AT.—*Professor* H. D. Hill

Hill Farming Research Organisation, 48 Palmerston Place, Edinburgh, 12.—*Director*, A. R. Wannop, O.B.E., F.R.S.E.

Nutrition

Rowett Research Institute, Bucksburn, Aberdeen.—*Director*, D. P. Cuthbertson, M.D., D.Sc., F.R.S.E.

Poultry

Poultry Genetics Research Station, School of Agriculture, Cambridge.—*Director*, M. S. Pease, M.A.

Houghton Poultry Research Station,* Houghton Grange, Huntingdon.—*Director*, R. F. Gordon, D.Sc., M.R.C.V.S.

(c) Research on Agricultural Engineering

National Institute of Agricultural Engineering, West Park, Silsoe, Beds.—*Director*, W. H. Cashmore, C.B.E.

National Institute of Agricultural Engineering, Scottish Station, Howden, Mid-Calder, Midlothian.—*Director*, W. J. West.

* Financed jointly by the Agricultural Research Council and the Animal Health Trust.

EDUCATIONAL TRUSTS

BOEKE TRUST, care of Messrs. Cadbury Brothers, Bourneville, Birmingham. (Applications by individuals for financial assistance not considered.)—*Sec.*, J. P. Bartlett.

CARNEGIE TRUST FOR THE UNIVERSITIES OF SCOTLAND, The Merchants Hall, Hanover Street, Edinburgh.—*Sec. and Treasurer*, J. R. Peddie, C.B.E., D.Litt., F.R.S.E.

CASSEL EDUCATIONAL TRUST, 21 Hassocks Road, Hurstpierpoint, Sussex.—*Sec.*, D. Hardman.

COMMONWEALTH FUND FELLOWSHIPS, Harkness House, 35 Portman Square, W.1.—*Warden*, S. Gorley Putt.

DARTINGTON HALL TRUST, Totnes, Devon.—*Chairman*, L. K. Elmhirst.

EDUCATION AID SOCIETY, 19 Wendover Court, Finchley Road, N.W.2.—*Sec.*, Miss S. M. Levy.

EDUCATION SERVICES, 1 Park Crescent, W.1.—*Hon. Sec.*, J. B. Annand.

FEDERAL EDUCATIONAL AND RESEARCH TRUST, 20 Buckingham Street, W.C.2.—*Hon. Sec.*, J. M. Bowyer.

GILCHRIST EDUCATIONAL TRUST, 1 York Street, W.1.—*Sec.*, S. T. Shovelton, C.B.E., M.A.

KING GEORGE'S JUBILEE TRUST, 166 Piccadilly, W.1.—*Sec.*, Maj.-Gen. T. N. F. Wilson, C.B., D.S.O., M.C.

LORD KITCHENER NATIONAL MEMORIAL FUND, 50 Pall Mall, S.W.1.—*Sec.*, C. G. M. Broom, M.A. Awards annually for university courses 30 to 40 scholarships established to reward long and distinguished service and especially war service, in H.M. Armed Forces. Competition is open to (a) sons of members or ex-members (men or women) of the British Navy, Army or Air Force, aged over 17 and under 20 on 1st January of year of competing, and (b) male applicants aged under 30, who have served in the British Navy, Army or Air Force (National Service not normally a qualification). Administrators also five "Kitchener Medical Services Scholarships," awarded annually for applicants qualified as (a) above, desiring to be trained for commissions in the Medical branches of the Forces. Application forms, available after Jan. 1, are returnable by Feb. 28.

MITCHELL CITY OF LONDON CHARITY AND EDUCATIONAL FOUNDATION, 31 Bedford Row, W.C.1.—*Clerk*, A. E. L. Cox, M.A.

NUFFIELD FOUNDATION, Nuffield Lodge, Regent's Park, N.W.1.—*Dir.*, L. Farrer-Brown.

ROYAL COMMISSION FOR THE EXHIBITION OF 1851, 1 Lowther Gardens, Exhibition Road, S.W.7.—*Sec.*, W. D. Sturch.

SIR RICHARD STAPLEY EDUCATIONAL TRUST, 121 Gloucester Place, Portman Square, W.1.—*Sec.*, Miss Joyce Brown, B.A.

TRUSTEES OF THE LONDON PAROCHIAL CHARITIES, 3 Temple Gardens, E.C.4.

Income 1955, £301,488. Grants made in support of Polytechnics, for the maintenance of City Churches, in the payment of pensions, and for the welfare of the poorer classes of the Metropolis.

Clerk to the Trustees, Sir Donald Allen.

THOMAS WALL TRUST, 1 York Street, W.1.

S. C. WITTING TRUST, Friends House, Euston Road, N.W.1.—*Sec.*, Miss E. M. Faram.

BRITISH STANDARDS INSTITUTION

British Standards House, 2 Park Street, W.1

The British Standards Institution is recognized both by industry and by the Government as the organization responsible for setting up national standards, other than those expressly dealt with by special Acts of Parliament.

The Institution dates from 1901 when the Institutions of Civil, Mechanical and Electrical Engineers together with the Iron and Steel Institute and the Institution of Naval Architects formed a Joint Engineering Standards Committee, which eventually became the British Engineering Standards Association. Between 1923 and 1929 the building, chemical and textile industries joined in the work and the organization was incorporated by Royal Charter under the title of "British Standards Institution."

The subscribing members of the Institution number more than 8,500 organizations and individuals, including public authorities, trade and technical associations, boards of the nationalized industries, commercial firms, individual engineers and architects.

The General Council, which is responsible to the members of the Institution for the conduct of its affairs, is representative of the whole range of British industry and commerce and also includes representatives of the professional engineering institutions, Government departments and the Trade Union Congress.

British Standards are voluntary standards embodying agreed specifications for quality, dimensions, performance and other characteristics of industrial products, methods of test, terms, definitions, and symbols, as well as codes of practice for installation, maintenance, etc., and are prepared by B.S.I. Committees representative of the interests concerned.

President, Sir Roger Duncalf.

Chairman of General Council, Sir Herbert Manzoni, C.B.E.

Director, H. A. R. Binney, C.B.

LOST PROPERTY IN LONDON

PROPERTY LOST ON LONDON TRANSPORT

Enquiries about property left in London Transport Trains, Buses, Trolleybuses, or Green Line Coaches, should be made at the *Lost Property Office of London Transport*, 200-202 Baker Street, N.W.1. Office hours are 10 a.m. to 6 p.m. from Monday to Friday, and 10 a.m. to 1 p.m. on Saturday. The office is not open on Sundays, Good Friday, Christmas Day and Bank Holidays. Enquiries may be made by letter. Articles left in London Transport

vehicles in the country area can be claimed at the nearest London Transport Country Garage within 48 hours.

PROPERTY LOST IN CABS

Enquiries as to property lost in a taxicab should be made at the *Lost Property Office of the Metropolitan Police District*, 109 Lambeth Road, S.E.1. Office hours are 10 a.m. to 4 p.m. (Saturdays, 10 to 1). The office is not open on Sundays, Good Friday, Christmas Day and Bank Holidays.

PRINCIPAL BANKS OPERATING IN THE BRITISH COMMONWEALTH

* Clearing Bankers.

† Army Agents.

London Banking Hours are 10 a.m. to 3 p.m. (Saturdays 9.30 a.m. to 12 noon).

- ALEXANDERS DISCOUNT CO., LTD.** (1810), 24 Lombard St., E.C.3.—Capital, authorized, £2,600,000. Issued, £200,000 in £2 (fully-paid 6 p.c.) Cumulative Preference Shares, £2,400,000 £1 Ordinary Shares, fully paid. Reserves £2,212,000; Deposits, £128,931,901; Dividend, 1955, 6 p.c. Preference Shares, 7½ p.c. Ordinary Shares (= 15 p.c. on former capital).
- ALLAHABAD BANK, LTD.** (1865), Calcutta, India. Affiliated to Chartered Bank of India, Australia and China.—Capital, authorized, Rs. 1,00,00,000. Issued and subscribed—45,000 Ordinary Shares of Rs. 100 each, 16,000 fully paid, 29,000 Rs. 50, paid; 15,000 6 p.c. Preference Shares of Rs. 100 each, fully paid; Reserve Fund, Rs. 1,08,00,000. Dividend for 48 years to December 31, 1955, 12 p.c. and bonus 6 p.c. on Ordinary Shares (free of tax). (81 Branches.)
- THE AMERICAN EXPRESS CO. Inc.** The Subsidiary of American Express Co., New York (1868), 65 Broadway, New York, U.S.A.; 6 Haymarket, S.W.1.—Capital, \$6,000,000 (Shares fully paid).
- ANGLO-FEDERAL BANKING CORPORATION, LTD.**, Capel House, New Broad Street, E.C.2.—Authorized Capital, £2,000,000. Capital Issued and Paid-up £541,875.
- ANGLO-PALESTINE BANK, LTD.** (1902).—Banking Business transferred to Bank Leumi le-Israel B.M., on May 1, 1951.
- ANGLO-PORTUGUESE BANK, LTD.** (1929), 9 Bishops-gate, E.C.2.—Capital, £1,500,000. Issued and fully paid, £1,250,000; Reserve £250,000; Deposits, 31/1/56, £8,754,467.

NATIONAL SAVINGS CERTIFICATES

The amount, including accrued interest, remaining to the credit of investors in National Savings Certificates on March 31, 1956, was approximately £2,397,800,000. In 1955-56 £183,500,000 was subscribed and £162,900,000 (excluding interest) was repaid.

First Issue (the original "War Savings Certificates"). Feb. 21, 1916 to March 31, 1922. 15s. 6d. per unit. Value at end of 10 years, 26s. interest after 10th year at 1d. per completed month per unit.

Second Issue April 1, 1922 to Sept. 29, 1923. 16s. per unit. Value at end of 10 years, 26s. Thereafter as for 1st Issue.

Third Issue Oct. 1, 1923 to June 30, 1932. 16s. per unit. Value at end of 22 years, 33s. Thereafter as for 1st Issue.

Conversion Issue. In 1932 offered to holders of 1st Issue Certificates. 16s. per unit. Value at end of 22 years, 33s. Thereafter as for 1st Issue.

Fourth Issue Aug. 2, 1932 to May 31, 1933. 16s. per unit. Value at end of 20 years, 29s. Interest after 20th year at 2½d. per completed 3 months per unit.

Fifth Issue June 1, 1933 to Feb. 28, 1935. 16s. per unit. Value at end of 21 years, 29s. Interest after 12th year at 4d. per completed 6 months per unit until end of 21st year; then at 2½d. per completed 3 months per unit.

Sixth Issue March 1, 1935 to Nov. 21, 1939. 15s. per unit. Value at end of 22 years, 27s. Interest after 10th year at 3½d. per completed 6 months per unit, until the 22nd year; then at 3d. per completed 3 months per unit.

Certificates of 1st to 6th Issues may be held indefinitely in the absence of further notice.

Seventh Issue Nov. 22, 1939 to March 31, 1947. 15s. per unit. Value at end of 10 years, 20s. 6d. and at end of 22 years, 27s. 6d. Interest after 10th year (when bonus of 6d. is added) at 3½d. per completed 6 months per unit.

£1 Issue Jan. 11, 1943 to March 31, 1947. £1 per unit. Value at end of 10 years, 23s. and at end of 22 years, 27s. Interest after 10th year (when bonus of 6d. is added) at 1d. per completed 3 months per unit.

Certificates of 7th and £1 Issues may be held until 22 years from date of purchase.

Eighth Issue April 1, 1947 to Jan. 31, 1951. 10s. per unit. Value at end of 10 years, 13s. At end of 1st year, 2d. per unit is added. During 2nd and 3rd years interest at 1d. per complete 4 months per unit. Thereafter at 1d. per complete 3 months per unit. May be held for 10 years from the date of purchase and for a further ten years when 1½d. per completed month is added. Value at the end of 20 years, 18s.

Ninth Issue Feb. 1, 1951 to July 31, 1955. 15s. per unit. Value at end of 10 years, 20s. 3d. At end of 1st year 3d. is added per unit; during 2nd year, 4d. per complete 2 months per unit; during 3rd, 4th, 5th, 6th and 7th years 1d. per complete 2 months per unit; thereafter 1½d. per complete 2 months per unit until the end of the 10th year. May be held for 10 years from the date of purchase.

Tenth Issue August 1, 1956. The current issue. 15s. per unit. Value at end of 7 years, 20s. At end of 1st year 4d. per unit is added, during the 2nd year 1d. is added every completed 3 months per unit; during 3rd year 1½d. every completed 3 months per unit, during 4th and 5th years 2d. every completed 3 months per unit; during 6th and 7th years 3d. every completed three months per unit with an extra 6d. added at the end of 7th year.

The normal maximum holding of National Savings Certificates by an individual is 500 units of the ordinary issues up to the Seventh issue, 250 units of the £1 issue, 1,000 units of the Eighth issue, 1,400 units of the Ninth issue and 600 units of the Tenth issue.

Note—Savings Certificates may be bought in denominations of 1, 2, 3, 4, 5, 10, 20, 50 and 100 15s. units.

SAVINGS BANKS

Post Office Savings Bank.—On Dec. 31, 1955, there were approximately 22,253,000 active deposit accounts in the *Post Office Savings Bank*, with the sum of £1,700,029,000 due to depositors. On December 31, 1955, Government Stock and Bonds to the amount of £843,935,000 stood to the credit of holders in the *Post Office Savings Bank* Section of the *Post Office Register*. Any sum from one shilling to £500 may be deposited and interest is allowed at 2½ per cent. per annum. A depositor may have more than one account. There is a limit of £3,000 to the amount which may stand to his credit and he may not deposit more than £500 in the aggregate in any year.

P.O.S.B. DEPOSITS

Dec. 31	E. & W.	Scotland	N. Ireland
	£	£	£
1950 . . .	1,830,244,000	73,359,000	30,729,000
1951 . . .	1,774,749,000	71,406,000	29,765,000
1952 . . .	1,713,786,000	69,694,000	28,819,000
1953 . . .	1,650,431,000	68,261,000	28,138,000
1954 . . .	1,631,848,000	67,819,000	27,713,000

In 1954 the Average Amount due to each Depositor in Active Accounts was £78 8s. 10d.

Trustee Savings Banks were started in the early years of the 19th century by public-spirited men who recognized the importance of individual thrift to the well-being of the community. They are not conducted for private profit, and their sole concern is to offer to the public the best service and the most convenient and remunerative method of saving compatible with sound administration and the greatest possible degree of security. They combine security, which is inseparable from a close connection with the State, with the freedom which can only come from independent management. They are directed by local voluntary Trustees and Managers, whose duties are set out in Acts of Parliament and in Rules certified by the Registrar of Friendly Societies. They are subject to Government supervision, and are also inspected on behalf of the Trustee Savings Banks Inspection Committee, a statutory body which submits an Annual Report to Parliament.

Trustee Savings Banks are full partners in the National Savings Movement, and consequently all deposits in these Banks directly assist the nation's finances.

On Nov. 20, 1955, there were 9,610,272 active accounts in the Trustee Savings Banks. The total assets of the Banks amounted to £1,198,030,729 which comprised £1,053,562,731 due to depositors in the Ordinary and Special Investment Departments, £124,555,317 Stocks and Bonds held for depositors and £19,912,681 representing the accumulated surplus of the individual Trustee Savings Banks throughout the country. Information about these Banks and their offices, number in 1,320 (principal and subordinate) in November, 1955, can be obtained from the *Trustee Savings Bank Association*, Tavistock House South, Tavistock Square, W.C.1. Chairman, Sir Kenneth Stewart, G.B.E.; Secretary, R. T. H. Scott, M.B.E.

Life Assurance and Fire and General Insurance

LIFE ASSURANCE

THE list on the following two pages contains the names of all the more important British Life offices, and of Commonwealth companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked (O) in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter (I).

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended December 31, 1955.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actually compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reinsurance parts of the risks.

EXPENSES.—The expenses of a Life office include in all cases where paid commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 16½%, of which about 5½% is expended on commission and 11% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total pre-

miums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policy holder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is before deduction of Income Tax except where marked (N)—net.

VALUATIONS.—The last columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, the most used being known as the A. 1924-29, H^m, O^m, H^m(⁵) and O^m(⁵)—the latter exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^m and O^m(⁵) tables in conjunction are more stringent than the O^m table alone, the H^m is more stringent than the A. 1924-29 and with every table the lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case of an office which has adopted a Bonus Reserve Valuation.

FIRE INSURANCE RATES

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity 15. 6d.

Household goods therein, usually 2s.

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 2s.

Stock and Utensils in trade fixtures, and household furniture in such shops and warehouses, from 2s.

Most fire insurance companies transact accident (including Motor) and miscellaneous business,

and if a strong company be selected it will probably be found to the advantage of an insurer that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies, previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, etc., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

NOTE.—As insurance is highly technical, particularly where business risks are involved, the advice and assistance of a qualified Insurance Broker can be utilized with considerable advantage.

* NOTE.—The Valuation period is for the 5 years ending in December of the year stated, unless otherwise marked.

A.—Annual Valuation.

Atlas.—Three years ending December 31, 1955.
Beacon.—Three years ending December 31, 1953.
Caledonian.—Three years ending December 31, 1953.
Clerical, Medl. and Genl.—Rates of bonus apply only to Policies effected since 1st Jan. 1946.
Ecclesiastical.—Five years ending February 28, 1954.
Equity and Law.—Three years ending December 31, 1955.
Further revisionary bonus on existing bonus additions.
Ideal Life.—Three years ending December 31, 1953.
Life Association of Scotland.—Three years ending December 31, 1954.
Liverpool Victoria.—Three years ending December 31, 1953.

National Mutual.—Two years ending December 31, 1954.

National Mutual of Australasia.—One year ending Sept. 30, 1955.

National Provident.—Three years ending December 31, 1954.

Pilot.—Guaranteed Bonus.

Pioneer.—One year ending March 31, 1956.

Royal Exchange.—Three years ending December 31, 1954.

Scottish Mutual.—Three years ending December 31, 1955.

Standard.—Three years ending Nov. 15 1955.

Sun Life.—Three years ending December 31, 1954.

United Kingdom.—Three years ending December 31, 1953.

Western Australian.—Five years ending June 30, 1953.

Yorkshire.—Three years ending December 31, 1954.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE

Life assurance may be effected either with or without participation in profits. If with participation then a higher premium is charged and the Policy is entitled to a Bonus, which is a share in the profits made by the Office, as and when declared. Valuations are made by Offices at periods varying from one to five years and the rate of Bonus then

declared is usually in respect of each year since the previous valuation. These Bonuses are normally payable with the Sum Assured for their full amount, but, if desired, they can be applied to reduce the premium or surrendered for a cash payment. If a Policy is effected without participation the Sum Assured only is payable.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100

30	2	9 4	1	16 0	40	3	3 2	2	11 0	60	6	17 1	5	18 11

The next table shows the annual premiums payable throughout life for a policy of £100 payable at death, with and without profits. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation

bonuses, especially in cases of endowment assurance. A without profit Insurance provides the maximum amount of cover at the lowest cost and if an Office, as in some cases, is prepared to allow the option of converting the Insurance at any time to "with" profits either for whole of Life or on the Endowment plan, this gives an attractive contract. The change would, of course, entail a higher premium being paid but under this arrangement the highest cover can be obtained in the early years and the alteration made when the increased cost can be met.

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realization of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-

earning capacity—see first page of Life Assurance.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a "with profit" Policy.

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 at the end of 15, 25 and 35 years, or at death, if previous with

HOW TO ASSIGN A LIFE POLICY

When a Policy is assigned by way of Mortgage, it is better to employ a solicitor; but when the Assignment is absolute, i.e., when a Policy is sold out and out, his services may be dispensed with, provided the Title is clear.

The Assignment may be in the following form to comply with English law, but may be subject to slight variation in other parts of the British Isles:—

I, (name), of (address), in the County of, (occupation), in consideration of the sum of (pounds), paid to me by (name), of (address), in the County of, (occupation), the receipt of which I herewith acknowledge, do hereby, as beneficial owner, assign unto the said, his Executors, Administrators and Assigns, all that Policy of Assurance on my life for £..... effected with the (name of Company), numbered, and dated, and all monies assured by or to become payable thereunder. *And I hereby certify that the above effected does not form part

of a larger transaction, or of a series of transactions, in respect of which the amount or value, or the aggregate amount or value, of the consideration exceeds five hundred pounds.* In witness whereof I have hereunto set my hand and seal this day of, 19....

Signed, sealed and delivered by the above-named, in the presence of—
Name
Address

The document must be stamped by the Inland Revenue Stamp Office.

Notice of the Assignment should be sent, in duplicate, to the Head Office of the Company immediately on execution. The Company is entitled to charge a fee of five shillings for acknowledgment, and will retain one copy and the other will be returned with acceptance of service endorsed thereon.

* This wording should be omitted when not applicable.

Friendly Societies—Great Britain

Acts 1896-1955.

VOLUNTARY (i.e. Not Including State) BUSINESS.

In spite of the expansion of *Compulsory* "Health" insurance since the introduction of the *State* scheme in 1912 and its extension in 1948, the *Voluntary* business of Friendly Societies registered under the Friendly Societies Act, 1896, still continues on a large scale, as shown by the following comparative totals—those in ordinary type relate to registered Friendly Societies proper (embracing both "Centralized" societies and "Orders with Branches"); those in *italics* "Collecting" societies which, although registered under the Friendly Societies Acts, are subject also to the special provisions of the Industrial Assurance Acts:—

End of Year	No. of Societies on Register		Member-ship	Assurances or Policies	Total Funds	
			Thousands		£000's	
1954.....	12,677	107	6,503	33,073	224,325	232,105
1938.....	19,600	149	8,491	25,738	151,613	84,837
1913.....	25,475	71	6,783	7,481	51,489	11,165

During the year 1954, Friendly Societies proper paid out £5,155,000 in Sickness benefit and £1,896,000 in Death benefit, while payments of claims on Death by Collecting societies amounted to £8,051,000.

The membership and funds figures—as at the end of 1954—set out below, indicate the strength of several leading old established societies, including the three largest centenarian Orders which operate through their registered districts and branches, subject to a central body. The first society mentioned which is operated wholly on the "Deposit" system of sickness insurance, has, despite its later establishment, far outstripped all other non-collecting societies in expansion of membership and is indicative of the trend during recent years for many entrants to prefer a cash endowment in old age, e.g. 65, instead of remaining insured for sickness benefit throughout life as was the basis of the older "Accumulating" type of society. There are, however, several systems operated on Individual Account lines (apart from the National Deposit Society's method of a uniform contribution throughout membership), one of which, known as the "Holloway" (the name of the founder of the "Original" society formed at Stroud in 1875), is worked by a contribution increasing with each year of attained age after the member reaches age 30, up to age 65:

FRIENDLY Socs.—Name with (in brackets) Year Established	Membership	Funds (including Reserves)
National Deposit Friendly Society (1868).....	735,000	£22,285,000
Hearst of Oak Benefit Society (1842).....	518,000	17,683,000
Independent Order of Odd Fellows, Manchester Unity (1810).....	509,000	26,386,000
Ancient Order of Foresters (1834).....	358,000	19,333,000
Independent Order of Rechabites, Salford Unity (1835).....	255,000	6,701,000

COLLECTING Socs.—Name and Year Established	No. of Assurances Premium Paying	Free Paid-up	Funds (including Reserves)
Liverpool Victoria Friendly Society (1843).....	12,675,000	4,099,000	£126,185,000
Royal Liver Friendly Society (1850).....	7,922,000	1,755,000	66,288,000
Scottish Legal Life Assurance Society (1852).....	2,867,000	817,000	18,972,000

The present National Insurance scheme with its provision of "cradle to the grave" benefits has had serious repercussions on the Voluntary Friendly Societies. From the end of 1937 to the end of 1947 total membership rose from 8,341,000 to 8,608,000, an increase of 3 per cent., but during the next seven years it fell by 24 per cent. to 6,503,000. There are, however, signs that the decline in membership is now being arrested.

When the modest scheme of 1912 was introduced some people doubted the Voluntary Friendly Societies' ability to survive for long, and yet they continued to grow in the face of keen competition, although their remarkable expansion naturally brought many societies up to a point where they found it increasingly difficult to maintain a sufficient inflow of new, young entrants to replace membership losses due to death and other causes. In recent years, too, many of the older (non-deposit type) societies have had to introduce more attractive tables to cater for the growing

preference amongst members for a curtailed (instead of whole-life) Sickness insurance to enable a margin of contributions to accumulate to their credit as an increasing cash endowment payable in full at age 65, or in the event of prior death, with the option of drawing on the credit from time to time if the member is in need, subject to certain conditions, including the retention of a specified minimum sum in the member's account.

In considering how far the general body of members comprising the Friendly Societies movement can afford to continue their voluntary insurances along with their higher State scheme contributions in future, it must not be overlooked that present-day wage levels are substantially higher for all classes of workers than before the war and the Government has declared that continued Voluntary insurance to supplement State benefits, wherever one's means permit, should be encouraged.

Moreover, in addition to the widespread branch

units of the better known "Orders," there are numerous small independent societies whose membership is maintained more easily than in the large societies, by age-long custom of family and social ties within their own locality, and there still exist a few such societies whose formation dates back far beyond any "Friendly Society" legislation. In fact, long before the term "Friendly Society" came into use, the seeds of Voluntary mutual insurance had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution in order to obtain relief when sick or in old age and a payment to the widow in the event of death. Some of these old Guilds with their distinctive titles still survive, and the present Voluntary Register of Friendly Societies includes several societies which have been in existence for upwards of 200 years, the four earliest all operating in Scotland, the oldest being the "Incorporation of Carters in Leith" established as long ago as 1555. The three oldest in England were all formed in London—the "Norman Society" (estd. 1703): the "Society of Lintot" (estd. 1708) and the "Society for the Mutual Help of Swiss in London" (estd. 1703), the first two of

these having been formed by Huguenot refugees from the Protestant persecution under Louis XIV.

The first Act for the encouragement and protection of "Friendly Societies" in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration of sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

The present consolidating Act of 1896 allows various specific classes other than "Friendly Societies" to be registered thereunder, but exemption from income tax (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

The Friendly Societies Act, 1955, which became law on 21st December 1955, extends the purposes for which societies may be registered under the Acts, including the provision of homes for members and others in old age, and authorizes societies to invest their surplus funds in other registered societies and also in the share and loan capital of housing associations.

Co-operative Societies—Great Britain

Industrial and Provident Societies Acts, 1893-1954

During the 10 years ended 1955 Co-operative Retail Trading Societies (almost all General Supply Stores) expanded their membership by 31 per cent. and assets by 19 per cent. as shown by the following particulars covering the 1,077 societies on the register at the end of 1955 and 1,128 societies in 1945:

Year	Number of Members	Share Capital	Sales	Surplus on Year's Working	Interest on Shares	Dividends on Sales	Total Assets
1955	12,143,000	£000's 238,978	£000's 825,418	£000's 56,348	£000's 6,444	£000's 43,039	£000's 426,360
1945	9,268,000	236,982	356,490	41,612	6,909	31,179	358,820

In addition, 183 Co-operative Wholesale and Productive Trading Societies (with a total membership of 60,000) were on the register at the end of 1955. The total figures for these societies are dominated by those of the two main Wholesale Trading Societies (with their "Joint" undertaking) whose combined sales for 1955 amounted to £504,000,000, their assets at the end of the year totalling £194,000,000.

Building Societies—Great Britain

Acts 1874-1940.

Building Societies are, with few exceptions, associations incorporated with limited liability under the Building Societies Acts. All Building Societies are required to register their rules and file their accounts with the Registrar of Friendly Societies.

The following particulars of Building Societies (as published in the Co-operative Societies Year Book, 1955, respectively tabulated on p. 1118 and above) are based on the Registrar's Annual Reports. The Editor is also indebted to the publishers of the "Building Societies Year Book" for details of individual societies from which the second table hereunder has been compiled.

As indicative of the part played by the Building Societies movement in assisting the vast owner-occupier housing expansion after the 1914-1918 war, Building Societies advanced on mortgage a total of almost £1,600,000,000 during the 21 years 1919-1939.

There was, of course, a considerable decline in mortgage advances during the Second World War but £2,839,000,000 was advanced during the 10 years, 1946 to 1955. The £393,000,000 advanced in 1955 was the highest figure yet recorded in one year.

During 1955, shareholders and depositors added £429,000,000 to their accounts. Withdrawals of capital amounting to £285,000,000 were the highest the societies have ever experienced but nevertheless the amount due to shareholders increased by £196,000,000 during the year. The total assets of building societies reached £2,000,000,000 for the first time in 1955. Of this total, mortgage balances represented 85 per cent, the remainder consisting chiefly of investments in Government securities and cash. Reserves and profit balances represented 4.6 per cent of the total liabilities.

For the year 1955 interest received by societies from borrowers amounted to £77,000,000. Interest payments to shareholders and depositors totalled over £47,000,000. Management costs, at £11,977,000 for 1955 averaged only about 1½d. per £1 of the mean mortgage assets.

The average mortgage interest rate charged by societies is 5-5½ per cent., and the interest rates offered to investors are mainly 3 per cent. on shares and 2½ per cent. on deposits (both tax paid by the societies). Increases in interest rates to 6 per cent on mortgages and 3½ and 3 per cent on shares and deposits respectively were recommended by the Building Societies Association in July, 1956.

NATIONAL INSURANCE AND ASSISTANCE

The three State compulsory insurance schemes in force up to July 5, 1948, financed by contributions from insured workpeople, their employers and the Exchequer, provided the following cash benefits:

Unemployment Insurance.....	Unemployment benefit.
National Health Insurance.....	Sickness and disablement benefits; maternity benefit.
Contributory Pensions.....	Old age and widows' (over 60) pensions; widows' (under 60) pensions; orphans' pensions.

The National Health Insurance scheme also gave medical benefit, and the Health and Pensions schemes made provision for certain classes of voluntary contributors. Other national schemes gave assistance out of State funds, subject to a means test, in three forms—unemployment assistance, non-contributory old age and blind persons' pensions, and supplementary pensions to old age pensioners and to widow pensioners under 60 in receipt of allowances for dependent children. Under the Workmen's Compensation Acts, 1925 to 1945, compensation for industrial accidents and prescribed industrial diseases was payable by employers without contribution by workpeople or the Exchequer. The Public Assistance Authorities remained responsible for the administration of poor relief on a local basis.

These services, except for non-contributory old age pensions, were replaced after the Second World War by schemes of National Insurance and Industrial Injuries Insurance, National Assistance and Family Allowances. The two insurance schemes and the family allowances scheme are administered by the Ministry of Pensions and National Insurance, and the national assistance scheme and non-contributory old age pensions by the National Assistance Board.

The Ministry of National Insurance, which was instituted in November, 1944, under the Ministry of National Insurance Act, 1944, took over the functions of other departments with respect to the existing State schemes and was responsible for their administration until the new insurance schemes came into force. On August 31, 1953, the Ministry of Pensions and the Ministry of National Insurance were merged in a single Ministry of Pensions and National Insurance. Local offices of the Ministry (Pensions and National Insurance Offices) have been established throughout the country.

NATIONAL INSURANCE

The National Insurance Scheme operates under the National Insurance Act, 1946, as amended by the National Insurance Acts of 1949, 1951, 1953, 1954, 1955 and 1956, and the Family Allowances and National Insurance Acts, 1952 and 1956, and Regulations made by the Minister under these Acts.

	Employed Person	Employer of Employed Person	Self-employed Person	Non-employed Person
	s. d.	s. d.	s. d.	s. d.
Men 18 and over.....	6 9	6 0	8 5	6 6
Women 18 and over.....	5 6	4 11	7 2	5 2
Boys under 18.....	3 11	3 6	4 10	3 9
Girls under 18.....	3 3	2 10	4 3	3 1

These rates include, in addition to the National Insurance contributions, contributions to the National Health Service (viz. man 10d., woman 8d., boy or girl 6d.), and, for employed persons, contributions under the Industrial Injuries Acts.

In the case of employed persons over 18 earning 60s. or less per week, the employee's contribution is 4s. 1d. (man) or 3s. 4d. (woman) and the employer's contribution 8s. 8d. (man) or 7s. 1d. (woman). Men aged 70 and over and women aged 65 and over in classes (1) and (2) pay no National Insurance contribution. Men aged 65 to 70 and women aged 60 to 65 in these classes, with certain exceptions, are liable to pay contributions if they have not retired from regular employ-

INSURED PERSONS AND CONTRIBUTIONS

Subject to certain statutory exceptions, every person living in Great Britain who is over school leaving age and under pensionable age becomes insured under the Acts.

There are three classes of insured persons namely:

- Class 1. Employed persons, i.e. persons who work for an employer under a contract of service or are paid apprentices.
- Class 2. Self-employed persons, i.e. persons gainfully occupied but not working under the control of an employer.
- Class 3. Non-employed persons, i.e. persons who are not gainfully occupied.

Regulations made under the Acts give married women and widows, upon certain conditions, the choice whether to pay contributions or not.

The estimated number of persons in respect of whom contributions were payable in 1954 was as follows: employed, 21.8 million; self-employed, 1.4 million; non-employed, 0.5 million.

Contributions are payable by insured persons, by employers of employed persons, and out of moneys provided by Parliament. The normal weekly rates of contribution for the three classes of insured persons and for employers of employed persons are shown below:

Normally no contributions are payable by men over 65 or women over 60 in class (3). Increases in contribution rates as provided in the Act of 1946 took effect in October, 1951, and further increases laid down in the Act of 1952 became payable on October 6, 1952. The contribution rates shown above, which include the increases laid down in the Act of 1954, became payable as from June 6, 1955.

Regulations state the cases in which insured persons may be exempted from paying National Insurance contributions, and the conditions upon which contributions are credited to persons who are exempted.

Normally contributions are paid by means of

stamps on a single insurance card; in the case of employed persons the stamp also covers the Industrial Injuries contribution.

The Exchequer contribution comprises (a) a supplementary payment ("the Exchequer supplement") in respect of each contribution paid by an insured person or employer, and (b) additional

sums paid into the National Insurance Fund, viz., for the period of five years beginning with April 1, 1955, sums not exceeding a total of £225 million, and, for later years, such sums as Parliament may determine. As from June 6, 1955, the amounts of the Exchequer Supplement to contributions are as follows:—

Person by or in respect of whom contribution is paid	For contribution as employed person	For employer's contribution	For contribution as self-employed person	For contribution as non-employed person
	s. d.	s. d.	s. d.	s. d.
Men over age 18.....	11	11	2 6	1 10
Women over age 18.....	9	9	2 2	1 6
Boys under age 18.....	6	6	1 5½	1 1
Girls under age 18.....	5	5	1 3	10½

BENEFITS

The Acts give the following benefits:

Unemployment benefit.

Sickness benefit.

Maternity benefit, including maternity grant, home confinement grant and maternity allowance.

Widow's benefit, including widow's allowance, widowed mother's allowance and widow's pension.

Guardian's allowance.

Retirement pension.

Death grant.

The benefits available to the various classes of insured persons are as follow:

Employed persons....	All benefits.
Self-employed persons.	All benefits <i>except</i> unemployment benefit.
Non-employed persons	All benefits <i>except</i> unemployment and sickness benefits and maternity allowance.

There is one system of adjudication on all claims for benefit under the Acts; with certain exceptions, questions as to the right to benefit are decided by independent statutory authorities, consisting of insurance officers, local tribunals and the Commissioner and Deputy Commissioners.

UNEMPLOYMENT BENEFIT

The standard weekly rates of benefits from May 19, 1955, are as follows:

	s.	d.
Man, single woman or widow over 18...	40	0
Married woman over 18: ordinary rate	30	0
If maintaining an invalid husband, or not living with and unable to obtain any financial assistance from her husband...	40	0
Person under 18 (other than a married woman): ordinary rate.....	23	0
If entitled to an increase of benefit in respect of a child or adult dependant.	40	0
Married women under 18: ordinary rate.	23	0
If entitled to an increase of benefit in respect of a child or adult dependant...	30	0
If supporting an invalid husband, or if entitled to an increase of benefit in respect of a child or adult dependant: other than her husband and not residing with and unable to obtain any financial assistance from her husband.....	40	0
Increase of benefit for only child or elder or eldest child (where payable).....	11	6
Increase of benefit for each additional child (where payable).....	3	6
Increase of benefit for adult dependant (where payable).....	25	0

Normal Contribution Conditions.—The claimant must have paid 26 Class 1 contributions since July 5, 1948, and, to be entitled to benefit at the standard rate during a benefit year, must have paid or had credited 50 Class 1 contributions during the preceding contribution year.

Waiting Period.—Benefit is not payable for the first three days of a spell of unemployment or sickness unless the claimant has twelve days or more of unemployment or sickness within a period of 13 weeks beginning with the first of these days. Odd days of unemployment or sickness count for benefit only where any two or more of them fall within a period of six consecutive days, excluding Sundays, and such spells of two or more days are treated as "linked up" if not separated by more than 13 weeks.

Duration of Benefit.—A claimant can draw in respect of any period of interruption of employment 180 days of unemployment benefit, together with additional days of benefit, assessed on his record of contributions and benefit.

Requalification for Benefit.—A person who has exhausted his standard benefit, including any additional days, requalifies therefor when he has paid 13 Class 1 contributions.

Disqualifications.—As in the former scheme, there are disqualifications for receiving benefit, e.g. for a period not exceeding six weeks if a person has lost his employment through his misconduct, or has voluntarily left his employment without just cause, or has, without good cause, refused an offer of suitable employment.

Numbers Unemployed.—During the year 1955 the average number of persons registered as unemployed in Great Britain was 232,200. At the end of 1954, about 148,000 persons were receiving unemployment benefit.

SICKNESS BENEFIT

Standard Rates of Benefit.—Same as for unemployment benefit, except that the ordinary rate for a married woman over 18, and the rate for a married woman under 18 if entitled to an increase of benefit in respect of a child or adult dependant, is 25s. instead of 30s.

Normal Contribution Conditions.—Same as for unemployment benefit, except that Class 2 as well as Class 1 contributions are counted.

Waiting Period.—Same as for unemployment benefit. Days of sickness are "linked up" with days of unemployment falling within the same period of 13 weeks.

Duration of Benefit.—A person who has paid 156 Class 1 or Class 2 contributions receives sickness benefit of unlimited duration. If he has paid less than 156 such contributions, benefit is limited to 312 days (one year); but he will requalify for

benefit when he has paid contributions for 13 weeks.

Disqualifications.—Regulations provide for disqualifying a person for receiving sickness benefit for a period not exceeding six weeks if he has become incapable of work through his own misconduct, or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or if he acts in a way which would retard his recovery.

Number of Claims.—During 1954, 7,173,000 new claims for sickness benefit were received. The number of insured persons incapacitated owing to sickness varied during the year from about 805,000 in August to 1,107,000 in February.

MATERNITY BENEFIT

The National Insurance Act, 1953, made changes as from October 26, 1953, in the structure and the amount of maternity benefits provided by the principal Act. Increases in the benefits under the Act of 1954 took effect as from May 16, 1955.

Maternity Grant.—A cash grant of £10 is payable on the mother's own insurance or on her husband's. Extra grants are payable, in certain circumstances, if more than one child is born. The normal contribution conditions for this grant are (i) that the mother or her husband has paid not less than 26 contributions of any class since his or her entry into insurance, and (ii) that not less than 26 contributions of any class have been paid by or credited to that person during the previous contribution year, or the mother has satisfied the contribution conditions for a maternity allowance at the standard rate or at a reduced rate.

Home Confinement Grant.—An additional grant of £4 is payable to women who are confined at home or elsewhere at their own expense.

Maternity Allowance.—A woman who is gainfully occupied receives in addition a maternity allowance of 40s. a week normally for 18 weeks beginning eleven weeks before the expected week of confinement, provided that she abstains from work. The rate of allowance is increased where the woman has dependants. The normal contribution conditions for this benefit are (i) that the claimant has paid or had credited 50 Class 1 or 2 contributions during the 52 weeks ending 13 weeks before the expected week of confinement; and (ii) that in the same 52 weeks at least 26 Class 1 or 2 contributions have been paid.

During 1954, maternity grants were paid for about 750,000 births; in addition, the home confinement grant was paid in 290,000 cases, and about 190,000 women received weekly maternity allowances under either the old or the new provisions.

WIDOW'S BENEFIT

This benefit in any of its three forms is payable to the widow of any class of insured person. The normal contribution conditions to be satisfied by the husband are (a) that he had paid not less than 156 contributions of any class since his last entry into insurance (104 if he was married before July 5, 1948, and insured from before September 30, 1946), and (b) that the yearly average of the contributions paid by or credited to him since his insurance started was not less than 50. Increases in this benefit under the Act of 1954 became payable as from April 25, 1955. The Family Allowances and National Insurance Act, 1956, provided for an increase, as from October 2, 1956, in the weekly rate of widow's allowance and widowed mother's allowance in respect of each qualifying child; and this enactment and the National Insurance Act, 1956, made a number of other changes in the widowhood provisions of the National insurance scheme.

Widow's Allowance.—A woman who at her husband's death is under 60, or, if the husband had not qualified for a retirement pension, is over 60, receives (during the first 13 weeks of widowhood) a cash allowance usually of 55s. a week, with an increase of 16s. 6d. for the first or only child and 8s. 6d. for each other child.

Widowed Mother's Allowance.—When the 13 weeks of widow's allowance have elapsed, a widow who is left with one or more children within the age limits laid down in the Family Allowances and National Insurance Act, 1956, receives a cash allowance usually of 56s. 6d. a week so long as she has a child of qualifying age, and in addition 8s. 6d. a week for each child other than the first. A widow who is pregnant by her late husband qualifies for a 40s. widowed mother's allowance for the duration of the pregnancy.

Widow's Pension.—A widow under pensionable age receives a widow's pension usually of 40s. a week (i) when widow's allowance ends, if she was over 50 at the time of her husband's death and had been married for not less than three years; or, (ii) when her widowed mother's allowance comes to an end, if she is then over 50 (40 if widowed before August 21, 1956) and not less than three years have elapsed since marriage.

Widow's benefit of any form ceases upon remarriage. A 40s. widow's pension is reduced by sixpence for each shilling of any net earnings in excess of 50s. and a further sixpence for each shilling of net earnings in excess of 70s. A widowed mother's allowance is reduced by sixpence for each shilling of any net earnings in excess of 60s. and a further sixpence for each shilling of net earnings in excess of 80s.; but an allowance payable by virtue of the widow's having a family must not be reduced for any week to less than 16s. 6d. plus any increase in respect of any child of the family after the first.

If a woman, who was married before July 5, 1948, to a man insured under the old scheme immediately before that date does not qualify for widow's benefit under the new scheme, she may qualify for a widow's basic pension, usually of 10s. a week.

At the end of 1954, about 440,000 widows were receiving widowed mother's allowance, widow's pension or widow's 10s. pension, and in addition about 20,000 widow's allowances were in payment.

GUARDIAN'S ALLOWANCE

Where the parents (including step-parents) of a child are dead, and one at least of them was an insured person, any person who has the child in his family receives a guardian's allowance of 18s. 6d. a week while the child is of school age. The increase in this benefit under the Act of 1954 took effect as from April 25, 1955. At the end of 1954, 5,700 allowances were being paid.

RETIREMENT PENSIONS

A retirement pension is payable for life to an insured person who (a) is over pensionable age (65 for a man and 60 for a woman), (b) has retired from regular employment, and (c) has paid the prescribed number of contributions. Men aged 70 and over and women aged 65 and over are not required to satisfy condition (b).

The basic rate of pension as from April 25, 1955 (under the Act of 1954) is 40s. a week, plus 25s. for a dependent wife under 60, plus 11s. 6d. for the first or only child and 3s. 6d. for each other child.

Where the insured person postpones retirement beyond pensionable age, the weekly rate of pension is increased, when he or she finally retires or reaches

the age of 70 (65 for women), in respect of contributions paid as an employed or self-employed person during the five years after reaching pensionable age. The increment to pension is 1s. for every 25 contributions paid before July 16, 1951, and 1s. 6d. for every 25 contributions paid after that date.

A man aged 65 to 70 (or a woman aged 60 to 65) who has qualified for pension will have it reduced by sixpence for each shilling of net earnings in excess of 50s. and a further sixpence for each shilling of net earnings in excess of 70s.

The Normal Contribution Conditions for persons who entered insurance before September 30, 1946, are (a) that 104 contributions of any class have been paid, and (b) that the yearly average of contributions paid or credited is not less than 50.

Special Provisions as to Women.—Subject to certain conditions, a married woman on reaching 60 or a woman on marriage after that age receives by virtue of her husband's insurance a retirement pension of 25s. a week. A widow over the age of 60 when her husband dies will usually qualify for a retirement pension of 40s. a week from her husband's insurance instead of a widow's pension. A retirement pension payable to a woman by virtue of her husband's insurance is increased by 1s. for every 25 contributions paid by the husband as an employed or self-employed person while he is over 65 and under 70 and she is over 60, but if he should die before her, any 1s. increase he earns for her after July 16, 1951, will then be paid at the 1s. 6d. rate. The pension of a woman under 65 is reduced by sixpence for each shilling of net earnings in excess of 50s. and a further sixpence for each shilling of net earnings in excess of 70s.

Special provisions apply to persons who enter insurance late in life. For persons who entered before September 30, 1946, the qualifying insurance period is five years, and, for persons who entered on or after that date, ten years.

Unemployment and sickness benefit is payable (at rates not exceeding the retirement pension) to men between 65 and 70 and women between 60 and 65 who have not retired from regular employment if they would have been entitled to a retirement pension had they been retired from regular employment.

At the end of 1954, retirement pensions, or contributory old age pensions under the old Acts, were being paid to approximately 4,436,000 persons.

DEATH GRANT

A death grant is paid for expenses in connection with the death of an insured person or of his wife, child or widow or, if the insured person is a woman, of her husband, child or widower. The normal grant is for an adult £20, a child aged 6-17 £15, a child aged 3-5 £10, a child under 3 £6. For the deaths of people who on July 5, 1948, were over 55 (men) or over 50 (women) the grant is £12.

The normal contribution conditions for death grant are that (a) not less than 26 contributions of any class have been paid by or credited to the deceased or the person by virtue of whose insurance the grant is claimed since July 5, 1948, and (b) either not less than 45 contributions have been paid by or credited to him in the previous contribution year, or the yearly average of the contributions paid or credited since July 5, 1948 (or 16th birthday 1. later) is not less than 45. Not more than one person is entitled to a death grant in respect of the same death. No grant is payable for deaths of persons already over pension age on July 5, 1948, or of children born before July 5, 1948, if they die under the age of 10.

FINANCE

Under the Act of 1946 two funds are set up, viz. the National Insurance Fund, and the National Insurance (Reserve) Fund. The income from contributions, Exchequer grants and interest from both funds are paid into the National Insurance Fund, and the payments to be made out of the Fund include, in addition to the cost of benefits and administration, a contribution to the National Health Service. At the outset of the new scheme, the assets of the existing National Health, Contributory Pensions and Unemployment Insurance Funds, with a total value of about £786 millions, were carried to the Reserve Fund, and £100 millions were transferred from it to the National Insurance Fund, the remaining assets being maintained as a reserve for the National Insurance Fund.

Approximate receipts and payments of the National Insurance Fund for the year ended March 31, 1955, were as follows:—

Receipts		£'000
Balance, April 1, 1954.....		336,147
Contributions from employers and insured persons.....		489,324
Exchequer supplement.....		71,000
Income from investments.....		8,403
Transfer from the Reserve Fund of income from investments, etc.....		43,192
Other receipts.....		91
		<hr/> 948,157
Payments		£'000
Benefit:—		
Unemployment benefit.....	15,662	
Sickness benefit.....	84,456	
Maternity benefit.....	13,000	
Widow's benefit.....	32,000	
Guardian's allowance.....	330	
Retirement pension.....	348,112	
Death grant.....	3,043	
		<hr/> 446,603
Contribution to the National Health Service.....		40,289
Administration expenses.....		26,570
Other payments.....		3,626
Balance, March 31, 1955.....		381,069
		<hr/> 948,157

As compared with the previous year, the surplus of receipts over payments rose by £8.8 million, receipts increasing by £17.2 million and payments by £8.4 million. Contributions by employers and insured persons accounted for £8.8 million of the increase in receipts. The increase in payments was mainly on retirement pensions, which accounted for £14.0 million more than in 1953-54. The cost of unemployment benefit was £6.5 million less than in the previous year.

The balance in the Reserve Fund at March 31, 1955, was £1,068.6 million, as compared with £1,068.5 million at March 31, 1954. Since the end of 1954-55, a sum of £100 million has been transferred from the National Insurance Fund to the Reserve Fund.

The Government Actuary has estimated that the excess of expenditure over income of the National Insurance Fund, with benefits and contributions as increased by the 1954 Act, will rise to £145 millions in 1959-60, £295 million in 1969-70, and £424 million in 1979-80.

INDUSTRIAL INJURIES INSURANCE

The National Insurance (Industrial Injuries) Act, 1946, substituted for the Workmen's Compensation Acts, 1925 to 1945, a system of insurance against

personal injury caused by accident arising out of and in the course of a person's employment and against prescribed diseases and injuries due to the nature of a person's employment. The scheme, which insures against personal injury caused and prescribed diseases and injuries developed on or after July 5, 1948, operates under the Act of 1946, as amended by the National Insurance (Industrial Injuries) Acts, 1948 and 1953, the National Insurance Acts, 1951 and 1954, and the Family Allowances and National Insurance Acts, 1952 and 1956, and Regulations made by the Minister under those Acts.

The Workmen's Compensation Acts, including the Workmen's Compensation (Temporary Increases) Act, 1943 (which is now made permanent) continue to apply, subject to certain amendments to cases arising before the new scheme started.

The Workmen's Compensation (Supplementation) Scheme, 1951, which came into operation on July 11, 1951, provides for the payment out of the Industrial Injuries Fund of allowances supplementing workmen's compensation where the accident or disease happened before 1924.

The Pneumoconiosis and Byssinosis Benefit Scheme, 1952, provides for payment of benefits out of the Industrial Injuries Fund for those totally disabled by pneumoconiosis or byssinosis, and for dependants of those who died from one of those diseases, after December 31, 1949, if they are not covered by either the Workmen's Compensation Acts or the Industrial Injuries Acts. This Scheme was extended by the Amendment Scheme, 1954, to cases of partial disablement as a result of either disease.

The Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, provides for payment of benefit out of the Industrial Injuries Fund to or in respect of certain persons who are disabled or die or have died after December 31, 1949, as a result of certain malignant and other diseases due to occupational exposure to carcinogens, in cases where neither workmen's compensation nor benefit under the Industrial Injuries Act is payable.

As from August 28, 1956, under the Workmen's Compensation and Benefit (Supplementation) Act, 1956, a supplementary benefit of 17s. 6d. a week will become payable out of the Industrial Injuries Fund to the classes of totally disabled persons mentioned in the Act who are receiving workmen's compensation.

INSURED PERSONS

The persons covered by the Industrial Injuries scheme correspond closely to the class of "employed persons" under the National Insurance Act, 1946 (excluding members of the Forces), and numbered in 1954 about 21 million, of whom approximately one-third were women.

CONTRIBUTIONS

Contributions are payable by insured persons and their employers, unless exempted, and the Exchequer contributes an amount equal to one-fifth of the combined contributions of insured persons and employers.

The normal weekly rates of contributions payable by insured persons and employers respectively are 5d. and 6d. for men over 18, 3d. and 4d. for women over 18, 3d. and 3d. for boys under 18, and 2d. and 2d. for girls under 18. Normally contributions are paid by means of stamps on a single insurance card, the same stamp covering insurance under the National Insurance Act as well as Industrial Injuries Insurance.

There are no contribution conditions for the payment of benefits. Persons employed in insurable employment are covered from the time

of starting work, but if employed while of school age pay no contributions.

BENEFITS

The main types of benefit are (i) injury benefit, (ii) disablement benefit, and (iii) death benefit.

Injury benefit is payable for not more than the first 26 weeks of incapacity; no payment is made for the first three days unless there are a further nine days of incapacity within the injury benefit period. Benefit is payable to persons over 18 and to juveniles with dependant's allowances, at the weekly rate of 67s. 6d. (days being paid for at one-sixth of the weekly rate), plus 25s. for one adult dependant, plus 11s. 6d. for the first or only child and 3s. 6d. for each other child. Juveniles not entitled to a child or adult dependant's allowance receive benefit at half the adult rate if under 17 and at three-quarters the adult rate if 17 and under 18.

Disablement Benefit is payable if at or after the end of the injury benefit period the insured person suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than one per cent. The amount of disablement benefit varies according to the degree of disablement (in the form of a percentage) assessed by a medical board or medical appeal tribunal by reference to the claimant's disabilities (incurred as a result of the loss of faculty) as compared with a normal person of the same age and sex. In cases of disablement of 1 per cent. and below 20 per cent., benefit normally takes the form of a *gratuity* paid according to a prescribed scale, but not exceeding £225. Where the degree of disablement is 20 per cent. or more, the benefit is a weekly *pension* payable either for a limited period or for life according to the following scale:

Degree of disablement	Weekly Rate
	s. d.
100 per cent	67 6
90 " "	60 9
80 " "	54 0
70 " "	47 3
60 " "	40 6
50 " "	33 9
40 " "	27 0
30 " "	20 3
20 " "	13 6

These are basic rates applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive one-half the adult rate if under 17, and three-quarters of the adult rate if between 17 and 18.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. Upon prescribed conditions, however, pension is supplemented for unemployment and in cases of special hardship. There is provision also for increases of pension during approved hospital treatment or if the pensioner requires constant attendance. An increase of 25s. for an adult dependant and of 11s. 6d. for the first or only child and 3s. 6d. for each other child is also payable where the pensioner is either entitled to an unemployment supplement or receiving approved hospital treatment. Subject to certain exceptions, a pensioner who is not in receipt of unemployment supplement can draw other national insurance benefits in full in addition to disablement pension.

Death Benefit, in the form of a pension, a gratuity or a weekly allowance for a limited period, payable to dependants in fatal cases, depends in amount upon their relationship to the deceased and their circumstances at the time of death, and not upon the deceased's earnings.

Increases in the rates and amounts of Industrial Injuries benefits laid down in A

took effect in the case of death benefit on April 25, 1955, and in the case of other benefits on May 19, 1955. The Family Allowances and National Insurance Act, 1956, provides, as from October 2, 1956, for an increase of 5s. in the child's allowance payable to a widow for each qualifying child.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of the former, that of submitting to medical examination and treatment and attending vocational training courses or industrial rehabilitation courses provided under the Disabled Persons (Employment) Act, 1944.

Industrial Diseases, etc.—The Act of 1946 extends insurance to prescribed industrial diseases and prescribed personal injuries not caused by accident, which are due to the nature of an insured person's employment and developed on or after July 5, 1948.

Determination of Questions and Claims.—Provision is made for the determination of certain questions (e.g., as to insurability and liability to contribute) by the Minister, and of "disablement questions" by a medical board (or a single doctor) or medical appeal tribunal. Claims for benefit and certain questions arising in connection with a claim for or award of benefit (e.g., whether the accident arose out of and in the course of the employment) are determined by an insurance officer appointed by the Minister, or a local appeal tribunal consisting of a chairman appointed by the Minister and equal numbers of members representing employers and insured persons, or, on appeal, by the Commissioner.

About three-quarters of a million awards of injury benefit are made each year. The number of awards of disablement benefit has increased year by year. The number of disablement pensions in payment rose during the twelve months ended October 31, 1954, from 106,000 to 115,000; of those in payment at the end of the period 28,000 were in respect of pneumoconiosis. The annual number of awards of death benefit slightly exceeds 2,000.

FINANCE

Contributions from employers, insured persons and the Exchequer are paid into, and benefits and administrative expenses are paid out of, a fund established under the Act of 1946, viz., the Industrial Injuries Fund.

The approximate receipts and payments of the Fund for the year ended March 31, 1955, were as follows:—

Receipts	£'000
Balance, April 1, 1954.....	108,834
Contributions from employers and insured persons.....	33,373
Exchequer contribution.....	6,700
Income from investments.....	4,198
Other receipts.....	3
	153,109

Payments	£'000
Benefit:—	
Injury.....	10,551
Disablement (a).....	13,175
Death (a).....	1,180
Other benefits (b).....	632
	25,538

Administration expenses.....	4,448
Other payments.....	21
Balance, March 31, 1955.....	123,102

153,109

(a) The division has been estimated.

(b) Allowances paid under the Workmen's Compensation (Supplementation) Scheme, 1951,

and allowances and death benefit paid under the Pneumoconiosis and Byssinosis Benefit Scheme, 1952, as amended by the Pneumoconiosis and Byssinosis Benefit Amendment Scheme, 1954, or under the Industrial Diseases (Miscellaneous) Benefit Scheme, 1954.

As the scheme in general applies to cases arising after July 4, 1948, expenditure on benefits will not reach maturity for many years.

NATIONAL ASSISTANCE

The National Assistance Act, 1948, was designed to complete the break-up of the Poor Law, and to substitute for certain existing services a comprehensive scheme of assistance and welfare services. Under this Act, from July 5, 1948, the following existing services provided by either the State or local authorities were replaced by a unified State service of financial assistance according to need:

(1) Unemployment Assistance and Supplementary Pensions, previously paid by the Assistance Board; (2) Blind Domiciliary Assistance, Tuberculosis Treatment Allowances, and Outdoor Relief under the Poor Law, previously paid by local authorities. From the same date, the Assistance Board, renamed the National Assistance Board, was charged with the administration of the new service, the ultimate responsibility to Parliament resting with the Minister of National Insurance (now the Minister of Pensions and National Insurance).

Application for assistance may be made by any person aged 16 or over who is in need, including a person who needs assistance in supplementation of a pension or insurance benefit. The National Assistance (Determination of Need) Regulations, 1948, as amended, lay down how the need of an applicant shall be determined, and for this purpose how his requirements and resources shall be computed.

The scale rates for requirements other than rent, prescribed by the amending Regulations which came into operation on January 23, 1956, are as follows:

	Ordinary	Special (a)
	s. d.	‘ d.
Husband and wife.....	67 0	87 0 (b)
Single householder.....	40 0	
Other persons:—		
Aged 21 or over.....	36 0	60 0
Aged 18–20.....	29 0	46 0
Aged 16–17.....	23 6	37 0
Aged 11–15.....	18 0	18 0
Aged 5–10.....	15 6	15 6
Aged under 5.....	13 0	13 0

(a) For blind and certain tubercular persons.

(b) 101s. when both husband and wife are in the special classes.

The amount to be added for rent, if the applicant, or his wife or her husband, is a householder, or if the applicant is living alone, will be the net rent payable, or such part thereof as is reasonable having regard to the general level of rents in the locality. If an applicant over the age of 18 is a member of a household but is not himself the householder, the amount to be added for rent will be a reasonable share of the rent payable by the householder, subject to a minimum addition of 2s. 6d. a week and a maximum of 10s. a week.

The rules for the computation of resources contain provisions for the treatment of capital and earnings and certain statutory disregards.

The amount to be paid by way of assistance is settled by the local officer of the Board; an applicant who is dissatisfied with the amount granted has a right of appeal to the local Appeal Tribunal, whose decision is final.

On July 5, 1948, national assistance had to be given to some 800,000 persons who had previously been receiving unemployment assistance (31,000), supplementary pensions (512,000), outdoor relief (200,000), blind domiciliary assistance (40,000), or tuberculosis treatment allowances (20,000). The number of weekly assistance allowances in payment rose from 1,011,000 at the end of 1948 to 1,810,000 in February, 1955. By the end of 1955 the number had fallen to 1,612,000, providing in whole or in part for the needs of nearly 2½ million persons. The fall in numbers during 1955 was due mainly to the increase in insurance benefits under the National Insurance Act, 1954. At the end of 1955 about 61,000 recipients were registered at the Employment Exchange; most of the rest were old, sick or otherwise incapable of work. More than two-thirds of the allowances were paid in supplementation of insurance benefits. During 1955 the Board also made about 830,000 single payments and 147,000 exceptional needs grants. In addition, assistance amounting to £1,172,000 was given to meet charges raised under the National Health Service for prescriptions, spectacles, dentures and dental treatment, and surgical appliances.

The total net expenditure of the Board during 1955 was about £122,727,000, as compared with £126,600,000 in 1953 and £60,760,000 in 1948. Included in the figure for 1955 were payments of national assistance £98,220,000, and payments of non-contributory old age pensions £17,280,000.

NON-CONTRIBUTORY OLD AGE PENSIONS

The maximum non-contributory old age pension payable under the Old Age Pensions Act, 1936, to persons aged 70 and over, and under the Blind Persons Act, 1938, to blind persons aged 40 and over, was increased in October, 1946, from 10s. a week to 26s. a week for single persons of either sex and married men, and 16s. a week for married women. Pension was payable at the maximum rate where the yearly means, calculated in accordance with the provisions of the Act, did not exceed £26 5s. od. Where the yearly means were between

£26 5s. od. and £89 5s. od., pension was payable at rates varying from 24s. (16s. for married women) to 2s. Where the yearly means exceeded £89 5s. od., no pension was payable.

The National Assistance Act, 1948, which charged the National Assistance Board with the administration of non-contributory old age pensions, assimilated the pensions procedure to the national assistance procedure, and the Board have power to supplement old age pensions by national assistance in case of need.

The number of pensions in payment fell from 453,000 at the end of 1948 to 315,000 at the end of 1954, and declined further to 286,000 by the end of 1955. At the latter date, pensions were supplemented by national assistance in 158,000 cases. The award of new non-contributory pensions will eventually be brought to an end by the provisions of section 74 of the National Insurance Act, 1946, under which sighted persons will not qualify unless they reach the age of 70 by October 1, 1961.

FAMILY ALLOWANCES

The Family Allowances Act, 1945, which was brought into operation from August 6, 1945, provided for a payment by the Minister of National Insurance out of moneys provided by Parliament of an allowance of 5s. a week for each child in a family other than the elder or eldest. From September 2, 1952, under the Family Allowances and National Insurance Act, 1952, the allowance was increased to 8s. From October 2, 1956, under the Family Allowances and National Insurance Act, 1956, the allowance in respect of the third and subsequent children of a family was increased to 10s. The allowance is payable (through the Post Office) while a child is of school age and up to the age of eighteen years if he or she is undergoing full-time instruction in a school or is an apprentice. Claim forms for allowances can be obtained at any post office or local Pensions and National Insurance Office. Claimants have a right of appeal to an independent Referee.

At January 31, 1954, about 4,973,000 allowances were in payment for about 31 million families. It is estimated that in 1954 nearly £105 million was spent on allowances (excluding administrative expenses), as compared with £63 million in 1951 when the weekly rate was 5s.

A series of official leaflets on the National Insurance and Industrial Injuries Schemes and information and advice can be obtained from local Pensions and National Insurance Offices.

Forms of application for national assistance or non-contributory old age pensions can be obtained at any Post Office and posted to the Local Office of the National Assistance Board. Able-bodied persons can also obtain forms at the Local Offices of the Ministry of Labour. In addition, anyone wanting assistance can apply in person at the Local Office of the Board.

OCEAN AREAS AND DEPTHS

The greatest known Ocean Depth (in the Pacific, off Mindanao, 35,410 feet) is not much greater than the greatest land height (in the Himalayas); but the mean depth of the Ocean floor exceeds 12,000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each:—

Oceans			Seas	
Name	Area of Basin (sq. miles)	Greatest Depth (feet)	Name	Greatest Depth (feet)
Pacific.....	63,986,000	Off Mindanao, 35,410	Malay.....	3,137,000 Kei Trench, 21,342
Atlantic.....	31,530,000	Porto Rico Trench, 30,143	Central American	1,770,170 Cayman, 23,000
Indian.....	28,350,000	Sunda Trench, 22,968	Mediterranean...	1,145,000 Matapan, 14,435
Arctic.....	5,541,600	17,850	Behring.....	878,000 Buldir Trough, 13,422
			Okhotsk.....	582,000 Kurile Trough, 11,154
			East China.....	480,000 about 10,500
			Hudson Bay....	472,000 about 1,500
			Japan.....	405,000 about 10,200
			Andaman.....	305,000 about 11,000
			North Sea.....	221,000 Skaggerak, 1,998

			Baltic.....	158,000 about 1,000

NATIONAL HEALTH SERVICE

The National Health Service was inaugurated on July 5, 1948, by the Minister of Health under the *National Health Service Act, 1946*, "to promote the establishment in England and Wales of a comprehensive Health Service designed to secure improvement in the mental and physical health of the people of England and Wales and the prevention, diagnosis and treatment of illness." There are separate Acts for Scotland and Northern Ireland, where the Health Services are run on very similar lines.

The National Health Service is available to every civilian in the country and is a charge on the National Income. Everyone is entitled to use any complete part or all of the services and no Insurance qualification is necessary. The cost of the Service is met by the National Exchequer, by a small contribution made from the National Insurance Fund and by charges for the Service. About half the expenses of the local health services fall on local rates.

Under the 1946 Act, the only charges falling on the patient for any of the services were in certain cases for the renewal or repair of glasses or for the replacement of dentures; for domestic help, extra food at home, blankets, etc.; and for accommodation and treatment in private wards in hospitals. It was open to anyone, if they wished, in certain cases to pay the extra cost of more expensive glasses, more expensive dental treatment than is clinically necessary, and artificial limbs. In May, 1951, and May, 1952, charges were introduced for certain items in the National Health Service.

The *National Health Service (Amendment) Act, 1949*, had empowered the Minister *inter alia* to introduce a charge for prescriptions, and a charge of 1s. for each prescription form was introduced on June 1, 1952. The *National Health Service Act, 1952*, authorized the making of charges to meet part of the cost of dentures and spectacles supplied through the Service. These charges came into force on May 21, 1951. The *National Health Service Act, 1952*, authorized the making of charges for medicines and certain appliances supplied to hospital out-patients, for dental treatment (excluding examination) provided under the General Dental Services and for day-nurseries run by local health authorities. These charges were effective from June 1, 1952. *Patients who are unable without hardship to meet charges under these Acts may apply to the National Assistance Board and there are also some exemptions from charges made to out-patients and for dental treatment.*

THE HEALTH SERVICES

Family Doctor Service

The Family Doctor Service is organized by 138 Executive Councils which also organize the Dental, Pharmaceutical and Supplementary Eye Services for their areas. There is an Executive Council for each County and County Borough area, but in some cases one Council covers two areas. Members, who serve voluntarily, are appointed by local doctors, dentists and pharmacists (12), the Local Health Authority (8) and the Minister of Health (5). All doctors may take part in the Family Doctor Scheme and about 20,000 out of some 21,000 general practitioners do so. They may at the same time have private fee-paying patients. Health Service doctors are paid on a capitation basis, i.e. an annual fee in respect of each patient accepted.

Everyone aged 16 or over can choose his doctor (parents or guardians choose for children under 16) and the doctor is also free to accept a person or not as he chooses. A person may change his doctor if he wishes, either at once if he has changed his address or obtained permission of the doctor on whose list he is, or by informing the local Executive Council. When people are away from home they can still use the Family Doctor Service if they ask to be treated as "temporary residents," and in an emergency, if a person's own doctor is not available, any doctor in the service will give treatment and advice.

Patients are treated either in the doctor's surgery or when necessary, at home. Doctors may pre-

scribe for their patients all drugs and medicines which are medically necessary for their treatment and also a certain number of surgical appliances (the more elaborate being provided through the hospitals).

Drugs and Medicines.—Almost all the 15,764 chemists in England and Wales have joined the Service. Approximately 262,116,091 prescriptions were dispensed in 1955. Since June 1, 1952, there has been a charge of 1s. in respect of each prescription form made out by the family doctor and presented for dispensing. The only exception is where the doctor prescribes elastic hosiery, in which case the patient pays 5s. or 10s. on each article. In those country areas where the doctor does his own dispensing, the 1s. is paid to the doctor.

Dental Service

Dentists, like doctors, may take part in the Service and may also have private patients. About 9,600 of the dentists available for general practice have joined the National Health Service. They are responsible to the Executive Councils in whose areas they provide services.

Patients are free to go to any dentist taking part in the Service and willing to accept them, and do not require to register with any particular dentist. Dentists receive payment for items of treatment for individual patients, instead of the capitation fee received by doctors. There is no need for the patient to obtain a recommendation before seeking dental treatment. The dentist is able to carry out at once all normal conservative treatment (e.g. fillings), emergency treatment and ordinary denture repairs; he seeks prior approval from the Dental Estimates Board before undertaking treatment when it involves the removal of teeth necessitating replacement by denture; provision of dentures; extensive and prolonged treatment of the gums; gold fillings; inlays; crowns; special appliances and oral surgery.

A dentist may, with the approval of the Dental Estimates Board, charge his patient a prescribed sum for gold fillings or metal dentures where these are not clinically necessary, if the patient wishes to have them. Where a denture supplied under the Service has to be replaced because of loss or damage the whole or part of the cost may be charged to the patient if he has been careless. In May, 1951, charges were introduced for dentures whereby the patient has to pay an amount corresponding roughly to half the cost to the Exchequer. In June, 1952, a charge of £1, or the full cost of any treatment if less than £1, was introduced. No charge is made for the clinical examination of a patient's mouth. Charges for dental treatment (other than the usual charges for dentures) are not made in the case of anyone under 21 years of age or expectant mothers or mothers who have had a child during the preceding twelve months.

Supplementary Ophthalmic Service

A Supplementary Ophthalmic Service is being run by the Executive Councils until such time as all necessary Eye Services can be made available at the clinics planned as part of the Hospital and

Specialist Services. On the advice of the family doctor, the patient's sight can be tested by ophthalmic medical practitioners or ophthalmic opticians and spectacles supplied if necessary.

Until 1951 there were no charges under the Supplementary Ophthalmic Service except, in certain cases, for the renewal or repair of glasses or where the patient chose a more expensive spectacle frame than one of the standard frames available free, or asked to be supplied with special lenses where only flat lenses were necessary. In May, 1951, charges to patients of 10s. for each lens, plus the actual cost of the frames, were introduced. Children's glasses in the standard type of children's frame remain free of charge.

Hospitals and Specialists

On July 5, 1948, ownership of 2,688 out of 3,040 voluntary and municipal hospitals in England and Wales was vested in the Minister of Health. The remaining hospitals were disclaimed. The hospital service, of which the specialist and consultant facilities are a part, includes general and special hospitals; maternity accommodation; tuberculosis sanatoria; infectious diseases units; provision for chronic sick; mental hospitals and mental deficiency institutions; accommodation for convalescent hospital treatment and medical rehabilitation, and all forms of specialized treatments—for example, plastic surgery, cancer, orthopaedic and ear, nose and throat treatment, together with the provision of most surgical and medical appliances.

In the main, this part of the Service is organized by 14 Regional Hospital Boards (see p. 386); in each hospital region there is a University having a teaching hospital or medical school. Hospitals are administered on behalf of the Board by 388 Hospital Management Committees. The only hospitals in the Service outside the Regional Boards' immediate responsibility are the teaching hospitals which provide facilities for undergraduate and post-graduate medical or dental education and which are administered by Boards of Governors. There are 26 Boards of Governors in London and 10 in the rest of the country.

Specialists and consultants who take part in the Service (and nearly all of them are doing so) hold hospital appointments. They can take up whole-time or part-time service and those who have part-time appointments can still accept fee-paying patients outside the Service.

Certain hospitals have accommodation in small wards or single rooms which, if not required for patients who need privacy for medical reasons, may be made available to patients who desire it as an amenity. Amenity bed charges are fixed under Regulations at 6s. to 12s. per day. In such a case the patient pays nothing for the cost of treatment or the normal cost of maintenance. In some hospitals a number of pay-beds has been placed at the disposal of part-time specialists taking part in the Service for use by private patients who agree to pay full hospital maintenance costs, and (usually) private fees to the specialist as well. The fees that may be charged by specialists to patients occupying private pay-beds are normally restricted to 75 guineas to cover everything. For exceptionally long or complicated treatment this limit may be raised to 125 guineas and special arrangements may be made in a limited proportion of pay-beds for patient and doctor to agree to fees outside these limits.

Arrangements to obtain the service or advice of a hospital specialist are made by the patient's family doctor as in the past. A specialist usually sees a patient at the hospital or clinic at which he works, but arrangements will be made for the specialist to visit the patient at home if he is unable, for medical

reasons, to be taken to hospital. No charges are made to National Health Service in-patients (except for amenity beds as above), but since June, 1952, a charge of 1s. has been made to out-patients for each prescription form for drugs and medicines (unless administered at hospitals). Exemptions from this charge are made in the case of patients receiving National Assistance or their dependants; war pensioners receiving medicines for their accepted disability; and patients attending V.D. clinics who receive medicines as part of their treatment. Also since June, 1952, hospital out-patients have to pay fixed charges for elastic hosiery, surgical abdominal supports, surgical footwear (and healing and soling repairs) and wigs. Exceptions are made in the case of a child under 16 years of age or at full-time attendance at school, to National Assistance recipients and their dependants and to war pensioners in respect of their accepted war disabilities.

In December, 1955, there were 64 hospitals providing distribution centres where hearing aids can be obtained after recommendation by a specialist.

Local Health Authority Services

The Local Health Services, mainly concerned with the care of patients in their own homes, are the responsibility of the major local authorities—County Councils and County Borough Councils. There are 146 Local Health Authorities in England and Wales.

Local Health Services provide such services as midwifery; ante-natal, post-natal and infant welfare clinics, and dental services where practicable for expectant and nursing mothers and young children; health visiting; home nursing; ambulances; provision of domestic help on health grounds; special care and after-care of the sick; local mental health services; and also vaccination and immunization. It will also fall to the Local Health Authorities to develop Health Centres.

All these services are free of charge except for domestic help and, in certain cases, provision of residential accommodation, meals, nursing requisites, bedding, etc., for which a charge may be made according to means. Since June, 1952, Local Health Authorities have also had power to make charges for the use of day nurseries. The Local Health Authorities may only charge what is reasonable, having regard to the means of the users.

CHILDREN IN THE CARE OF LOCAL AUTHORITIES

At March 31, 1956, there were 62,347 children (boys, 34,601; girls, 27,746) in the care of local authorities in England and Wales. Of the total number of children in care, 27,098 were boarded out, 21,586 were accommodated in local authority children's homes, 2,265 in lodgings or residential accommodation, 2,206 in boarding homes or schools for handicapped children, 1,148 in hostels, 4,584 in voluntary homes and 3,460 in other accommodation.

Estimated expenditure of local authorities on the maintenance of children in their care rose from £13,980,421 in 1953-54 to £15,197,213 in 1955-56; the average weekly cost per child rose from £4 6s. 0d. to £4 10s. 8d. in 1955-56.

ADOPTION OF CHILDREN

There are 73 societies in the United Kingdom concerned with the adoption of children, including national and local organizations. The National Adoption Society and the National Children Adoption Association were formed before the passing of the first adoption act in 1926 and their sole work is the arranging of adoptions. All adoption societies including moral welfare associations, rescue and protection societies must be registered under the *Adoption Act, 1950*. Many of the adoption societies are denominational in character. The great children's organizations, such as Dr. Barnardo's Homes, the Church of England Children's Society and the National Children's Home and Orphanage, are also registered as adoption societies.

The Conference of Societies Registered for Adoption (*Hon. Sec., A. Rampton, Gort Lodge, Petersham, Surrey*) exists to promote good adoption work in this country.

EMPLOYMENT OF DISABLED PERSONS

The Ministry of Labour and National Service provides services for the disabled under the *Disabled Persons (Employment) Act, 1944*. Under the Act, Employment Exchanges keep a Disabled Persons Register in which are enrolled disabled persons who so desire and who satisfy certain conditions intended to ensure that they are able to enter and keep employment or work on their own account. The number of registered disabled persons on April 16, 1956 was 798,279, compared with 827,102 at the same date in 1955, a decrease of 28,823. In March, 1953, a Committee of Inquiry was set up to review the existing provision for the rehabilitation, training and resettlement of disabled persons.

Rehabilitation Courses.—Designed to restore to the maximum degree of fitness for employment persons who, because of sickness, accident or long unemployment are in need of physical or mental toning-up and to give them guidance as to the most suitable types of employment. During 1955, 15 Industrial Rehabilitation Units with total accommodation for 1,600 men and women were in operation in Great Britain; 9,723 disabled persons (men, 8,356; women, 1,367) were admitted to courses together with 208 men and 54 women who were not disabled; 8,375 (including 1,210 women) completed courses.

Courses of industrial rehabilitation for the blind are provided by the Royal National Institute for the Blind at Torquay and by the Edinburgh and S.E. Scotland Society for the Adult Blind at Ceres, Fifeshire. During 1955, 233 men and women completed courses at these centres.

Vocational Training.—The Disabled Vocational Training Scheme makes available courses of training in a wide variety of skilled trades and short courses in semi-skilled employments. Courses are held at Government training centres, at technical colleges and at employers' establishments. Residential training centres for the more seriously disabled are provided at Exeter, Leatherhead, Durham

and Mansfield. During 1955, 3,947 disabled persons completed courses of vocational training under the above scheme: at Government training centres, 2,073; at technical and commercial colleges, etc., 1,135 and at residential centres and special establishments, 739. Courses of training of the adult blind for employment under normal conditions are also provided. Of 218 blind persons who completed courses in 1955, 188 were placed in employment, 129 blind persons received training in employers' establishments under arrangements of the Royal National Institute for the Blind with financial assistance from the Ministry of Labour.

Ordinary Conditions.—The *Disabled Persons (Employment) Act* requires employers of 20 or more persons to employ a quota of registered disabled persons based on a percentage of all their staff, currently 3 per cent. Many smaller firms without quota obligations employ registered disabled persons and, although the Act does not apply to Government Departments, the Government has undertaken to accept obligations similar to those imposed by the Act on employers. Registered disabled persons employed in Government service on Oct. 1 1955, formed 5.3 per cent. of total staff. The Act also empowers the Minister of Labour to "designate" occupations which appear suitable for disabled persons and employers may not engage non-registered persons for these occupations without a permit from the Ministry. At present only two occupations have been so designated—passenger electric lift attendant and car park attendant. Pensioners of the First World War have the benefits of the King's National Roll Scheme as well as those of the services provided under the Act. Advice and assistance in obtaining suitable employment are available to disabled persons from the Disablement Resettlement Officer at each local office of the Ministry of Labour and National Service.

Sheltered Conditions.—Under the Act, the Minister of Labour is empowered to provide special employment facilities for registered disabled who are unlikely to be able to secure work under ordinary conditions. Remploy Limited, a non-profit making company, has been established by the Government to provide employment for registered disabled persons who can only work under sheltered conditions. During 1955, there were in operation 90 Remploy factories employing 6,019 severely disabled persons, including 7 factories reserved for employment of persons disabled by pulmonary tuberculosis (489 workers). Other special facilities are provided (a) by voluntary associations with workshops approved by the Minister of Labour and (b) by some local authorities either directly or through the agency of voluntary associations. During 1955, 23 voluntary associations with 31 workshops provided facilities for the training and employment of severely disabled persons; in addition 269 severely disabled persons were in training under special arrangements with 7 voluntary associations and 4 local authorities, including village settlements for tuberculous persons.

Blind Persons.—At Dec. 31, 1955, 3,863 blind persons were employed in 23 Workshops for the Blind controlled by local authorities and 46 managed by voluntary bodies; 290 blind men and women were under training in these workshops; 355 blind persons were employed in the non-industrial grades of the Civil Service.

Unemployment.—40,797 registered disabled persons were unemployed at April 16, 1956, compared with 41,249 in April, 1955. Of this total 3,830 persons were classified as unlikely to obtain employment except under sheltered conditions.

Legal Notes

ADOPTION OF CHILDREN

In England and Wales the adoption of children is regulated mainly by the Adoption of Children Acts, 1926 to 1949, and the Adoption Act, 1950. An order of court is necessary to legalize the adoption. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; further, it is provided by the Act of 1950 (under sections which do not, however, apply to Scotland) that an adopted child shall be treated as the child of the adopter (and not the child of its natural parents) for the purpose of the devolution of property on an intestacy occurring, or under any disposition (e.g. a Will) made, after the date of the adoption order. Applications are made to the High Court (Chancery), County Court, or Magistrates Court. Orders will not usually be made for a man to be sole adopter of a girl, and applicant (or in the case of a joint application one of the applicants) must be either:—

- (a) Twenty-five years of age or over and at least twenty-one years older than the child in respect of whom application is made; or
- (b) Twenty-one years of age or over and a relative (as defined in the Act of 1950) of the infant; or
- (c) the mother or father of the infant.

The consent of the child's parents or guardian is required before an adoption order will be made, but in certain circumstances (e.g. where the parent or guardian has ill-treated or neglected the child) the Court may dispense with this consent. Since the 1949 Act, marriage between the adopter and the adoptee is prohibited, but marriages of that kind, solemnized before the passing of the Act, are not thereby invalidated.

The 1950 Act places restrictions on societies which make arrangements for the adoption of children.

Scotland.—The Adoption of Children (Scotland) Acts, 1930 to 1949, and the Adoption Act, 1950, cover the law relating to the adoption of children in Scotland, where an Adopted Children Register is maintained. Applications are made to the Court of Session, or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application. The Adoption Act, 1950, which is a consolidating Act, also applies, with modifications, to Scotland. Owing to divergence of the laws of England and Scotland there is not, however, complete uniformity in this branch of the law in both countries. Thus, in regard to property rights, an adopted child in Scotland remains a member of the family of his actual parents, and an adoption order does not deprive him of any legal rights competent to him in the estate of his parents. (See further under note dealing with intestacy in Scotland.)

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh respectively. Certificates from these registers, including short certificates which contain no reference to adoptions, can be obtained on conditions similar to those relating to birth certificates. (See below.)

BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth

occurred, and the register signed in his presence, by one of the following persons:—

1. The father or mother of the child. If they fail;
2. the occupier of the house in which the birth happened;
3. a person present at the birth; or,
4. the person having charge of the child.

The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days (Scotland 21 days) of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of forty shillings (in Scotland the penalty is £1). The registration of a birth will be free when it takes place within 42 days (in Scotland 21 days). In England or Wales, the informant, instead of attending before the registrar of the sub-district where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any registrar. The fee payable for this is 3s. 0d. There are special provisions relating to late registration. Under the Public Health Act, 1936, and the Public Health (London) Act, 1936, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. *This is in addition to the registration already mentioned.*

A "Stillbirth" must be registered and a certificate signed by the doctor or midwife who was in attendance at the birth or has examined the body of the child must be produced to the registrar.

The re-registration of the birth of a person legitimated within the meaning of the *Legitimacy Act, 1926* (see p. 1140), is provided for in the Births and Deaths Registration Act, 1953. In Scotland re-registration of a child legitimated *per subsequens matrimonium* or whose birth entry is affected by a Decree of Court respecting status or paternity is provided for by the Registration of Births, etc. (Scotland) Amendment Act, 1934.

Birth at Sea: The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's office, London.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 5s. 3d., viz., 1s. 6d. for search, and 3s. 9d. for the certificate. (When application is made by post the charges are 7s. 6d.) They can also be obtained from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriages can also be obtained from the incumbent of the church in which the marriage took place (the customary fee being 3s. 9d.); or from the Nonconformist minister (or other "authorized person") where the marriage takes place in a registered building (See *post* under Marriage).

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament, and under Births and Deaths Registration Act, 1953, a modified form of birth certificate, showing the names, sex and date of birth and certain other particulars, but not the parentage, may be obtained

from the Registrar General, or the appropriate Superintendent Registrar or Registrar, on payment of a fee of *9d.* (inclusive of search) and on furnishing certain particulars.

English Registers.—Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the General Register Office, Somerset House. An index to earlier entries (Births and Marriages) can be consulted at the Society of Genealogists, 37 Harrington Gardens, S.W.7.

Scottish Registers of Births, Marriages and Deaths.—Parish registers were instituted for these in 1551, but until the Registration of Births, &c. (Scotland), Act, 1854, they were not properly kept in many cases. Extracts may, however, be obtained from them on payment of *3s.* for each entry, but to be valid evidence it must be shown that the registers from which the entries are taken were regularly kept. Lists of the old parish registers may be consulted in the offices of the Registrar General, New Register House, Edinburgh, or of local Registrars. These old registers are in the charge of the Registrar General, and since 1854 local registers have been transmitted to him at stated periods. A fee of *20s.* is payable for a search of all the Scottish registers, and *1s.* is payable for a search of a particular parish. An extract of an entry may be obtained on payment of *3s.* Extracts of entries are issued at reduced rates for specified purposes as in England, and similar provision exists for abbreviated birth certificates. The Registrar General may permit searches to be made by and extracts to be given gratis to persons unable to pay the fees.

BRITISH NATIONALITY AND CITIZENSHIP OF THE UNITED KINGDOM AND COLONIES

General.—The law as to British Nationality is now to be found mainly in the British Nationality Act, 1948, which came into force on Jan. 1, 1949. The Act introduces a new term, "citizenship." Every person who under the Act is a citizen of the United Kingdom and Colonies, or any citizen (by virtue of legislation in that country) of Canada, Australia, New Zealand, the Union of South Africa, India, Pakistan, Southern Rhodesia or Ceylon (hereafter referred to as "the Dominions") has by virtue of that citizenship the status of a British subject, and may be known either as a British Subject or as a Commonwealth citizen. Under s. 2 of the Newfoundland (Consequential Provisions) Act, 1950, potential citizens of Newfoundland under the British Nationality Act, 1948, are deemed to have been potential citizens of Canada.

Nationality before Jan. 1, 1949, was determined mainly by the British Nationality and Status of Alien Acts, 1914-1943, though these Acts did not affect the status of any person born before Jan. 1, 1915.

Retention of nationality by persons born in or who are citizens of Eire (now by virtue of the Ireland Act, 1949, styled the Republic of Ireland).

By the Ireland Act, 1949, a person who was born before Dec. 6, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before Jan. 1, 1949, is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on Dec. 6, 1922, or (ii) was on or after April 10, 1935, and before Jan. 1, 1949, permanently resident there, or (iii) had before Jan. 1, 1949, been registered as a citizen of Eire under the laws of that country.

In addition by the British Nationality Act, 1948, any citizen of Eire who immediately before Jan. 1, 1949, was also a British subject can retain that status by submitting at any time a claim to

the Home Secretary on any of the following grounds: (a) he has been in the service of the United Kingdom government; (b) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory; (c) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions."

Citizenship of the United Kingdom and Colonies.

In the majority of cases, a person who is a British subject becomes also a "citizen," either of one of the "Dominions" by virtue of legislation in that country, or of the United Kingdom and Colonies under the 1948 Act. In the latter case, citizenship is acquired by:—

1. Birth on or after Jan. 1, 1949, in the United Kingdom and Colonies (which term does not include the "Dominions"), except

(a) children born to non-citizen fathers enjoying diplomatic immunity from suit or legal process;

(b) children born to fathers who are enemy aliens in enemy occupied territory.

2. Descent, if the father was a citizen by birth. If the father was a citizen by descent only, the child acquires citizenship by descent if either:—

(a) the child is or his father was born in a protectorate, protected state, mandated territory or trust territory, or in a foreign country where Her Majesty then had jurisdiction over British subjects; or

(b) the birth (occurring elsewhere than (a)) is registered at a United Kingdom consulate within one year; or

(c) the father is at the time of birth in the service of the Crown under Her Majesty's United Kingdom government; or

(d) the child is born in one of the "Dominions" in which a citizenship law has then taken effect and does not become a citizen thereof by birth.

3. Registration by the Home Secretary upon application by:—

(a) a citizen of one of the "Dominions" or of the Republic of Ireland who can show either that he is ordinarily resident in the United Kingdom and has been so resident for a period of twelve months, or is in Crown service under the United Kingdom government;

(b) a woman married to a United Kingdom, etc. citizen. If she is a British protected person or an alien she must take an oath of allegiance. (A woman who marries on or after Jan. 1, 1949, does not by virtue of that marriage acquire citizenship.)

A minor child of a citizen can be registered upon application being made by his parent or guardian.

4. Naturalization.—In order to be eligible for a certificate of naturalization an alien must:—

(a) during the eight years preceding his application have resided for not less than five years (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory, or have been for five years in the service of the Crown; and

(b) be of good character and have a sufficient knowledge of the English language; and

(c) intend to reside in the United Kingdom or any colony, etc., or in the Anglo-Egyptian Sudan, or to enter or continue in the service of the Crown, or in the service of certain organizations.

A British protected person who satisfies (b) and (c) above can apply for naturalization if he can show either that he has resided in the United Kingdom for the twelve months (or such shorter period as the Home Secretary may allow) immediately preceding his application, or that he is in the service of the Crown under Her Majesty's United Kingdom Government.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application which may be obtained from H.M. Stationery Office.

5. *Incorporation of Territory* when citizenship is granted to such persons as are specified by Order in Council.

6. *Transitional Provisions*, which confer citizenship on a person who was a British subject immediately before Jan. 1, 1949, if either:—

- (i) (a) he would, if born after that date, have qualified for citizenship by birth; or
- (b) he is a person naturalized in the United Kingdom and Colonies; or
- (c) he became a British subject by reason of annexation of territory which on Jan. 1, 1949, was included in the United Kingdom and Colonies; or
- (ii) at the time of his birth his father was a British subject and possessed any of the above qualifications; or
- (iii) he was born within territory comprised on Jan. 1, 1949, in a protectorate, protected state or United Kingdom trust territory; or
- (iv) he was not on that date a citizen or potential citizen of one of the "Dominions"; or
- (v) being a woman, had before Jan. 1, 1949, been married to a man who becomes, or would but for his death have become, a citizen.

A British subject who is merely a potential citizen of one of the "Dominions" continues as a British subject without citizenship until he becomes a citizen of such "Dominion" or of the Republic of Ireland, or an alien. If none of these has happened at the date when a citizenship law is passed in the country of which he is potentially a citizen, he becomes a citizen by descent of the United Kingdom and Colonies.

A woman who lost British nationality by reason of marriage to an alien regained it on Jan. 1, 1949.

By the Adoption Act, 1950, an adopted child becomes a citizen of the United Kingdom and Colonies as from the date of the adoption order if the adopter or, in the case of a joint adoption, the male adopter, is a citizen of the United Kingdom and Colonies.

Citizenship of the United Kingdom and Colonies can be lost:—

- (i) by declaration in the prescribed manner by a person who is also a citizen of a "Dominion" or of the Republic of Ireland or a national of a foreign country. The Home Secretary can withhold registration of the declaration in time of war;
- (ii) where the Home Secretary is satisfied that citizenship by registration or naturalization was obtained by fraud, false representation, etc.;

(iii) by the Home Secretary depriving a naturalized person of citizenship if such person has:—

- (a) shown himself by act or speech to be disloyal or disaffected towards Her Majesty; or
- (b) in time of war, traded with the enemy; or
- (c) within five years after becoming naturalized, been sentenced in any country to a term of twelve months imprisonment; or
- (d) continuously resided in foreign countries for seven years, and during that period has neither at any time been in the service of the Crown or of certain international organizations, nor registered annually at a United Kingdom consulate his intention to retain citizenship;

and the Home Secretary is satisfied that it is not conducive to the public good that such person should retain his citizenship;

- (iv) where a naturalized person is deprived of citizenship of a "Dominion" or of the Republic of Ireland, the Home Secretary can also deprive him of citizenship of the United Kingdom and Colonies.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act, 1949, declares that the Republic, though not part of H.M.'s Dominions, is not a foreign country, and any reference in an Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at a considerable disadvantage and which was not normally available at all in cases of tort (i.e., civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if a subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee were injured by the defective condition of the Crown premises on which he worked. Now, however, by the Crown Proceedings Act, 1947, which came into operation on Jan. 1, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Among exceptions to the Act are the following: (a) No action lies in tort against the Crown or the individual Crown servant for anything done or omitted to be done in relation to any postal packet or telephone communication, except for loss of a registered inland postal packet (in which case the action must be brought within one year of posting), not being a telegram. (b) The Crown and any member of the armed forces are immune from liability in tort in respect of death of, or personal injury to another member of the armed forces on duty, provided that the death or injury is attributable to service for purposes of pension.

Scotland.—The Act extends to Scotland and has the effect of bringing the practice of the two countries as closely together as the different legal systems will permit. While formerly actions

against the Crown, when permissible, were confined to the Court of Session, proceedings may now be brought in the Sheriff Court. The Lord Advocate is the proper defender in proceedings against the Crown.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of Post Office Savings Bank deposits. On the other hand, the former rule that the wages and salaries of the servants of the Crown are not arrestable remains unaltered.

DEATHS, BURIAL AND CREMATION

DEATHS

(For Certificates, see under BIRTHS)

In England and Wales.—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the disposal of the body. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar. If the deceased was attended during his last illness by a registered medical practitioner, a certificate of cause of death must be sent by the doctor to the registrar. The doctor must give to the informant of the death a written notice of the signing of the certificate, which must be delivered to the registrar. It is essential that a certificate for disposal should be obtained from the registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods. After twelve months no death can be registered without the Registrar General's consent and on payment of fees amounting to fifteen shillings.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered or received notice of the death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act, 1926, s. 1*).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib. s. 3*).

"Still-born" child. (See under Births (Registration), p. 1134.)

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad.—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased was

of Scottish domicile, particulars are sent to the Registrar General for Scotland.

In Scotland, the rules of registration are similar, but (1) the death must be registered within 8 days, failure to do so involving a penalty of £1; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c. (Scotland) Act, 1854, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases.

BURIAL

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable; legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In populous districts cemeteries and crematoria have been established either by the local council, or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a registrar's certificate or authority from the Coroner for disposal, see above.

CREMATION

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards.

If Cremation is desired it is advisable for instructions to be left in writing to that effect. Cremation may not take place if deceased has prohibited that from disposal.

To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1016).

DIVORCE, ETC.

Preliminary.—Matrimonial Suits may be conveniently divided into three classes, viz. (1) those in which a declaration that there has never been a marriage is sought; (2) those in which the duties arising from marriage are sought to be upheld; and (3) those in which, the marriage being admitted, it is sought to end the marriage or the duties arising from it.

(1) *Nullity of Marriage.*—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no sufficient consent on the part of one or both of

the parties, if one of the parties was insane, or if one of the parties was under the age of consent, i.e., 16—Marriage Act, 1949. Where the formalities of the marriage were defective, the marriage is generally void if both parties knew of the defect (e.g., where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage. Inability to consummate a marriage may also be a ground for a nullity decree; but in this case, the marriage is only voidable and remains valid until the decree is made.

Under the Matrimonial Causes Act, 1950, which does not apply to Scotland, a marriage is also voidable (i.e. a decree of nullity may be obtained) on the following grounds—(a) respondent's wilful refusal to consummate the marriage; (b) that either party at the time of marriage was mentally defective or subject to recurrent fits of insanity or epilepsy; (c) that at the time of marriage the respondent was suffering from communicable venereal disease; (d) that at the time of the marriage the respondent was pregnant by another man. In cases, (b), (c) and (d), the petitioner must have been ignorant of the grounds at the date of the marriage and must not have agreed to intercourse taking place since discovering the grounds, and proceedings must be instituted within a year of the marriage.

By the Matrimonial Causes Act, 1950, and, as to Scotland, by the Law Reform (Miscellaneous Provisions) Act, 1949, it is provided that a decree of nullity in respect of a voidable marriage shall not operate so as to bastardize any child, who would have been the legitimate child of the parties to the marriage if the marriage had been dissolved instead of annulled.

A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (a) above, even though there has been no normal intercourse, but it may in certain circumstances enable a petition for Divorce to be brought on the grounds of cruelty (as to which see below). Further it has been allowed as a defence to a charge of desertion against the aggrieved party.

In one High Court case the judge held that a husband's insistence on the practice of *coitus interruptus* amounted to wilful refusal to consummate the marriage, where there had been no other intercourse. In other High Court cases the judges have disagreed with this view, but held that, in the circumstances of the particular cases, a divorce could be granted on the ground of legal cruelty.

(2) *Restitution of Conjugal Rights*.—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights is a ground for obtaining judicial separation.

(3) *Judicial Separation and Divorce*.—The third class of suit includes a suit for judicial separation (which does not dissolve a marriage) and a suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the same grounds as those for divorce and also on the ground specified in (a) above.

Divorce.—Complete divorce is now obtainable by either husband or wife upon any one of the following grounds: adultery of respondent since marriage; desertion by respondent for 3 years immediately before petition; cruelty to petitioner; incurable insanity (under certain conditions); and by the wife, also on commission by the husband of

certain criminal sexual offences. Matrimonial Causes Act, 1950, s. 1.

The foregoing is subject to a clause prohibiting any petition for divorce before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Cruelty, in a legal sense, is conduct of such a character as to have caused injury or a reasonable apprehension of injury to life, limb, or health (bodily or mental). A course of conduct calculated to break the spirit of the sufferer, continued until health breaks down or is likely to break down under the strain, constitutes legal cruelty.

Desertion may be defined as a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of a serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

If, upon disputes arising, the parties agree to live apart, then in general neither can be said to have deserted the other.

When the decree will be refused.—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. (There is no such thing in the Divorce Court as judgment against the respondent by default.) Other absolute bars to relief are (i) connivance at the adultery of the respondent; (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation of the respondent's adultery or cruelty, i.e., complete forgiveness which restores the status quo (although the offence may be revived by later misconduct). There are also certain discretionary bars, as e.g., where the petitioner has been guilty of adultery; of unreasonable delay; of cruelty; or of wilful neglect or misconduct conducing to the adultery, insanity, or desertion alleged. (1950 Act, s. 4.)

Intervention by Queen's Proctor.—At any time during the progress of a suit, and before the decree nisi is made absolute, the Queen's Proctor may intervene.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree nisi. The marriage subsists until the decree is made absolute, usually six weeks after decree nisi. After that date either spouse may marry again; but as to marriage within "Prohibited Degrees" see Marriage—Miscellaneous Notes, p. 1147.

Maintenance, etc.—The Court has wide powers to make orders as to maintenance or alimony (usually payable to an innocent wife), and as to costs. The husband can be ordered to pay his wife's costs, even if she is unsuccessful in her suit or defence. A guilty co-respondent may be ordered to pay costs and damages.

By the Matrimonial Causes Act, 1950, the High Court in England may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, even though no matrimonial suit is pending between the parties to the marriage.

CUSTODY OF CHILDREN

In suits for nullity, divorce or judicial separation, the Court can make orders as to the custody of and access to the children of the marriage and as to their upkeep. A guilty spouse will normally be entitled to reasonable access to the children of the marriage and may even be awarded the custody

if the Court thinks fit. The paramount consideration is always the welfare of the child.

A spouse who has been deprived of the custody of a child of the marriage will not thereby be deprived of his other rights as the child's *guardian* unless the Court expressly so orders.

SEPARATION BY AGREEMENT

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult a solicitor in every such case.

MAGISTRATE'S SEPARATION AND MAINTENANCE ORDERS

When a husband has been guilty of adultery or assault or has deserted his wife, or has been guilty of persistent cruelty to her or her children, or of wilful neglect to maintain her or her infant children, or where he is an habitual drunkard, or insists on having intercourse while suffering from a venereal disease, or compels her to submit herself to prostitution, the wife may obtain relief from the local magistrates' court. A husband may apply on the ground that the wife has been cruel to his children; or is an habitual drunkard; or has committed adultery. The Court may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her, and the husband may be ordered to pay a weekly sum not exceeding £5 for the benefit of the wife and a sum not exceeding £1 10s. a week for each child until the child attains sixteen. Further, if a child is or will be engaged in a course of education or training after attaining the age of sixteen, the Court may on the application of the wife make an order for the payment of maintenance in respect of that child for a further period of up to two years from the date of the making of the order; such further period may be extended on subsequent applications to the Court, but this maintenance provision will in no case be extended beyond the date when the child attains the age of twenty-one. Where the husband applies, the custody of any children of the marriage may be given to him. The Court may, on giving the custody of any children to either spouse, make such order as to access to those children by the other spouse as it thinks fit. If the wife has been guilty of adultery, no order will be made on her application unless there was condonation or connivance or conduct conducing thereto by the husband; and if, having obtained an order, she commits adultery, the order must be discharged, unless the court is of opinion that the husband conducted to the adultery by failing to make such payment of the separation allowances as he was able. An order may be altered, varied or discharged at any time on fresh evidence, or, as regards orders for payment, on cause being shown. All applications for relief, except on grounds of desertion or failure to maintain, must be made within six months of the offence complained of. The Magistrates' Courts Act, 1952, separates the hearing of matrimonial disputes from ordinary Court business; specifies the persons allowed to be present; limits newspaper reports, etc., etc.

(The Royal Commission on Marriage and Divorce has now submitted its report to Parliament, in which it recommends many changes, including three new grounds for divorce. However, legislation is required to give effect to most of the recommendations, and there is no immediate prospect of this.)

SCOTLAND

DIVORCE

Proceedings are brought in the Court of Session and it is necessary that the husband be domiciled in Scotland, or, he not being domiciled in the United Kingdom or in the Channel Islands or the Isle of Man, that the wife is resident in Scotland and has been ordinarily resident there for a period of three years immediately preceding commencement of proceedings.

The following are the grounds for divorce:—

1. *Adultery*.—A mere confession by the defender is of itself insufficient; there must be proof of the facts. Direct evidence is not required, if facts can be established which give rise to an inevitable inference of adultery. There must be no collusion between the parties, and the pursuer is required to swear to this. It is not collusion, however, for a guilty spouse to give information of an act of adultery already committed. It is a defence to an action of divorce for adultery to plead that the innocent spouse has condoned the misconduct on which the action is founded.

2. *Desertion*.—The defender must have wilfully and without reasonable cause deserted the pursuer and persisted in such desertion for a period of not less than three years. It must be shown that the desertion was without reasonable cause, and that the pursuer has throughout the period been willing to adhere. Refusal by one spouse to have marital relations with the other for any period of three years may amount to desertion. Here also, collusion is fatal to the success of the action.

3. *Incurable Insanity*.—The defender must, for five years preceding the raising of the action, have been under care and treatment as an insane person.

4. *Cruelty*.—The degree of cruelty to be established depends on the circumstances of each individual case, but the test, generally speaking, is that the conduct complained of must be such as to endanger the health of the pursuer. Cruelty may take the form of habitual drunkenness on the part of one of the spouses.

5. *Unnatural Sexual Offences*.—An extract of the criminal conviction is sufficient proof.

Effect of Divorce on Property.—A husband or wife obtaining decree of divorce against the other, except on the ground of incurable insanity, is entitled to claim his or her legal rights as if the offender was dead. Where there has been a successful cross-action the effect is the same as though both spouses had died at the date of decree.

Nullity of Marriage.—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

SEPARATION

A decree of judicial separation may be obtained by one spouse against the other on the grounds of (a) adultery, (b) cruelty. This entitles the parties to live apart, but does not dissolve the marriage. The husband, if the guilty party, is liable for aliment.

CUSTODY OF CHILDREN

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the marriage. The welfare of the children is the paramount consideration, and the mere fact that a spouse is the guilty party in the action does not of itself deprive him or her of the

right to claim custody, though where the considerations of welfare are equally balanced the Court will have regard to the element of guilt.

HIRE-PURCHASE³

ENGLAND AND WALES

Protection of the purchaser against unscrupulous dealings is given by the Hire-Purchase Act, 1938 (as amended by the Hire-Purchase Act, 1954), which applies to a hire-purchase agreement under which the hire-purchase price i.e., the total sum payable by the hirer to complete the purchase of the goods, does not exceed £1000 for livestock, or £300 in any other case.

Before any agreement is made, the owner of the goods must state in writing to the hirer the cash price at which the goods can be purchased, and there must be a memorandum of the agreement signed by the hirer himself and by or on behalf of the owner and any guarantor. The memorandum must contain (i) the cash price, (ii) the hire-purchase price, (iii) the amount of each instalment, (iv) when each instalment falls due, (v) a list of the goods, and (vi) a notice informing the hirer of his right to terminate the agreement (*below*), and of the restrictions on the owner's right to recover the goods (*below*), and a copy of the memorandum must be sent to the hirer within seven days of the agreement being made. In breach of any of these conditions the owner can neither recover the goods nor enforce the agreement or any security given, although the court can dispense with any of these requirements save that as to the signed memorandum. The same result ensues (whilst default continues) if the owner fails without reasonable cause within four days after written request (with a tender of 1s. for expenses) to supply to the hirer a copy of the agreement and a statement of amounts paid, in arrear, and not yet payable. Before the last instalment becomes due, the hirer may by writing determine the agreement and, although he will not thereby escape liability for any instalments which have already become due he will be under no further obligation under the agreement. Under the Act, however, he must allow the owner to retake the goods and, if one-half of the hire-purchase price exceeds the total of the sums paid and due, he must pay the difference to the owner. These rights of the hirer cannot be taken away from him, but he can enforce more favourable rights (if any) under the agreement.

Any provision in the agreement giving the owner a right to enter any premises for the purpose of seizing the goods is invalidated by the Act. Further, even though the agreement may have been terminated because the hirer has broken it, or because the owner has exercised a right to terminate it, if one-third of the hire-purchase price has been paid or tendered, the owner cannot recover the goods otherwise than by action in a County Court, in which the Court can ensure that the hirer is fairly treated. If the owner disregards this provision, the hirer cannot recover the goods, but can recover all sums paid under the agreement.

SCOTLAND

The Hire Purchase and Small Debt (Scotland) Act 1932 provides that no contract of hire purchase to which the Act applies is binding on the hirer unless (1) it is signed by him and (2) either a copy is acknowledged by him to have been delivered at the time of his signature or sent to him by registered post within fourteen days thereafter. Any contract which limits any right conferred by the Act on the hirer is void to that extent. The hirer may terminate the contract at any time by (1) re-delivery of the article in a good state of

repair, fair wear and tear excepted, and (2) paying any instalment then due together with the amount, if any, by which one-third of the total payments stipulated for in the contract by way of instalment exceeds the *cumulo* amount of the instalments due. Even after the owner has obtained decree of delivery of an article, the hirer is entitled to retain it in his possession or to recover it if, within fourteen days of the decree, he pays the whole instalment which is due, with expenses.

The above Act was extended by the Hire Purchase Act, 1954, to apply to articles exceeding £300 in value.

ILLEGITIMACY AND LEGITIMATION

ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Public Assistance Authority where the child becomes chargeable to the local authority and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 20s. a week. The evidence of the woman must be corroborated in a material particular. The mother has the custody of her bastard children. *Prima facie* every child born of a married woman during a marriage is legitimate; and this presumption can only be rebutted by strong, distinct, satisfactory and conclusive evidence.

LEGITIMATION.—By the *Legitimacy Act, 1926*, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever last happens. This does not legitimate a person whose father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar General information for re-registration of the birth of a legitimate child.

Declarations of Legitimacy.—A person claiming that he, his parent, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

Rights and Duties of Legitimated Persons.—A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimation, or under any disposition (e.g., a will) coming into operation after such date, as if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

SCOTLAND

Illegitimate Children (Scotland) Act, 1930.—The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall in awarding *inlying* expenses, or aliment, have regard to the means of the parties, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such

order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognized by International Law so far as the laws of particular countries allow it and is valid to that extent in England. By the Legitimacy Act, 1926, an illegitimate child may, in certain circumstances, succeed on intestacy. By the Registration of Births, Deaths and Marriages (Scotland) Amendment Act, 1934, a child so legitimated, who has already been registered as illegitimate, may, in certain circumstances be re-registered as legitimate. The consent of the father of an illegitimate child to its adoption is not required.

INTESTACY

ENGLAND AND WALES

As regards deaths on or after January 1, 1953, the position is governed by the Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952. The latter Act considerably increased the benefits of a surviving spouse of an intestate, and also extended the provisions of the Inheritance (Family Provision) Act, 1938 (see under "Wills"), to intestacies. These notes deal with the position under the 1952 Act, so that if the death occurred before 1953 reference must be made elsewhere. If the intestate leaves a spouse and issue, the spouse takes (i) the "personal chattels"; (ii) £5,000 with interest at 4 per cent. from death until payment; and (iii) a life interest in half of the rest of the estate. This life interest can be capitalised at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the "personal chattels"; (ii) £20,000 with interest at 4 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood. If the intestate leaves a spouse, but no issue, no parents, and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy, any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £5,000 or £20,000 as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of

those entitled under later numbers):—(1) issue; (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain twenty-one or marry under that age, their shares going to the other persons (if any) within the same group who do attain twenty-one or marry. Moreover, in the same cases, succession is not *per capita*, but *per stirpes*, i.e., by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (i.e., leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.

Note that the old rule of primogeniture no longer applies.

For further details, see Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952.

The Legitimacy Act, 1926, contains special provisions concerning the intestacy of an illegitimate child or the mother of an illegitimate child.

SCOTLAND

Heritage.—The lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals and so on in the ascending scale. Males have preference over females and the rule of primogeniture obtains. Regard is had, however, to the right of representation; thus, if the eldest son of the deceased, being his heir, has predeceased him leaving issue, the issue (whether male or female) are preferred to the younger sons of the deceased. Daughters only succeed if there are neither sons nor the issue of predeceasing sons, and where there are more than one, they share equally. There being no descendants, brothers, etc., will succeed, those of the full blood excluding those of the half blood. Among collaterals it is noted that the deceased's immediate younger brother is preferred to an elder brother. Failing a younger brother and his issue the estate ascends to the next elder brother and so on. If there are no brothers and sisters, nor the issue of brothers and sisters, the estate goes to the father and failing him to his collaterals; failing these the estate ascends to the paternal grandfather and his collaterals. The succession never ascends to the mother and her relations; even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again.

By the Intestate Husband's Estate (Scotland) Acts, 1911 and 1919, the widow of a man dying intestate and without lawful issue is entitled to the whole estate both heritable and moveable if under £500 in value; if over that amount, she takes £500 with interest at 4 per cent. from the date of death, out of the heritable and moveable estate rateably before any division is made, and without prejudice to her rights of *terce* and *ius relictae* (see *post*,

p. 1152). Section 5 of the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1940, gives like rights to a surviving husband. The same section covers the case of partial intestacy.

Moveable.—One-third of the moveable estate goes to the surviving spouse as *ius relictae (relictae)*; one-third to surviving children as *legitim* (see *post*, p. 1152); and one-third to surviving children and issue of predeceased children *per stirpes*, i.e., the share which would have fallen to a predeceased parent, if alive, is divided equally among the children. Where no children or issue of children survive, half of the estate goes to the surviving spouse and half to the heirs in *mobiliis*, i.e., nearest heirs including representatives of predeceaseds, subject to the spouse's right to £500 (*supra*). The lines of succession are the same as in heritable succession, but the right of representation (*supra*) only applies where there are next of kin or the issue of predeceased next of kin, intestate Moveable Succession (Scotland) Act, 1855 (amended 1919). Beyond that relationship heirs take *per capita*. Where an intestate leaves no issue and is predeceased by his father, his mother is entitled to the same rights as the father would have had on survivance (1919 Act). It is of interest to note that a Committee was recently set up by the Secretary of State for Scotland to make such recommendations as seemed desirable for the alteration of the law in regard to intestate succession; the legal rights of spouses and children, and the law in relation to adopted persons and adopters. The Committee have issued their Report in which important alterations are proposed.

JURY SERVICE

Liability to Jury Service depends upon inclusion in the local Jury Book. This is compiled from the Electors Lists for each year (see *post* under "Voters' Qualifications"). The names of all persons who are on 10th October qualified and liable to serve as jurors are marked with the letter "J" on the Electors Lists. The marked Electors Lists are published, and anyone whose name is improperly marked may before the following 17th December claim that, although qualified to serve [see below] he is exempt from service [see below]; the marks will be removed from the names of exempted persons. The remaining marked names are thereafter included in the Jury Book. No one whose name actually appears in the Jury Book may claim exemption on any ground whatever except illness or, if a woman, for medical reasons.

QUALIFICATIONS.

England and Wales.—Every man and woman between the ages of 21 and 60 years [persons over 60 are exempt but not disqualified] residing in England or Wales being the owner, legally or under a trust, of freehold land worth £10 a year or more, or of leasehold land worth £20 a year or more (if the lease is for at least 25 years or a life interest) in the county in which they live; or being a householder assessed to the poor rate or inhabited house duty at £30 in Middlesex or £20 elsewhere; or occupying a house with at least 15 windows; is qualified and liable to serve on juries in the superior courts (civil and criminal), and at Assizes in their own county, and on petty juries in the local County Court or Quarter Sessions. Also all burgesses of boroughs having separate quarter sessions or a borough civil court are qualified and liable to serve on juries therein. Special regulations govern the qualifications and method of listing common jurors in the City of London; and jurors for a coroner's inquest. By the Juries

Act, 1949, a person attending for jury service is entitled to be paid travelling and subsistence allowances together with compensation for loss of earnings and other loss or expenses.

Disqualifications.—Any person who has been attainted of treason or felony, or convicted of any infamous crime (unless he has obtained a free pardon) is disqualified from service on all juries.

Exemptions.—The persons who are exempt from serving on juries (including coroner's juries) include: peers; M.P.'s; judges; ministers of religion (Christian and Jewish); practising lawyers; officers of the Courts; coroners; prison, etc., officers; asylum keepers; practising M.R.C.S.'s, M.R.C.P.'s and L.R.C.P.'s; practising apothecaries, doctors and chemists (and registered dentists at their option); midwives; members of the armed forces; members of the Territorial Army (in certain cases) or the Royal Auxiliary Air Force; members of the Mersey Docks and Harbour Board, and of the Port of London Authority; certain members of Trinity House, Deptford Strond; masters of buoy and light vessels under the Trinity Houses, and all licensed water pilots; household servants of the Crown; officers of the Post Office, customs and excise; sheriff's officers; police officers; special constables; metropolitan magistrates and their court clerks and servants; officers of the Houses of Parliament; Registrars of births, deaths, and marriages.

As to their own counties: members of the L.C.C., and commissioners of income tax.

As to their local counties: borough councillors and J.P.'s, town clerks and borough treasurers; burgesses of boroughs having separate Quarter Sessions.

As to their own area of jurisdiction: J.P.'s.

Moreover a juror can never be called upon to serve oftener than once in each year; this period of exemption is longer in certain counties.

JURY SERVICE IN SCOTLAND

It is the duty of the Sheriff in each county to make up a list of persons qualified and liable to serve as jurors. The list is compiled from information which every householder is required to provide. From this list the General Jury Book is made up. Part II of the Juries Act, 1949, applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors, and for compensation for loss of earnings, of which the latter must not exceed 20s. per day.

QUALIFICATIONS

Every man or woman between the ages of 21 and 60 is qualified, who is possessed of heritable property of the yearly value of at least £5, or of moveable property of the value of at least £200 sterling.

Exemptions.—The persons who are exempt from serving on juries include: peers, judges of the supreme courts, sheriffs, magistrates of Royal Burghs, ministers of religion, parochial schoolmasters, practising lawyers, clerks and officers of court, prison officers, university professors, physicians, surgeons and dentists, officers in the Navy or Army on full pay, customs officers, messengers-at-arms and other officers of the law, lighthouse keepers and their assistants, soldiers, members of the Territorial Army and the Auxiliary Air Force (in certain circumstances), Inland Revenue officials and officers of the Post Office.

Jurors failing to attend without good cause are liable to a penalty.

LANDLORD AND TENANT ENGLAND AND WALES

The law governing the relationship of landlord and tenant is complicated by the mass of legislation on the subject, and no attempt is made here to deal in any detail with that legislation. Some of the statutes which govern specific aspects of the topic are set out at the end of this note with brief particulars. Basically the relationship between the parties to a lease is governed by the lease itself, although there are certain matters which will be implied in a lease although the lease be silent on these matters *e.g.*, an obligation on the tenant to pay the rent. To take effect at law, *i.e.* to create a legal estate in favour of the tenant, a lease must be by deed, with the exception that a lease for three years or less at the best rent without a fine to take effect in possession at once can be validly created, even at law, in writing or even by word of mouth. The liability of the parties under the covenants in the lease depends essentially upon the wording of the covenants themselves. In many leases the landlord reserves the right to re-enter and forfeit the lease if the tenant is in breach of covenant, but usually before the landlord forfeits the lease he must serve a notice on the tenant. See s. 146, Law of Property Act, 1925. It is emphasised that no attempt is made here to deal comprehensively with the law on this subject, which is very wide, but the few points dealt with above may show the desirability of seeking professional assistance in these matters. Important statutes include:—

(1) As to agricultural holdings—the Agricultural Holdings Act, 1948. Among other things, this Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Minister to the operation of a notice to quit.

(2) As to business premises—the Landlord and Tenant Act, 1954, which does not extend to Scotland, has made substantial changes in the law. The compensation for improvement provisions of the Landlord and Tenant Act, 1927, are still applicable, although slightly amended, but the compensation for loss of goodwill and right to a new lease provisions of the 1927 Act have gone. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation. A tenant of business premises who receives a notice to quit, and who does not want to leave, would be well advised to consult a solicitor.

(3) As to unfurnished dwelling houses—the complicated mass of legislation generally known as the Rent Acts. If a house is within these Acts, the tenant may have a personal right to reside in the house and can only be ousted on certain grounds. Further, each house within the Acts has a standard rent, and the rent recoverable by the landlord is limited to this rent with the addition of permitted increases. The Housing Repairs and Rents Act, 1954, enables a landlord of premises within the Rent Acts who has spent money on repairs to make a "repairs increase" in the rent, subject to certain conditions and limitations, and also permits an increase in rent for rise in cost of services in certain cases where the house was first let on or before 1st September, 1939. If there is a mortgage of a house which is within the Acts, the mortgagee can only take steps to enforce his

security if certain grounds exist. Further, he cannot in general increase the rate of interest.

Houses let at a rent which includes board or substantial attendance or furniture are governed by the Furnished Houses (Rent Control) Act, 1946, as amended by the Landlord and Tenant (Rent Control) Act, 1949.

The Rent Acts did not apply to a dwelling-house if the rent was less than two-thirds of the rateable value, so that on the expiry of a building lease neither head lessee nor an occupying sub-tenant had any security of tenure against the ground lessor. Some protection was given in such cases by the Leasehold Property (Temporary Provisions) Act, 1951, and Part I of the Landlord and Tenant Act, 1954, now gives more permanent protection. It applies to a tenancy granted for over twenty-one years (whether or not subsequently extended) of premises within the Rent Acts in all respects save that the rent is less than two-thirds of the rateable value. The contractual tenancy is automatically extended until brought to an end in the manner prescribed by the Act, and in effect the landlord can only get possession on one of the grounds specified in the Act.

SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of Statute 1449 c. 17, a contract binding the landlord's successors, as purchasers or creditors, provided the following four conditions are observed; (1) the lease, if for more than one year, must be in writing, (2) there must be a rent, (3) there must be a term of expiry, and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act, 1949, which is a consolidating act applicable to Scotland, contains provisions similar to those in the English Act, which is alluded to in the preceding Section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act, 1911, provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Act, 1949, gives a measure of security to tenants of shops. This Act enables the tenant of a shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for a renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Act applies to premises held by the Crown or Government Departments, either as landlord or tenant.

The series of complicated Statutes known as the Rent and Mortgage Interest (Restrictions) Acts, 1920 to 1939, govern the relations between landlord and tenant in regard to unfurnished houses, including parts thereof if let as separate dwellings. One effect of these Acts is to give security of tenure to tenants who, except in certain circumstances,

cannot be evicted at the will of the landlord. It is important to note that, notwithstanding conditions in the lease of a controlled house providing for the removal of the tenant, it is not possible to contract out of the Acts. Houses controlled are those of rateable value not exceeding £90. Employees occupying premises by virtue of their employment are not tenants and so cannot claim protection. Reference should be made to Part II of the Housing (Repairs and Rents) (Scotland) Act, 1954—which came into force on 30th August, 1954—for provisions relative to the permitted increase in rent of a controlled dwelling-house on which repairs of a certain value have been carried out.

The Rent of Furnished Houses Control (Scotland) Act, 1943, which is in operation until March 31, 1957, contains provisions applicable to houses or parts of houses let with furniture and with or without services, as also to unfurnished premises let with services. Application may be made to a Tribunal set up under the Act to approve, reduce and, in certain cases, to increase the rents of such houses.

The Landlord and Tenant Act, 1954, referred to in the preceding section, does not apply to Scotland.

LEGAL AID

LEGAL AID IN CIVIL PROCEEDINGS

The main structure of the new service is contained in the Act itself, but the administrative details are embodied in a scheme made by the Law Society. The various parts and provisions of the Act may be brought into force at different times by statutory instrument.

The part of the Act dealing with legal aid in civil proceedings came into force on October 2, 1950, limited, however, to proceedings (including matrimonial causes) in the High Court and Court of Appeal and proceedings remitted by the Supreme Court to a County Court, although it has now been extended to proceedings in any County Court and in certain local courts *e.g.*, the Liverpool Court of Passage. Legal aid is not available in civil proceedings before Magistrates. In any event, an application for legal aid will not be approved if it appears that the applicant would gain only a trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of defamation, breach of promise of marriage, seduction, inducement of one spouse to leave or remain apart from the other are excepted from the scheme, as are also relator actions, election petitions and proceedings by way of judgment summons. The provisions of the Act which provide for legal aid by a solicitor in cases where the question of litigation does not arise or has not arisen, and oral legal advice generally, and legal aid in Courts other than those mentioned above, have been deferred, but there is a likelihood that the legal advice scheme will soon be introduced.

Eligibility for legal aid in civil proceedings depends upon an applicant's "disposable income" and "disposable capital." Legal aid may be available if the former does not exceed £420 per annum, but a person may be refused assistance if he has a disposable capital of more than £500 and it appears that he can afford to proceed without legal aid. Even so, the applicant may be required to contribute up to half the excess of his disposable income above £156, together with the whole excess of his disposable capital above £75. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax,

rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital the value of the house in which the applicant resides, of furniture and household possessions; a deduction of up to £75 may be made in respect of dependants. Except in matrimonial proceedings or cases where the spouses are living apart, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the National Assistance Board, and will be certified to a Local Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of a certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid may apply for a certificate to any Local Committee; if resident elsewhere, application should be made to the Local Committee for London. However, if the application is made in respect of proceedings in an *appellate* court and the applicant is resident in England or Wales, application should generally be made to any Area Committee—if resident elsewhere, to the Area Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel, from a panel. However, in matrimonial causes, where the maximum contribution payable by an applicant does not exceed £10, his case will be conducted by a solicitor employed whole time to deal with such cases.

LEGAL AID IN CRIMINAL CASES

The Poor Prisoners' Defence Act, 1930, provides for free legal aid in criminal proceedings in specified cases, and official lists are kept of solicitors and barristers willing to undertake the defence of poor prisoners. On trial for an *indictable offence* (*i.e.*, before the higher courts, such as Assizes or Quarter Sessions) the person charged may have free legal aid, if Justices, on committal for trial, or Judge of trial court grant a *Defence Certificate*. If the person's means are insufficient, such Certificate may be granted in cases where desirable, and must be given for a murder charge. In Magistrates' Courts, a Defence Certificate may be granted to a person of insufficient means if it is considered desirable to do so owing to gravity of charge or exceptional circumstances. The Legal Aid and Advice Act, 1949, provides that application for free legal aid under the Poor Prisoners' Defence Act, 1930, may be made by letter by any person arrested or summoned for an offence, as well as by a person charged with an offence. The letter should be addressed to the clerk to the Justices and must give particulars of the offence charged and set out the grounds of the application. Refusal of a legal aid certificate by a Justice after such application does not prevent the applicant being granted a legal aid certificate at the hearing. Legal aid is also available under the 1930 Act in proceedings on the question of the sentence to be passed, and after as well as before the defendant has pleaded or been found guilty.

Provision is also made for applications for legal aid in the event of an appeal under the Criminal Appeal Act, 1907, and the Summary Jurisdiction (Appeals) Act, 1933.

In any application for aid under the Poor Prisoners' Defence Act, 1930, the Summary Jurisdiction (Appeals) Act, 1933, or the Criminal Appeal Act, 1907, if any doubt exists as to whether the applicant can afford to provide his own legal aid, or whether it is desirable in the interests of justice that he should have free legal aid, such doubt is to be resolved in favour of the applicant. Further, the Justices have an almost absolute discretion in deciding applications.

SCOTLAND

Civil Proceedings

The Legal Aid and Solicitors (Scotland) Act, 1949, came into force on and October, 1949. For the time being the scheme provided by the Act is limited to civil actions in the Court of Session and in the Sheriff Courts except actions in respect of defamation or verbal injury, breach of promise of marriage, the inducement of one spouse to leave or remain apart from the other, election petitions (under the Parliamentary Elections Act, 1868, or the Elections (Scotland) (Corrupt and Illegal Practices) Act, 1890), and small debt proceedings (i.e. under £20) and proceedings for summary removing, in both of which liability for the debt and the amount thereof are admitted. Advice from solicitors, as distinct from proceedings, is not yet available.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) A person believing himself to be eligible may instruct any solicitor of his own choice who is on the official lists, or he may apply for a solicitor to one of the various Committees which are set up to administer the scheme. Application for a certificate granting legal aid is thereafter made to the appropriate Committee by the applicant's solicitor, who is required to prepare, for the signature of the applicant, a memorandum setting forth the grounds of the proposed action. Investigation into the applicant's financial means is carried out by the National Assistance Board after the Committee has considered the memorandum and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action.

Criminal Proceedings

In every sheriffdom there are Solicitors for the poor, and in the Court of Session there are Counsel and Solicitors for the poor, all of whom act gratuitously. No Court dues are payable in the first instance. The means that preclude a person from the benefit of the Poors' Roll are not fixed, and each application depends on its own circumstances.

MARRIAGE

A.—MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND

1. MARRIAGE BY BANNS.—The Marriage Act, 1949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the parish church, which is the usual place of worship of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of banns is in addition to any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain a licence (see below), or submit to the republication of banns.

2. MARRIAGE BY LICENCE.—Marriage licences are of two kinds:—

- (i) A *Common Licence*, dispensing with the necessity for Banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (1 The Sanctuary, Westminster, S.W.1) and (for marriages in London) at the Bishop of London's Diocesan Registry (1 Dean's Court, Doctors' Commons, E.C.4), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings. [The cost of licences through a clerical Surrogate in the country (see below) varies, according to the diocese, from £1 15s. to £2 12s. 6d.] No previous notice is required and the licence is available as soon as it is issued. Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, or the church in which the marriage is to be solemnized is the usual place of worship of the parties or one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The Licence continues in force for three months from its date.
- (ii) A *Special Licence* granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., £25.

3. MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.—A marriage may be performed in church on the Superintendent Registrar's Certificate (as to which see below) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—These are not uniform, but if excessive the Diocesan Chancellor has power to moderate them. The usual fees are paid although a stranger-clergyman be invited to perform the service.

B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):—

- (a) A marriage in a registered building (e.g. a nonconformist church registered for the solemnization of marriages therein).
- (b) A marriage in a register office.
- (c) A marriage according to the usages of the Society of Friends (commonly called Quakers).
- (d) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
- (e) A marriage according to the rites of the Church of England (see above—in this case the marriage can only be *without* licence).

NOTICE.—Notice of the intended marriage must be given as follows:—

- (i) Marriage by certificate (*without* licence)—If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.
- (ii) Marriage by certificate (*with* licence)—One notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (see below) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

ISSUE OF CERTIFICATE;

- (i) *Without* licence.—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three months from the date of the entry of the notice.
- (ii) *With* licence.—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than a Sunday, Christmas Day or Good Friday) from the date of entry of

the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.

SOLEMNIZATION OF THE MARRIAGE:

- (i) *In a Registered Building.*—The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act, 1949. This section provides for the appointment of an "authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage must be solemnized between the hours of 8 a.m. and 6 p.m. with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," or, if the marriage is solemnized in the presence of an authorized person without the presence of a Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

- (ii) *In a Register Office.*—The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the marriage has been given. The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of the Superintendent Registrar and a Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: "I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.," and each party must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." No religious ceremony may take place in the Registry Office, though the parties may on production of their marriage certificate, go through a subsequent religious ceremony in any church or persuasion of which they are members.
- (iii) *Other Cases.*—If both parties are members of the Society of Friends (Quakers), or if, not

being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in a Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary.

If both parties are Jews they may marry according to their usages in a synagogue, which has a certified marriage secretary, or private dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the man is a member. The presence of a Registrar of Marriages is not necessary.

MISCELLANEOUS NOTES

Consanguinity and Affinity.—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have now been replaced by the Marriage Act, 1949 (see the 1st Schedule to the Act). It is now permitted to contract a marriage with:—

Deceased wife's sister.
Deceased brother's widow.
Deceased wife's brother's daughter.
Deceased wife's sister's daughter.
Father's deceased brother's widow.
Mother's deceased brother's widow.
Deceased wife's father's sister.
Deceased wife's mother's sister.
Brother's deceased son's widow.
Sister's deceased son's widow.

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister. During the lifetime of a person upon whose decease a marriage is now authorized (but which would otherwise be prohibited owing to affinity), it is not lawful for such a marriage to be contracted.

Minors.—Persons under 21 years of age are generally required to obtain the consent of certain persons (see Marriage Act, 1949, sections 3 and 4 Schedule). Where both parents are living, both must consent; where one is dead, the survivor, or, if there is a guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, e.g., the insanity of a parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act prohibits any marriage where either party is under 16 years of age.

C.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate with licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties.

Impediments to marriage: These render the marriage null and void. (a) Age: If either party is under the age of 16. (b) Forbidden Degrees: If the parties are within certain degrees of relationship. (c) Subsisting previous marriage. (d) Impotency of either party. (e) Non-residence, i.e. if the legal requirement of prior residence of one or other of the parties in Scotland have not been complied with. (f) Insanity of either party.

No consent of parents or guardians is necessary. Marriages may be regular or "irregular."

Regular Marriages.

A regular marriage is one which is celebrated by a Minister of religion or authorized Registrar after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in the Registration District for at least 15 days before the ceremony. No form, place or hours are prescribed by law. There are no canonical hours as in England. Public proclamation is made by (a) banns or (b) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 2s. 6d. A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns, but a minister of the Church of Scotland is not bound, although he is entitled, to celebrate a marriage not preceded by banns. The statute is limited to persons living in Scotland, i.e., for at least 15 clear days prior to the notice. Exhibition is made for 7 consecutive days, during which time any person may appear personally and lodge an objection in writing subscribed by him. If no objections are lodged the Registrar issues a certificate: fees, 2s. 6d. Such certificate of publication is only valid for three months. The Naval Marriages Act, 1908, regulates the publication of banns on board H.M. ships and the granting of certificates by the Officer-Commanding.

Marriage before Registrar: After obtaining a certificate of due publication as above, it is competent for the parties to contract the marriage in the office of the authorized Registrar in his presence and in the presence of two witnesses. Such a marriage is regular and valid in all respects.

Marriage by Licence: In unforeseen and exceptional circumstances—see Section 2 of the Marriage (Scotland) Act, 1939—where normal methods of publication cannot be carried through, the Sheriff, on application by the parties may grant a licence which is deemed in all respects to be equivalent to a certificate of publication.

Irregular Marriages.

Since the passing of the Marriage (Scotland) Act, 1939, only one form of irregular marriage is recognized, viz. marriage by co-habitation and habit and repute. If parties live together constantly as husband and wife, and if they are held to be such by the general repute of the neighbourhood, then there may arise a presumption from which marriage can be inferred. Before such marriage can be registered, however, a decree of declarator of marriage must be obtained from the Court of Session.

MASTER AND SERVANT

WAGES AND HOLIDAYS

Under the Truck Acts, it is in general forbidden for an employer to pay wages other than in current coin of the realm, and it is illegal for an employer to deduct from the employee's wages sums alleged to be due to the employer. However, the application of these Acts is confined to workmen, and domestic servants are specifically excluded from their operation. Even in the case of payments to workmen, certain deductions, including rent and the price of food to be consumed on the employer's premises, are not forbidden where the employee's written consent is obtained. These Acts did not relate to the amount of wage to be paid to the employee; but to-day minimum wage rates for particular trades are prescribed by numerous statutes. The Wages Councils Act, 1945, established Wages Councils, which are given power to fix minimum wages in respect of a number of trades and industries. The Councils may also direct as to the length of holidays for workers in such trades and industries, and for payment of wages during holidays, under the Holidays with Pay Act, 1938. Subject to this Act, a servant's right to a holiday is a matter of contract. The terms of the contract may be express or implied; but if there is a right to a holiday once in a year and the servant is rightfully dismissed before the end of that year, he cannot successfully claim pay in respect of the loss of the holiday.

RECEIPTS

Receipts should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, etc., received.

In Scotland, as in England, inability to produce receipts does not necessarily bar defence to an action for payment.

TOWN AND COUNTRY PLANNING

The Town and Country Planning Act, 1947, contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. A person has generally to get planning permission before carrying out any development on his land from the Local Planning Authority. Development charge is not payable in respect of operations begun or uses of land instituted on or after the 18th November, 1952.

What is Development:—

(a) Carrying out of building, engineering, mining or other operations.

(b) Making a material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.

Examples of what is not Deemed Development:—

(a) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior.

(b) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, not be deemed development if building operations are carried out.)

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

Planning Permission.—Application for such permission is not always necessary, as the Minister may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1950 specified a number of types of development for which no permission is required e.g., enlargement of a dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 1,750 cubic feet or one-tenth whichever is greater, subject to a maximum of 4,000 cubic feet.

Appeal against refusal of permission lies to the Minister, whose decision is final. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land.

Enforcement Notice.—If development is carried out without permission, or in defiance of conditions attached to such permission, the Local Planning Authority may serve an enforcement notice on the owner of the land calling upon him to demolish or alter any building, or to discontinue the use of land, or to comply with the said conditions. If the notice is not complied with, the Local Planning Authority may take appropriate steps to enforce it, recovering their expenses from the owner for the time being of the land. Appeal against an enforcement order lies to a Court of Summary Jurisdiction and thence to Quarter Sessions.

For further details and other provisions of the planning law, the Act of 1947 and the Orders made under the Act, the Town and Country Planning (Amendment) Act, 1951, and the Town and Country Planning Act, 1953, should be consulted. Elaborate provisions as to payments for loss of development value by reference to established claims on the £300 million fund (established under the 1947 Act) are contained in the Town and Country Planning Act, 1954.

Scotland.

In Scotland special provisions, on similar lines, have been made by the Town and Country Planning (Scotland) Act, 1947, which incorporates certain provisions of the Town and Country Planning (Scotland) Act, 1945, all other earlier planning Acts being repealed. The financial provisions of the 1947 Act, have, however, been amended by the Town and Country Planning Act, 1953, which abolished development charges, and by the Town and Country Planning (Scotland) Act, 1954, which set up a new Scheme of compensation and under which a number of Regulations have recently come into operation.

VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the latest of which, the Acts of 1948 and 1949, have made important changes in the law. Those entitled to vote as electors at a parliamentary election in any constituency are those resident there on the qualifying date who, at that date and on the date of the poll, are British subjects of at least twenty-one years of age and not subject to any legal incapacity to vote; but registration as an elector in the register to be used at the election in question in that constituency is a prerequisite, and at a general election no person may vote in more than one constituency. Since the Electoral Registers Act of 1949, the registers are prepared once in each year only. Under the Electoral Registers Act, 1953, the Register (of parliamentary and local government electors or, in Northern Ireland, of parliamentary electors) is published not later than February 15 in each year and is for use in the period of 12 months commencing on February 16. The qualifying date referred to is, in England, Wales and Scotland the preceding October 10, and in Northern Ireland the preceding September 15. It is, however, provided that any person who is not of full age on the relevant qualifying date, but is of full age on June 15, and is otherwise duly qualified, is entitled to vote at elections held in Great Britain between October 2 of that year and February 15 of the following year. Detailed provisions are laid down as to the meaning of "residence" in doubtful cases.

The Act of 1948 abolished the university constituencies and the business premises vote.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made as to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' names: the registration officer determines the claims and objections. The procedure is slightly different for Northern Ireland.

Special provision is made for "Service voters," who include wives of Service voters resident with their husbands outside the United Kingdom. Such persons may make a Service declaration in a prescribed form and are then treated as resident at the address specified in the declaration. Service voters may vote by post or by proxy, on making the necessary application to the registration officer.

Certain other persons (e.g. those unable to go in person to the polling station owing to the general nature of their occupation, blindness or other physical incapacity, etc.) may vote by post or, in some cases, by proxy as "absent voters."

The local government franchise now depends upon either residence in the area or the possession of a non-resident qualification, i.e., occupation as owner or tenant of rateable lands or premises of the yearly value of not less than £10, excluding occupation of furnished dwelling-houses let for less than nine weeks and excluding occupation as a lodger. There are provisions, similar to those relating to the parliamentary franchise, for the preparation of registers, etc., and in fact the same register is used, as far as possible, with a mark indicating those persons entitled to vote for local government purposes only.

The Acts apply generally to Scotland where certain matters relating to local government and parliamentary elections are further regulated by Representation of the People (Scotland) Regulations, 1949.

WILLS

IMPORTANT NOTE.—The following notes must be read subject to the provisions of the Inheritance (Family Provision) Act, 1938, which is liable to affect or modify the will of any person (domiciled in England) dying after July 13, 1939. This Act empowers the High Court to order maintenance out of the testator's estate for the benefit of certain "dependants," i.e., a surviving wife or husband; an unmarried (or invalid) daughter; an infant (or invalid) son. Such order can be made if the will does not itself make "reasonable provision" for the maintenance of the dependant who seeks the order. An application must normally be made within six months of probate. A legally adopted child comes within the definition of a "son" or "daughter" under the Act. For further details as to the limits of an order, the Act itself should be consulted.

Since the object of the Act is to provide maintenance for dependants, an application is not likely to be successful where the estate is very small, e.g., two or three hundred pounds.

REASONS FOR MAKING A WILL.—Every person should make a will. However small the estate, it is safer in every case to protect the interests of the survivors by a will, and by the appointment of one or more trustworthy persons as executors to carry the testator's wishes into effect. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g., the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. When property is thus "settled," there may be a saving in death duties. Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed (see below) an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of *codicils* should be left to the lawyer. A will should be written in ink and very legibly, on a single sheet of paper. Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me [Thomas Smith] of [Vine Cottage, Silver Street, Reading, Berks] which I make this [thirteenth] day of [February, 1956] and whereby I revoke all previous wills and testamentary dispositions.

I hereby appoint [John Green of — and Richard Brown of —] to be the executor(s) of this my will.

a. I give all my property real and personal to *my wife Mary or my sons Raymond and David equally or as the case may be*.

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence and in the presence of each other have herunto set our names as witnesses.

Thomas Smith
Signature of
Testator;

William Jones (*signed*) of Green Gables, South Street, Reading, tailor.

Henry Morgan (*signed*) of 16, North Street, Reading, butcher.

Should it be desired to give legacies and or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:—

a. I give to — of — the sum of £ — and to — of — the sum of £ — and to — of — all my books (*or as the case may require*).

3. All the residue of my property real and personal I give to — of —.

TERMS.—Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words "my money," apart from the context, will normally only include actual ready money. The expression "goods and chattels" should not be used. In giving *particular* property, ordinary language is sufficient, e.g., "my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail, if not owned by the testator at his death.

RESIDUARY LEGATERS.—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. It should be remembered that a will operates on property *acquired after it has been made*.

EXECUTION OF A WILL, AND WITNESSES.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift should not be an attesting witness. Their attestation would be good, but they would forfeit the gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been

first read over to the testator, who appeared fully to understand the same."

A blind person may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy generally lapses and falls into the residue. Where a residuary legatee pre-deceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

TESTAMENTARY CAPACITY.—A minor cannot make a will except, in certain circumstances, if he be a soldier, sailor or airman. A married woman (married on or since January 1, 1883) may dispose by will of any real or personal property as if she were a man.

REVOCATION.—A will is revoked by a subsequent will (but, if it does not expressly revoke former wills, only so far as such subsequent will operates as an implied revocation as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise *destroying* the same with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of a particular marriage (Law of Property Act, 1926, s. 177); so that after marriage a new will should be made, except in this last case.

PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made *in person* at the Principal Probate Registry, or at a district registry, by the executors or persons entitled to a grant of administration. Applicants should bring (1) the will, if any; (2) a certificate of death; (3) particulars of property liable to estate duty; and (4) generally, a list of debts and funeral expenses. In an application for administration, the applicant will be required to enter into a bond for due administration, generally with two sureties who must attend at the Registry, although they need not do so at the same time as the applicant.

WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

SCOTS LAW OF WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances dispose of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (her *jus relictae*), and the children are entitled to another one-third share equally between them (their *legitim*). If he leave a widow but no children—or children but no widow—the *jus relictae* or *legitim* is increased to a one-half share in the estate. The remaining portion is known as the *dead's part*. The widow is also entitled to *terce*, i.e., a life rent in one-third of her husband's heritable property. A surviving husband and children have comparable rights in the wife's estate. The *dead's part* is the only portion of which the testator can freely dispose. All burdens falling upon the representatives in moveables are payable out of the whole of the moveables before any division. Burdens in the nature of legacies are payable out of the *dead's part*. Pupils cannot make wills. Minors may dispose of moveables without the consent of any other person; but minors (unless they be serving in H.M. forces) cannot dispose of heritage. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6s. 8d. sterling) and

may be typewritten or even in pencil. A will may be either (1) *holograph*, i.e., written by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily *holograph* but may be made effectual when it has clearly been adopted as *holograph*. Words written on erasure or marginal additions or interlineations in *holograph* writings, if proved to be in the handwriting of the maker of the deed are valid; (2) *tested*, i.e., signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, or is blind, his will may be authenticated by a notary and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child, no testamentary provision having been made for him, may revoke a will in whole or in part. A will is revoked by a subsequent will, either expressly or by implication; but in so far as the two can be read together both wills have effect.

"Confirmation," the Scottish equivalent of Probate, is obtained in the Sheriff Court of County in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under £500 confirmation is obtained under a simplified procedure at reduced fees.

BUCHAN'S WEATHER PERIODS OR RECURRENCES OF WEATHER

Dr. Alexander Buchan, F.R.S., Secretary of the Scottish Meteorological Society, published in 1867 a paper in the Journal of that Society entitled "Interruptions in the regular rise and fall of temperature in the course of the year." Buchan gave six cold periods and three warm periods, based on his examination of the mean daily temperature as recorded at stations in Scotland covering long periods. The cold periods were February 7-14, April 11-14, May 9-14, June 29-July 4, August 6-11, November 6-13, and the warm periods July 12-15, August 12-15, and December 3-14. This early work aroused considerable interest later. It should be noted, however, that Buchan claimed no more than the existence of tendencies for short spells of relatively cold or warm weather to occur at certain times of the year.

In recent years these smaller fluctuations of weather super-imposed on the normal seasonal changes have been examined from the aspect of tendencies to stormy or anticyclonic spells over the British Isles and have been referred to as "singularitys." Stormy periods are relatively warm in winter and cool in summer. The following tendencies have been given:—Jan. 5-17 stormy; Jan. 18-24 anticyclonic; Jan. 24-Feb. 1 stormy; Feb. 8-16 anticyclonic; Feb. 21-25 cold; Feb. 26-Mar. 9 stormy; Mar. 12-19 anticyclonic; Mar. 24-31 stormy; April 10-15 stormy; April 23-26 unsettled; June 1-21 summer monsoon; July 10-24 warm; Aug. 20-30 stormy; September 1-17 anticyclonic; Sept. 17-24 stormy; Sept. 24-Oct. 4 anticyclonic; Oct. 5-12 stormy; Oct. 16-20 anticyclonic; Oct. 24-Nov. 13 stormy; Nov. 15-21 anticyclonic; Nov. 24-Dec. 14 stormy; Dec. 18-24 anticyclonic; Dec. 25-Jan. 1 stormy.

It is interesting to compare these generalized statements with the daily values given for Greenwich. The cold or warm spells rarely cover precisely the periods given for the Buchan Spells, but cold or warm spells can be found fairly near to some of these dates.

PROFESSIONAL FEES

The following notes on the Fees and Charges of various Professions are based on information supplied by the appropriate professional Societies and Institutes.

SOLICITORS

Solicitors and their clients may (subject to certain rules designed to prevent undercutting) make special agreements as to remuneration in non-contentious business (including conveyancing) under Section 57 of the Solicitors Act, 1932. In the absence of any such agreement the solicitor's remuneration is governed by Orders made under Section 56 of that Act. There are two methods of charging under the Orders. The more usual is by a scale based upon the amount of money involved; the other is by a charge (usually known as a Schedule II charge) determined by reference to all the circumstances of the case, the amount of money involved being only one factor amongst many. Usually a scale charge is payable in conveyancing matters, provided the transaction has not been abortive, but a solicitor has an option to elect, before undertaking any business, to be paid a

Schedule II charge instead. For negotiating sales or purchases the charges are always under Schedule II. In addition to solicitors' charges, disbursements such as Government stamp duty, search fees and Land Registry fees may be payable.

Where under Table I below the charges would amount to less than £7 10s. 0d. there is a minimum fee of £7 10s. 0d.; if, however, the amount of money involved is less than £100 the minimum fee (except for conducting a sale of property by public auction) is £4 10s. 0d.

In sales by auction further charges may be payable, which will be computed under Schedule II below, e.g. for preparing or perusing Particulars of Sale and poster and attending the sale.

The following tables illustrate the scales of charges on sales, purchases and mortgages based upon the amount of money involved:—

I. For land (including houses) having a title which is not registered at the Land Registry.

Scale of Charges.

	For the first £1,000	For the second and third £1,000	For the fourth and each subsequent £1,000 up to £10,000	For the remainder without limit
	per £100 s. d.	per £100 s. d.	per £100 s. d.	per £100 s. d.
Vendor's solicitor for conducting a sale of property by public auction, including the conditions of sale:—				
When the property is sold.....	30 0	15 0	7 6	3 9
When property not sold, then on the reserved price.	15 0	7 6	3 9	1 10½
NOTE:—A minimum charge of £7 10s. is to be made whether a sale is effected or not.				
Vendor's solicitor for deducing title to freehold or leasehold property, and perusing and completing conveyance (including preparation of contract or conditions of sale, if any).....	45 0	30 0	15 0	10 0
Purchaser's solicitor for investigating title to freehold or leasehold property, and preparing and completing conveyance (including perusal and completion of contract, if any).....	45 0	30 0	15 0	10 0
Mortgagor's solicitor for negotiating loan.....	16 10½	16 10½	5 7½	3 9
Mortgagor's solicitor for deducing title to freehold or leasehold property, perusing mortgage and completing.....	45 0	30 0	15 0	10 0
*Mortgagee's solicitor for negotiating loan.....	33 9	33 9	11 3	7 6
Mortgagee's solicitor for investigating title to freehold or leasehold property, and preparing and completing mortgage.....	45 0	30 0	15 0	10 0

* These charges apply equally to land having a registered title.

Title registered after completion.—Where the title is registered under the Land Registration Act, 1925, after completion, charges under Schedule II are payable in addition in respect of the first registration.

II. For land (including houses) having a title registered at the Land Registry.

Scale of solicitor's charges for Transfers on Sale, Charges, Sub-Charges, Mortgages, Sub-Mortgages and Transfers thereof.

Value of Land or Amount of Charge	Scale of Remuneration	Value of Land or Amount of Charge	Scale of Remuneration
(1) Up to and including £200	£4.	For each subsequent £1,000 up to £17,000.	5s. per £100.
Over £200 but not exceeding £300.....	£4 10s.	For the remainder without limit.....	4s. per £100.
For each additional £100 thereafter up to £1,000.	£1 10s. per £100.		
For the second and third £1,000....	£1 per £100.		
For the fourth £1,000....	10s. per £100.	(2) Fractions of £100 under £50 are to be reckoned as £50.	
For each subsequent £1,000 up to £13,000.	7s. 6d. per £100.	Fractions of £100 above £50 are to be reckoned as £100.	

CHARTERED AND INCORPORATED ACCOUNTANTS

Neither the Council of the Institute of Chartered Accountants in England and Wales nor the Council of the Society of Incorporated Accountants has laid down any scale of fees for their members. There are no statutory scales of fees except for certain special appointments such as Approved Auditors under the Industrial and Provident Societies Acts.

Accountancy and auditing.—The Council of the Institute has stated that chartered accountants charges should generally be calculated on the basis of the type of work involved, the seniority of the persons necessarily engaged on the work and the time occupied by each person engaged. The normal practice is therefore to calculate charges at an appropriate rate per day for the principal and for each of the clerks engaged on the work.

Special work.—The general basis referred to above will not usually be applicable to special types of work involving a special degree of skill or calling for priority, for example, prospectus reports and special investigations. For this type of work special fees are usually agreed with the client.

Receivers, Liquidators and Trustees in Bankruptcy.—Usually a percentage on the amount realised and on the amount distributed in dividend.

The remuneration of a liquidator of a company in a members' voluntary winding-up is fixed by the company in general meeting. In the case of a creditors' voluntary winding-up remuneration is fixed by the Committee of Inspection, or, if there be no such committee, by the creditors. In either case application may be made to the Court to fix the remuneration.

Taxation.—The rates charged for taxation matters are generally higher than those for audits. In 1935 the Council of the Institute passed a resolution that a member undertaking taxation work on the basis that he should be remunerated by a percentage on the amount recovered, or receive no remuneration if no recovery results, would be liable to be regarded as acting discredibly.

ARCHITECTS

A.

Conditions of Engagement

1. Members of the R.I.B.A. are governed by the Charters, Bye-laws and Code of Professional Conduct of the Royal Institute.

2. The Architect shall give such periodical supervision and inspection as may be necessary to ensure that the works are being executed in general accordance with the contract; constant supervision does not form part of the duties undertaken by him.

3. In cases where constant superintendence is required a Clerk of Works shall be employed for this purpose. He shall be nominated or approved by the Architect, and appointed and paid by the Client. He shall be under the Architect's direction and control.

4. The Architect shall not make any material deviation, alteration, addition to or omission from the approved design without the knowledge and consent of the Client.

5. The Architect has authority to give orders on behalf of the Client if such are necessitated by constructional requirements provided that the Client shall be immediately notified thereof.

6. The Architect shall, if requested to do so, at the completion of the work, prepare free of charge to the Client, drawings sufficient to show the main lines of drainage and other essential services.

7. The following Architects' charges do not include for Surveyors' work for which see Clauses

B 11 to B 16 which are those of the Royal Institution of Chartered Surveyors adopted by the R.I.B.A.

8. The employment of Consultants shall be at the Architect's discretion in agreement with the Client and Consultants shall be nominated or approved by the Architect, and appointed and paid by the Client. Where it is agreed to retain the services of Consultants in no case shall the Architect's fee be reduced by more than one-third on the cost of the work upon which the services of the Consultants are retained, provided always that the Architect's fee on the cost of the whole scheme shall not be reduced by more than one-sixth.

9. An engagement entered into between the Architect and the Client may be terminated at any time by either party upon reasonable notice being given.

10. Copyright in all drawings and in the work executed from them will remain the property of the Architect.

11. Under these Conditions of Engagement, the fees and charges payable to the Architect shall be in accordance with the following Scale of Charges.

B.

Scale of Charges

NOTE.—Apart from the two copies of the drawings and documents provided for in Clause B 1 and the drawings specified in Clause A 6, the fees as set out in this Scale of Charges are in all cases exclusive of the cost of all prints and other reproductions of drawings and documents, travelling and hotel expenses, and other reasonable disbursements.

1. New Works

For taking the Client's instructions, preparing sketch designs, making approximate estimate of cost by cubic measurement or otherwise, submitting applications for building or other licences and town planning, bye-law or other approvals, preparing working drawings, specification or such particulars as may be necessary for the preparation of bills of quantities by an independent Quantity Surveyor, or for the purpose of obtaining tenders, advising on tenders and preparation of contract, nominating and instructing Consultants (if any), preparing, and supplying for the use of the Contractor, two copies of the contract drawings, specification, or other particulars and of such further details as are necessary for the proper carrying out of the works, giving general supervision as defined in the Conditions of Engagement, issuing certificates for payment, and certifying accounts, exclusive of the services enumerated in Clauses B 5 and B 14, the charge is to be a percentage on the total cost of all executed works as follows:

(i) If the cost of the executed works exceeds £4,000 the percentage is 6 per cent.

(ii) If the cost of the executed works does not exceed £4,000 the percentage is 10 per cent. in the case of works costing £200 graduated to 6 per cent. in the case of works costing £4,000.

(iii) When work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage shall be calculated as if the works had been executed wholly by the Contractor supplying all labour and materials.

(iv) In addition to a percentage on the total cost of executed works, the Architect is entitled to charge in respect of all works included in the tenders, but subsequently omitted, two-thirds of the charge which would have been payable had they been executed.

2. Variations of Charges

The above Scale of Charges is subject to variation by prior written agreement between Client and Architect in respect of the following:

(i) Repetitive Works: In the case of extensive works of a simple repetitive character, the charge may be reduced by one-sixth.

(ii) Works to Existing Buildings: In the case of works to existing buildings a higher percentage is chargeable, not exceeding twice the amount payable under the Scale for new works of the same cost, and depending upon the intricacy of the work involved.

(iii) Special Works: In works involving special services in respect of fittings, furniture, decorations, exhibitions, garden or landscape design, special fees appropriate to the circumstances are chargeable.

3. Partial Services

In cases where the Architect performs partial services for any reason, including the abandonment, deferment, substitution or omission of any project and/or works, or part thereof, or if the services of the Architect are terminated, the charges in respect of the services performed are as follows:

(i) For taking Client's instructions and preparing preliminary sketch designs to illustrate possibilities of a site or cost of a scheme the charge is on *quantum meruit*.

(ii) For taking Client's instructions, preparing sketch designs sufficient to indicate the Architect's interpretation of the Client's instructions (but not in detail adequate to enable bills of quantities to be prepared) and making approximate estimate of cost, the charge is on *quantum meruit* and should not exceed one-sixth of the percentage due under Clauses B 1 or B 2 (as the case may be) on the estimated cost of such works.

(iii) For taking Client's instructions, preparing sketch designs sufficient to indicate the Architect's interpretation of the Client's instructions, and preparing drawings and particulars sufficient to enable applications to be made for Town Planning, Bye-law and/or Building Act approvals, the charge is one-third of the percentage due under Clause B 1 or B 2 (as the case may be) on the estimated cost of such works.

(iv) For taking Client's instructions, preparing sketch designs, making approximate estimate of cost by cubic measurement or otherwise, and preparing working drawings, specification, or such particulars as may be necessary for the preparation of bills of quantities by an independent Quantity Surveyor, or for the purpose of obtaining tenders, the charge is two-thirds of the percentage due under Clause B 1 or B 2 (as the case may be) on the estimated cost of such works.

(v) If the project or any part thereof is abandoned or deferred or any part omitted or substituted on the Client's instructions during the preparation of the working drawings, the charge is two-thirds of the appropriate percentage on the estimated cost of such works less a *quantum meruit* charge for bringing the working drawings and other particulars up to the stage defined in Clause B 3 (iv).

(vi) In all cases where fees are assessed on the basis of *quantum meruit* regard must be had to all relevant factors.

4. Mode and Time of Payment

The Architect is entitled to payment in stages as follows:

(i) On the completion of sketch designs one-sixth of the total fees payable.

(ii) On the completion of the drawings and particulars sufficient to enable applications to be made for Town Planning, Bye-law and/or Building

Act approvals, one-third of the total fees payable less the amounts of any payments already received by the Architect pursuant to sub-clause B 4 (i).

(iii) During the preparation of working drawings and other particulars instalments consistent with the amount of work completed by the Architect.

(iv) On completion of the said working drawings and other particulars, two-thirds of the total fees payable less the amount of any payments already received by the Architect pursuant to sub-Clauses B 4 (i), B 4 (ii) and B 4 (iii).

(v) The remaining one-third of the total fees to be paid by instalments as the building work proceeds consistent with the value of the said building work as certified from time to time.

5. Services not Included in the Scale

Charges assessed on the basis of *quantum meruit* in accordance with Clause B 3 (vi) shall be payable in respect of any additional services involved:

(i) Advising as to the selection and suitability of sites. Negotiating as to sites or buildings. Surveying sites or buildings and taking levels, and making surveys, measurements, and plans of existing buildings.

(ii) In preparing for the use of the Client special drawings in addition to working drawings, and preparing drawings for negotiations with ground landlords, adjoining owners, public authorities, licensing authorities or others.

(iii) In amending working drawings or preparing new working drawings to give effect to alterations of the Client's instructions or changes in design due to causes outside the control of the Architect.

(iv) In negotiations arising from applications for building or other licences, town planning, bye-law or other approvals, and negotiations in connection with Party Walls, Rights of Light and other easements, reservations or restrictions.

(v) Arising out of delay in building operations due to causes outside the control of the Architect.

6. Inspections and Reports

For making inspections, preparing reports or giving advice on the condition of premises, the charge is on *quantum meruit* in accordance with Clause B 3 (vi).

7. Litigation and Arbitration

For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendance in Court or before Arbitrations or other tribunals, and for services in connection with litigation, the charge is based upon the time occupied in accordance with Clause B 3.

Architects acting as Arbitrators are recommended to base their charges upon the total time occupied in dealing with a case at the rate of £3 3s. an hour exclusive of out-of-pocket expenses and other disbursements.

8. Dilapidations

For preparing schedule and settling the amount if required, the charge is 5 guineas per cent. on the amount of the settlement, or on the estimated cost of complying with the Schedule. (Minimum fee, 5 guineas.)

9. Travelling Time

An additional charge may be made by prior written agreement if the work should be at such a distance as to lead to an exceptional expenditure of time in travelling.

10. Time Charges

In cases in which charges are based upon time occupied the minimum fee is 1½ guineas per hour exclusive of charges for Assistants' time.

NOTE.—*Clauses dealing with the following subjects are in accordance with the Schedule of Professional Charges of the Royal Institution of Chartered Surveyors and are adopted by the Royal Institute of British Architects.*

11. For approving plans submitted by lessees and inspecting buildings during progress.

12. The laying out or development of estates.

13. For land surveying and the preparation of plans and maps.

14. Preparing bills of quantities and valuing work executed.

15. Valuation of freehold or leasehold properties.

16. Work under the Lands Clauses Consolidation Act or other Acts for the compulsory acquisition of property.

STRUCTURAL ENGINEERS

The following charges are those usually in operation among Consulting Structural Engineers who are not connected with any firm of contractors and who receive remuneration for their services directly from their clients. Full details of the scales which it authorizes can be obtained from the Institution of Structural Engineers, 11 Upper Belgrave Street, S.W.1.

Reports, Advisory Work and Surveys

For inspections, professional advice, opinions and reports: a fee of Three Guineas per hour upwards, minimum three hours at rate agreed, plus any necessary expenses for travel and services of Engineer's staff.

Constructional Work

A fee of £25, plus (1) for Reinforced Concrete, 7½ per cent. on total cost of work, with an additional 1 per cent. on the first £20,000; for preparation of Bending Lists, 5 per cent. on cost of steel bent and fixed in work; (2) for Structural Steelwork and other work except (1) above, 6 per cent. on total cost of work, with additional 1 per cent. on first £20,000; (3) an additional fee where the Engineer is required to give advice or accept responsibility for the strength or safety of brickwork or other items not covered by (1) and (2) above.

The above scale is governed by conditions regarding constructional emergencies, remuneration for work done to the Engineer's Specification and/or Drawings, remuneration for works varied or abandoned, travelling and out-of-pocket expenses, etc.

Bills of Quantities, etc.

A fee of from 1½ per cent. to 2½ per cent. (depending on the size and complexity of the work) of the total actual cost or, in the case of abandoned work, the total estimated cost. Measuring and making-up accounts for variations upon contracts, including pricing and agreeing totals with contractors: 2½ per cent. upon the amount of the additions and 1½ per cent. upon the amount of the omissions, less the provisional sums or work omitted as a whole.

Technical Evidence

For "qualifying," considering documents, preparing proof of evidence, attending consultations, appearing before Parliamentary Committees, Courts of Law, Arbitration Tribunals and Official Enquiries: (1) a fee of Three Guineas per hour upwards, varying in accordance with the standing of the Engineer and the importance of the case, with a minimum of three hours at whatever rate is agreed; (2) a charge for the time spent by the Engineer's assistants; (3) a refresher for each day for which the Engineer is requested to hold himself

in readiness to attend but is subsequently not required, at the rate agreed for one hour per day; (4) fees at the agreed hourly rate for time occupied in travel, together with travelling and out-of-pocket expenses.

Valuations and Negotiations for Purchase

For valuation of, and negotiations for the purchase of, engineering undertakings less than £10,000: a percentage charge dependent on the amount of work and responsibility involved; £10,000 or more: a fee in accordance with Ryde's Scale, i.e. Thirteen Guineas, plus one-half of one Guinea per cent. of the total.

CONSULTING ENGINEERS

The fees payable to Consulting Engineers for design and supervision are based on a percentage scale and for project reports, inspections, etc., on a lump sum or time scale. Full details can be obtained from the Association of Consulting Engineers (Incorp.), 36 Victoria Street, S.W.1.

A booklet "Professional Rules and Practice and Scales of Fees" which gives full details of fees in addition to containing Model Forms of Agreement between a Client and a Consulting Engineer is issued at 5s. per copy. The Model Forms of Agreement contained in this booklet are:—

Form "A"—For Design and Supervision of Works of Civil Engineering Construction.

Form "B"—For Design and Supervision of Works Principally of an Electrical and Mechanical Nature (not being Electrical or Mechanical Installation Work for Buildings or other Structures to which Model Form "D" applies).

Form "C"—For Design and Supervision of Structural Engineering Work in Buildings and other Structures (where an Architect has been appointed by the Client).

Form "D"—For Design and Supervision of Electrical and Mechanical Installation Work for Buildings and other Structures.

QUANTITY SURVEYORS

In general Quantity Surveyors' fees are calculated as a percentage upon the estimated cost of the work or are based upon the time involved. Details of the scales of charges which they authorize can be obtained from:—

THE ROYAL INSTITUTION OF CHARTERED SURVEYORS, 12 Great George Street, S.W.1., and
THE INSTITUTE OF QUANTITY SURVEYORS, 98 Gloucester Place, W.1.

STOCKBROKERS

The Rules and Regulations drawn up by the London Stock Exchange Council are voluminous and technical. On British Government stocks the scale of brokerage is ½ per cent. up to £10,000 and ¼ per cent. on any balance in excess of £10,000 on Stock. On shares not exceeding 15s. the brokerage is ¼d. to 2½d. per share.

Not exceeding 20s.	3d. per share
"	"	30s. 3½d. "
"	"	40s. 4½d. "
"	"	50s. 6d. "
"	"	60s. 7½d. "

and so on. There are minimum charges of 5s. on less than £20; 10s. on less than £100; and £1 on £100 and over. In certain circumstances the above charges may be modified. Copies of the Rules and Scale of Commission may be obtained from the Secretary.

SHIPBROKERS

A scale of Minimum Agency Charges became operative for members of the Institute of Chartered Shipbrokers (Office, 25 Bury Street, E.C.3) from 1920, and has been revised from time to time. Copies (price 6d. post free) may be obtained from the Secretary.

AUCTIONEERS AND ESTATE AGENTS

(Summary based on the Scales of Charges of the Professional Societies)

Sales by Private Treaty or by Auction

Freehold Property and Ground Leases, including in the case of auctions the preparation of particulars and advising as to reserves:—On the first £300, 5 per cent.; on the next £4,700, 2½ per cent.; on the residue, 1½ per cent.

In addition to the above charges:—On payments for goodwill, 5 per cent. on the first £1,000 and 2½ per cent. on the residue; and on amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks*, and other *Movable Effects, Timber, and Tenant-right*, 5 per cent. on the first £500, and 2½ per cent. on the residue, to include inventory and valuation (5 per cent. throughout in special cases).

Where the division of an estate into a number of lots involves substantial additional work, an increased remuneration shall be payable.

On all sales by auction, commission is exclusive of out-of-pocket expenses, unless otherwise stated.

Sales before Auction

After acceptance of instructions, whether sale arranged by auctioneer or not, the same scale as for sale by auction.

Non-Sale

In the event of non-sale at the auction, a fee, the amount of which is a matter of arrangement, is payable.

Sales within 3 Months after Auction

Whether arranged by auctioneer or not, same commission as for sale by auction merging any fee for non-sale previously paid.

Leasehold Property (other than Ground Leases).—

On disposing of leases by private treaty, auction, assignment or otherwise:—On the rent the same commission as for a letting (see below), and, in addition, where the necessary instructions are held.—On the premium and any consideration which is equivalent thereto, or on payments for goodwill, 5 per cent. on the first £1,000; and 2½ per cent. on the residue; and on payments for *Chattels, Fixtures, etc.*:—As for Freehold Property (see above).

NOTE.—Where two Agents are co-operating at the request of the owner, the commission shall be at the rate of a scale and a quarter.

Purchases

Freehold and Leasehold Property.—One-half of the fee for a sale, such fee including advising as to value if required. If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent. on first £1,000; half a guinea on next £9,000; and a quarter of a guinea per cent. beyond on the residue. Minimum fee, £5 5s.

Lettings

NOTES.—(a) Should the rent be a progressive one, the commission is based on the average rent for the period up to the first possible break of the tenancy. (b) When a property, which an Agent has been instructed to let or sell, is let with an option to purchase, and the tenant afterwards exercises his option, or becomes the purchaser within the period of the option, the commission for selling, less the commission already paid on the letting, will then become payable.

(1) *Unfurnished Premises* (excepting flats, offices, and parts of a building with liability to repair, and Farms and Agricultural Land); (a) Where the letting is for 1 year or less—5 per cent. on the amount of the rent for 1 year; (b) For more than 1 year and for less than 5 years—7½ per cent. on 1 year's rent; (c) For 5 years or more—10 per cent. on 1 year's rent; and in addition a commission on the premium, consideration, or goodwill as on sales of leasehold property (see above).

(2) *Flats or Offices*, or parts of a building where the tenant is liable for repair or redecoration—10 per cent. on 1 year's rent, whatever the term; and in addition a commission on the premium, consideration or goodwill as on sales of leasehold property (see above.)

(3) *Furnished Premises or Sporting Rights*, including collection of rent, if required, but excluding the making and checking of inventories—7½ per cent. on the amount of rent payable under the letting.

(4) *Farms and Agricultural Land*.—On yearly lettings—5 per cent. on 1 year's rent; on Leases for 3 years or more—7½ per cent.

(5) *Land on Building Lease, or at a Fee Farm Rent, by Auction or by Private Treaty*. (a) On Ground Rents up to £50—1 year's Ground Rent; (b) Exceeding £50 and not exceeding £100, as in (a) on first £50, plus 75 per cent. on the residue. (c) Exceeding £100 and not exceeding £1,000, as in (b) on first £100, plus 50 per cent. on the residue. (d) Exceeding £1,000, as in (c) on first £1,000, plus 25 per cent. on the residue; and in addition where a premium is paid, a Commission of 5 per cent. on the first £1,000, and 2½ per cent. on the residue.

STATUTORY INCOME is computed as follows:—

Under Schedule A.—Assessed on an actual year basis, the annual value of Houses, Lands, Tenements, etc., including houses occupied by the owner. Net assessment is computed by deducting scale allowance for repairs, insurance, etc., from rack rental, i.e. rent payable when landlord undertakes all repairs and maintenance and tenant pays rates. *Scale repairs, etc., by reference to gross assessment.*

Lands.....	one-eighth
Houses: Where assessment does not exceed £40.....	one-quarter
Exceeds £40, but not £50..	£10
Exceeds £50, but not £100	one-fifth
Exceeds £100.....	£20 plus one-sixth of excess of £100.

A reduction may be claimed in the assessment of any year where average cost of previous five years' maintenance, etc., exceeds scale allowance for that year. In relation to recently acquired

property it is permitted to claim a reduction in the net assessment equal to the excess of the actual year's maintenance over scale allowance provided this basis is used for first five years of ownership. Except in the case of agricultural property relief cannot exceed the net annual value. The cost of insuring the property and agents charges are allowable maintenance expenditure.

Under Schedule B.—Fixed assessment on actual year basis to cover value of amenity lands—parks, gardens etc., not used for husbandry. Also on woodlands, although these can be assessed on actual profits under Sch. D. Case I if taxpayer so elects. Schedule B assessments are to equal one-third of annual value of the land for Schedule A purposes.

INCOME TAX is chargeable on an individual's income of the usual year ending 5th April (a married woman's income is normally included with that of her husband). An individual receiving income from a business or a profession can, however, use his own accounting year as a basis for his assessment. The standard rate of income tax for 1956-57 is 8s. 6d. in the £.

MARRIED COUPLES WITHOUT CHILDREN

NOTE.—The Table shows the tax payable by Married Couples without Children and, in the case of earned income, of Earned Income Relief. The Taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amount shown in the Table.

Under Schedule C.—Dividends, interest, annuities from public revenue on actual year basis. Income Tax is deducted at source. For exception, see Schedule D.

Under Schedule D.—Generally on income of preceding year. Profits of Trades and Professions. Interest on public revenue escaping Schedule C and on Bank and Post Office Savings Bank Accounts, etc. Interest on P.O.S.B. and Trustee Savings Bank Accounts up to £15 per person exempt from income tax. Such amount of interest has to be included for Sur Tax purposes and has to be grossed at the standard rate. Income from Foreign or Common wealth securities, rents and possessions. For persons domiciled and ordinarily resident in Great Britain this income is assessable whether remitted or not. Persons not domiciled or British subjects not ordinarily resident in Great Britain are assessable only on remittances to the United Kingdom of this income in any year in which they become technically resident. Income from Trades or Professions, carried on abroad is assessable only to extent that it is remitted and then only when person entitled thereto is technically resident in United Kingdom.

Profits from letting of Furnished Houses, etc., and Excess Rents (arising when rent of unfurnished house less attributable repairs allowance exceeds net Schedule A assessment).

Under Schedule E.—Income from all Employments and Pensions, including Salaries, Wages, Emoluments, Directors Fees, etc. Taxed under

system commonly known as PAYE on actual year basis.

Income from employments exercised abroad assessable only to the extent that it is remitted and then only when employee is resident in United Kingdom.

Since 5th April, 1949, unemployment and sickness benefit payable under the National Insurance Act are not assessable to income tax. Maternity benefit under the same Act has never been assessable.

Expense allowances and payments in kind (less expenses incurred in performance of duties) to Directors and employees enjoying emoluments of £2,000 p.a. or more now assessable.

TAXABLE INCOME is Statutory Income less Allowances and Deductions as under:

Personal Allowance.—To single person... £140
To married man living with or normally maintaining his wife... £240

Note.—When either husband or wife is absent from United Kingdom throughout a complete fiscal year they are treated as separate entities for tax purposes, each entitled to Single Personal Allowance. This course is not followed if it is to the advantage of the spouses to be jointly assessed on the basis of the husband's residential position. A married woman permanently separated from her husband is treated as a *femme sole*.

MARRIED COUPLES WITH ONE CHILD

NOTE.—The Table shows the tax payable by Married Couples with one child after deduction of the Married Allowance and Allowance for one child and, in the case of earned income, of Earned Income Relief. The Taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amount shown in the Table.

Allowance for Children.—For each child under 16 years (or if over that age at beginning of fiscal year receiving full time education at recognized educational establishment) and who does not have income in the year exceeding £85 in its own right. £100

Scholarship or bursary does not count for this purpose.

"Child" includes step child and adopted child.

When a husband and wife are divorced or permanently separated, relief in respect of any children of the marriage can be given to either the father or he mother or divided between them in any way they may mutually agree. Alternatively, the relief will be divided in the ratio in which they each contribute to the children's maintenance and education. In this connection, any payments which the father makes under an Order of Court or Separation Agreement for the benefit of the children or in any way which would entitle him to deduct the payments as a charge in his own income tax return would not count for the purpose of apportioning the Child Relief.

The "Family Allowance" for children ranks as the father's income subject to Earned Income Allowance. Allowance may also be claimed when child over 16 years is articulated or apprenticed provided

emoluments (exclusive of premiums returned) do not exceed £52 in the year.

Allowance for Dependent Relatives.—A maximum deduction for each dependent relative of £60

This allowance is reduced by £1 for every £1 by which the relative's own income (excluding voluntary allowance) exceeds £105. Claimant must maintain relative who must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's widowed mother. If more than one person gives support to the dependent relative then allowance is divided pro rata. If annual maintenance afforded is less than £60 allowance limited to amount expended.

A taxpayer, who by reason of his or her own age or infirmity, has to retain the services of a daughter resident with him or her is entitled to an allowance of £40

Allowance for Housekeeper or person looking after children. £60

An allowance of £60 is granted to:—

- any male taxpayer entitled to single personal allowances, any female taxpayer who was either working full time in some employment or business or was totally incapacitated throughout the year and a married

man entitled to higher personal allowance whose wife is totally incapacitated throughout the whole of the year, who has a female person resident with and maintained or employed by him or her for the purpose of having care of any child or children for whom the taxpayer is entitled to claim child relief.

- (b) a widow or widower who has a female relative (or, if no relative is available, a female person) resident with her or him in the capacity of Housekeeper.

Earned Income.—Allowance of two-ninths of the earned income including pensions (after deduction of allowance for tools, uniform, superannuation fund contributions, etc.), subject to maximum allowance of £450.

Married woman earning income in her own right has deduction of two-ninths of such earnings and, in addition, an allowance equal to seven-ninths of her earnings subject to a maximum of £140 plus Reduced Rate Reliefs as shown below.

Age Allowance.—Allowance of two-ninths of unearned income where taxpayer (or his wife) attains 65 years subject to total income not exceeding £600. Marginal relief given on incomes slightly in excess of £600.

Pension Contributions and National Insurance Act.—Part of a taxpayers' N.I. contribution and contributions by both employed and self-employed persons to "approved" superannuation fund or for the provision of a life annuity in old age are allowed as deductions from income. Taxpayer paying "employer's" contribution in respect of personal servants may deduct whole of such contribution from his income.

Life Assurance Premiums.—Relief is given on premiums paid for Life Assurance or for contracts for Deferred Annuities on life of taxpayer or his wife. In all cases, except those of policies or contracts taken up in connection with a Superannuation Scheme, a capital sum must be payable at death. Where date of policy or contract is after 22nd June, 1916, and total premiums available for relief to taxpayer and his wife do not exceed £25 an amount of £10 or total premiums, whichever is less, may be deducted from assessable income. Where total premiums exceed £25 relief given at two-fifths of standard rate. For policies or contracts dated before 22nd June, 1916, following rates of relief apply:—

Where total income does not exceed £1,000. Half standard rate (maximum 3s. 6d.).

Income between £1,000 and £2,000. Three-quarters standard rate (maximum 5s. 3d.).

Income exceeding £2,000. Full standard rate (maximum 7s.).

Where annual premium exceeds 7 per cent. of capital sum assured relief is limited to sum equal to 7 per cent. Relief also given on sums paid under Act of Parliament or under terms of employment for securing deferred annuity to widow or provision for children after death of the taxpayer. Relief is given as for life policy or deferred annuity premiums above except that there is no restriction on amount of standard rate. Total relief under either of these headings limited to one-sixth of total income.

<i>Rates of Tax on Taxable Income</i>	<i>in the £</i>
On first £60	2s. 3d.
On next £150	4s. 9d.
On next £150	6s. 9d.
On balance	8s. 6d.

Small Income Relief.—Persons whose TOTAL income, from whatever source, does not exceed £300 are entitled to a deduction of two-ninths of their total income in addition to other reliefs they may enjoy (except Earned Income Relief). Marginal Relief for those whose total income is somewhat in excess of £300 is given by adding a sum equal to nine-twentieths of the excess of £300 to the liability calculated as above on £300.

Building Society Interest.—Majority of societies operate under special arrangement with Inland Revenue Authorities and interest is paid to depositors and shareholders "free of income tax." While there is thus no liability to income tax on such interest it must be calculated in taxpayer's total income for assessment to sur-tax. The interest received must be grossed at the standard rate when brought in for sur-tax purposes.

SUR-TAX is additional income tax payable on incomes exceeding £2,000. Sur-tax is charged on a sliding scale as follows:—

No Sur-tax on first £2,000

On each £ of next	£500	2s	in the £
"	£500	2s. 6d.	"
"	£1,000	3s. 6d.	"
"	£1,000	4s. 6d.	"
"	£1,000	5s. 6d.	"
"	£1,000	6s. 6d.	"
"	£1,000	6s. 6d.	"
"	£1,000	7s. 6d.	"
"	£1,000	7s. 6d.	"
"	£2,000	8s. 6d.	"
"	£3,000	9s. 6d.	"
"	£5,000	10s.	"
On each £ above £20,000		10s.	"

Deeds of Covenant.—Where covenant to pay annual sums of money is made for other than valuable and sufficient consideration the period of the covenant must be for a term which can exceed six years if the Covenantor wishes to divest himself of such income for income tax purposes. Any such covenant entered into after 10th April, 1946, must be in favour of an individual, not employed in any way by Covenantor and not, for example, a charitable body in order to divest the Covenantor of the income for Sur-tax purposes.

Settlements in favour of taxpayer's own infant children.—The income of any such Settlement made since 22nd April, 1936, is treated as that of the Settlor for all income tax purposes if:—

- the Settlement can be revoked inside a period of six years (unless the child becomes bankrupt);
- the income can be paid to or for the benefit of the child during the lifetime of the settlor. This ceases to apply at the end of the fiscal year in which the child attains 21 years or marries.

Agreements for the Avoidance of Double Taxation have been made between the United Kingdom and Aden Colony, Antigua, Australia, Barbados, Basutoland, Bechuanaland, Belgium, British Guiana, British Honduras, British Solomon Islands Protectorate, Brunei, Burma, Canada, Ceylon, Cyprus, Denmark, Dominica, Falkland Islands, Fiji, Finland, France, Gambia, Germany (Rep.), Gilbert and Ellice Islands, Gold Coast, Greece, Grenada, Guernsey, Ireland (Rep.), Isle of Man, Israel, Jamaica, Jersey, Kenya, Malaya, Mauritius, Montserrat, Netherlands, New Zealand, Nigeria, North Borneo, Northern Rhodesia, Norway, Nyasaland, Pakistan, St. Christopher and Nevis, St. Lucia, St. Vincent, Sarawak, Seychelles, Sierra Leone, Singapore, Southern Rhodesia, Swaziland, Sweden, Switzerland, Tanganyika, Trinidad, Uganda,

Union of South Africa, United States of America, Virgin Islands, and Zanzibar.

Double Taxation Relief.—Relief may be obtained by residents of the United Kingdom in respect of any income tax payable in any other Country, Colony or Dominion, not covered by the specific Agreements referred to above, when that income is also liable to British income tax. A credit against the British tax liability on the doubly taxed income is given at a rate equal to the rate paid outside the United Kingdom subject to a limit of the taxpayer's average or effective rate of British tax.

Persons Resident Abroad.—Persons normally resident outside the United Kingdom are not liable to United Kingdom Tax on income arising outside the United Kingdom (including Dominion, Colonial and Foreign Loans issued in London) nor on the interest from:—

3% War Stock 1955-59; 3½% War Stock 1952; 4% Victory Bonds; 4% Funding Loan 1960-90; 2½% and 3% Defence Bonds (all issues except the 5th); 2½% National War Bonds (except 1954-56 issue); 3% Savings Bonds (all issues).

Such persons become technically resident in the United Kingdom if they visit for a period or periods exceeding six months in any fiscal year. Also if they visit for any period in a year in which they have retained a place of abode in the United Kingdom, except such persons as are engaged in full-time employment abroad. They would then be liable to United Kingdom Tax on all remittances of income arising abroad. If they visit the United Kingdom in four consecutive years for periods averaging three months or more per annum they would be regarded as ordinarily resident there.

A person who is not resident in the United Kingdom who has income which is liable to United Kingdom tax cannot claim any of the normal income tax allowances unless he is.

- (a) a British subject;
- (b) a present or former servant of the Crown; or widow of a former Crown servant;
- (c) employed by any missionary society controlled from the United Kingdom or a servant of a native State under British protection.
- (d) a resident of the Isle of Man or the Channel Islands; or
- (e) was previously resident in the United Kingdom but resides abroad for the sake of his health or the health of a member of his family.

Such a person can claim a proportion of the normal allowances in the ratio which his income liable to United Kingdom Tax bears to his total income.

This relief is now extended to persons residing in Belgium, Burma, Denmark, Finland, France, Germany (Rep.), Netherlands, Norway, Sweden and Switzerland.

Post War Credits.—Those credits arising out of the temporary reduction of certain income tax allowances during the years 1941-42, 1942-43, 1943-44, 1944-45 and 1945-46 are repayable to women over 60 and men over 65 years of age. Where a man or woman who has died or become bankrupt would, but for that, be entitled to claim repayment then the person having the title to the credit shall be able to claim repayment. Forms for claiming repayment may be obtained at any Post Office.

INCOME TAX ACT, 1952

The Income Tax Act, 1918 and all subsequent Income Tax Acts and Finance Acts up to and in-

cluding the Finance Act, 1951 (in so far as they relate to income tax) have been consolidated in the Income Tax Act, 1952. This Act came into force as from 6th April, 1952.

NOTES ON INCOME TAX ADMINISTRATION

Income Tax under Schedules A, B, D and E, is assessed by H.M. Inspector of Taxes. Where taxpayer is assessable under Schedules A and (or) B, these assessments will be made by H.M. Inspector for the district in which the land or property giving rise to the assessment is situated. Assessments under Schedule D (Profits of Trades and Professions) and under Schedule E are made by H.M. Inspector of Taxes for the district in which Trade, Profession or Employment is carried on, or from which Pension is paid. Other Schedule D income is assessable by H.M. Inspector for the district to which the taxpayer makes his individual return. This is called his Primary district and is determined by the main source of his earned income. Where taxpayer has no earned income his chief place of residence determines his Primary district. H.M. Inspector for this district decides, with the agreement of the taxpayer, against which assessment or assessments the Personal Allowances shall be given. Notices of Assessment are sent to taxpayer who should make a formal appeal against any assessment which he disputes direct to H.M. Inspector by whom the Notice was issued within the time limit for such appeals as stated on the notice. The reason for disputing the assessment must be stated on appeal. If the assessment cannot be agreed, the taxpayer may appeal to the General Commissioners (whose address will be supplied by H.M. Inspector) and an appeal may be made from their decision to the Supreme Court on points of law.

The tax on such assessments is demanded by and should be paid to the Collector of Taxes who receives the necessary instructions from H.M. Inspector of Taxes and is in no position to discuss the assessment.

Sur-tax is assessable by the Special Commissioners of Income Tax to whom returns for this purpose can be made; but this is unnecessary where a full return of all income is made to H.M. Inspector of Taxes. Procedure of appeal is the same as for Income Tax assessment.

PAYE.—Income Tax payable under Schedule E is deducted by employer, who accounts for it to the Collector of Taxes. The amount of tax deduction from each payment of salary, wage, pension, etc., is determined by reference to Tax Tables issued by H.M. Inspector of Taxes to employer, in conjunction with the taxpayer's Code Number. This Code Number is an interpretation of the taxpayer's Allowances and Reliefs. Notices of Coding are issued by H.M. Inspector of Taxes and they may take into account income assessable under other Schedules. Care should be taken to check Notice of Coding and advise H.M. Inspector of Taxes of any necessary amendment in order that no considerable over or under-deduction of income tax may take place. The tax deductions are on a cumulative basis and can be carried on by any number of employers should changes in employment take place during fiscal year. When leaving one employment a statement (Form P45) showing code number, remuneration, and tax deductions to date should be obtained from old employer and handed, in due course, to new employer. At the end of fiscal year employer should give employee a statement (Form P60) showing total remuneration and tax deductions for the year.

STANDARD RATES OF INCOME TAX

Standard Rates of Income Tax (since the passing of the Income Tax Act, 1842) —The Income Tax year from April 6 to the following April 5.

OTHER TAXES AND STAMP DUTIES

(ADMINISTERED BY THE BOARD OF INLAND REVENUE.)

NOTE.—(x) The instruments for which the use of adhesive postage stamps is "permitted" under the Stamp Act, 1891, include:—

Agreements liable to the duty of 6d.—s. 22. Bills of exchange (including cheques), for payment of money on demand—s. 34 (1). Policies of Insurance (not life or marine)—s. 99. Receipts—s. 101 (a).

(a) The Commissioners as a general rule allow deeds, etc., to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY:
Foreign sea policies, within 10 days of arrival in U.K.

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where wholly executed *abroad*, the period begins to reckon from the date of arrival here.

PENALTIES ENFORCEABLE ON STAMPING, IN ADDITION TO DUTY:—

Agreements under hand only. Attested copies or contracts: after 30 days from their first execution....	£ s. d.
Receipts, within 14 days after they have been given.....	10 0 0
Receipts, after 14 days, but within one month.....	5 0 0
Other instruments presented after the proper time (subject to special provisions in some cases).....	10 0 0

AGREEMENT for Lease, *see* LEASES.

AGREEMENT FOR SALE OF PROPERTY—charged with *ad val.* duty as if an actual conveyance on sale (*see post*, p. 1163) with certain exceptions, e.g. agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (*see* s. 59 (1), Stamp Act, 1891). If *ad val.* duty is paid on an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any *ad val.* duty and the Commissioners will upon application either place a denoting stamp on such conveyance or transfer or will transfer the *ad val.* duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the *ad val.* duty paid.

AGREEMENT, not otherwise charged with duty, under hand only.....

N.B.—The following agreements are exempt:—

(a) Where the value of the subject-matter is less than £5.

(b) For the hire of any labourer, artificer, manufacturer, or menial servant.

£ s. d.

(c) For the sale of any goods, wares, or merchandise (but hire purchase agreements, *post*, p. 1165, are not exempt).

Not otherwise charged with duty, under seal or with clause of registration.....

APPOINTMENT of a new trustee or in exercise of a power over property, not being by a will; also on retirement of trustee, although no new trustee be appointed.....

ASSIGNMENT:

By way of security—*see* Mortgage.
By way of sale—*see* Conveyance.
By way of gift—*see* Voluntary Disposition.

ASSURANCE—*see* Insurance Policies.

Exceeds £300 but does not exceed £3,500 for every £50 and any fraction of £50.....

Exceeds £3,500 but does not exceed £4,250 for every £50 and any fraction of £50.....

Exceeds £4,250, but does not exceed £5,000 for every £50 and any fraction of £50.....

Exceeds £5,000, for every £50 and any fraction of £50.....

If the consideration does not exceed £3,500 (or £4,250, or £5,000, as the case may be) the Conveyance or Transfer on Sale must contain a certificate of value certifying that the transaction does not form part of a larger transaction or a series of transactions in respect of which the amount or value or the aggregate amount or value of the consideration exceeds £3,500 (or £4,250 or £5,000 as the case may be).

If the Conveyance or Transfer on Sale does not contain the appropriate statement duty at the full rate of £1 for every £50 or fraction of £50 will be payable whatever the amount of the consideration.

CONVEYANCE OR TRANSFER of any other kind..... fixed duty

Included under this head are Transfers for nominal consideration within any of the following categories:—

(a) Transfers vesting the property in trustees on the appointment of a new trustee of a pre-existing trust, or on the retirement of a trustee.

(b) Transfers, where no beneficial interest in the property passes, (i) to a mere nominee of the transferor, (ii) from a mere nominee of the transferor, (iii) from one nominee to another nominee of the same beneficial owner.

(c) Transfers by way of security for a loan or re-transfer to the original transferor on repayment of a loan.

(d) Transfer to a residuary legatee

of stock, etc., forming part of the residue divisible under a will.

(e) Transfers to a beneficiary under a will of a specific legacy of stock, etc. (*Note*.—Transfers by executors in discharge, or partial discharge, of a pecuniary legacy (unless made under an express power of appropriation) are chargeable with *ad valorem* duty on the amount of the legacy so discharged.)

(f) Transfers of stock, etc., forming part of an intestate's estate to the person entitled to it.

(g) Transfers to a beneficiary under settlement on a distribution of the trust funds of stock, etc., forming the share or part of the share of those funds to which the beneficiary is entitled in accordance with the terms of the settlement.

(h) Transfers on the occasion of a marriage to trustees of stocks, etc., to be held on the terms of a settlement made in consideration of marriage.

(i) Transfers by the liquidator of a company of stocks, etc., forming part of the assets of the company to the persons who were shareholders, in satisfaction of their rights on a winding-up.

The evidence necessary to establish that a transfer is liable to the fixed duty of 10s. should take the form of a certificate setting forth the facts of the transaction. In cases falling within (b) or (c) such a certificate should be signed by (1) both transferor and transferee or (2) a member of a Stock Exchange or a solicitor acting for one or other of the parties or (3) an accredited representative of a bank; in the last case when the bank or its official nominee is a party to the transfer, the certificate, instead of setting out the facts, may be to the effect that "the transfer is excepted from Section 74 of the Finance (1909-10) Act, 1910." A certificate in other cases should be signed by a solicitor or other person (e.g. a bank acting as trustee or executor) having a full knowledge of the facts.

Registering Officers will in any case in which a Marking Officer's certificate has not been given require such evidence in order to satisfy themselves that a transfer stamped with the 10s. fixed duty is duly stamped.

COVENANT—For repayment of money, *see* MORTGAGE.

For original creation and sale of any annuity, *see* CONVEYANCE.

For an annuity (except on original creation and sale) or other periodical payments, *see* BOND.

and (as respects deaths on and after 30th July, 1954) to certain business assets, viz.: "industrial hereditaments" and "machinery or plant" (Finance Act, 1954, s. 28).

Gifts made by deceased during his life for public or charitable purposes are liable for duty, unless made more than twelve months before death; other gifts are liable for duty, unless made more than five years before death; gifts made in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts not exceeding £100 in value or amount (or in certain circumstances £500) also excepted.

Payment of Estate Duty may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Interest at 2 per cent. per annum is also payable on the Estate Duty on personality from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and 2 per cent. interest is charged on all unpaid instalments from twelve months after death.

FACULTY OR DISPENSATION:	£ s. d.
In England, in all cases.....	30 0 0
In Scotland or Ireland, in some cases £20, in others.....	25 0 0

- (1) Not exceeding 6 months, three times the amount which would be payable if the insurance were made upon a voyage;
- (2) Exceeding 6 months and not exceeding 12 months, six times the amount which would be payable if the insurance were made upon a voyage.

N.B.—No insurance can be made for a time exceeding 12 months, although a policy of such insurance for time may contain a continuation clause in which case an additional stamp duty of 6d. is payable (see s. 11, Finance Act, 1901).

- (3) A policy of insurance on baggage or personal or household effects only, if made or executed out of Great Britain, is exempt from stamp duty.

Penalty for fraud, or evasion of Sea

Policy duty..... 100 0 0

LEASES:—Lease or tack of any dwelling-house or part thereof for any definite term not exceeding a year at a rent not exceeding £40 per annum, *ad.*, but if there is a consideration other than rent, the duty is *ad.*; for any definite term less than a year of any furnished dwelling-house or apartments where the rent for such term exceeds £25, 5s., unless there is a consideration other than rent, or the average rate of rent exceeds £100 per annum, when the duty is 10s.; of any lands, tenements, etc., in consideration of any rent, according to the following table:—

Annual rent not exceeding	* Term not exceeding		Term exceeding 100 years
	35 years	100 years	
£	£ s. d.	£ s. d.	£ s. d.
5	0 1 0	0 12 0	1 4 0
10	0 2 0	1 4 0	2 8 0
15	0 3 0	1 16 0	3 12 0
20	0 4 0	2 8 0	4 16 0
25	0 5 0	3 0 0	6 0 0
50	0 10 0	6 0 0	12 0 0
75	0 15 0	9 0 0	18 0 0
100	1 0 0	12 0 0	24 0 0
Exceeding £100, for every £50 or fraction of £50	1 0 0	6 0 0	12 0 0

* If the term is indefinite the same duty is payable as if the term did not exceed 35 years. However, if the term does not exceed 35 years and the annual rent does not exceed £100, but there is a consideration other than rent, the duty is double that shown in the first column.

Agreement for lease not exceeding 35 years, same as actual lease.

Where a consideration other than rent is payable and duty is charged on that consideration at conveyance rates, the same graduation applies where the consideration does not exceed £5,000 as under Conveyance or Transfer on Sale (except stock or marketable securities), provided that any rent payable does not exceed £20 a year.

MINERAL RIGHTS DUTY.—This is payable in respect of minerals which are the subject of a mining lease, or which are being worked by the proprietor of the minerals. Duty is payable annually on the rental value of all rights to work minerals and of all mineral wayleaves. Rate, per 20s. of the rental value..... 0 1 0

 £5,000, for every £50 and fraction
 of £50..... 0 15 0

Exceeds £5,000, for every £50 and
 fraction of £50..... 1 0 0

The instrument must contain similar certificates of
 value as a Conveyance or Transfer on Sale
(ante, pp. 1163-4), with the substitution of the
 words "property conveyed or transferred"
 for the word "consideration."

N.B.—The instrument is not deemed to be duly
 stamped unless it has been adjudicated, *i.e.* the
 instrument has been lodged with the Com-
 missioner who will adjudicate the value of the
 property and the duty payable.

LOCAL TAXATION LICENCES

In England and Wales, Dog, Game and Gun Licences are administered by the respective County Councils
 and County Borough Councils and the proceeds retained by them. Licences are issued for the Councils
 by the Post Office.

DOGS of any kind (annually), Great £ s. d.
 Britain..... 0 7 6

Dogs under 6 months of age, and
 those kept solely for the purpose of
 tending sheep or cattle on a farm,
 or by shepherds, or by blind per-
 sons for their guidance, exempt
 from Duty.

GAME AND GUN LICENCES.—A licence is required
 by every person who hunts, shoots, or takes game,
 except persons (in Great Britain) taking woodcock
 and snipe with nets or springs; proprietors, or
 tenants, on enclosed land, killing rabbits; persons
 hunting deer, or hares, with hounds; owners or
 occupiers, or their servants, killing deer on their
 own enclosed land; beaters and others, not holding
 guns, attending holders of game licences. Occu-
 piers of enclosed land, or owners, having the right
 to kill game, may themselves kill hares, or authorize
 others to do so, without a licence, but such authority
 must be limited to one person at a time in any
 one parish, and must be registered with the clerk
 of the Justices of the Petty Sessional Division in
 which the land is situate. Even when the quarry
 is not what is legally known as "game," a "gun"
 licence is necessary. A game licence, however,
 covers a gun licence. Sailors, soldiers, airmen,
 territorial soldiers, or constables, on duty or at prac-
 tice, need not take out a gun licence, nor need

occupiers of land scaring birds or killing vermin
 on such land, or persons so acting under the orders
 of occupiers holding a licence. Unless, however,
 the occupier is himself licensed, he cannot authorize
 any unlicensed person to carry a gun. "Scaring"
 birds is not to be regarded as including killing of
 any birds, and "vermin" does not include rabbits.
 The rates of duty are as follows:—

GAME LICENCES, if taken out after 31st £ s. d.
 July and before 1st Nov., to expire

on 31st July following..... 3 0 0

After 31st July, to expire 31st Oct... 2 0 0

After 31st Oct., to expire 31st July.. 2 0 0

For a continuous period of 14 days.. 1 0 0

Gamekeeper's (Great Britain), to expire

31st July..... 2 0 0

Game-Dealer's Licence, to expire 1st

July, annually..... 2 0 0

GUN LICENCES (gun, air gun or pistol). 0 10 0

A *Firearm Certificate* (s/- for the first, 2/6

subsequently—renewable every 3 years) is also

necessary (with certain exceptions) for any person

in possession of a firearm, other than a smooth

bore gun with a barrel not less than 20 inches in

length, or an air weapon.

A person under 17 may not purchase or hire

and (with certain exceptions) a person under 14

may not have in his possession a firearm.

Firearm regulations are strictly enforced.

MECHANICALLY PROPELLED VEHICLES

Bicycles (other than electrically pro- £ s. d.
 pelled):

(a) If the cylinder capacity of the

engine does not exceed 150 cubic

centimetres..... 10 17 6

Licensing of Public Vehicles.

Public vehicles and also the persons concerned with driving and conducting them must be licensed. Vehicles are licensed by the Police Traffic area offices; licensing of personnel is effected by the authority in the area in which they live—not the area where the vehicle is to operate. Addresses of these authorities can be obtained from local Police Stations.

MOTOR DRIVER'S LICENCE, annually .. 0 5 0

Motor-cars and cycles must be registered with, and licences to drive obtained from, the respective Clerks of the County Councils or County Borough Councils.

BROADCAST RECEIVING LICENCES

Sound.—Broadcast Receiving Licences (excluding television) may be obtained at most Post Offices at a charge of £1.

Television.—Broadcast Receiving Licences (including television) are obtainable, price £3, at most Post Offices in England, Wales and Northern Ireland. In Scotland licences are obtainable at most Post Offices in areas conveniently situated for television reception. Elsewhere in the United Kingdom licences are only available at Head Post Offices. If application is made at any other office which conducts wireless licence business arrangements can be made for a licence to be issued at a Head Post Office and forwarded by post to the applicant. If the applicant holds an unexpired (£1) sound licence it should be surrendered when the television licence is applied for and the price of the television licence will be abated at the rate of 1s. 8d. for each month of the unexpired portion of the surrendered (£1) licence.

Blind Person's Free Licences.—Free broadcast receiving licences (excluding television) or tele-

vision licences at a concessionary fee of £2 may be obtained by blind persons who produce the required certificates of registration.

Licensing requirements.—One licence (which must be a television licence if a television set is used anywhere in the household) covers any number of sets in a single household; but lodgers, paying guests and occupiers of flats (even if not self-contained) count as separate householders and require separate licences. Licences are required both for self-contained sets and for loud speakers worked by wire extensions from main receiving sets outside the household concerned. Licences are also required by those using apparatus which is rented or hired. A separate licence is necessary for a wireless receiving set fitted in a motor-car.

Period of Validity.—An initial licence (either sound or television) is valid for twelve months from the first day of the month of issue. A renewal licence covers a period of twelve months from the date on which the previous licence expires.

POSTAL REGULATIONS OF GREAT BRITAIN AND NORTHERN IRELAND

For full conditions, exceptions, &c., see Post Office Guide, price 2s. 6d., Associated volumes are London Post Offices and Streets (1s. 6d.), Post Offices in the United Kingdom (3s. 6d.) and Postal Addresses (1s.).

CHIEF POSTAL SERVICES

LETTERS

Inland (U.K. and Irish Republic):—

Not exceeding 2 oz. 2½d.

British Commonwealth and Foreign:—

(a) *British Commonwealth, Territories under British Trusteeship, British Post Offices in Morocco and in the Persian Gulf; Burma, Egypt, Gaza and Khan Yunis, Israel, Jordan, Sudan (Republic of) and the U.S.A.*

Not exceeding 1 oz. 2½d.
For each further oz., or less 1d.

(b) *Elsewhere:—*

Not exceeding 1 oz. 4d.
For each further oz., or less 2½d.

WEIGHT LIMITS:—*Inland, none; Elsewhere, 4 lb.*
SIZE LIMITS: (A) If in roll form:—*Inland and elsewhere, length, 32 in.; length+twice diameter, 39 in.*
(B) Not in roll form:—(i) *Irish Republic, 24×18×18 in.;*
(ii) *United Kingdom, British Commonwealth, territories under British Trusteeship, British Post Offices at Tangier and in the Persian Gulf; Burma, Egypt, Israel and Jordan, 24×18×18 in.;* (iii) *Elsewhere, length+twice diameter, 39 in.;* (iv) *elsewhere must be at least 4×4 in.*

POST CARDS (p. 1173).

Inland, British Commonwealth and Foreign Countries in (a) above:—

Single 2d.
Reply paid (2d. stamp on each part) 4d.

Elsewhere abroad:—

Single 2½d.
Reply paid 5d.

PRINTED PAPERS, BOOKS (p. 1173).

Inland:—
Not exceeding 4 oz. 2d.
For each further 2 oz., or less 1d.

British Commonwealth and Foreign:—

For first 2 oz. 1½d.
For each further 2 oz., or less 1½d.

Exceptionally, newspapers, periodicals, books, pamphlets, maps and sheets of music which comply with the conditions shown in the Post Office Guide under *Printed Papers at Reduced Rates* may be sent abroad at the prepaid rate of 2d. for the first 2 ounces and 1½d. for each additional 2 ounces or fraction thereof.

LIMITS: Size, as for Letters (but Egypt, Gaza and Khan Yunis as under (A) and (B) above); **Cards (and envelopes)** must be at least 4×2½ in. **WEIGHT: Inland, 2 lb.** All destinations abroad, 6½ lb.; but a single printed volume up to 11 lb. may be sent abroad.

Unless stamped at least 2½d., printed papers posted after a prescribed hour are liable to be held over until next day.

MAGAZINE POST

Canada (incl. Newfoundland) and by direct steamship only:—

Not exceeding 6 oz. 2d.
Over 6 oz. to 1½ lb. 1½d.
Each further ½ lb. (up to 5 lb.) 1½d.
Size limit: 24×18×10 in.

COMMERCIAL PAPERS

British Commonwealth and Foreign only:—

Not exceeding 12 oz. 4d. (minimum charge)
Every further 2 oz., or less 1½d.

LIMITS: Size, as for Printed Papers; **Weight, Brit. Commonwealth, Territories under British Trusteeship, British Post Offices at Tangier and in the Persian Gulf; Burma, Israel and Jordan, 5 lb.; Elsewhere, 4 lb.**

NEWSPAPERS

(See also p. 1173).

Inland (Newspapers "Registered at G.P.O."):

Not exceeding 6 oz. per copy 2d.
Every further 6 oz., or less per copy 1d.
Limits: 2 lb. in weight; in size as Letters.

Inland (Papers whether "Registered at G.P.O." or not) and British Commonwealth and Foreign:—
As for Printed Papers.

SAMPLES (See also p. 1173).

Inland (not to Irish Republic):—

Not exceeding 4 oz. 2d.
Every additional 2 oz. or less 1d.

British Commonwealth and Foreign:—

Not exceeding 2 oz. 1½d.
For each further 2 oz. or less 1½d.

LIMITS: Inland: Size 24×18×18 in., weight 8 oz.; **Abroad: British Commonwealth, territories under British Trusteeship, British Post Offices at Tangier and in the Persian Gulf; Burma, Israel, Jordan and Sudan (Republic of) 24×12×12 in., 5 lb. Elsewhere: as for Letters A and B, 1 lb. If in form of roll, everywhere as for letters, A.**

SMALL PACKETS (See also p. 1173).

(British Commonwealth and Foreign—certain countries only)

Not exceeding 10 oz. 7½d. (minimum charge)
For each further 2 oz. or less 1½d.
LIMITS: Size, as for letters A and B; weight 2 lb.

INSURED BOXES (See also p. 1174).

(British Commonwealth and Foreign—certain countries only)

Not over 10 oz. 1s. 3d. (minimum charge)
For each further 2 oz. or less 3d.
Plus appropriate fee for insurance.
LIMITS: size, 12×8×4 in.; weight, 2 lb.

PARCELS

Should be marked "Parcel Post," and must be handed across the counter; postage must be prepaid by stamps, affixed by the sender. On Sundays parcels are not accepted or (except during Christmas) delivered. The name and address of sender should be inside or (not too prominent) on the outside of every parcel, and preferably at right angles to the name and address of the addressee.

A rural postman will accept any packets he can conveniently carry, except overseas parcels or overseas letters intended for insurance; but if on foot or cycle not more, without notice, than 15 lb. from one person. He may weigh parcels on request. Mail-drivers need not accept between regular stopping points.

Parcels to or from Irish Republic, Channel Is. or I. of Man are liable to customs duty: except in last case, the sender must declare contents when posting. Addressee must pay clearance fees (6d. or 1s. in the United Kingdom, 1s. or 2s. in the Irish Republic) if any duty be payable. Senders can undertake to pay customs charges of Irish Republic and some overseas countries (fee 6d., and a deposit).

Inland:—(Limit of size: length, 3 ft. 6 in.; length and girth combined, 6 ft.):—

(a) *Britain and Northern Ireland:—*

Not over 2 lb. 1s. 4d.	Not over 6 lb. 2s. 3d.
" " 3 lb. 1s. 6d.	" " 7 lb. 2s. 6d.
" " 4 lb. 1s. 9d.	" " 8 lb. 2s. 9d.
" " 5 lb. 2s. 0d.	" " 15 lb. 3s. 0d.

(b) *Irish Republic:—*

Not over 2 lb. 1s. 4d.	Not over 8 lb. 2s. 0d.
" " 5 lb. 1s. 10d.	" " 11 lb. 3s. 0d.
11 to 15 lb. (limit) 3s. 3d.	

H.M. Forces Abroad, and H.M. Ships Abroad (see also p. 1178).—

Not exceeding 3 lb.	11. 3d.
" " 7 lb.	25. 3d.
" " 11 lb.	35. 6d.
" " 22 lb. (limit)	55. 6d.

British Commonwealth and Foreign:—

Various (see pp. 1174-7). See P.O. Guide for mode of packing, prohibitions, &c.

GENERAL REGULATIONS

EXPORT RESTRICTIONS.—Under Board of Trade regulations many kinds of goods, including certain foodstuffs, may be sent abroad (including Irish Republic) only under the authority of an export licence. Enquiries in the matter should be addressed to the Controller, Export Licensing Branch, Board of Trade, Atlantic House, Holborn Viaduct, E.C.1.

Under the Defence (Finance) Regulations, senders of trade letter packets or parcels exceeding £250 in value to most foreign countries, including the U.S.A., and also to Canada (including Newfoundland), must furnish with the parcel a currency declaration (form C.D.3) which, together with explanatory notices, may be obtained from banks.

Senders of private gift packets or parcels exceeding £25 in value must furnish with the packet or parcel a currency declaration C.D.3(X) (or C.D.3 if the gift exceeds £250 in value).

PROHIBITED AND DUTIABLE ARTICLES.—Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters, and certain kinds of advertisement. To Channel Islands, and I. of Man dutiable articles must be sent in Parcels. Abroad generally they may be sent in Parcels, in Insured Boxes and Small Packets (to those countries which accept them) or (where the "Green Label" system applies) in Letters.

CERTIFICATE OF POSTING.—Given as a matter of course for registered and insured items. May also be obtained for ordinary parcels (no charge) and other unregistered packets (fee, 1d.).

UNPAID PACKETS, except Business Reply packets and redirected parcels, are charged double postage on delivery; **UNDERPAID PACKETS,** double the deficiency.

UNDELIVERABLE POSTAL PACKETS.—*Inland packets chargeable with a postage of 2½d. or more, undelivered, are returned to sender without charge, if his address is found either outside or inside. Packets without sender's address or any enclosure of importance are destroyed, except parcels, which, if not applied for, are generally disposed of after 3 months, or if perishable are dealt with as requisite. Packets chargeable with postage not exceeding 2d. are returned to sender only on payment of a second postage, and if name, address and request for return appear on outside; those without such request are disposed of. British packets undelivered abroad are returned to sender here on payment of charges due; printed papers of no value only if request for return appears outside in a language known in the country of destination. Magazine Post packets are charged with return postage, when return is requested. Parcels further incur other charges unless abandonment is requested at the time of posting.*

REPLY COUPONS, for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing the minimum letter postage rate from the country concerned to the U.K. Price (valid in all countries of the Universal Postal Union), 9d.; (valid within the Commonwealth and Irish Republic only), 3d. Sold at chief offices.

POSTE RESTANTE (solely for the accommodation of travellers, and for three months only in any one town).—A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 14 days unless longer (up to 3 months) is applied for. Letters at a seaport for an expected ship are kept 2 months; otherwise letters are kept for a week—or for 1 month if originating from abroad—at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

REDIRECTION.—(1) By agent of addressee: *Packets other than parcels and business reply may be reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and not tampered with, and if original addressee's name is unobscured. Parcels may be redirected free of charge, within the same time limits, only if the original and the corrected addresses are both within the same Town Delivery Area (or within the London Postal District). Registered packets, which must be taken to a Post Office, are re-registered free only up to day after delivery. (a) By the Post Office (not undertaken when other persons remain at the address). Requests for redirection of letters, &c., should be on printed forms, obtainable from the postmaster, and must be signed by the persons to whom the letters are to be addressed. Redirection is free for 3 months; thereafter for each different surname and each new address costs 5s. for 12 months, and 10s. for each subsequent year. Separate forms must be filled in for the forwarding of telegrams.*

(b) **REGISTRATION, INLAND.**—All kinds of postal packets intended for registration should be marked "Registered" in bottom left-hand corner, and must be handed to an officer of the Post Office, and a receipt taken. The packets must be made up in a reasonably strong cover appropriate to their contents. Parcels (or the string with which they are tied) and letters must be fastened with adhesive (if tape is used it must be transparent and each piece must be signed or distinctively marked), or sealed with wax, lead, &c. Minimum fee 1s. exclusive of postage. Advice of delivery, a further 3d. The latest time for registering is usually half an hour before the latest time for posting ordinary packets. Compulsory registration is applied to (a) any packet apparently meant for registration and wrongly posted (1s. less any prepaid excess postage); (b) packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, &c., in each case 10s. or more in value (1s.).

COMPENSATION, INLAND.—Subject to certain prescribed regulations which are fully set forth in the Post Office Guide, the Post Office pays compensation for (i) loss of or damage to registered letters and parcels, (ii) though not as a legal right, for loss of or damage to unregistered parcels and for unregistered packets conveyed by Express Messenger all the way. The onus of making up properly any packet sent by post and of packing adequately any article or articles enclosed therein lies on the sender, and the Post Office does not accept any responsibility for loss arising from faulty or inadequate packing. No compensation

is paid for consequential injury or damage arising in respect of anything sent by post. *Registered letters and parcels (including items sent to the Irish Republic):* The fees for registration are 1s. covering compensation up to £10; 1s. 1d., £20; and 1d. for each additional £20 up to the maximum of 2s. 8d. for £400. (No legal right to compensation exists in respect of registered letters and parcels sent to and from Irish Republic.) *Unregistered parcels and unregistered packets conveyed by Express Messenger all the way:* Maximum compensation £5 (£4 for unregistered parcels sent to or received from Irish Republic).

Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by *registered letter post* in one of the special envelopes sold officially (see p. 1173) and, in the case of paper money, if particulars (for identification) are kept; the maximum compensation for coin, which must be packed so as not to move about, is £5. Compensation for eggs, fish, poultry, game and rabbits, meat, fruit and vegetables is paid only if sent by *parcel post*; and for fragile articles only if they have been adequately packed and the cover is conspicuously marked "Fragile, with care." No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic whether registered or not.

REGISTRATION, BRITISH COMMONWEALTH AND FOREIGN (except for parcels and a magazine post packet for Canada, including Newfoundland), is in force to all countries with the exception of Chagos Islands; the service to China (except Formosa (Taiwan)) is restricted to certain classes of correspondence. Valuable articles may not be sent in unregistered letters. Fee, 6d. If claimed within a year, compensation (in the U.K., £2 18s.) is paid to the sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union, subject to certain conditions.

INSURANCE, BRITISH COMMONWEALTH AND FOREIGN, may be effected on packets to many countries at the following rates:—8d. for £12; 2d. each further £12 up to 6s. 2d. for £400 (lower maxima in many countries). For *H.M. Ships abroad and also members of H.M. Army and Air Force overseas using closed Forces addresses* (e.g. British Forces Post Office followed by a number) only parcels are insurable, up to £50. Packets containing no articles (besides correspondence) but valuable papers (banknotes, &c.) or valuable documents (plans, &c.) can be insured as letters; other valuable articles should be sent as insured parcels, or as "insured boxes."

COMPENSATION up to a maximum of 93s. may be given for loss or damage in the U.K. to *uninsured* parcels to or from most Commonwealth and Foreign Countries, if certificate of posting is produced.

No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.

INSURED BOX POST.—Jewellery and precious articles (not letters or paper valuables) may be sent in insured boxes to certain countries. Customs declarations must be filled in.

CASH ON DELIVERY SERVICE, INLAND (not to or from Irish Republic, nor to H.M. Ships).—A sum (Trade Charge) up to £40 can, under certain conditions, be collected from addressee and remitted to sender of a parcel or registered letter posted at a Money Order Office, or of goods

consigned by railway. Fees (extra to usual postal or rail charges): For Trade Charge up to £1, 1s. 2d.; £2, 1s. 4d.; £5, 1s. 6d.; and for each further £5 or part thereof, 2d. An additional charge of 6d. is made on consignments sent by rail.

CASH ON DELIVERY, BRITISH COMMONWEALTH AND FOREIGN.—Applicable to parcels only, but not to all countries, nor to H.M. Naval and Military Forces and R.A.F. serving overseas. Fees for collection: 4½d. for Trade Charge (amount to be collected) not exceeding £1, with 2½d. extra for each additional £1 of Trade Charge up to the maximum, which is usually £40 (fee 8s. 6d.), but in some countries less. Addressee has also to pay on delivery, besides Customs, if any, a further fee (4d. in U.K.) not prepayable. If Trade Charge cannot be collected, the rules for undeliverable parcels apply.

EXPRESS AND SPECIAL SERVICES (INLAND).—In general the express services are limited to the hours of telegraph business, but the times vary according to the service used and local conditions. No. (4) (*below*) is available on Sundays only. Waiting fees: 10 minutes free, each further 10 minutes or less, 4d.;—(1) *All the way*, by P.O. messenger, of packets, conspicuously marked "Express" above the address, handed over the counter. Inclusive charge, 1s. per mile, or part of a mile, with 2½d. on each *separate* packet after the first. Live animals, liquids, and money may be delivered by this service. (2) *After transmission by post*, on addressee's application (1s. per mile, or part of a mile, and 2d. for every ten or less additional packets). (3) *After transmission by post*, at sender's request "Special Delivery" from the ordinary delivery office, if messengers are available (2s. + postage). Packets must be marked "Express," and letters bear a broad blue or black vertical line back and front. (4) See p. 1178. (5) ("*Railx.*") Postal packets not liable to registration are despatched by rail, met, and specially delivered in Britain, Douglas (I.O.M.), Northern Ireland, Jersey and Guernsey. Inclusive charges, 2 oz., 6s.; 1 lb. (maximum) 7s. 6d.; but packets from Jersey and Guernsey to Britain, Douglas or N. Ireland may not exceed 2 oz. (6) *A Railway Parcel* is similarly accelerated at the cost of a telegram, of railway charges, and of Service (1) at both ends of its journey.

RAILWAY LETTERS, &c.—A letter, not liable to registration, may be handed in at the parcel or booking office of a railway station, at any time when the station is open to the public, for conveyance by the next available train. A railway letter may either be addressed to be called for at a station, or to the residence of the addressee in which case it is posted at the station named in the address. The service is available between any two stations in Great Britain and Northern Ireland, between Great Britain and Jersey, Guernsey and Douglas (I.O.M.), and from Great Britain and Northern Ireland to the Irish Republic. It is not available at or to stations of the London Transport Executive. Fees (besides postage): at stations in Great Britain, Jersey, Guernsey and Douglas (I.O.M.), 2 oz., 11d.; 4 oz., 1s. 6d.; 1 lb. (maximum), 2s. 4d.; at stations in Northern Ireland, 2 oz. (maximum), 7d. The maximum weight for letters to the Irish Republic is 2 oz. Except on Sundays, or in Irish Republic, the letter can be delivered Express under Service (3), or directly from the station (Service (1)) by wiring for messenger to meet it. For other combinations of rail and express, see preceding paragraph, Services (5) and (6).

AIRWAY LETTERS.—On certain air routes operated by the British European Airways Cor-

poration, letters may be handed in at the airport or town terminal for conveyance by the next available direct air service to be transferred to the post at the distant town terminal or to be called for at the airport or town terminal. Fees (besides postage): 2 oz., 9d.; 4 oz., 1s. 3d.; 1 lb. (maximum), 1s. 11d. The conditions on which this service operates are, in general, similar to those applying to the Railway Letter Service. The service is not available to the Irish Republic. Full information can be obtained from any office of B.E.A.C.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence (including parcels) to or from certain countries. In some cases the service is restricted to certain towns. It is paid by the sender, the rest, if any, by addressee, according to the local regulations. (See P. O. Guide.)

POST CARDS.—Minimum size $4 \times 2\frac{1}{2}$ in., maximum $5\frac{1}{2} \times 4\frac{1}{2}$ in. The left-hand half of the address side may be used for correspondence, inland or abroad. Plain cards, if as stiff as official cards and not under $\frac{1}{16}$ th in. thick, may also be used both inland and abroad.

Reply Post Cards for abroad must have the heading *Carte Postale avec réponse payée* on first part, and on the second part (valid only to country of origin) *Carte Postale—Réponse*.

BUSINESS REPLY SERVICE (Inland, excluding Irish Republic). This service enables a person or firm to receive cards, letters, etc. from clients without prepayment of postage, the postage together with a fee of $\frac{1}{4}$ d. being paid by the addressee on each card or letter delivered.

A licence to use the service must be obtained from the Post Office.

PRINTED PAPER POST (including former BOOK POST).—For certain printed or written matter (p. 1170).

By this post may be sent books and other works of a literary character, with or without written dedications, and in the inland service any other written, typed or printed matter not being in the nature of a letter, drawings, paintings, photographic prints, engravings, maps, &c., together with normal non-fragile binding and anything necessary for safe transmission. Commercial printed forms, legal documents, printers' copy and proofs, examination papers, answers and corrections, the writing on which refers solely to the subject matter of the document, Christmas and picture cards with date, names and addresses of sender and addressee, and with conventional formulas not exceeding 7 words or initials, are also admitted, and circulars (if in characters resembling typewriting, only under special conditions). To overseas, only printed matter in general is admitted as Printed Papers; items written or drawn, such as receipts, invoices and statements of account, admissible in the inland printed post service, go only as Commercial Papers, and there are other differences. Written chess-moves and puzzle-solutions, also blank stationery are inadmissible. Printed papers being subject to examination in the post, the cover, if any, must be capable of easy removal and replacement for purposes of examination, i.e. without breaking, tearing, ungumming, or cutting. (For full conditions see the official Guide, or free leaflet P. 386 w.)

ARTICLES FOR THE BLIND (Inland, including Irish Republic). Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable of easy examination in the post. Rate:—1 lb., $\frac{1}{4}$ d.; 5 lb., 1d.; 8 lb., $\frac{1}{2}$ d.; 11 lb., 2d.; 15 lb., $\frac{1}{2}$ d. Limits: weight, 15 lb.; size, as for letters.

BLIND LITERATURE, COMMONWEALTH AND FOREIGN (in other respects treated as Printed Papers).—Papers, periodicals and books, if printed in special type and subject to certain conditions

of posting, marked outside "Blind Literature," with name and address of sender. Packets must be capable of easy examination in the post. They may be sent post free by surface route to all parts.

SAMPLE POST (not to Irish Republic).—Restricted to bona-fide Trade Samples, without saleable value; but one key, printers' blocks, fresh cut flowers, and certain scientific specimens can be sent abroad by Sample Post. Packets must be capable of easy examination in the post. (See p. 1170.)

SMALL PACKETS POST (Commonwealth & Foreign).—For small articles of merchandise by Printed Paper mails. Registration is allowed; not insurance. Available only to certain countries. A green Customs label must be affixed and, in certain cases, Customs declarations prepared. (See p. 1170.)

NEWSPAPER POST (INLAND).—For newspapers "registered at the G.P.O." (p. 1170).

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected. No writing or additional printing is permitted, other than the words "with compliments," name and address of sender, request for return if undelivered, and a reference to a page.

Newspapers not "registered at G.P.O." or supplements to registered newspapers apart from their ordinary publications should be sent at printed paper rate.

STAMPS, ENVELOPES, POST CARDS, &c.

Stamps of reigns before that of King George V are no longer valid.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties) are sold of the respective values of $\frac{1}{4}$ d., 1d., $\frac{1}{2}$ d., 2d., 3d., 4d., 5d., 6d., 7d., 8d., 9d., 10d., 11d., 1s., 1s. 3d., 1s. 6d., 2s. 6d., 5s., 10s., and £1. Books containing 6 $\frac{1}{4}$ d., 6 $\frac{1}{2}$ d., 3 1d. and 6 1d. stamps, 2s. 6d., or containing 18 $\frac{1}{4}$ d. stamps, 3s. 9d., or containing 12 $\frac{1}{2}$ d. and 6 each of 2d., $\frac{1}{2}$ d., 1d. and $\frac{1}{4}$ d. stamps, 5s. Rolls of $\frac{1}{4}$ d., 1d., $\frac{1}{2}$ d., 2d., $\frac{1}{2}$ d., 3d., or 4d. stamps are also sold, joined lengthwise or sideways and rolls of 6d. stamps joined lengthwise.

INLAND REGISTERED LETTER ENVELOPES with a 1s. $\frac{1}{2}$ d. embossed stamp (1s. for registration and $\frac{1}{2}$ d. for postage), are of four sizes: F. $5\frac{1}{2}$ in. \times $3\frac{1}{2}$ in. or G. $6\frac{1}{2}$ in. \times $3\frac{1}{2}$ in., 1s. 4d. each; H. 8 in. \times 5 in., 1s. 4d. each; K. $11\frac{1}{2}$ in. \times 6 in., 1s. 7d.

OVERSEAS REGISTERED ENVELOPES with a 6d. embossed stamp (for registration fee only) are in two sizes: G. $6\frac{1}{2}$ in. \times $3\frac{1}{2}$ in., 7 $\frac{1}{2}$ d. each; K. $11\frac{1}{2}$ in. \times 6 in., 10 $\frac{1}{2}$ d. each.

LETTER CARDS with $\frac{1}{4}$ d. stamp: 3d. each.

POST CARDS, with impressed $\frac{1}{4}$ d. stamp: $\frac{1}{4}$ d. each. Reply: double the Single figures.

EMBOSSSED ENVELOPES with $\frac{1}{4}$ d. stamp; "A" ($4\frac{1}{2}$ \times $3\frac{1}{2}$ in.) or "Commercial" ($5\frac{1}{2}$ \times $3\frac{1}{2}$ in.), 3d. each. Air Letter Forms impressed with 6d. stamp, 6d. each.

Embossed or impressed postage stamps cut out of envelopes, post cards, letter cards, air letter forms, newspaper-wrappers, or telegram forms, may be used as these stamps in payment of postage or telegrams provided they are not imperfect, mutilated, or defaced in any way.

MONEY ORDERS

Advice of Payment: 3d. inland (and to Irish Republic), 3d. for foreign and colonial orders (to certain countries). Payment may be stopped (see 6d.); or deferred up to 10 days in case of Ordinary Inland Money Orders. Inland orders (including those for Irish Republic) may be crossed for payment through a bank.

Inland Ordinary Money Orders (and to Irish Republic).

The poundage charged is, for sums not exceeding

£10, 1s. od.; and for each additional £10, 2d., to £50 (maximum), 1s. 8d. No order may contain a fractional part of 1d. The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of many Revenues (e.g., Income Tax) if demand note is produced.

Inland Telegraph Money Orders (and to Irish Republic).

Money may be transmitted by this means from all Money Order offices which despatch telegrams, and paid at most of those which also deliver telegrams, and at some other offices. On Sundays, Christmas Day and Good Friday, Inland telegraph money orders for amounts not exceeding £5 are issued at all Money Order Offices which transact telegraph business at the times when these offices are open for telegraph counter business and sums up to £5 are payable at, or in the delivery areas of, London Chief Office, the District Offices, and some Branch Offices in London, and all head and many of the more important other offices outside London.

Poundage at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of 3d., and cost of official Telegram of Advice, 3s. od. for Inland Orders and 3s. 6d. for Irish Republic Orders.

Ordinary Money Orders for Abroad.

Poundage, £1, 6d.; £2, 1s.; £3, 1s. 6d., and thereafter 3d. per £1 or part thereof. Limits of amount, £10, £20 or £40; validity, normally 12 months.

At present, not more than £10 per day per remitter can be sent to Canada or any other country outside the *Scheduled Territories* (formerly known as the Sterling Area), and then only when the purpose of the remittance is declared on a special form and permission has previously been granted by the Accountant General's Department G.P.O. (Postal Remittance Branch I).

Telegraph Money Orders for Abroad.

Only to certain countries, e.g., Australia, Canada, India, New Zealand, S. Africa, Egypt, U.S.A. Poundage as in last paragraph, plus cost of official Telegram of Advice (at Letter Telegram rate, if desired to certain countries) plus a supplementary fee. For restrictions, see the preceding paragraph.

POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and paid in most countries within the Commonwealth. Transmission of postal orders to Canada or any other country outside the *Scheduled Territories* (formerly known as the Sterling Area) is prohibited except to members of H.M. Forces under special arrangements, particulars of which may be obtained at any Post Office transacting Postal Order business. They are paid (but not issued) in Irish Republic. They are printed with a counterfoil, for every multiple of 6d. up to 5s., for 6s., and by 1s. steps up to 21s. then for 40s. Adhesive, unmarked current British Postage Stamps not exceeding two in number, if affixed in the 2 spaces provided, increase the value of an Order by not more than 5d. (orders up to 4s. 6d.) or 11d. (orders of 5s. and upwards). Poundage:

6d. and 1s., 11d.; 1s. 6d. to 5s., 2d.; 6s. to 21s., 3d., 40s., 6d. The name of payee must be inserted. If not presented within six months of the last day of the month of issue, Orders must be sent to the local Head Postmaster, or in London to the District Postmaster, for verification, and commission equal to the original poundage will be charged.

INLAND TELEGRAMS

Telegrams are accepted during counter business hours at any post office or railway station at which telegraph business is transacted. They may also be handed with the necessary payment to messengers delivering telegrams or express letters. Telegrams may be tendered by telephone at all times. Rate, 12 words or less 3s. od. (to Irish Republic 12 words or less 3s. 6d.), each further word 3d. Priority rate (not available to or from Irish Republic) 1s. extra. A redirection charge of 3s. od. per telegram is made if the original and new addresses are in the same place, delivery area or London Postal District. In all other cases the charge is at the ordinary inland rate. Telegrams handed in on *Sundays* and (exc. Scotland) *Good Friday* or *Christmas Day* are charged 1s. 6d. extra. Replies may be prepaid up to 12s.; the reply voucher may be used in payment or part payment of any Post Office telegram or any telegram or telephone account rendered by the Post Office, or its value refunded to sender of original telegram. Receipt for charges free on request. Certified copy 1s. 6d. sometimes more. There is no charge for delivery in the United Kingdom. In the Irish Republic delivery is free to addresses within 1 mile of the delivery office; beyond that the charge is 3d. per mile and is collected on delivery.

TELEGRAPH OFFICES ALWAYS OPEN IN LONDON:—Chief Office (King Edward Street), Leicester Sq., Charing Cross Road.

COMMONWEALTH AND FOREIGN TELEGRAMS

The charges for ordinary or FULL RATE telegrams from the United Kingdom to places abroad are shown below and on pp. 1175-7. The minimum charge for an ordinary telegram is as for 5 words. To any place in the British Commonwealth the full rate does not exceed 1s. 4d. per word. Urgent telegrams may be sent at double the ordinary rate.

For telegrams of a social character the GLT (Commonwealth Social Telegram) service is available to Commonwealth countries. The charge is 6s. 8d. for 11 words or less (including the indicator =GLT=), and 8d. for each word after 11 except to Canada, Cyprus, and the British West Indies to which lower charges apply.

Most countries admit Letter Telegrams at half the full rate but there is a minimum charge as for 22 words. Letter Telegrams, which must be written in plain language, are subject to delay in transmission in favour of ordinary telegrams.

Phototelegrams, i.e. pictures, photographs, drawings, plans, printed, typed or written documents may be telegraphed in Facsimile to many European and extra-European countries. Full particulars of all telegraph charges and services available to any country will be given on enquiry at any Postal Telegraph or Post Office Cable & Wireless Office.

RADIOTELEGRAMS

Radiotelegrams for transmission to ships at sea in any part of the world may be handed in at any Postal Telegraph Office or dictated over the telephone. The standard rate of charge for messages sent to ships through coast stations in the British Isles is *xs. 4d.* a word; there is a reduced rate of *qd.* a word for messages to ships regularly engaged on short voyages to or from ports in the British Isles. The address should contain (1) the name and/or rank of the addressee, (2) the name of the ship, and (3) either the name of a British coast station if the sender knows that the ship is within range of that station, or the word "Wireless".

Radiotelegrams may be sent to service personnel on board H.M. Ships in foreign waters at a charge of *10d.* a word and in the Home Fleet at a charge of *6½d.* a word. The address should contain (1) the name of the addressee and his rank or rating, (2) the word "Warship" (or "Submarine") (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio" (or, in the case of the Home Fleet, the words "Homewaters Admiraltyradio").

Radiotelegrams may also be sent to R.A.F. vessels at a reduced rate of *6½d.* per word. Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words R.A.F. Vessel before the name of the ship.

GENERAL SUNDAY AND HOLIDAY ARRANGEMENTS

On SUNDAY THROUGHOUT THE U.K. no Parcel Post, non-telegraphic Money Order, Postal Order business is transacted, nor is there a delivery of letters, &c., except by Express Service (4) below. There is a collection for night despatch in most places. IN LONDON, the Chief Office and Leicester Square Branch Office are open always, and 33 other offices are open from 9 a.m. to 1 p.m. for stamps, telephone, telegrams, and with some exceptions telegraphic money orders up to £5 and savings bank demand withdrawals up to £3. OUTSIDE LONDON all Head Offices and some country telegraph Sub-offices open 9-10.30 a.m. (Scotland 9-10 a.m.) for stamps, telegrams, registration and with some exceptions telegraphic money orders up to £5 and Savings Bank demand withdrawals up to £3; but all town Sub-offices, and most non-telegraph country offices, are closed.

EXPRESS SERVICE 4 ("Special Delivery on Sundays.") Two limited inter-city services, (a) for London, Belfast, Dublin and certain provincial cities (except that the service is not in operation from Southampton to Belfast or between Dublin and some of the provincial cities), (b) between Belfast and Cork, are available only: (1) Sundays: reciprocally between the cities in each group; (2) Good Friday: to London only from the others of good (d). Delivery is made from offices only during periods when they are open for telegraphic business. The handing-in offices in London are:—The London Chief Office, King Edward St., E.C.1., W. and S.W. District Offices, and (Branch Offices) Camberwell Green, Clapham Common, Hammersmith Broadway, Holloway, Leicester Square, Stratford, and Swiss Cottage. Packets, marked "Express: Sunday Delivery," must be handed in in time to catch preceding night mails (in London, Sat., 12 noon-3.30 p.m. for Belfast, 2.15 p.m.-7.0 p.m. for Dublin and 4.15 p.m.-6.30 p.m. for provincial cities in group (d)). Fee 1s. 6d., besides postage, covers delivery in any city (Dublin and Cork, not beyond the first mile). Not available for parcels.

CHRISTMAS DAY AND GOOD FRIDAY.—

London: One morning delivery of letters, parcels, &c., on Christmas Day; none on Good Friday except by Express Services 4 and 5. The same offices as on Sundays open from 9 a.m. to 1.0 p.m.

Outside London: In Scotland business is as usual on Good Friday; on Christmas Day some town sub-offices are shut, and after 1 p.m. many chief offices are open only for telegraph; there are one or two deliveries of letters, etc. In England, Wales and N. Ireland open as Sundays; one delivery of letters and parcels; no acceptance of parcels.

OTHER PUBLIC HOLIDAYS

London.—One morning delivery of letters and parcels, except on Boxing Day. On Bank Holidays, in addition to the London Chief Office and Leicester Square Branch Office which are open always, 43 offices open (9 to 1) (but Boxing Day, same as on Sundays) for all classes of business, but parcels are not despatched till next day.

Outside London.—In Scotland, chief offices open for a period in the morning for all business; telegrams delivered mostly as usual; one delivery of letters, &c. On New Year's Day offices open as on Sundays, and for the same business; no delivery of letters and parcels. In England, Wales and N. Ireland, one letter and parcel delivery (except on Boxing Day). Most non-telegraph country, and all town, sub-offices are closed. Generally head offices open 9 a.m. to noon, the main office in other towns and some country telegraph sub-offices 9 a.m. to 10.30 a.m., for most classes of business. On Boxing Day the hours are as on Christmas Day.

LETTERS AND PARCELS FOR MEMBERS OF H.M. ARMY OR AIR FORCE

MEMBERS STATIONED AT HOME.—While serving in Great Britain or Northern Ireland a unit will employ a "Place name" address.

Addresses must show: (a) Army or Air Force number (in the case of "other ranks" only); (b) rank; (c) name, (d) squadron, battery, company, or other section of the unit; (e) Army or Air Force Unit (including in the latter case the letters "R.A.F."); (f) correct postal address of the place at which the unit is stationed.

MEMBERS SERVING OVERSEAS.—Addresses must show (a) Army or Air Force Number (in the case of "other ranks" only); (b) rank; (c) name; (d) squadron, battery or company (or other section of the unit) or name or number of the R.A.F. unit, where this is allowed; (e) Army unit or the words Royal Air Force; (f) British Army of the Rhine.—British Army Post Office or British Forces Post Office, followed by the appropriate number. Where a Forces address has not been adopted, the name of the place and country of destination.

Rates of Postage to H.M. Armed Forces

(a) Members of H.M. Army and Air Force stationed at home and personnel of H.M. Ships believed to be in Home Waters (including the North Sea)—the ordinary inland rates of postage apply.

(b) Members of H.M. Army and Air Force serving overseas and personnel of H.M. Ships believed to be in Foreign Waters:—

Letters, 2½d. for the first ounce and 1d. for each additional ounce.

Postcards, 2d. each.

Printed Papers, including Newspapers, 1d. for first a oz. and ½d. each additional a oz.

Parcels, not exceeding: 3 lb., 1s. 3d.; 7 lb., 1s. 3d.; 11 lb., 3s. 6d.; 22 lb., 5s. 6d.

Particulars of the rates, including air mail, are in leaflet PL 89 obtainable at Post Offices.

INLAND TELEPHONES

Quarterly rentals for single exclusive lines for private-residence subscribers range from £2 5s. 0d. to £2 10s. 0d., and include, free, 62½d.-worth of local calls (*viz.* calls of 2½d. to 10d. value, up to 15 miles distance); if over 3 miles from the exchange, an extra 7s. 6d. a quarter is payable in respect of each furlong or part thereof beyond the 3 miles. Shared service, in which two subscribers use one line but enjoy nearly all the facilities of exclusive line service, is offered under certain conditions. For this service a rebate of 7s. 6d. is allowed from the normal quarterly rental for a single exclusive line. Trunk call charges (*viz.*, to exchanges over 15 miles away) vary with distance, but do not exceed 3s. 9d. by day (for 3 minutes) and 2s. 6d. from 6.0 p.m. to 10.30 p.m., (7s. 6d. and 3s. 3d. to Irish Republic.) Call Office charge 3d. extra. *Personal calls* (to specified person) 1s. 6d. extra (6 p.m. to 10.30 p.m. 9d.); if the required person cannot be found, nothing further is charged. For fuller information, see the Preface to the Telephone Directory.

TELEX SERVICE

Annual rental of teleprinter, associated equipment and line to Telex exchange is £160 per annum in most cases. Where nearest Telex exchange is more than 30 miles distant an additional rental based on the excess mileage applies. Charges for inland calls between exchanges 25 miles or more apart are about half equivalent charges for daytime telephone calls. International calls to European countries are about two-thirds of equivalent charges for telephone calls; to United States of America and to South Africa charges are the same as for telephone calls i.e. £1 per minute (minimum three minutes). Automatic equipment allowing messages to be sent at the maximum speed of 66 words per minute can be rented in addition. Descriptive booklet available from all Telephone Managers; for local address see telephone directory.

OVERSEAS TELEPHONES

The caller should ask for CONTINENTAL or INTERNATIONAL RADIO Service and give the name of the country and town required. Callers in London with Dial Telephones with letters should dial "CON" or "INT." The charges shown are minimum rates for a call of three minutes duration, each further minute or part thereof costing one-third of this charge.

A. Continental Services.

The rates quoted are for calls from all places in Great Britain, Northern Ireland the Isle of Man and the Channel Islands to the first zone of the country concerned. For *Personal Calls* an additional charge equivalent to one minute's conversation is made.

B. Overseas (Radio) Services.

Calls can be booked up to two days in advance. Minimum rates, the same from all parts of Great Britain, Northern Ireland, the Isle of Man and the Channel Islands are shown below. Hours of Service to most countries are limited. A *person to person call* may be booked without extra charge; if it fails (or call is cancelled) a *Report Charge* is made (4s. to 6s.) but not if call matures. Time allowance is made for interruption by adverse radio conditions and a *limited duration facility* (minimum 3 mins.) is available enabling connection to be terminated after a specified period of effective conversation. A *reduced rate* (10 p.m. to 10 a.m. on weekdays and all day on Sundays) is available on services with Canada (except Newfoundland), U.S.A., Cuba and Mexico. Reduced Sunday rates apply also in certain other services.

C. Ship's (Liners) Radio-Telephone Service.

Service is also available to certain British and foreign liners. Minimum charge to ships in Atlantic waters west of Cape Verde Islands, and in the Mediterranean Sea is 7s. 6d. beyond these limits it is 7s.

SHORT-RANGE TELEPHONE SERVICE WITH SMALL SHIPS

A short-range radiotelephone service is also available between telephone subscribers in Great Britain and Ireland, and suitably equipped trawlers, coasting vessels and other small ships.

The service is available continuously through the Cullercoats, Humber, Ilfracombe, Land's End, Niton, North Foreland, Oban, Portpatrick, Seaforth, Stonehaven and Wick Radio Stations and normally provides satisfactory communication over sea-ranges up to about 150 miles from these coast stations.

The inclusive charge for a call is 10s. 6d. for three minutes (minimum) and 3s. 6d. for each additional minute or part of a minute. Subscribers should book their call through their local telephone exchange, stating the name of the ship and, whenever possible, the name and telephone number of the coast station with which the ship is expected

to be in contact. Calls to ships cannot be accepted from telephone call boxes or from subscribers' telephones fitted with coin-collecting boxes.

The service is also available for calls to and from H.M. Ships in home waters (excluding H.M. Ships proceeding to and from foreign naval stations).

The conditions of service and charges are the same as those which apply to the service with small ships, but as H.M. Ships do not normally keep watch for radiotelephone calls from the shore, a subscriber should not attempt to book a call to one of H.M. Ships unless prior arrangements have been made with the person concerned on board ship. The subscriber must also state either the name of the coast station through which the call is to be set up, or the approximate position of the ship at the time the call is required.

WEIGHTS AND MEASURES

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

Apothecaries' Weight.

Measures of Weight.

- 20 grains = 1 scruple (℞).
- 3 scruples = 1 drachm (℥).
- 8 drachms = 1 ounce.

Measures of Capacity.

- 60 minims (min.) = 1 fluid drachm.
- 8 fluid drachms = 1 fluid ounce.
- 20 fluid ounces = 1 pint.
- 8 pints = 1 GALLON.

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy

ounce, of 480 grains. The Apothecaries' *drachm* is not the same as the Avoirdupois *drum*, and is spelled differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid *drachm* (54.6875 grains) is equal in weight to TWO Avoirdupois *drums*.

Approximate Equivalents:—

1 "table-spoon" = $\frac{1}{2}$ fluid oz.; 1 "dessert-spoon" = $\frac{1}{4}$ fluid oz.; 1 "tea-spoon" = $\frac{1}{8}$ fluid oz.

Avoirdupois Weight.

7000 grains (gr.) = 1 pound (lb.).

16 drams (dr.) = 1 ounce.

16 ounces = 1 POUND.

14 pounds = 1 stone.*

28 pounds = 1 quarter (of a cwt.).

100 pounds = 1 cental.

4 quarters (112 lb.) = 1 hundredweight (cwt.).

20 hundredweight (2,240 lb.) = 1 ton.

Troy Weight.

24 grains = 1 pennyweight (dwt.).

20 dwt. = 1 ounce.

For gold and silver the ounce, divided decimally, and not into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce = 480 Avoirdupois grains (31.1035 Grammes) in weight. There is no Troy POUND.

Jewellers' Weight.

The metric *carat* of 200 milligrammes is the legal standard of weight for precious stones and pearls.

Measures of Capacity.

4 gills = 1 pint.

2 pints = 1 quart.

4 quarts = 1 GALLON.

1 gallon = 277.274 cubic inches.

2 gallons = 1 peck.

8 gallons = 1 bushel.

2 bushels = 1 quarter.

A chaldron is 36 bushels = $\frac{1}{4}$ quarters.

Measures of Length.

12 inches (in.) = 1 foot (ft.).

3 feet = 1 yard (yd.).

5 feet = 1 fathom.

5½ yards = 1 pole.

22 yards = 1 chain = 100 links.

20 chains = 1 furlong.

8 furlongs = 1 mile = 1,760 yards.

3 miles = 1 league (obsolete).

Height of Horses: Hand = 4 inches. Span = 9 inches.

A Cricket Pitch is 22 yards (one chain) between the stumps.

A Lawn Tennis Court is 78 × 36 feet (double) and 78 × 27 feet (single).

A Croquet Lawn is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.

A Badminton Court is 44 × 20 ft., with net 30 ins. deep and 5 ft. high at centre.

A Polo Ground is 300 × 160 yds.

A Football Ground (Association) is 130 × 100 yds. (full size) and 120 × 80 yds. for international matches; (Rugby) 110 × 75 yds. (full size).

Square or Surface Measure.

144 sq. inches = 1 sq. foot.

9 sq. feet = 1 sq. yard.

30½ sq. yards = 1 perch, or rod, or pole.

40 perches = 1 rood.

4 roods = 1 acre.

10 square chains = 1 acre.

640 acres = 1 square mile.

Thermometer Comparisons.

Comparison between Scales of Fahrenheit Reaumur, and Centigrade.

27	80.6	21.6	48	54.4	39.2
26	78.8	20.8	49	56.2	40

NOTE.—The normal temperature of the human body is 98.4° F., or 37° C. (36.9° C.), or 99° F., or 37.2° C. (36.8° C.). Boiling point = 212° F. = 100° C. = 80° R. "Absolute Zero" is temperature reckoned from "Absolute Zero," which is at 273° C. below 0° F., and 273.15° below 0° C., and is denoted by the letter "K."

* The *smith's* stone of 8 lb. (for dead meat) was abolished in 1939.

Dimensions of an Acre.—The acre is 4,840 sq. yards, or 220×22 yards. The length of a side of a square acre is 69·57 yards; an area 110×22 yards (or 220×11 yards) would be *half an acre*; an area 55×22 yards (or 110×11 yards) would be *one quarter of an acre*, and so on.

Decimal Parts of an Acre.—The following note is appended to Ordnance Maps: "To convert Decimal Parts of an Acre into Roods and Perches, multiply by 4, this will give Roods and Decimals of a Rood, multiply this Decimal by 40, thus obtaining Perches and Decimals of a Perch."

Cubic Measure.

1,728 cubic inches = 1 cubic foot.

27 cubic feet = 1 cubic yard.

Angular or Circular Measure.

60 seconds (") = 1 minute (').

60 minutes = 1 degree (°).

30 degrees = 1 sign (of the Zodiac. See p. 164).

90 degrees = 1 right angle or quadrant.

12 signs (4 quadrants) = 1 circumference.

Diameter of circle × 3·1416 = circumference.

Diameter squared × ·7854 = area of circle.

Diameter squared × 3·1416 = surface of sphere.

Diameter cubed × ·5236 = solidity of sphere.

One degree of circumference × 57·3 = radius.*

Diameter of cylinder × 3·1416; product by length or height, gives the surface.

Diameter squared × ·7854; product by length or height, gives solid content.

* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = 57·3 degrees, nearly.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Water Measures.

Cubic inch..... = 252·458 grains.

Gallon (277·274 cu. in.)... = 10 lb. (distilled).

Cubic foot..... = 62·321 lb.

35·943 cubic ft. (24 gals.) = 1 ton.

Water for Ships: Tun, 210 gals. Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

An Inch of Rain on the surface of an acre (43,560 sq. feet) = 3,630 cubic feet = 100·992 tons.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186·963 gallons, weighing 16 cwt. 2 qrs. 21·6 lbs. in addition to its own weight.

Fuel and Power

British Thermal Unit (B. Th. U.) = The amount of heat required to raise 1 lb of water through 1 degree Fahrenheit at or near 39·1 degrees F.

Therm = 100,000 British Thermal Units.

Unit of electricity (kilowatt-hour) = Output of 1,000 watts for one hour.

Shipping

Gross tonnage.—The total volume of all the enclosed spaces of a vessel, the unit of measurement being a ton of 100 cubic feet.

Net tonnage.—The gross tonnage less certain deductions for crew space, engine room, water ballast and other spaces not used for passengers or cargo.

METRIC WEIGHTS AND MEASURES

See also "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights

and measures, the use of the Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1.—MEASURES OF LENGTH.

10 millimetres = 1 centimetre = 0·39370113 inch.

(mm.) (cm.)

10 centimetres = 1 decimetre = 3·9370113 inches.

(dm.)

10 decimetres = 1 METRE (m) = 1·0936143 yards.

10 metres = 1 dekametre = 10·936143 yards.

(dam.)

10 dekametres = 1 hectometre = 109·36143 yards.

(hm.)

10 hectometres = 1 kilometre = 0·62137 mile.

(km.)

A kilometre is approximately *five-eighths* of a mile, so that 8 kilometres (4·97082 miles) may be regarded as 5 miles.

2.—MEASURES OF SURFACE.

1 sq. centimetre = 0·15498 sq. inch.

1 sq. METRE = 10·76365 sq. feet = 1·19596 sq. yds.

1 are (a) = 0·0988 rood.

1 hectare (ha) = 2·4711 acres.

1 sq. kilometre = 0·38611 sq. mile.

3.—MEASURES OF CAPACITY.

1 centilitre (cl.) = 0·0704 gill.

1 decilitre (dl.) = 0·17598 pint.

1 LITRE (lit.) = 1·7598 pints = 0·88 Imp. quart =

0·22 Imp. gallon.

1 hectolitre (hl.) = 21·9975 Imp. gallons = 26·4171

U.S. gallons = 2·7497 Imp. bushels = 2·8377 U.S. bushels.

1 cubic metre = 35·31338 cu. ft. = 1·30794 cu. yds. (cbm. or m³.)

1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

4.—MEASURES OF WEIGHT.

1 centigram (cg.) = 0·15432 grains.

1 decigram (dg.) = 1·5432 grains.

1 gramme (gm.) = 15·4323 grains.

1 dekagram (dag.) = 5·6438 drams.

1 hectogram (hg.) = 3·5274 oz.

1 KILOGRAM kg. = 32·1507 oz. Troy = 35·2734 oz.

Avoirdupois = 2·2046223 lb. Avoirdupois.

1 myriagram = 22·046223 lb. Avoirdupois.

1 quintal (q.) = 220·46 lb. Avoirdupois = 2·2045

Centals = 1·9684 cwt.

1 tonne (t.) = 0·98421 long ton = 1·1023 short tons.

NOTES.

1 hectolitre..... = 2·75 bushels.

1 hectolitre per hectare = 1·11 bushels per acre.

1 quintal..... = 3·6743 bushels.

1 quintal per hectare... = 1·49 bushels per acre.

DOUBLE CONVERSION TABLES FOR WEIGHTS AND MEASURES.

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the case may be. Examples:—1 centimetre = 0.394 inch and 1 inch = 2.540 centimetres. 1 metre = 1.094 yards and 1 yard = 0.914 metre. 1 kilometre = 0.621 mile and 1 mile = 1.609 kilometres.

Centi- metres.	Inches.	Metres.	Yards.	Kilo- metres.	Miles.	Hectares.	Acres.	Square Kilometres.	Square Miles.

Demy Folio.....	= 17½ × 11½ "
Royal Folio.....	= 20 × 12½ "
Music.....	= 14 × 10½ "

NOTE.—Folio means a sheet folded in half, quarto folded into four, and so on; thus, a crown 8vo page is one-eighth the size of a crown sheet. Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or 10 reams per 1,000 copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

Sizes of Types

The type size chiefly used in "Whitaker" is 5½ point, or Ruby, set on a 6 point "body." The column contains 78 lines, and is 22 Pica ems wide; on an average every column contains about 3,100 letters, or 710 words.

Today type up to 14 point size is usually set by 1 keyboard machine, and mechanically cast in single letters or in complete lines of type (e.g. Monotype and Linotype). All type is cast to one uniform height ("type high"), which is 1½ inch. Individual letters vary in breadth, but the "body" of each character is of uniform depth throughout the alphabet in each size. The unit of breadth is the Pica M (Em) 6 of which, side by side, occupy one inch of space. The unit of depth is the Point (72 Points=1 inch), so that 6 lines of 12 Point occupy 1 inch in depth. The names of the various sizes are:—

Brilliant (3½ point). A column the size of this in "Whitaker," if set in Brilliant would contain 132 lines, and about 2,450 words.

Printing is the art of producing impressions from characters or figures.

Diamond (4½ point) is the next size; the column would contain 102 lines, and about 1,020 words.

Printing is the art of producing impressions from characters or figures.

CORRECTING FOR THE PRESS

Copyright by WILLIAM CLOWES & SONS, LTD., Printers of "WHITAKER'S ALMANACK."

The following extract is set up incorrectly in order to explain the conventional methods of correcting for the Press:—

¹o/ The process of printing, when compared with that of writing, is unquestionably a ~~dear~~ process; provided a ²cheap sufficient number of any particular book are printed, so as to render the proportion of the first expense upon a single copy inconsiderable. If, for example, it were required, even at the present ~~moment~~ time, to print a single copy, or even three ³copies or four, only of any production, the cost of printing would be greater than the cost of transcribing.)

¹⁰run on It is when hundreds and especially thousands, of the same work are demanded that the great value of the printing press in making knowledge cheap is particularly shown. [It is probable that the first printers did not take off more than two or three hundred, if so

¹⁴;/ many, of their works and, therefore, the earliest printed books must have been still dear, on account of the ¹⁵ital. limited number of their readers. CAXTON, as it appears by a passage in one of his books, was a ~~cautious~~ printer; and required something like an assurance that he should sell enough of any particular book to repay the cost of producing it. In his 'Legends of Saints,' he says, "I have subynsed (submitted) myself to translate into English the Saints of Legend," called 'Legenda aurea' in Latin; and William, Earl of Arundel, sent me a

HALL MARKS ON PLATE*

London (Goldsmiths' Hall) Date Marks

From 1438 to 1956.

ASSAY OFFICE MARKS.—Official marks stamped on gold and silver plate at Assay Offices in the United Kingdom until 1921 and thenceforward in Great Britain.

Assay Office ... Distinguishing Mark.
 London (Goldsmiths' Hall) Leopard's Head (uncrowned from 1300 to 1478-9, when it became crowned until 1821, since when it has been uncrowned). From 1697-1720 this mark was used in London, for gold only and not for silver.

Birmingham ... Anchor.
 Chester ... City Arms (3 Garbs and a Sword).
 Sheffield ... Crown.
 Edinburgh ... Castle. [Ring.
 Glasgow ... Tree, Salmon, Bell, Bird and
 Dublin ... Harp crowned.

The Assay Offices at Bristol, Exeter, Newcastle upon Tyne, Norwich and York have long been closed.

Makers' Mark (instituted in 1363).—This is impressed by the maker, and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker.

Date Mark (instituted in 1478-9).—The year in which the article is marked at the Assay Office is

Hall runs from May 20 to May 28. In 20-year cycles (London, invariably, Chester, alternately with 25, and Sheffield, alternately with 25), the letters J, V, W, X, Y, Z are omitted; in 25-year cycles (Birmingham, Edinburgh and Dublin, and alternately at Chester and Sheffield) the letter "j" is omitted from the alphabet; at Sheffield in the first two cycles, letters were used not alphabetically but arbitrarily, at Glasgow all the letters are employed in a 26-year cycle.

The Standard Mark (originally "The King's Mark.")—The "lion passant," for silver articles only, was first used in 1411, since (except during 1697-1720). From then, uncrowned.

The Sovereign's Head.—The portrait of the reigning Sovereign was impressed on all plate chargeable to duty assayed from 1784-1889-90. The duty on plate was removed in 1890, and the Sovereign's head does not appear on plate assayed before 1784 or after 1890.

The Crown.—On gold articles only, of the two higher standards (22 and 18 carats); on the lower standards (14 and 9 carats) the decimal (14.585 and 9.375). It is used on all silver articles in lieu of the lion passant.

Britannia.—A full-length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz. 10 dwt. of fine metal to each 10 dwt. of alloy) during a short period only, 1697-1720; since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia, with the lion's head erased and the date mark.

Sterling Silver.—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 11 oz. 2 dwt. of fine metal to each 18 dwt. of alloy.

Fine Gold.—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof.

* For the greater part of the material for this article readers of the ALMANACK are indebted to the late Mr. Wilfrid Cripps (author of "Old English Plate") by whose courtesy also many of the illustrations were provided.

	Lombardic, simple.....	1438-9 to 1457-8
	Lombardic, external cusps	1458-9 " 1477-8
	Lombardic, double cusps	1478-9 " 1497-8
	Black letter, small....	1498-9 " 1517-8
	Lombardic	1518-9 " 1537-8
	Roman and other capitals	1538-9 " 1557-8
	Black letter, small ...	1558-9 " 1577-8
	Roman letter, capitals	1578-9 " 1597-8
	Lombardic, external cusps	1598-9 " 1617-8
	Italic letter, small ...	1618-9 " 1637-8
	Court hand	1638-9 " 1657-8
	Black letter, capitals	1658-9 " 1677-8
	Black letter, small ..	1678-9 " 1696-7
	Court hand	1697 " 1715-6 (From March 1697 only.)
	Roman letter, capitals	1716-7 to 1735-6
	Roman letter, small	1736-7 " 1755-6

	Old English, capitals	1756-7 to 1775-6
	Roman letter, small...	1776-7 " 1795-6
	Roman letter, capitals	1796-7 " 1815-6
	Roman letter, small...	1816-7 " 1835-6
	Old English, capitals	1836-7 " 1855-6
	Old English, small ...	1856-7 " 1875-6
	Roman letter, capitals [A to M square shield N to Z as shown.]	1876-7 " 1895-6
	Roman letter, small...	1896-7 " 1915-6
	Black letter, small ...	1916-7 " 1935-6
	Roman letter, capital	1936-7 " 1955-6

An article marked with the letter F 1721-2 can be distinguished from letter F 1801-2 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head (which was "crowned" until 1821); and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from F 1881-2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1801-2); the absence of crown on leopard's head, and the presence of the Queen's *vice* the King's head.

Jubilee Mark on Silver, 1935.

In 1935 permission was granted to celebrate a National Event by a special mark on silver plate. The special mark was applicable to the year 1935; but for the convenience of the trade it was arranged that articles marked during the previous two years could also bear the mark, the marks, as shown above, being (1) Maker's initials, (2) Standard mark known as the "Town Mark," (3) Assay Office mark (Goldsmiths' Hall), (4) Date mark, and (5) Special Silver Jubilee mark.

Imported Plate.

Any gold or silver plate or article manufactured out of Great Britain and Northern Ireland and brought to be assayed, stamped or marked at a British Assay Office must be marked in the manner prescribed by the Order in Council of May 11, 1906, under which the mark for each Assay Office is ordained to be:—*London*, the sign of the Constellation Leo; *Birmingham*, Equilateral Triangle; *Chester*, Acorn and two leaves; *Sheffield*, the sign of the Constellation Libra; *Edinburgh*, St. Andrew's Cross; *Glasgow*, double block letter F inverted; *Dublin*, Boujet. For both gold and silver the decimal equivalent is used as the standard mark with thecarat in numerals with a decimal equivalent—e.g. 22.916 or 18.750. The annual date letter is to be added by the Assay Office, as for plate, etc., of home manufacture.

THE PERIODS OF ENGLISH ARCHITECTURE

Date	Style
I. Before 55 B.C.	Ancient British.
II. 55 B.C. to A.D. 420	Roman Period.
III. A.D. 449 to Norman Conquest (1066)	Anglo-Saxon.
IV. 1066-1189 (i.e. to end 12th cent.)	Norman.
V. 1189-1307 (i.e. 13th cent.)	Early English (Lancet, or Geometrical).
VI. 1307-1377 (i.e. 14th cent.)	Decorated (or Curvilinear).
VII. 1377-1485 (i.e. 15th cent.)	Perpendicular (or Rectilinear).
VIII. 1485-1558 (i.e. first half 16th cent.)	Tudor.
IX. A.D. 1558-1625. Early Renaissance	Elizabeth (A.D. 1558-1603). Jacobean (A.D. 1603-1625).
X. A.D. 1625-1830. Late Renaissance	Stuart (A.D. 1625-1702).
XI. Modern Architecture (The Age of Revivals) } 19th cent.	Queen Anne and Georgian (A.D. 1702-1830) William IV. (A.D. 1830-1837). Victoria (A.D. 1837-1901). Edward VII. (A.D. 1901-1910). George V. (A.D. 1910-1936). Edward VIII. (A.D. 1936).
XII. Recent Architecture. 20th cent.	George VI. (A.D. 1936-1954).

This Comparative Table (from "A History of Architecture," by the late Sir Banister Fletcher) shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced.

EQUIVALENT INVESTMENTS

Examples:—To ascertain the yield of Consols at a price of £83 6s. 8d. look in the column headed 3½ per cent. for 83½, and it will be seen that the yield (column headed Return Per Cent.) is £3 os. od. Similarly, shares paying a fixed dividend of 6 per cent., if purchased at £189, will yield £3 3s. 6d. per cent.; while 5 per cent. shares at £152 10s. od. yield £3 5s. 7d. per cent.

Return Per Cent.	1 p.c.	1½ p.c.	2 p.c.	2½ p.c.	3 p.c.	3½ p.c.	4 p.c.	4½ p.c.	5 p.c.	5½ p.c.	6 p.c.	7 p.c.	7½ p.c.
